## Larsen \& Toubro: Good start to the year

Strong growth in international markets drives revenue/PAT beat

* LT's 1QFY25 results were 3\% ahead of our estimates on both revenue and PAT. The company reported $15 \% / 15 \% / 12 \%$ YoY growth in revenue/EBITDA/PAT on a consolidated basis. In a seasonally weak quarter, core E\&C revenues and EBITDA also grew by $18 \% / 21 \%$ YoY, with Core E\&C margins improving by 10bp to 7.6\%.
* Both Core E\&C revenue and margin beat our estimates. Core E\&C revenue growth was largely driven by sharp improvement in overseas revenue, while domestic revenue was flat YoY due to elections, labor shortage and heat waves. Order inflows/order book were up by 8\%/19\% YoY, mainly driven by international geographies. NWC remained low at $13.9 \%$ of sales.
* We maintain our estimates and TP of INR4,150 based on SOTP, valuing core business at $30 \times \mathrm{P} / \mathrm{E}$ on Jun'26E EPS.

## Good start to the year

## Strong growth in international markets drives revenue/PAT beat

LT's 1QFY25 results were 3\% ahead of our estimates on both revenue and PAT. The company reported $15 \% / 15 \% / 12 \%$ YoY growth in revenue/EBITDA/PAT on a consolidated basis. In a seasonally weak quarter, core E\&C revenues and EBITDA also grew by $\mathbf{1 8 \% / 2 1 \%}$ YoY, with Core E\&C margins improving by 10bp to $7.6 \%$. Both Core E\&C revenue and margin beat our estimates. Core E\&C revenue growth was largely driven by sharp improvement in overseas revenue, while domestic revenue was flat YoY due to elections, labor shortage and heat waves. Order inflows/order book were up by $8 \% / 19 \%$ YoY, mainly driven by international geographies. The order prospect pipeline was down by $10 \%$ YoY at INR9.1t due to a drop in hydrocarbon prospects. NWC remained low at $\mathbf{1 3 . 9 \%}$ of sales. We maintain our estimates and TP of INR4,150 based on SOTP, valuing core business at 30x P/E on Jun'26E EPS and 25\% holding company discount for subsidiaries.

## Results better than our estimates

LT reported a better-than-expected core E\&C performance with revenue of INR386.2b (est. INR372.5b), up 18\% YoY. This was primarily led by a robust performance of the Infrastructure segment, which grew by a healthy $22 \% \mathrm{YoY}$ to INR269b. Similarly, Energy Projects revenue grew 27\% YoY to INR84.9b, led by strong execution of the order book. Core E\&C EBITDA margin came in at $7.6 \%$, largely in line with our estimate and up 10bp YoY. For the infrastructure segment, margin improved by ~70bp YoY to 5.8\%. Energy Projects margin contracted $\sim 40$ bp YoY to $8.7 \%$. Thus, core E\&C EBITDA grew by $21 \%$ YoY. NWC to sales improved YoY to $13.9 \%$ of sales and RoE improved to $14.7 \%$ of sales. Order inflow grew 8\% YoY to INR544.4b, driven by international geographies (+25\% YoY). Domestic orders declined 1\% YoY, due to general elections during the quarter. The order book remains robust at INR4.9t (+19\% YoY). On a consolidated basis, revenue grew $15 \%$ YoY to INR551.2b, while EBITDA rose $15 \%$ YoY to INR56.2b. Margin was flat YoY at 10.2\%, while PAT increased by $12 \%$ YoY to INR27.9b (3\% beat). For FY25, the management maintained the guidance of order inflow growth of $10 \%$, revenue growth of $15 \%$, NWC to sales of $15 \%$, and a margin of $8.25 \%$.

## We see possibility of revenue outperformance vs. guidance in FY25

LT's $1 Q$ revenue growth of $18 \%$ in a seasonally weak quarter was driven by a strong order book and sharp growth in international revenue. Domestic revenue growth was affected by elections and labor issues, and we expect it to revive sharply only during 2 HFY25. With strong international order inflows in FY24, we expect execution to remain strong. Hence, we see a possibility of LT's revenue growth outperforming its guidance of $15 \%$ for FY 25 despite a guidance of flat margins on a YoY basis.

## Prospect pipeline down 10\% YoY due to moderation in GCC prospects

LT's order book grew $19 \%$ YoY to INR4.9t (3x TTM revenue). The international segment now forms $38 \%$ of the overall order book. Within international, $92 \%$ comes from the Middle East. LT's prospect pipeline for the remaining nine months is down $10 \%$ YoY at INR9.1t, owing to a marginal increase in infrastructure prospects (at INR6.02t, up 3\% YoY) and a decline in hydrocarbon prospects (at INR2.2t, down 37\% YoY). Within the domestic infrastructure pipeline, the company is eyeing large-sized projects in water, urban transportation, bridges, B\&F, T\&D and renewables. LT expects a hit rate of $20-25 \%$ in the domestic prospect pipeline, which will drive growth in domestic order inflows.

## Eyeing growth from new areas

The company is eyeing opportunities in new areas such as offshore wind projects, where it has already made its foray with an order win of USD100m. It is also looking for opportunities in green hydrogen and nuclear projects construction. On domestic private capex, LT expects capex from traditional industries, state road projects, water projects and new-age projects from data centers, electronics manufacturing and semiconductor manufacturing. Though Saudi Aramco's oil-related capex may see a decline in coming years, LT is in active discussions with the client to target gasbased opportunities in overall capex. The Middle East region is already spending on renewable and hydrocarbon and the next leg of spending can come in railways and metro related orders where LT would keep targeting projects.

## Maintains its long-term target of $\mathbf{1 8 \%}$ RoE

LT's RoE stands at $14.7 \%$ and it has maintained its long-term target of $18 \%$ RoE. This RoE target can be achieved via 1) a reduction in losses from Hyderabad metro, which can add $1 \%$ to RoE; 2) improvement in margins, which can add $1 \%$; and 3) capital restructuring in terms of rewarding shareholders, which can add $1 \%$ to RoE.

## Valuation and view

We maintain our estimates and TP of INR4,150 based on SOTP, valuing core business at $30 x$ P/E on Jun'26E EPS and $25 \%$ holding company discount for subsidiaries. We reiterate our BUY rating on LT. Our multiple takes into account a strong prospect pipeline and improvements in NWC and RoE, despite margins being still far off from earlier highs.

## Key risks and concerns

A slowdown in order inflows, delays in the completion of mega and ultra-mega projects, a sharp rise in commodity prices, increase in working capital, and increased competition are a few downside risks to our estimates.

