ALCHEMY HIGH GROWTH (AHG) - PRODUCT HIGHLIGHTS

- Basis of selection of types of securities as part of the Product/ Investment Approach:
- 1. Relevant Universe: We have identified a relevant universe of about 500 companies based on market capitalisation, qualitative governance filters, long term attractiveness and ROE profile of business amongst other parameters.
- 2. Investible Universe: From this relevant universe, an investible universe of companies is created based on assessment of past and future fundamental variables like revenue and EBIDTA growth, cash flow conversion efficiency and core ROE of the business amongst several other relevant variables which may be unique to a business. In addition to objective fundamental parameters and assessment of qualitative management capabilities, governance standards and competitive ability of the business is also carried out. A comprehensive valuation exercise is also carried out based on one and/or combination of valuation parameters like P/E, P/B, EV/EBIDTA, DCF etc to arrive at an acceptable valuation range for investing in the security.
- 3. Portfolio Construction: The Portfolio Manager managing the strategy is then free to construct the Clients Portfolio from within the investible universe at his discretion.
- Benchmark*: S&P BSE 500 TRI (effective April 1,2023)
- Basis for choice of benchmark: As per APMI Circular APMI/2022-23/02 dated March 23, 2023

OUR INVESTMENT PHILOSOPHY

- We believe that consistent and superior long term absolute returns can be made across market cycles by investing in growth companies with good management teams.
- We like businesses which address large and growing external opportunities, have a competitive advantage in effectively exploiting those opportunities and have a scalable business model with higher-than-average Return on Capital Employed (ROCE) over the investment horizon.
- We believe that management teams are key to business success. We look for managements which have aggression, are aligned to business outcomes while simultaneously having respect for governance and capital allocation.
- While growth companies form the core of our portfolio, we also tactically invest in deep value opportunities and special situations that may appear due to and during market cycles.
