- ✓ Unifi is headquartered in Chennai with offices in Bangalore, Hyderabad, Mumbai, Kolkata and Delhi with a total team size of 111 professionals.

Investment Strategy

Blend Theme cherry picks
Investments from all 7 distinct
strategies managed by Unifi.

Distinctive Themes managed by Unifi

Spin Off: In a single corporate structure with multiple businesses, the sum of the value of the separate parts is often less than that of the whole. A de-merger of disparate businesses, unlocks the financial and management bandwidth required for the respective businesses to grow. Spin off strategy invests in situations that offer great scope for the businesses to realise their full growth potential and attract commensurate market valuation.

DVD: Few segments of the market tend to be mispriced in spite of visible growth prospects, resulting in such stocks trading at a deep discount to their intrinsic value. Reasons could vary from inadequate understanding of a business by most analysts, low relative market cap and liquidity or the lack of correlation to benchmark indices. DVD invests in such businesses and exploits market inefficiencies.

HoldCo: Many holding companies are run as group holding companies rather than strategic investment companies. This results in a perennial discount in their valuations but such discounts are not a constant. The Holdco strategy identifies strong underlying businesses and looks for massive valuation discounts that are likely to recover as promoters feel the heat of change in the regulatory landscape; meantime benefiting from value convergence in a rising market.

APJ 20: As always, markets fancy few sectors that have done well in the past ignoring the rest. Of the sectors which are less understood, few like specialist chemicals, agri, precision manufacturing have become globally competitive and are privy to an expanding market opportunity. APJ20 invests in firms that have evolved and are in a ripe position to benefit from such growth prospects.

Green Strategy: The investment focus of the green strategy is on companies which provide products and services that help in reducing the carbon footprint in the environment and/or result in more efficient use of natural resources. Within the context of this strategy, the sectors that have been identified for creating the portfolio are - emission control, energy efficiency, water management and waste management.

Insider Shadow Strategy: The theme invests in companies which have repurchased their own shares or where its promoters' have acquired additional shares at market prices. Such an action demonstrates their conviction on company's growth prospects or inherent value not captured in stock price at that point. The proposition is to gain from the eventual balancing of the value-price mismatch in the market.

BCAD: India is a USD 2.6 Trillion economy and will double to USD 5 Trillion in a decade from now. Supporting this massive scale are certain social, legal and tax changes that have powerful repercussions for various sectors. The unintended consequences of these changes are impacting the competitive ability and in some cases the very survival of unorganised businesses, thus leading to a disruptive shift favouring organised businesses.
