Guar Seed

NCDEX Guarseed prices declined by 0.13% in the previous week. It recorded the high of Rs. 5587 and low of Rs. 5471 throughout the week. Key immediate support is held at Rs. 5300 level whereas significant resistance is placed at Rs. 5670. Preceding a downtrend, it is followed by a bullish gap indicating reversal in the medium term. Any sustenance above the crucial support of Rs. 5300 mark is likely to push the prices higher targeting 5670 level. The 14-period RSI on weekly chart is hovering around 50 indicating range bound movement. Buying on dips is suggested in this counter for the coming week.

Guar Gum

NCDEX Guargum prices declined by 0.18% in the previous week while touching the high of Rs. 11099 and low of Rs. 10692 level. Preceding a downtrend, it is followed by a bullish gap indicating reversal in the medium term. The 14-period RSI on weekly chart is hovering around 50 indicating range bound movement. Buying on dips is advised going forward with a view targeting 11450 on the higher side as long as prices are not breaking below Rs. 10200 mark on closing basis.

Turmeric

NCDEX Turmeric prices gained by 11.70% in the previous week. It dropped to a low of Rs. 18040 and a high of Rs. 20172 level. The vital immediate support is now seen at Rs. 19100 mark. However, the key immediate resistance is placed at Rs. 20800 level. The 14-period RSI has crossed above the mid-point of 50 mark on the weekly chart suggesting that momentum is strengthening towards upside. It is likely to consolidate with a sideways to positive bias going forward. The short term trend suggests buying on dips testing 20800 on the higher side as long as it is holding above 19100 mark.

Cocudaki

NCDEX COCUDAKL prices gained by 1.89% in the previous week while recording the low of Rs. 2688 and high of Rs. 2850 throughout the week. Major support is seen at Rs. 2600 level whereas resistance is placed at Rs. 2850 mark. The 14-period RSI has crossed above the mid-point of 50 mark on the weekly chart suggesting that momentum is strengthening towards upside. There might be gradual shift in the momentum towards upside thus buying on dips is suggested for this counter. It looks likely to test Rs. 2850 level on the higher side going forward, however any break below 2600 level on sustainable basis towards downside could negate our view.

Jeera

NCDEX JEERA prices gained by 5.57% in the previous week while recording high of Rs. 30465 and low of Rs. 28500 level. The critical support is noted at Rs. 26800 level however key immediate resistance is placed at Rs. 31000 mark. One can expect it to trade in a narrow range with the slight positive bias. The 14-period RSI has turned upwards from its oversold level of 30 on the weekly chart indicating momentum has started to pick up on the higher side. Buying on dips is suggested for the coming week.