## High provisions drag earnings; elevated C/D ratio to suppress loan growth

## Asset quality deteriorates slightly

Axis Bank (AXSB) reported a net profit of INR60.3b (+4\% YoY; 6\% miss) in 1QFY25. The miss was due to higher provisions.

- NII grew 12\% YoY and 3\% QoQ to INR134.5b (in line). NIM moderated 1bp QoQ to $4.05 \%$, displaying continued resilience. Provisioning expenses were INR20.4b (sharply higher than MOFSLe), thus leading to the $6 \%$ miss at the PBT level.
- Loans grew $14 \%$ YoY ( $2 \%$ QoQ). Deposits grew $13 \%$ YoY ( $-1 \%$ QoQ), thus resulting in further increase in the C/D ratio to $92 \%$. CASA mix stood at 42\%.
- Fresh slippages came in at INR47.93b (vs. INR39.9b in 1QFY24). GNPA/NNPA ratios thus increased $11 \mathrm{bp} / 3 \mathrm{bp}$ QoQ to $1.54 \% / 0.34 \%$. PCR stood broadly stable at $78 \%$. About $55 \%$ of the rise in credit costs is attributed to lower recoveries in the corporate portfolio this quarter.
- We cut our earnings estimates by $5.6 \% / 7.8 \%$ in $\mathrm{FY} 25 / 26$, as we moderate our growth assumptions and build in higher credit costs. We thus estimate FY26E RoA/RoE of 1.7\%/16.2\%. Reiterate Neutral with a revised TP of INR1,175 (based on 1.7x FY26E ABV).

## Business growth muted; NIM moderates 1bp QoQ

- AXSB reported a net profit of INR60.3b (+4\% YoY; 6\% miss) in 1QFY25. The miss was due to higher provisions.
- NII grew $12 \%$ YoY and $3 \%$ QoQ to INR134.5b (in line). NIM moderates 1 bp QoQ to $4.05 \%$. Other income grew $14 \%$ YoY to INR57.8b. Treasury gains stood at INR4.06b (vs. INR10.2b in 4QFY24). Total revenue thus grew $13 \%$ YoY to INR192.3b (in line) during the quarter.
■ Opex grew 11\% YoY to INR91.3b (4\% beat). The C/I ratio stood at 47.5\%, while the cost-to-assets ratio improved to $2.5 \%$.
- PPoP thus grew $15 \%$ YoY to INR101.1b (in line). The bank suggested continuing investments in the business while maintaining the ability to tighten the overall opex run-rate.
- AXSB's loan book grew $14.2 \% \mathrm{YoY} / 1.6 \% \mathrm{QoQ}$, with retail/commercial loans being flat/up 4\% QoQ and SME loans growing at 20\% YoY/0.3\% QoQ.
Deposit growth was modest at $12.8 \%$ YoY/down 0.6\% QoQ. Retail TD dipped 0.9\% QoQ while non-retail TD grew 4.8\% QoQ. CASA mix moderated 100bp QoQ to 42\%. C/D ratio increased 194bp QoQ to 92.2\%.
- Fresh slippages came in at INR47.93b (INR39.9b in 1QFY24). GNPA / NNPA ratio thus increased by $11 \mathrm{bp} / 3 \mathrm{bp}$ QoQ to $1.54 \%$ and $0.34 \%$ respectively. PCR stood broadly stable at $78 \%$.
- Net credit costs came in higher at 97bp due to seasonality and lower recoveries \& upgrades and did not reflect the full-year credit costs owing to timing differences. About 55\% of the rise in credit costs is attributed to lower recoveries in the corporate portfolio this quarter. Excluding this timing difference, the effective credit costs would be 67bp. The restructured loans edged lower to $0.14 \%$ of net advances.

## Highlights from the management commentary

- The new investment guidelines had a net positive impact of INR12.19b, reducing RoE by 82 bp and RoA by 7bp. However, CET 1 improved 14bp.
- ECL provisions included INR50.12b in extra provisions, providing a cushion of 40bp over the reported capital ratio.
- In 1QFY25, the net credit costs did not reflect the full-year outlook due to timing differences. Approximately 55\% of the increase is attributed to lower recoveries in the corporate portfolio.
- Excluding this 55\% impact from timing differences, the effective credit costs would be 67bp. About $32 \%$ of gross slippages were linked accounts that were standard; as these slippages regularize, so would the linked provisions.

## Valuation and view

AXSB reported a mixed quarter, with higher provisions leading to the earnings miss, while margin witnessed a meager 1bp QoQ moderation. Asset quality deteriorated, with credit costs increasing sharply due to the timing difference and lower recoveries. Loan growth was driven by the corporate segment, while deposits saw a muted growth leading to an increase in the C/D ratio to $92.2 \%$. We will keenly monitor the near-term growth as an elevated C/D ratio will constrain credit growth, while continued re-pricing of deposits may keep margins under check. The bank has a healthy LCR of $120 \%$, as it maintains the industry-best outflow rates; however, the impact of a surge in non-retail deposits will need to be monitored over the coming quarters. We cut our earnings estimate by $5.6 \% / 7.8 \%$ in FY25/26, as we moderate our growth assumptions and build in higher credit costs. We thus estimate FY26E RoA/RoE of 1.7\%/16.2\%. Reiterate Neutral with a revised TP of INR1,175 (1.7x FY26E ABV).

## CMP: INR1,636 TP: INR1,900 (+16\%) Buy <br> Gross premium in line; VNB margin contracts to $\mathbf{2 6 . 8 \%}$

Focus on protection and non-par to improve margins in FY25E

- SBI Life Insurance (SBILIFE) reported a decent performance in 1QFY25. APE grew $20 \%$ YoY (in line) to INR36.4b, whereas absolute VNB grew $11.5 \%$ YoY (a marginal miss of 2.4\%) to INR9.7b during the quarter.
- Strong growth in ULIPs and a blip in protection sales led to a contraction in VNB margin for 1QFY25. VNB margin came in at $26.8 \%$ vs. $28.8 \%$ in 1QFY24 (our estimate at 27.5\%).
- We expect SBILIFE to deliver an 18\% CAGR in APE and VNB over FY24-26, while RoEV is likely to remain $\sim 20 \%$. We reiterate our BUY rating on the stock with a TP of INR1,900 (premised on 2.2x Mar'26E EV).

