

# Invesco India R.I.S.E Portfolio

(R.I.S.E: R- Recovery in Demand, I- Idle Capacity-potential for operating leverage, S- Superior Business Model, E- Earnings Recovery)

## Investment Objective

To generate capital appreciation by investing in equity and equity related securities.

## Investment Strategy

The portfolio will comprise of companies which will benefit from revival in economic growth and rise in consumer discretionary spending. The portfolio will favour companies that are expected to benefit from operating and financial leverage. Operating Leverage refers to companies' ability to make more operating profit from each additional sale as demand recovers. Financial Leverage refers to companies' ability to make more net profit from incremental operating profit. Portfolio will also participate in companies that are available at a discount to their fair/intrinsic value & offer attractive dividend yield. While screening for investment opportunities, the portfolio would prefer companies with superior business models & healthy balance sheets. The portfolio will follow a bottom-up stock selection approach and would aim to invest across market capitalization & sector. The portfolio would generally comprise of 10-25 stocks.

### Benchmark & Rationale

#### S&P BSE 500 TRI

S&P BSE 500 TRI benchmark includes the top 500 companies in the listed space in India and is a broad representation of the listed companies in India, across sectors and market capitalization range; an appropriate representative of the universe of stocks that the portfolio endeavors to invest in.

### Investment Horizon

The portfolio is suitable for investors seeking long term wealth creation by investing in equities with an investment horizon of 4 years and above.

### Risk Factors

The portfolio invests in companies which are expected to benefit from operating & financial leverage. The returns of the portfolio will be affected in case there is delay in recovery in demand, and hence operating and financial leverage do not materialize as anticipated. The balance sheet of the companies may deteriorate over the holding period. Also, adverse tactical asset allocation between equity & cash could affect the performance of the portfolio. This portfolio is recommended for investors with higher risk appetite seeking long term capital appreciation.
