# ASK Indian Entrepreneur Portfolio

Public

Feb 2024

# Key Investment Objectives and Attributes

## Key investment objectives:

- Capital preservation\* over a period of time
- Capital appreciation over a period of time

- Size of pond v/s size of fish
- Dominance
- Resilience
- Liquidity

- Quantum
- Consistency
- Durability
- Predating (Early v/s Later)
- Compounding power

## Achieved through:

- Long-term investments in high-quality companies with strong growth prospects

- High quality of business (Superior RoCE)
- Strong moat. Impregnable
- Sustainability
- Key pivot of strong wealth creation

- Favorable Price-Value Gap
- Margin of safety

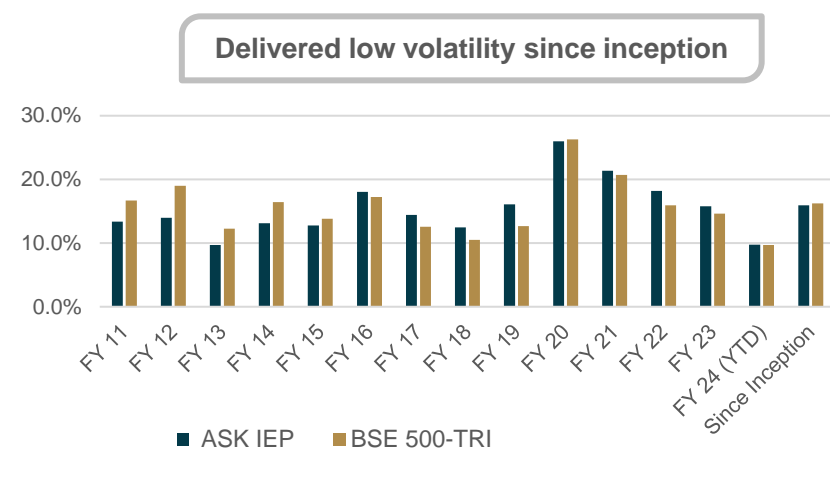

# Capital Preservation\*

## Consistently low volatility

We cater to investor's desire for a relatively stable investment approach very well

Sharpe ratio (since inception):  
0.59 v/s BSE 500-TRI : 0.36

Standard deviation (since inception):  
15.9% v/s BSE 500-TRI: 16.2%

Sharpe ratio measured as annualized mean of daily Portfolio returns over Risk Free Rate (RFR) divided by the annualized Portfolio Standard Deviation of daily returns. RFR assumed at 8% pa. Historical Volatility is computed based on standard deviation of daily returns.

\* ASK IM endeavors to preserve the capital however equity investments are subject to market risks and may result in loss of capital

ASK Portfolio returns are composite returns of all the Portfolios aligned to the investment approach as on Feb 29<sup>th</sup>, 2024. Returns for individual client may differ depending on time of entry in the Portfolio. Past performance may or may not be sustained in future and should not be used as basis for comparison with other investments. Returns for 1 year or lesser time horizon are absolute returns, while more than 1 year are CAGR. Returns have been calculated using Time Weighted Rate of Return method (TWRR) as prescribed by the SEBI. As per SEBI regulatory requirement, the benchmark for this investment approach is revised from BSE 500 to BSE 500-TRI w.e.f. 1 April 2023

# Capital Preservation\*

Consistently low volatility

# ASK Indian Entrepreneur Portfolio: The Investment Approach

- Identify **large** and **growing** business opportunities.
- Identify businesses with the competitive advantage that are **significantly sized** (min Rs.100cr of PBT)\*: Enables growth from both **market share gains** and **growth of the opportunity size** and can sustain for multiple years.
- The **quality of the business** should be good to be able to fund strong growth through internal cash generation
  - > We seek over 20% compounded growth from each business that we buy and target over 25%\* growth from the portfolio.
  - > To fund this growth, the business ROCE should be over 25%\* so that growth can be funded and there are surpluses for dividend.
- The management should have the drive and skin in the game to deliver **compounded growth** period after period (uncompromised corporate governance is a must)
  - > Hence, invest in businesses with an identifiable business house at the helm with a minimum 25% stake.\*\*
- We seek to identify such businesses **at a reasonable discount to value** and stay invested for a length of time and make money as EPS compounds.

# Risk Factors and Disclaimer

## **Risk arising from the investment objective, investment approach and asset allocation:**

Equities as an asset class carry a higher risk in comparison to debt. While risk cannot be totally eliminated, it can be mitigated through a well-designed Investment Approach. ASK Investment Managers Portfolios seek to mitigate risk and deliver superior returns through research-based investing. However, this objective may not be fully achieved due to various reasons such as unfavorable market movements, misjudgment by portfolio manager, adverse political or economic developments etc. The PMS is run with an objective to achieve reasonable returns consistently. Given this background the investor investing in the PMS faces the following risks

### (i) Political, economic and / or related risks

The Asset Value of the portfolio and the liquidity of the shares may be affected by changes in government policy, taxation, interest rates, social and religious instability and political, economic or other developments in or affecting India.

### (ii) Industry risk

The value of shares of companies in a particular industry may be affected due to factors affecting the industry like changes in government policy on duties, FDI or a foreign country, which is a big market for the industry, may impose restrictions on import etc.

### (iii) The Indian Securities Market

The Indian stock markets in the past experienced substantial price volatility and no assurance can be given that such volatility will not occur in future. Actual market trend may be in variance with anticipated trends hence, the decisions of the Portfolio Manager may not be always profitable.

### (iv) Liquidity Risk

Some stocks that the investor might be invested in might not be highly liquid. Though it will be the PMS service providers endeavour to restrict investments in less liquid stocks to a lower limit, there is an exposure of liquidity risk to the investor.