## ULIP's share in APE increases to 61\% in 1QFY25

- SBILIFE reported $15 \%$ YoY growth in gross premium to INR155.7b (in line), led by $16 \%$ growth in renewal premium.
- Total APE rose 20\% YoY (in line), within which, non-par and ULIPs grew $20.7 \%$ and $39.6 \%$, respectively. The total protection business, however, dipped $18.9 \%$ YoY, led by a $28.6 \%$ YoY decline in individual protection business. The Par/Annuity segments decreased $30.0 \% / 7.7 \%$, YoY.
- The total cost ratio for 1QFY25 was $10.5 \%$ vs. $10.8 \%$ in 1QFY24. The commission ratio was $4.4 \%$ vs. $4.0 \%$ in 1QFY24. The operating expense ratio was $6.1 \%$ vs. $6.8 \%$ in 1QFY24.
- For 1QFY25, the share of ULIPs in APE increased to $61.0 \%$ from $52.5 \%$ in 1QFY24. The share of protection business declined YoY to $8.2 \%$ in 1QFY25 from $12.2 \%$. On a YoY basis, the share of group protection and individual protection declined during the quarter.
- On the distribution front, the share of the banca and agency channels in total APE stood at $59.3 \%$ and $29.9 \%$, respectively.
- On a YoY basis, except for the $49^{\text {th }}$ Month (which declined 110bp YoY to $67.7 \%$ in 1QFY25), persistency improved across all cohorts.
- Shareholders' PAT jumped $36 \%$ YoY to INR5.2b (vs. our estimate of INR4.0b; registering a $30.5 \%$ beat).

## Highlights from the management commentary

- SBILIFE guided 18-20\% premium growth and ~28\% VNB margin for FY25.
- Lower VNB margin in 1QFY25 was due to: 1) a lower share of protection and 2) a reduced margin on non-par products due to timing differences between interest rate movement and IRR change.
- For reviving the protection segment, SBILIFE is working actively with SBI and, based on its customer data, will launch a protection product on the Yono app with: 1) pre-authorization, 2) simple product features, and 3) competitive pricing. Further, it plans to launch a new product in Aug' 24 for the HNI segment with higher sum assured. Higher non-medical limits are also being implemented.

## Valuation and view

SBILIFE reported a decent performance during the quarter, with APE and VNB in line with estimates (VNB margin contracted to $26.8 \%$ in 1QFY25). New product launches are likely to kick-start the recovery in the protection segment. Further, the impact of surrender charges is likely to be minimal. Considering the seasonality, the SBI channel is anticipated to see recovery in growth in 2Q and 3Q. SBILIFE continues to maintain its cost leadership. We expect SBILIFE to deliver an 18\% CAGR in APE/VNB over FY24-26, while RoEV is projected to remain ~20\%. We reiterate our BUY rating on the stock with a TP of INR1,900 (premised on 2.2x Mar'26E EV).

## CMP: INR972 TP: INR1200 (+23\%) Buy

## In-line revenue with a slight miss on margins; outlook bright

- Jindal Steel \& Power (JSP)'s 1QFY25 revenue stood in line at INR136b (YoY/ QoQ: $+8 \% /+1 \%)$, driven by decent volume growth. Sales volume came in at 2.09 mt (YoY/QoQ: $+14 \% /+4 \%$ ) vs. our est. of 2.02 mt . Production volume stood at 2.05 mt (YoY/QoQ: flat) in 1QFY25.
- EBITDA came in at INR28b (YoY/QoQ: $+8 \% /+16 \%$ ), $8 \%$ below our est. of INR31b led by higher-than-expected cost and weak realization. EBITDA/t was INR13,585 (YoY/QoQ: -5\%/+12\%) vs. our est. of INR15,195 in 1QFY25.
- APAT for the quarter stood at INR13b (YoY/QoQ: $-21 \% /+43 \%$ ) vs. our est. of INR14b. The share of exports reduced to 7\% in 1QFY25 vs. 11\% in 4QFY24.
- Net debt stood at INR104.6b at the end of Jun'24 (vs. INR112b at the end of Mar'24). Net debt-to-EBITDA stood at $1 x$ as of Jun'24 vs. 1.1x at Mar'24.

## Expansion status and update

- The BOF-II plant construction is delayed and is likely to be completed by Mar'25 (earlier 2QFY25). BOF-III, which will be in the same vicinity, should be commissioned by 3QFY26E.
- As of Jun'24, JSP spent ~INR175b of the INR310b of the announced capex plan. Management does not foresee any cost increase due to the delay in the expansion process. Going forward, JSP foresees incurring the remaining ~INR135b in the next three years (~INR75-100b each year) subject to better operating cash flows and balance sheet position.
- The company is targeting to increase the EC limit of Gare Palma IV/6 coal mine to 5MTPA by FY25-end from 4MTPA.
- JSP is in the last leg of EC limit approvals for Utkal B1 mines and expects the same in the next 2-3 months. Utkal B2 is under clearance and is likely to open in FY25.

## Highlights from the management commentary

- Based on current price trends, management expects coking coal costs to moderate by USD30-35/t in 2QFY25
- Iron ore costs to reduce by ~INR500-INR1000/t in 2QFY25
- Blended realization would see softening of $1 \%$ going forward, as the overall steel prices remain soft.
- Management targets to keep net debt/EBITDA below 1.5x.

## Valuation and view

- While 1Q EBITDA was marginally lower than our estimate, the outlook remains bright. JSP foresees coking coal/iron costs to be lower in 2QFY25, translating into a better margin despite softening NSR. The ongoing capex would lead to more value-added products, which would yield better profitability.
- We broadly retain our estimates and reiterate our BUY rating on JSP with a TP of INR1200, based on 7x FY26E EV/EBITDA. The stock is currently trading at $5.8 \times$ FY26E EV/EBITDA and $1.7 x$ FY26E P/B.

## Beat on EBITDA; retains double-digit growth guidance for FY25

- UNSP reported revenue growth of $8 \%$ YoY (in line) in 1QFY25. Prestige \& Above ( $P \& A$ ) segment clocked revenue growth of $10 \%$ YoY and volume growth of $5 \%$ YoY. The popular segment posted a decline of $3 \% / 5 \%$ YoY in value/volume.
- The premiumization trends in the liquor category continued to drive the P\&A portfolio. Pricing strategies also played a role in achieving better value growth. The proposed excise policy reform in Karnataka, which includes a duty reduction, will enhance demand trends and foster premiumization in the market. The company remains committed to driving double-digit growth in FY25, backed by better growth in 2HFY25.
- Gross margin expanded 90bp YoY to $44.5 \%$ (est. 43.2\%), led by mix and pricing. The company benefited from a 100bp reduction in overheads (trueup the provisions) and lower A\&P spending due to seasonality, which resulted in EBITDA margin expansion of 590bp QoQ/170bp YoY to 19.5\% (est. 17.5\%), a 23-quarter high margin. The management has guided that 1QFY25 margin was a one-off event and it will normalize in the coming quarters. We estimate 17\% EBITDA margin in FY25 (16\% in FY24), factoring in expectations of stable raw material inflation, steady product mix, and effective cost control.
- We value UNSP at 55x Jun'26E standalone EPS and include INR150/share for its RCB+ non-core assets to arrive at a TP of INR1,400. With the limited upside, we maintain our Neutral rating on the stock.

