Overview

- Fed reflected a dovish stance in recent FOMC minutes
- Oil tumbles despite huge draws in inventory
- Copper stabilizes after recent sell off
- Today will be the first day of Jackson Hole Symposium which will be in focus along with PMI figures from US.

Precious Metals

Gold prices regained lost ground to hover close to their all-time highs after minutes from the U.S. Federal Reserve's last meeting showed officials strongly leaned towards an interest rate cut at their September policy meeting. Several officials said recent progress on inflation and increases in the unemployment rate provide a 'plausible case' for a 25-basis-point rate cut in next meeting. Some officials are still in the wait and watch approach, moving according to the economic data points. Fed officials also mentioned that balance sheet run-off could continue even after rate cut begin. In a surprising event, US BLS announced a revision in payroll number the data showed economy added 818,000 fewer jobs than previously reported over the 12 months ended March i.e. job growth wasn't as strong in the year ended March as initially reported. Following the Fed minutes, dollar extended losses to a more than seven-month low, while benchmark U.S.10-year bond yields fell to a more than two-week low. Focus today will be on preliminary manufacturing and services PMI from major economies and US weekly jobless claims data. Market's focus will also be on Governor Powell's keynote speech at the Jackson Hole symposium on Friday. Gold price on domestic front could trade in a range of 71,300-72,300.

Base Metals

Copper remained stable after hedge funds reduced their bullish bets recently. Fund managers seem to have cut their positions; as copper demand remains sluggish. Aluminium prices stabilized as speculators booked profits after rising for consecutive sessions. Losses in the most traded three-month aluminium contract on the London Metal Exchange eased as the US dollar sank to its lowest level since December, boosting greenback-priced commodities. According to FOMC meeting minutes, Fed members were strongly leaning toward an interest rate decrease during their September policy meeting last month, with several even eager to reduce borrowing costs immediately. Meanwhile, employers gained much fewer jobs than previously reported in the year to March, according to BLS. PMI figures and Chair Jerome Powell's address at Jackson Hole will be important.

Energy

Oil prices fell to a six-month low as traders looked past a bullish U.S. stockpile report, focusing instead on concerns over the U.S. economy. A sharp downward revision in the number of jobs sparked fresh concerns about demand. The Bureau of Labor Statistics revised down March 2024's employment gains by 818,000 positions earlier in session. Although this was less than the estimated reduction of up to 1 million jobs, the revision lowered average number of jobs created in 12 months through March to 174,000, down from previous pace of 242,000. The data somewhat renewed investor concerns about a slowing economy and crude demand, though these were tempered somewhat by expectations that the Federal Reserve may deliver its first rate cut next month. This news overshadowed inventory data showing that commercial stockpiles fell by a larger-than-expected 4,649 kbbl last week. Refined product inventories also declined, with gasoline down 1,606 kbbl and distillate down 3,312 kbbl. Demand concerns from China remain major worry after China's central bank kept its benchmark loan prime rate unchanged, following an unexpected rate cut in July. Focus is now squarely on signals of further economic support from Beijing as government struggles to shore up growth. China's oil imports fell for a second consecutive month in July, as weak economic growth weighed on fuel demand in country. Market's focus will also be on Governor Powell's keynote speech at the Jackson Hole symposium on Friday.
