Neutral

NII in line; high provisions drive earnings miss

Revolver mix remains stable at ~24%

- SBI Cards (SBICARD) reported a 5% miss on PAT, which stood at INR5.3b in 4QFY25.
- The share of the revolver mix was flat at 24% and management expects the revolver mix to have a downward bias toward 23%. NIMs improved to 11.2%.
- Spends grew 2.6% QoQ (up 11% YoY), led by 15% YoY growth in retail spends, while corporate spends declined 17% YoY (up 63% QoQ).
- GNPA ratio improved to 3.08% (down 16bp QoQ), while NNPA ratio increased by 28bp QoQ to 1.46% as SBICARD made changes in ECL-3 classification, resulting in a decline in PCR to 53.5% (down 1,089bp QoQ).
- We raise our FY26E/FY27E EPS by 7.4%/9.9%, factoring in improvement in credit cost, rate cuts and improvement in margins. **Reiterate Neutral with a revised TP of INR975 (22x FY27E EPS).**

Margins to see a calibrated expansion from declining rate cycle

- SBICARD reported 4QFY25 PAT of INR5.37b (down 19% YoY, 5% miss vs. MOFSLe) amid high provisions (8% higher than est.). Gross credit cost for FY25 stood at 9%.
- NII grew 14.5% YoY/3.1% QoQ to INR16.2b (in line). NIMs improved by 60bp QoQ to 11.2%. However, SBICARD guides for calibrated NIM expansion as the benefit of CoF should come at a lag, while the decline in yields shall be passed on marginally. CoF declined by 20bp QoQ to 7.2% amid a decline in the benchmark rate.
- The revolver mix was sticky at 24%, and SBICARD expects to have a slight downward bias amid new vintages having a tilt toward transacting customers. Transactor share increased to 41%, while EMI share declined to 35%.
- Fee income as a proportion of total income stood stable at 52%. PPoP grew 7.2% YoY/7.3% QoQ to INR19.6b (largely in line). The C/I ratio decreased to 51.4% vs. 53.5% in 3QFY25.
- Cards-in-force rose 10.1% YoY/3% QoQ to 20.8m. New card sourcing was largely flat QoQ at 1.11m, with new sourcing tilting highly toward the banca channel at 63% vs. 55% in 3Q and 38% in 2Q, while on O/S basis, sourcing stood at 42% for banca channel.
- Spends grew 2.6% QoQ (up 11% YoY), led by 15% YoY growth in retail spends, while corporate spends declined 17% YoY (up 63% QoQ). SBICARD expects corporate spends to gain pace over the next few quarters.
- GNPA ratio decreased to 3.08% (down by 16bp QoQ), while NNPA ratio increased by 28bp QoQ to 1.46% as SBICARD made changes in ECL-3 reporting, resulting in a decline in PCR to 53.5% (down 1,089bp QoQ).

Highlights from the management commentary

- NIMs are influenced by two key factors — yields and interest rates. With rates trending lower, NIMs will see a calibrated expansion.
- The shift in ECL is primarily driven by changes in Stage 1 and Stage 2 assets, while Stage 3 changes are attributed to recoveries — all contributing to the ECL reduction.
- Receivables grew 10% last year and are expected to grow by 12-14% YoY this year.
- The mix of revolvers and EMI remains largely unchanged, with a slight downward bias in revolvers for new customers. As newer vintages are added, the revolver mix is likely to lean closer to 23%, given a stronger tilt towards transactors in the new portfolio.

Valuation and view

SBICARD reported a broadly in-line quarter, though provisions were higher, with management expecting further easing in the coming quarters. The revolver mix is likely to see a downward trend, and EMI yields remain under pressure. However, spends growth is expected to pick up, supported by a recovery in corporate spends and sustained traction in retail spends. Asset quality is projected to improve, aided by a reduction in forward flows. NIMs are expected to improve in a calibrated manner as the benefit from lower cost of funds will get partially offset by the yield pressure. We raise our FY26E/FY27E EPS by 7.4%/9.9%, factoring in improvement in credit cost, contained opex growth and improvement in margins. **Reiterate Neutral with a revised TP of INR975 (22x FY27E EPS).**