## In-line revenue; EBITDA beat estimate

- Volume growth in mid-single digit: Standalone net sales increased $8 \%$ YoY to INR23.5b (est. INR23.6b) in 1QFY25, with P\&A revenue growth of 10\% ( $90 \%$ revenue mix). Popular revenue declined $3 \%$ YoY as inflation continued to affect the price-sensitive segment. Volume growth stood at $3.5 \%$, with P\&A volume up $5.1 \%$ to 11.5 mn cases (est. 11.4 mn cases) and Popular volume down $5 \%$ to 2.2 mn cases (est. 2.4 mn cases).
- Operating leverage-led margin expansion: Gross margin was up 90bp YoY at 44.5\% (est. 43.2\%). Excluding a one-off benefit of INR130m due to a write-back in the 1QFY24, gross margin expanded 150bp YoY. As a percentage of sales, advertising costs rose 60bp YoY to $7 \%$, staff costs remained flat at 6\%, and other expenses were down 150bp YoY at $12 \%$. EBITDA margin was up 170bp YoY at 19.5\% (est. 17.5\%). Excluding the oneoffs in 1QFY24, EBITDA margin expanded 230bp YoY.
- Double-digit EBITDA growth: Employee and A\&P expenses were up by 7\% and 19\% YoY, respectively, while other expenses declined by $4 \%$ YoY. EBITDA grew 19\% YoY to INR4.6b (est. INR4.1b). Higher other income resulted in 25\% YoY growth in PBT and APAT to INR4.0b and INR3.0b, respectively (est. INR3.5b/INR2.6b).

RNING INDIA

## Highlights from the management commentary

- 1HFY25 is expected to see single-digit revenue growth, while 2 HFY 25 should witness revenue growth in double digits. The management expects to meet its double-digit growth guidance for FY25.
- The company approved investments in V9 Beverages Rise Up, the maker of sober non-alcoholic beverages, and Indie Brews and Spirits, the maker of coffee liqueurs, as part of its strategy to add premium Indian provenance craft brands.
- The price mix was $4.8 \%$, contributing to an overall portfolio NSV growth of $8.3 \%$ for the quarter. The company maintains that the price mix as a whole, the volume value delta, will stay in the range of about $6-8 \%$ on a full-year basis.
- ENA continues to experience inflation, while the rest of the commodity remains stable.
- The new policy in Karnataka suggests slab changes with a reduction in duty, which is a positive development. It will drive some premiumization, but the product will remain relatively expensive compared to other markets.

## Valuation and view

- With consistent improvements in gross and EBITDA margin, we increase our FY25/FY26 EPS estimates by 3\%/4\%. We model EBITDA margin of $17 \%$ for FY25E/FY26E (vs. 16\% in FY24).
- UNSP sold a large part of its popular portfolio to concentrate on its global strategy for the premium portfolio. The liquor industry is currently experiencing an upgrading trend, aligning well with UNSP's renewed emphasis on P\&A, which fits into the long-term liquor upgrading narrative in India.
- We value UNSP at $55 x$ Jun'26E standalone EPS and include INR150 per share for its RCB + non-core assets to arrive at a TP of INR1,400. With the limited upside, we maintain our Neutral rating on the stock.

## Chemical businesses mar operating performance

Operating performance in line.
SRF posted muted 1QFY25, with a material decline in operating profitability (EBIT down 20\% YoY), due to the continuing weakness in the Chemical businesses (EBIT dipped 33\% YoY), which offset the strong performance in the Packaging Film/Technical Textile businesses (EBIT grew $69 \% / 12 \%$ YoY).

- We maintain our FY25/FY26 EBITDA estimates. We value the stock on an SoTP-basis to arrive at our TP of INR2,130. Reiterate NEUTRAL.
Inventory rationalization/plant ramp ups hit chemical business margins
- SRF reported overall revenue of INR34.6b (est. of INR32.9b) in 1QFY25, up $\sim 4 \%$ YoY. EBITDA margin contracted 360bp YoY to $17.9 \%$ (est. of 19.7\%). EBITDA stood at INR6.2b (est. of INR6.5b), down $14 \%$ YoY. Adj. PAT declined $30 \%$ YoY to INR2.7b (est. of INR3.1b).
- Chemicals' revenue ( $43 \% / 63 \%$ of total sales/EBIT in 1QFY25) dropped $11 \%$ YoY to INR14.8b, while EBIT declined $33 \%$ YoY to INR3.1b. EBIT margin contracted $700 b p$ YoY to $20.7 \%$. The specialty chemicals business continued to face headwinds due to inventory rationalization by certain key customers, while the Fluorochemicals business was affected by low margins in the Chloromethane segment. However, the domestic refrigerant gasses business witnessed an improved performance in 1QFY25.
- Packaging Film's revenue ( $39 \% / 18 \%$ of total sales/EBIT in 1QFY25) grew $22 \%$ YoY to INR13.4b, while EBIT grew $69 \%$ YoY to INR868m. Margin expanded 180 bp YoY to $6.5 \%$. The BOPP films segment performed well while, the BOPET films segment continued to witness an oversupply situation.
- Technical Textiles' revenue ( $15 \% / 14 \%$ of total sales/EBIT in 1QFY25) grew $13 \%$ YoY to INR5.3b. EBIT grew $12 \%$ YoY to INR677m. EBIT margin contracted 20 bp YoY to $12.9 \%$. The segment performed well, led by healthy volumes in Nylon Tyre Cord Fabrics (NTCF) and Polyester Industrial Yarn (PIY).

## Highlights from the management commentary

- The Chemical business is likely to witness a revival in 2HFY25. Despite weak 10 , it is confident of achieving $\sim 20 \%$ revenue growth within chemicals business in FY25. FY25 margins to be plus or minus 2\% of FY24.
- Packaging business: The BOPET films segment continued to witness an oversupplied market. The business also had tough competition from the Chinese players in the Southeast Asian markets. Aluminum foil export sampling is under way, and production is expected to ramp-up from 2 HFY 25.
- Capex: SRF plans to incur a total capex of ~INR15-19b in FY25 (including INR6b towards the commissioning of three new fluoropolymer facilities).

## Valuation and view

- The chemicals business (fluorochemicals and specialty chemicals) is expected to achieve major improvement from 2HFY25 onwards. The packaging business is likely to remain under pressure in the medium term, while the technical textile business is likely to continue the current growth momentum.
- We maintain our FY25/FY26 EBITDA estimates. We value the stock on an SoTP basis to arrive at our TP of INR2,130. Reiterate NEUTRAL.

