Steady overall demand with Jewelry outlier; soft margins

In our consumer coverage universe, all segments are expected to deliver revenue/EBITDA growth YoY in 1QFY26—staples +6%/+1%, paints & adhesives +3%/+2%, liquor +11%/+6%, innerwear +12%/+21%, QSR +11%/+10%, and jewelry +20%/+27%.

- Ongoing revenue trends continue:** In 1QFY26, demand trends across various categories continued to mirror recent historical quarters. Staple companies are likely to experience a similar trend due to sluggish urban demand and high-cost inventory. We expect a marginal pickup in volume growth, with price hikes supporting 1Q revenue growth. We expect **staples** companies' revenue growth in the range of mid-to-high single digit. **Paint** companies are still struggling with a muted demand environment and high competitive intensity. However, some improvement is expected in the product mix. In **liquor**, UNSP's P&A portfolio is expected to see subdued volume growth in 1QFY26, partly due to a high base in 1QFY25, which had benefited from high elections-led inventory stocking. UBBL is also likely to deliver low double-digit revenue growth. While the early onset of monsoon is expected to weigh on volume growth, this is likely to be offset by healthy realization growth, the benefit of price hikes in the Telangana market, and premiumization. **Innerwear** companies are expected to see low double-digit growth due to soft inventory and product launches. The pressure from high trade inventory has eased, and primary growth is expected to align with secondary growth. The demand environment for **QSR** companies remained muted in 1QFY26. While demand sentiments remained healthy in Apr'25, they remained weak in May'25 and the second half of Jun'25. The performance of the dine-in channel and the revenue gap between dine-in and delivery will be key monitorables during the quarter. **Jewelry** demand was healthy in April but has since moderated due to the sharp rise in gold prices.
- Operating margin to remain subdued:** Despite moderating prices of key raw materials, gross margins for most consumer companies are expected to remain subdued due to high-cost RM inventory. Moreover, staple companies have increased promotional spending to drive demand growth, further pressuring EBITDA margins. While QSR and paint companies are likely to experience EBITDA margin contraction, liquor (ex-UNSP) and innerwear companies are expected to report margin expansion due to softer raw material costs and an improved product mix. Jewelry companies are expected to face margin pressure due to a shift toward more franchise-driven store expansion, slower studded jewelry growth, and high gold inflation. SSSG is expected in low double digits to mid-teens, primarily driven by pricing growth.
- Outperformers and under-performers:** Among our coverage companies, MRCO, JUBI, PAGE, Kalyan Jewellers, and PNG are expected to be outliers in 1QFY26, whereas Asian Paints, Indigo Paints, Emami, Dabur, UNSP, and Devyani/Sapphire will likely be underperformers.
- Outlook:** While the slowdown has continued across consumer segments, demand trends are expected to improve gradually, supported by a healthy monsoon outlook, income tax benefits, interest rate cuts, and a gradual improvement in the macro environment. **Our top picks are Marico, PN Gadgil, Radico Khaitan, and RBA.**

Segment-wise performance

- **Staples:** No material uptick in demand trends is expected in 1QFY26 as they continue to mirror recent historical quarters. Demand remained impacted by weakness in urban consumption, while rural markets are recovering gradually. Despite RM softening, the benefits should start to become visible from 2QFY26 onwards, as companies are still carrying high-cost RM inventory. Moreover, the early onset of monsoon has adversely impacted summer-led products, HI, and out-of-home portfolios. Volume growth is likely to remain in the low- to mid-single digits, while price hikes realized in 1QFY26 should aid overall revenue growth. We model gross margin contraction of 170bp YoY and EBITDA margin contraction of 130bp on a YoY basis due to high inventory costs (tea, wheat, palm oil, and edible oils) and negative operating leverage. For staple companies under our coverage, we expect sales/EBITDA/PAT growth of 6%/1%/2% in 1QFY26.
- **Paint & adhesives:** Revenue growth for paint companies is expected to remain weak in 1QFY26, with no material sequential uptick as demand conditions continue to remain muted. Rising competitive intensity is also putting pressure on growth. We believe the product mix will play a key role in driving revenue growth. We still build in a +600bp gap between volume and revenue growth due to an adverse product mix. EBITDA margins are likely to remain under pressure due to higher marketing spends and the impact of negative operating leverage. We build in 3% sales and 2% EBITDA YoY growth for paint companies under our coverage, while APAT is projected to remain flat YoY in 1QFY26.
- **Liquor:** UNSP's P&A portfolio is expected to witness subdued volume growth in 1QFY26, partly due to a high base in 1QFY25, which had benefited from high elections-led inventory stocking. EBITDA margin is expected to contract YoY, driven by higher A&P spends and operating deleverage during the quarter. The impact of Maharashtra's import duty changes is expected to become visible from 2QFY26 onwards. However, companies expect that the adverse impact in Maharashtra can be offset by improved performance in other states as well as mitigation effects within Maharashtra itself. For RDCK, we expect the strong volume trend to sustain. Premiumization trends are expected to remain strong, with growth driven across segments. We expect the company to expand its operating margin, supported by a favorable mix and operating leverage. For UBBL, while we expect the early onset of monsoon to weigh on volume growth, this should be offset by healthy realization growth, reflecting the full-quarter benefit of price hikes (effective from mid-Feb) in the Telangana market and the ongoing premiumization drive, leading to low double-digit revenue growth. Price hikes should support gross margins, while slow volume growth may not fully translate into operating margin improvement. We expect sales/EBITDA/PAT growth of 11%/6%/10% for our coverage companies in 1QFY26.
- **Innerwear:** We expect low double-digit revenue growth for Page Industries in 1QFY26, driven by softer inventory, product launches, and successful placements across alternate channels. Weak urban consumption remains a headwind, but normalized trade inventory should enable better primary growth. Primary and secondary sales are now expected to be aligned, reversing the trend observed over the past few quarters. We expect sales/EBITDA/PAT growth of 12%/21%/22% for Page Industries.

