ALCHEMY HIGH GROWTH SELECT STOCK

Investment Objective**

To generate long-term returns by investing in equities and equity related instruments, across all market capitalizations.

Combination of top-down & bottom-up stock picking and High Conviction

A demonstrable long-term track record of finding winners with a deep understanding of the businesses and the drivers of long-term sustainable performance in companies, which may then translate into long-term return performance.

Over diversification dilutes returns

A well-diversified portfolio is essential to capture a wide variety of businesses, too much diversification tends to dilute returns. A concentrated portfolio helps to focus more on individual stock performance and returns.

A differentiated strategy for UHNI, Family Offices & Large allocators

A slice of the capital allocated to a concentrated strategy makes eminent sense as the investors are already diversified, and a differentiated strategy can help generate differentiated returns.

*** The investment objective are indicative and there are no assurances that it will be achieved. Investors are advisable to take independent tax, legal, risk, financial and other professional advice.*

ALCHEMY HIGH GROWTH SELECT STOCK (AHGSS)* - PRODUCT HIGHLIGHTS

ALCHEMY CAPITAL MANAGEMENT

- Philosophy: The philosophy behind growth investing is based on the assumption that India is a high growth economy with a strong entrepreneurial culture. Our endeavor is to identify and invest in growth companies through a combination of top-down and bottom up fundamental research to enable long term wealth creation. A typical Portfolio may generally consist of between 8-14 stocks across sectors. We may construct such concentrated portfolios as per the clients need and understanding.
- Strategy**: Invest in companies across the market capitalization range, which have high growth potential and potential to deliver long-term capital appreciation.
- Fund Manager: Mr. Hiren Ved
- Description of types of securities: Equity | Investment horizon: 3 to 5 Years
- Risk associated with Product/Investment approach^^: High Risk
- Allocation of Portfolio across types of securities: Upto 100% in equity(cash portion may be deployed in liquid funds/ debt securities).
- Allocation across Market Cap: Since portfolio is concentrated, focus is more on stock selection than on market cap allocation.

**Inception Date: Dec 19, 2008*
*.** The investment objectives, strategy and allocation are indicative and there are no assurances that it will be achieved. Investors are advised to take independent tax, legal, risk, financial and other professional advice.*

ALCHEMY HIGH GROWTH SELECT STOCK – PRODUCT HIGHLIGHTS

- **Basis of selection of types of securities as part of the Product/Investment Approach:**

1. Relevant Universe: We have identified a relevant universe of about 500 companies based on market capitalisation (above 1,000 crores preferably), qualitative governance filters, long term attractiveness and ROE profile of business amongst other parameters.
2. Investible Universe: From this relevant universe, an investible universe of companies is created based on assessment of past and future fundamental variables like revenue and EBIDTA growth, cash flow conversion efficiency and core ROE of the business amongst several other relevant variables which may be unique to a business. In addition to objective fundamental parameters and assessment of qualitative management capabilities, governance standards and competitive ability of the business is also carried out. A comprehensive valuation exercise is also carried out based on one and/or combination of valuation parameters like P/E, P/B, EV/EBIDTA, DCF etc to arrive at an acceptable valuation range for investing in the security.
3. Portfolio Construction: The Portfolio Manager managing the strategy is then free to construct the Clients Portfolio from within the investible universe at its discretion.

- **Benchmark:** S&P BSE 500 TRI *
- **Basis for choice of benchmark:** S&P BSE 500 index serves as a comprehensive representation of the Indian economy,. The index comprises of the top 500 companies listed on the Bombay Stock Exchange, with selection based on a combination of average float-adjusted market capitalization, average value traded, and average total market capitalization. Hence, we believe S&P BSE 500 the appropriate benchmark which would reflect the realistic comparison with the Portfolio performance.

**To meet regulatory requirements, we have changed benchmark of the product from S&P 500 to S&P BSE 500 TRI, effective 1 Apr 2023*

OUR INVESTMENT POLICY

- We believe that consistent and superior long term absolute returns can be made across market cycles by investing in growth companies with good management teams.

- We like businesses which address large and growing external opportunities, have a competitive advantage in effectively exploiting those opportunities and have a scalable business model with higher-than-average Return on Capital Employed (ROCE) over the investment horizon.

- We believe that management teams are key to business success. We look for managements which have aggression, are aligned to business outcomes while simultaneously having respect for governance and capital allocation.

- While growth companies form the core of our portfolio, we also tactically invest in deep value opportunities and special situations that may appear due to and during market cycles.

Performance Tracking,
Contribution Analysis,
Outlier Management and decisions
Exception Reporting and Priority Actions

Major topics discussed in the Investment Committee meet

Macro View	The investment team presents their view on the changes in macro & micro variables and what can be expected in future.
Fund Performance	Performance of all funds/products is analyzed. Each fund manager has to present his portfolio positioning and the impact of change in macro and micro variables that have affected or may affect the portfolio in the future. In case of consistently underperforming positions, triggers of events are defined. If these triggers are not achieved, then relevant actions to be taken/already taken and discussed.
Risk Monitoring	An in-depth contribution analysis is presented to understand under-performers, out-performance and plan of action for the same.