Neutral

## Adj. PAT in line; utilization may soften in 2Q

- Petronet LNG (PLNG) recorded lower-than-estimated EBITDA of INR13.7b in 1QFY25. Dahej utilization was up $13 \%$ QoQ at $112 \%$, while Kochi utilization stood at $22 \%$ (+1.6pp YoY). Reported PAT at INR11.4b was above our estimate. In 1Q, the company booked additional provisions worth INR1.3b with respect to use-or-pay (UoP) charges.
- The Dahej terminal expansion from 17.5 mmt to 22.5 mmt is expected to be completed by Mar'25, after which it will be available for use. However, till now, there has not been any material progress on signing anchor customers for the expanded capacity. The management highlighted that the 250 km stretch of the Kochi-Bangalore pipeline will be completed by Mar'25, after which Kochi terminal utilization should improve. In 2Q, utilization trends for Dahej/Kochi are expected to remain robust, though likely down QoQ.
- PAT, adjusted for one-off income (net basis) of INR1.9b, came in-line with our estimate. In 2 Q , utilization trends are expected to soften given weaker power demand and some spot LNG inflation (Asia JKM +11\% QoQ in Jul'24'TD vs 1QFY25 avg.). Going forward, the key catalysts will be 1) the commissioning of the expanded Dahej capacity, and 2) pipeline connectivity for the Kochi terminal. While the PDH-PP project and Gopalpur FSRU can support the future volume trajectory, we believe that economics of these projects are yet to be established and that they are longer-dated projects. As such, we maintain our Neutral rating with a TP of INR380.

## Beat on volumes led by robust utilization

- 1Q revenue came in $10 \%$ below our estimate at INR134.2b (+15\% YoY).
- EBITDA also came in $10 \%$ below our estimates at INR13.7b (+16\% YoY).
> In 1Q, inventory gains stood at INR2.65b, while trading gains stood at INR580m.
■ Other income stood at INR2.2b (est. INR1.2b, +49\% YoY). Resultant reported PAT was INR11.4b (est. INR10.3b, +45\% YoY).
> However, adjusted PAT came in line with our estimates at INR10b.
- Operational performance:
> Total volumes stood at 262 Tbtu (est. of $232.8 \mathrm{Tbtu},+14 \% \mathrm{YoY}$ ).
> Dahej utilization stood at $112 \%$ (+14pp YoY), above our estimate. Kochi utilization at $22.2 \%(+1.6 \mathrm{pp} \mathrm{YoY})$ came in line with our estimate.
- In 1QFY25, PLNG provisioned INR1.3b for UoP dues. Additionally, PLNG has waived off UoP charges of INR632m.
- As of Jun'24, provisions on UoP dues stood at INR4.9b.
> UoP dues of INR17.9b (net provision INR13b) are included in trade receivables as of Jun'24. The company has obtained bank guarantees from customers to recover UoP charges for FY22 and FY23. The customers have not given balance confirmations toward these dues. However, the management is confident of recovering such charges.

## Valuation and view

- PLNG's volume utilization improved substantially in 1QFY25 amid moderate spot LNG prices and robust demand. While we remain positive about volume growth, we believe ongoing uncertainty around UoP provisioning and rising competition will prevent further re-rating.
- We increase our FY25 estimates to account for a strong 1Q operational performance. Additionally, we raise FY26E volumes to account for the start of expanded capacity at Dahej, even though the company is yet to tie up with offtakers for new capacity.
■ We value PLNG at $12 x$ FY26E EPS to arrive at a TP of INR380. We reiterate our Neutral rating on the stock.

CMP: INR201 TP: INR230 (+14\%) Buy

## Steady quarter; asset quality remains stable

## Restructured book declines to ~0.8\%

- Federal Bank (FB) reported a $4 \%$ beat on PAT at INR10.1b fueled by controlled provisions and healthy other income.
- NII stood broadly in line, while NIM contracted 5bp QoQ to 3.16\%. Slippages inched up following a dip in 4QFY24, while income from PSLC, revaluation of investments, and recoveries from w-off accounts led to higher other income.
- Business growth was robust, with advances growing $20.3 \% \mathrm{YoY} / 5.4 \%$ QoQ, while deposits grew 19.6\% YoY/5.4\% QoQ. CASA mix dipped 11bp QoQ to 29.3\%.
■ Fresh slippages increased marginally to INR4.2b/0.8\% from INR3.5b/0.8\% in 4QFY24. GNPA/NNPA stood largely flat at $2.11 \% / 0.6 \%$, while the restructured book declined $\sim 14 b p$ QoQ to $0.8 \%$.
- We broadly maintain our estimates with an RoA/RoE of 1.3\%/14.5\% for FY26. We reiterate our BUY rating on the stock with a TP of INR230.
Business growth healthy; NIM contracts 5bp QoQ to 3.16\%
- FB reported an earnings beat of $4 \%$ at INR10.1b amid controlled provisions and healthy other income. NII stood broadly in line at INR22.9b (up 19.5\% YoY/ 4.4\% QoQ), while NIM contracted 5bp QoQ to 3.16\%. The bank expects NIM to be broadly at the same level over the next two quarters.
- Other income rose $25 \% \mathrm{YoY} / 21.4 \%$ QoQ to INR9.15b (11\% above est.) amid higher PSLC fees of INR9b (seasonal in 1Q), revaluation and MTM on investments at INR5b, and a recovery from the w-off pool to the tune of INR4b.
- Opex stood at INR17.1b (3\% higher than MOFSLe) mainly due to the increase in other opex, as FB maintains its guidance of continuous investments in the franchise. C/I ratio stood at $53.2 \%$, while the bank guided for achieving about 50\% C/I over the next 4-6 quarters, with income being the driver. Thus, PPoP increased 15.2\% YoY/ 35.2\% QoQ to INR15b (4\% higher than MOFSLe).
- On the business front, advances growth stood robust at 20\% YoY/5.4\% QoQ to INR2.2t, led by broad-based growth. Retail grew $3.8 \%$ QoQ, while SME rose $5.9 \%$ QoQ, and corporate growth was $5.7 \%$ QoQ. Deposits too grew at a faster rate at $19.6 \%$ YoY/ $5.4 \%$ QoQ amid healthy growth in CASA as well as TDs. The CASA ratio contracted marginally by 11bp QoQ to $29.3 \%$. FB has seen a revival in the NR deposit segment over the past two quarters.
- Fresh slippages inched up to INR4.24b/0.8\% from INR3.7b/0.8\% in 4QFY24, while GNPA/NNPA ratios stood broadly flat at $2.11 \% / 0.6 \%$. PCR stood healthy at 71.9\% in 1QFY25. Restructured book declined $\sim 14 \mathrm{bp}$ QoQ to $0.8 \%$.

