 - · Strong moat. Impregnability
 - Sustainability
 - Key pivot of strong wealth creation

- Favorable Price-Value Gap
- Margin of safety

Consistently low volatility

ΛSK

We cater to investor's desire for a relatively stable investment approach very well

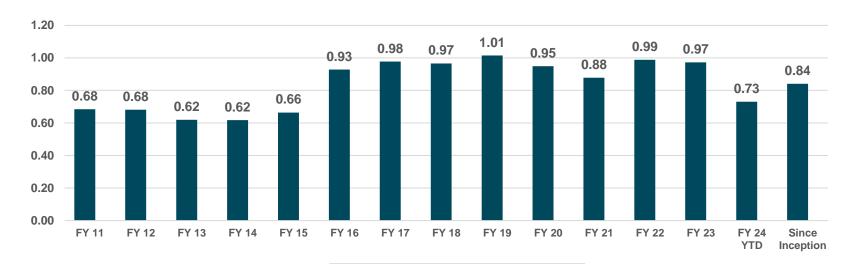

^{*} ASK IM endeavors to preserve the capital however equity investments are subject to market risks and may result in loss of capital

ASK Portfolio returns are composite returns of all the Portfolios aligned to the investment approach as on June 30th, 2023. Returns for individual client may differ depending on time of entry in the Portfolio. Past performance may or may not be sustained in future and should not be used as basis for comparison with other investments. Returns for 1 year or lesser time horizon are absolute returns, while more than 1 year are CAGR. Returns have been calculated using Time Weighted Rate of Return method (TWRR) as prescribed by the SEBI.

Consistently low volatility

Portfolio Beta has largely remained below 1 (12 out of 13 years)

Beta (Since Inception) 0.84 Vs BSE 500-TRI

ASK India Select has had a lower drawdown than BSE 500-TRI majority of the time

Risk Factors and Disclaimer

Risk arising from the investment objective, investment approach and asset allocation:

Equities as an asset class carry a higher risk in comparison to debt. While risk cannot be totally eliminated, it can be mitigated through a well-designed. Investment Approach. ASK Investment Managers Portfolios seek to mitigate risk and deliver superior returns through research-based investing. However, this objective may not be fully achieved due to various reasons such as unfavorable market movements, misjudgment by portfolio manager, adverse political or economic developments etc. The PMS is run with an objective to achieve reasonable returns consistently. Given this background the investor investing in the PMS faces the following risks

(i) Political, economic and / or related risks

The Asset Value of the portfolio and the liquidity of the shares may be affected by changes in government policy, taxation, interest rates, social and religious instability and political, economic or other developments in or affecting India.

(ii) Industry risk

The value of shares of companies in a particular industry may be affected due to factors affecting the industry like changes in government policy on duties, FDI or a foreign country, which is a big market for the industry, may impose restrictions on import etc.

(iii) The Indian Securities Market

The Indian stock markets in the past experienced substantial price volatility and no assurance can be given that such volatility will not occur in future. Actual market trend may be in variance with anticipated trends hence, the decisions of the Portfolio Manager may not be always profitable.

(iv) Liquidity Risk

Some stocks that the investor might be invested in might not be highly liquid. Though it will be the PMS service providers endeavour to restrict investments in less liquid stocks to a lower limit, there is an exposure of liquidity risk to the investor.