Highlights from the management commentary

Opening remarks

- SBICARD continues to play a key role in the expanding payment ecosystem.
- With 109m cards-in-force, the credit card industry is witnessing strong growth in new additions.
- SBICARD remains the largest standalone credit card issuer.
- The focus is on growing the co-branded card portfolio, with ongoing efforts to strengthen partnerships.
- To offer a diversified product suite, new cards like SBI Miles have been launched.
- The BPCL fuel card partnership has crossed 4m SBI Cards.
- The risk management framework has been updated to align with both market practices and regulatory guidelines.
- A dividend of INR2.5/- per share has been declared.
- SBICARD is the second-largest card issuer in India, consistently adding 1m cards every quarter. In FY25, 4m new accounts were added.
- Market share in card spends stands at 15.6%, with retail spends growing 15% year-on-year.
- Corporate spending is recovering; the strategy to diversify the corporate segment is proving successful and remains a focus area.
- Strong spending has been seen in consumer durables and jewelry segments.
- UPI-based credit card acceptance is boosting overall spending growth.
- Strong business momentum has supported solid financial performance in 4Q.
- The cost of funds is expected to decline due to the RBI's rate actions, helping to maintain stable NIMs.
- Asset quality is under pressure due to ongoing macroeconomic headwinds.
- Gross credit cost improved by 40bp, marking the first decline after several quarters of increase.
- Delinquencies in the 30-day and 90+ day buckets are now on a declining trend.
- Credit costs are expected to moderate, influenced by the state of unsecured lending and broader macro conditions.

Asset Quality

- The overall ECL rate has declined from 3.6% to 3.4%, remaining largely stable over recent quarters.
- SBICARD follows an ECL model that is reviewed by external auditors and various stakeholders.
- The shift in ECL is primarily driven by changes in Stage 1 and Stage 2 assets, while Stage 3 changes are attributed to recoveries — all contributing to the ECL reduction.
- Asset quality has been improving, indicating a downward trend in credit costs going forward.
- The gross write-off pool remains elevated.
- Stage 2 ECL has increased, mainly due to early provisioning and a reduction in Stage 3 provisions.
- Early delinquencies among new customers continue to decline.

- Write-offs have reduced, reflecting an improvement in delinquencies and overall flow rates.
- Flow rates have been consistently decreasing over the past few months.
- Gross slippages have come down from 2.2% to 2.1% in 4Q.
- The previous quarter also showed a positive trend, with improved flow rates and reduced write-offs.

Opex and other income

- Operating expenses have declined due to lower cashback-related spends in the previous quarter, following the festive-heavy 3Q.
- The C/I ratio is expected to remain in the 55–57% range.

NIMs, cost and yields

- NIMs are influenced by two key factors — yields and interest rates. With rates trending lower, NIMs will see a calibrated expansion.
- The company's loan book is on a fixed-rate structure, while borrowings have short terms. The impact of the Feb'25 rate cut should reflect in 1Q, though with a lag.
- On the yield side, rate benefits can be passed on to customers, supporting efforts to maintain stable NIMs.
- While rate cuts will provide relief over time, yields on the EMI portfolio may face slight pricing adjustments due to benchmark shifts. NIMs are likely to stay stable, with a slight upward bias.
- There is no regulatory cap on lending yields, providing flexibility in pricing.

Spends; loans and receivables

- The corporate card strategy aims to boost corporate spending, with 4Q expected to benefit from seasonal growth.
- Growth will continue in a calibrated manner given economic uncertainties, with new additions projected at 1.1m per quarter.
- Receivables grew 10% last year and are expected to rise by 12-14% YoY this year.
- Industry-wide spend growth has slowed, including in the corporate segment for SBICARD. FY26 is projected to see a similar growth trend as FY25, at 18-19% YoY.
- Market share was impacted by weaker corporate spends, but it is expected to recover as corporate activity picks up.
- Attrition rates in cards stand at 10-13%, with some exits being voluntary, while write-offs are involuntary.
- The drop in corporate spends was due to RBI regulations, which led the company to adjust its corporate portfolio strategy.
- Rental spends have moderated following the implementation of certain fee charges.
- New acquisitions gained momentum in 2HFY25, which is expected to push the cost-to-income ratio higher.

Sourcing

- The Rupay card portfolio now accounts for 20% of the total, with UPI-based spends nearing double digits as a share of overall spends.
- The banca channel mix rose to 63% in 4QFY25 and averaged 51% for the full year. The aim is to maintain a balanced 50-55% contribution from both Banca and open market channels.

Revolver mix and receivables

- The mix of revolvers and EMI remains largely unchanged, with a slight downward bias in revolvers for new customers.
- Over the next 3-4 quarters, the revolver mix is expected to range around 23-25%, with the last six quarters averaging around 24%.
- As newer vintages are added, the revolver mix is likely to lean closer to 23%, given a stronger tilt toward transactors in the new portfolio.