## Highlights from the management commentary

- Credit costs were contained within 30bp, significantly lower than normalized levels. The expected range for credit costs is $30-35 \mathrm{bp}$, and credit quality should remain stable.
- NIM is likely to remain at the same level for the next two quarters.
- Recoveries from W-off accounts stood at INR400m; revaluation from investments stood at INR500m, and income from PSLC and dividends from the life insurance subsidiary stood at INR900m.

## Valuation and view: Reiterate BUY with a TP of INR230

Overall, FB reported a healthy quarter characterized by a slight earnings beat, robust business growth, and healthy asset quality. Other income was healthy, while opex inched up. Credit costs remained in check due to controlled slippages, and FB guided steady trends. NIM contracted 5bp QoQ, while management guided stable margin. We believe that FB is well placed among the mid-size private sector banks to deliver a healthy earnings trajectory aided by steady business growth and further improvement in operating leverage. We broadly maintain our earnings estimates and project FY26E RoA/RoE at 1.3\%/14.5\%. We reiterate our BUY rating on the stock with a TP of INR230 (premised on 1.5x FY26E ABV).

## CMP:INR687

TP: INR620 (-10\%)
Neutral

## In line; rising trend of EV mix in the business continues

## Takes an enabling resolution for a fundraise of up to INR24b

- SONA BLW Precision Forging (SONACOMS)'s 1QFY25 operating performance was in line on all fronts. The healthy revenue/PAT growth of $\sim 22 \% / 24 \% \mathrm{YoY}$, despite a weak environment, stems from its growth in the BEV segment along with an effective execution of the robust order book. The BEV segment now accounts for $33 \%$ of the revenue vs. ~29\% in FY24.
- SONACOMS' strong performance is evident in its attractive valuations of ~65x/52x FY25E/FY26E EPS, reflecting its robust EV order book and superior earnings and return profile. However, given the demand uncertainties in its key markets and limited potential for a re-rating, we reiterate our Neutral rating with a TP of INR620, premised on $\sim 45 x$ Jun'26E consol. EPS.
Robust growth in the BEV segment fuels a strong outperformance
- SONACOMS' consol. revenue/EBITDA/Adj. PAT rose ~22\%/24\%/24\% YoY to INR8.9b/INR2.5b/INR1.4b (in line vs. our est. of INR9.1b/ INR2.6b/INR1.5b).
- Revenue growth was largely driven by the BEV revenue growth of $\sim 53 \%$ YoY to INR2.8b, as it now constitutes ~33\% to the total revenue (vs. $\sim 29 \%$ in FY24). The sales of the light vehicle industry in its top-3 markets (North America, India, and Europe) grew just 3\% YoY during the quarter.
- The share of revenue from North America has increased to ~43\% in 1QFY25 vis-à-vis 40\% in FY24, while it declined to 23\% for Europe, down 300bp vis-à-vis FY24. The India revenue share remained flat YoY.
■ Gross margin came in better at 57.6\% (+70bp YoY/120bp QoQ; est. 56.3\%).
- This was partially offset by higher-than-expected other operating expenses, resulting in an EBITDA of INR2.5b, up $24 \%$ YoY (in line). EBITDA margin came in at $28.1 \%$ (+30bp YoY, $+10 b p$ QoQ) during the quarter.
- Adjusting for the ESOP impact of INR82m, the EBITDA margin would have been at $29 \%$. Its margins were also hit by higher freight costs during the quarter due to the Red Sea crisis.

## Highlights from the management commentary

- The Indian e-2Ws market continues to face challenges related to FAME and the subsequent fall of demand. It is also seeing some launch delays in e2Ws. Most of the e2Ws have come close to ICE price points; despite that the ramp-ups have been very slow, indicating structural demand issues. Given this, the company will focus more on e-3Ws, e-LCVs, and e-buses.
- Demand remains weak in the Europe LV and the US off-highway markets.
- The order book as of 1QFY25 stood at INR233b (vs. INR226b in 4QFY24), as it added INR11b orders during the quarter. The EV order book stood at INR184b and now contributes $\sim 79 \%$ to the total order backlog.
- The company has won new orders in:
> Sensors and Software business - The order was won for in-cabin sensors for a new electric passenger vehicle OEM in Asia. This has added INR1.5b to the order book, and SOP is from 3QFY27.
> Driveline - The order was won for the final drive differential, intermediate gears, input shaft, and park gear for Class 5 Electric CVs. This was for an existing customer based in North America, and this would add INR6.8b to the order book, and SOP is from 4QFY25.
- Fundraise- SONACOMS has passed an enabling resolution for the fundraise of upto INR24b. This has been announced to fund any strategic inorganic growth opportunities or partnerships that it may consider.

## Valuation and view

- Despite the volatile geopolitical scenario impacting different key geographies globally, SONACOMS reported a PAT growth of $24 \%$ YoY in 1QFY25, driven by healthy order execution and its focus on the growing EV segment. SONACOMS remains a good proxy play for the global electrification trend, with a $\sim 33 \%$ revenue mix from EVs and a ~79\% mix in the order book. Moreover, its focus on expanding the product portfolio, global scale, and customer base should translate into strong earnings growth and healthy capital efficiency.
■ However, valuations at $\sim 65 x / 52 x$ FY25E/FY26E consol. EPS largely factor in these positives. Reiterate Neutral with a TP of INR620 (based on ~45x Mar’26E consol. EPS).

## One-offs, higher opex drag down earnings

## Operating leverage to improve; re-iterates margin, growth guidance

- DCB Bank (DCBB) reported $3.5 \%$ YoY decline in PAT to INR1.3b (7\% miss) in 1QFY25, due to lower net interest income and higher opex.
- NII grew $5.5 \%$ YoY to INR4.97b ( $6 \%$ miss). NIMs moderated 23 bp QoQ to $3.39 \%$, affected by interest reversals (due to regulatory changes) and the replacement of penal interest with penal charges.
- Advances grew $19 \%$ YoY/3.1\% QoQ, supported by healthy growth in mortgages and gold loans. Deposits rose $20.2 \%$ YoY/4.7\% QoQ, led by growth in term deposits. CASA mix moderated 62bp QoQ to 25.4\%.
- Fresh slippages increased to INR3.72b (vs. INR3.22b in 4QFY24) due to higher slippages in mortgages. GNPA/NNPA ratios increased by 10bp/7bp QoQ to 3.33\%/1.18\%.
- We cut our earnings estimates by $4.3 \% / 3.8 \%$ for $\mathrm{FY} 25 / \mathrm{FY} 26$. We estimate FY26 RoA/RoE at 0.93\%/13.3\%. Reiterate Buy with a TP of INR175 (based on 1 x FY26E ABV).

Business growth healthy; one-offs dent NIMs by 23bp QoQ

- DCBB reported 3.5\% YoY growth in PAT to INR1.3b (7\% miss), hit by lower NII and higher opex. NIMs moderated 23bp QoQ to $3.39 \%$, affected by interest reversals (due to regulatory changes) and the replacement of penal interest with penal charges.
- NII thus grew $5.5 \%$ YoY to INR4.97b (6\% miss, down 2\% QoQ). Other income grew $33.7 \%$ YoY to INR1.4b ( $12 \%$ beat), resulting in $10.7 \%$ YoY growth in total revenues (in line). The management guides for an unchanged NIM outlook at 3.65\%-3.75\%.
- Opex increased $17.7 \%$ YoY ( $4 \%$ above MOFSLe) as the bank continued to invest in the business and increased the employee count. PPoP thus declined $1.6 \%$ YoY to INR2.05b. C/I ratio increased to 67.9\%. Provisions stood at INR284m (down 24.8\% YoY/up 18\% QoQ).
- Advances grew $19 \%$ YoY, supported by healthy growth in mortgages and gold loans. Business loan as $\%$ of mortgage stood at $50 \%$, but the bank expects to improve it going further to improve yields. Deposits rose 20.2\% YoY/4.7\% QoQ, led by growth in term deposits. CASA mix moderated 62bp QoQ to $25.4 \%$. CD ratio thus stood at $81.6 \%$ and the management aims to bring it below $80 \%$.
- Fresh slippages increased to INR3.72b (vs. INR3.22b in 4QFY24) due to higher slippages in mortgages. GNPA/NNPA ratios deteriorated 10bp/7bp QoQ to $3.33 \% / 1.18 \%$. PCR moderated 123 bp QoQ to $65.2 \%$. The restructured book stood at INR9.87b (2.3\% of loans).

## Highlights from the management commentary

- The management guided for RoA of $1 \%$ and RoE at $\sim 14 \%$ in the near term.
- NIM compression was a result of two components: 1) the bank is in the last leg of term deposit renewals, and 2) some regulatory changes in loans resulted in interest reversal, which was a one-time item and included replacement of penal interest with penal charges.
- The bank has also ensured that loan disbursal interests are accrued from the handover date and not necessarily from the disbursal date, so on an ongoing basis, NIM is expected to go up as the bank expects the one-off to get eliminated.

## Valuation and view

DCBB reported a mixed quarter as earnings came in below our estimate due to lower NII and higher opex and margin moderated 23bp QoQ due to a one-off event. However, the management expects NIMs to remain steady in the coming quarters as the asset mix improves in favor of high-yielding business loans and the bank focuses on SME overdrafts rather than smaller-tenor SME loans. Moreover, margin will also benefit from increased EBLR due to a shift in hybrid loans from fixed rates to floating rates. Loan growth was steady, led by healthy growth in mortgages and gold loans, while deposits too grew strongly. Fresh slippages increased, with asset quality ratios witnessing marginal deterioration. The restructured book was under control at $2.3 \%$ of loans. We cut our earnings estimates by $4.3 \% / 3.8 \%$ for FY25/FY26. We estimate FY26 RoA/RoE at $0.93 \% / 13.3 \%$. Reiterate Buy with a TP of INR175 (based on 1x FY26E ABV).

## CMP: INR12,030

## Disappointing quarter

- Hitachi Energy posted an extremely weak set of numbers in 1QFY25, as net profit came in significantly below our estimates due to a sharp contraction in margins.
■ Revenue grew 27.6\% YoY to INR13.3b (est. INR13.7b).
- EBITDA margin stood at 3.6\%, sharply lower than our estimate of 9\%. It was affected by higher raw material expenses. More clarity is expected in the analyst call.
- Order inflow for the quarter stood at INR24.4b, up 112\% YoY, and order backlog stood at INR85.4b. Orders came from renewables, distribution utilities, upgrade of digital solutions and service orders. Export orders for transformers, power quality technologies and other key products were booked from markets like Europe, the Middle East, Australia and neighboring countries in South Asia.
- The company remains optimistic about opportunities in energy transition as well as from high-growth segments such as renewables, HVDC, data centers, electrification of transport, etc. However, we believe that margin improvement is critical for valuations to sustain at the current levels. We have a Neutral rating on the stock. We will review our estimates after the concall.

## Beat on EBITDA and PAT due to stronger-thanexpected margin performance

- Total volumes were in line with our estimate at $8.63 \mathrm{mmscmd}(+5 \% \mathrm{YoY})$
> CNG volumes were at $6.45 \mathrm{mmscmd}(+5 \% \mathrm{YoY})$ and PNG volumes stood at $2.18 \mathrm{mmscmd}(+7 \% \mathrm{YoY})$.
- EBITDA/scm came in 11\% above our est. at INR7.4 (vs. our est. of INR6.7).
> Gross margin came in at INR13.2/scm (vs. INR14.4/scm in 1QFY24).
> Opex was INR5.8/scm (vs. INR8.6 in 1QFY24).
- The resultant EBITDA stood at INR5.8b (our est. of INR5.4b, -9\% YoY), primarily due to lower opex.
- PAT came in above our estimate at INR4.0b (est. of INR3.7b, $-8 \% \mathrm{YoY}$ ).
- During 1QFY25, IGL invested INR88m in IGL Genesis Technologies Limited, its $51 \%$ subsidiary.

## CMP:INR5313

## Higher RM costs dent operating performance

- Overall financials:
> Consol 1QFY25 revenues grew 11\% YoY to INR11.5b (est. INR11.2b). This was driven by $9 \% / 17 \% / 22.5 \%$ YoY growth in Auto powertrain/Alu products/industrial segments. DR Axion grew 3\% YoY.
> Gross margin declined 380bp YoY to 43.7\% (est. 46\%). EBITDA margin declined 350bp YoY (-160bp QoQ) to 17.1\% (est. 19.4\%).
> EBITDA declined $8 \%$ YoY to INR1.97b (est.INR2.2b).
> Higher interest costs led to a decline in adj. PAT by $29 \%$ YoY to INR532m (est. INR801m).
- Segmental performance:
> Revenue for Auto powertrain/Alu products /industrial grew 9\%/17\%/ 22.5\% YoY.
> PBIT margin for both auto powertrain and industrial declined 490bp YoY to $17 \% / 1.7 \%$, while that for Alu products grew 60 bp YoY to $13.2 \%$.
- DR Axion- 1QFY25 performance (derived)
> Revenue grew 3\% YoY to INR2.9b (est.INR3.2b).
> EBITDA margins declined 100bp YoY to 17.1\% (est.20.3\%). EBITDA declined 3\% YoY to INR494m (est.INR657m).
- Others:
> The company has decided to infuse INR600m in its German subsidiary to acquire assets of Fronberg Guss (company under liquidation) to expand its presence and operations in the European market, including Germany. It specializes in iron casting solutions across markets and customers.
- Valuation view: The stock trades at 30x/22x FY25E/FY26E EPS.

## In-line performance with respect to bookings

Achieves the highest ever quarterly collections

## Operational performance

- MLDL achieved bookings of INR10.2b, up $195 \%$ YoY (in line), driven by a strong response in the new projects in Pune and Bengaluru, which were launched towards the end of 4QFY24. These two projects generated ~INR7b of pre-sales.
Sales volume in 1QFY25 stood at 1.2 msf , up $179 \%$ YoY.
- The company achieved the highest ever quarterly collections of INR5.4b, up $96 \% / 31 \%$ YoY/QoQ. Blended realization for the quarter was up $6 \%$ YoY to ~INR8700 psf.
- In 1QFY25, MLDL acquired its third redevelopment project, located in Borivali (Mumbai); the project has a GDV of INR14b.
- Launches in the near term are expected to remain strong as the company has a pipeline of $\sim 6.5 \mathrm{msf}$ across its new and existing projects.
- In the IC segment, the company leased 19 acres for INRO.8b.

## Financial performance

- MLDL's revenue came in at INR1.9b, up $92 \%$ YoY, driven by 0.1 msf completion of the premium project Vicino. It reported an operating loss of INRO.4b. However, PAT came in at INR127m, aided by INR365m of contribution from the JV projects and the IC business.

Bookings surged $3 x$ YoY to INR10b
Sales (INRb) - Volume (msf)

In IC segment, MLDL achieved leasing of 19 acres
IC - Leased Area (Acres) $\quad$ Avg price per acre (INR m)

## CMP: INR438

## Miss on revenue; margins in line

Revenue up ~5\% YoY, while EBITDA declines ~1\% YoY

## P\&L highlights

- SIS' revenue grew 5\% YoY/flat QoQ at ~INR31.2b, below our est. of $+15 \%$ YoY.
- Revenue growth was aided by $\sim 8.8 \%$ YoY growth in India Security, whereas Facility Management/International Security posted a modest growth of 2.2\%/ 2.7\% YoY.
- EBITDA margin came in at 4.4\%, down 30bp YoY (vs. est. 5.0\%). Margin for India Security remained flat at 5.4\%, while the same for International Business contracted 60bp YoY.
- PBT stood at INR643m (down 19\% YoY), below our estimates of INR1,101m.
- Consolidated adj. PAT stood at INR642m (down 28\% YoY). On a standalone basis, SIS's current tax rate continues to be close to NIL due to the benefits accruing under Section 80JJAA of the Income Tax Act, 1961.
- Net debt mounted to INR10.2b from INR8.9b in 4QFY24. Net debt/EBITDA stood at $1.7 x$ vs. $1.5 x$ in 4QFY24.
- OCF/EBITDA conversion was weak at $-30.9 \%$ owing to the four-day increase in DSO days.

## Operational highlights

- Security Solutions - The India business had new wins of over INR320m of monthly revenue during the quarter with major contributions from the Manufacturing, BFSI, Automobile, and Real Estate sectors.
Valuation and view: We will revisit our estimates after the earnings call.
Commentaries on the near-term outlook, verticals, and margin will be keenly monitored. We reiterate our BUY rating on the stock.

CMP: INR291

## Earnings in line; NIM stable QoQ, while AUM grows 23\% YoY

## Borrowing costs stable; asset quality healthy

- MASFIN's PAT grew 23\% YoY to INR704m (in line) in 1QFY25. Net total income rose $\sim 27 \%$ YoY to INR1.75b (in line), while Opex at INR567m grew $33 \%$ YoY (in line). PPoP stood at INR1.19b (in line) and grew $25 \%$ YoY.
- Provisions stood at INR239m, translating into annualized credit costs of $0.9 \%$, stable YoY and QoQ.
- GNPA/NNPA (basis AUM) stood broadly stable QoQ at 2.3\%/1.5\%. PCR on Stage 3 assets increased ~20bp QoQ to ~39\%.
- CRAR stood at $28.6 \%$ with Tier 1 of $\sim 25.4 \%$. This was after the equity capital raise of INR5b through QIP in Jun'24.

## AUM rises 23\% YoY; sequential expansion in spreads

- Standalone AUM stood at ~INR103.8b and rose ~23\% YoY. Within this, AUM of Micro-enterprise/SME/2Ws rose $12 \% / 23 \% / 17 \%$ YoY. Contribution of direct retail distribution to the standalone AUM stood at ${ }^{\sim} 66 \%$ (PY: ~63\%). The MSME segment contributed $62 \%$ to the incremental YoY AUM growth.
- Yields (calc.) rose $\sim 50 b p$ to $14.8 \%$ while CoF (calc.) grew $\sim 30 b p$ QoQ to $9.6 \%$. This resulted in $\sim 20 \mathrm{bp}$ QoQ expansion in spreads to ${ }^{\sim} 5.1 \%$.
- NIM (calc.) was stable QoQ at $\sim 6.8 \%$. Reported CoF declined $\sim 2 b p$ QoQ.

## Other highlights

■ The avg. ticket size of Micro-enterprise loans rose to ~INR69K (PQ: ~53K).

- RoTA increased ~3bp QoQ to ~2.98\% in 1QFY25.

## HFC subsidiary:

- MAS Housing reported an AUM of ~INR6.2b, which grew ~38\% YoY.

■ GS3 was stable at $\sim 0.9 \%$ QoQ.

## Valuation and view

- MASFIN has a niche expertise to serve the MSME market and continues to demonstrate healthy loan growth momentum, while its asset quality is perhaps the best among (M)SME lending peers.
- The company is well placed to achieve its target AUM CAGR of 20-25\%, supported by robust liability management, a strong capital base, and a healthy asset quality.
- Historically, MASFIN has managed its liquidity well and still continues to have an adequate liquidity buffer on its balance sheet. We will look to revise our estimates after the analyst call on $25^{\text {th }}$ Jul' 24 .

Analyst ownership of the stock

## Companies where there is interes

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

## Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL \& its group companies to registration or licensing requirements within such jurisdictions.

## For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong \& are not conducting Research Analysis in Hong Kong.

## For U.S.

MOTILAL Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the"1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts), and under

RNING
applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.