- **QSR:** The demand environment for QSR companies remained muted in 1QFY26. While demand sentiments were healthy in Apr'25, they were mixed in May'25 (due to factors such as the impact of war) and showed limited recovery in Jun'25. However, overall demand has still not seen a meaningful recovery, and companies' own initiatives have played a bigger role in sustaining a healthy trend. Jubilant appears strong within the pack, with sustained outperformance in delivery. Among dine-in players, we believe RBA will be the outperformer. With weak underlying growth, most companies are expected to face margin pressure, which will weigh on restaurant-level and EBITDA margins for most brands. The performance of the dine-in channel and the revenue gap between dine-in and delivery will be key monitorables during the quarter. Enhancing the menu and rolling out activation drives for dine-in could be crucial for improving footfall/orders going forward. We expect sales/EBITDA growth of 11%/10%, while APAT is likely to decline 17% for our coverage QSR companies in 1QFY26.
- **Jewelry:** In 1QFY26, gold prices surged ~30-35% YoY and ~15% QoQ, breaching the INR100k mark (per 10gm) in the retail market, driven by ongoing geopolitical tensions. This sharp and rapid increase has led to consumer budget constraints, with many customers choosing to delay purchases in anticipation of a price correction or stabilization, leading to demand softness in 1QFY26. SSSG is expected to grow in low-double digits to mid-teens, primarily driven by pricing growth. Finance costs are expected to stabilize as the GML rate has normalized, following a spike in 4QFY25 due to the imposition of US tariffs. We expect sales/EBITDA/PAT growth of 20%/27%/35% for our coverage jewelry companies in 1QFY26.

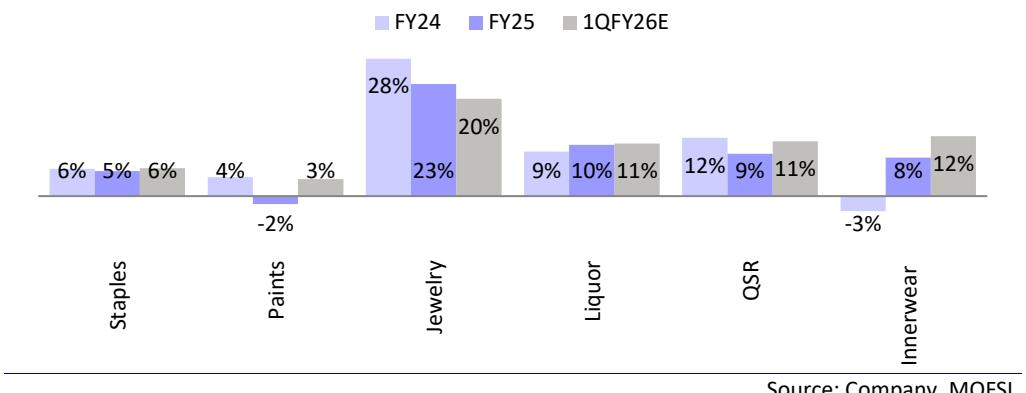

Existing inventory postpones the benefits from cooling input costs

- Commodities such as tea, coffee, and palm oil, which were inflationary in recent quarters, have started to ease in Q1FY26. Despite this moderation in input costs, the benefit to company margins is likely to be delayed, as most companies continued to utilize high-cost inventory in 1QFY26, keeping gross margins under pressure. Benefits from cooling RM pressure are likely to be realized 2QFY26 onwards, which should support most FMCG companies such as Dabur, HUL, Nestlé, Britannia, Marico, and Tata Consumer. Similarly, non-agricultural commodities, including crude oil, its derivatives, and VAM prices, have continued to ease. However, select commodities such as gold and copra continue to experience inflationary pressures.
- **Agricultural commodities:** Wheat prices increased 4% YoY but declined 11% QoQ. Barley prices surged 10% YoY but dipped 5% QoQ, likely impacting companies like UBBL and Nestlé. Sugar prices increased 4% YoY but remained flat QoQ. Coffee prices increased 6% YoY and 2% QoQ, while Cocoa bean prices have started to ease, declining 1% YoY and 3% QoQ, providing some relief for companies like Nestlé and HUL. Copra prices surged 70% YoY and 13% QoQ, while palm oil prices increased 1% YoY but declined 14% QoQ.
- **Non-agricultural commodities:** Given geopolitical issues, Crude oil prices remained volatile in 1QFY26 but declined 20% YoY and 10% QoQ. Other commodities like TiO2 and TiO2 (China) continue to show a downward trend. VAM (China) prices remained range-bound, correcting mere 1% both YoY and

QoQ. In contrast, gold prices surged 32% YoY and 14% QoQ, putting pressure on the margins of jewelry companies.

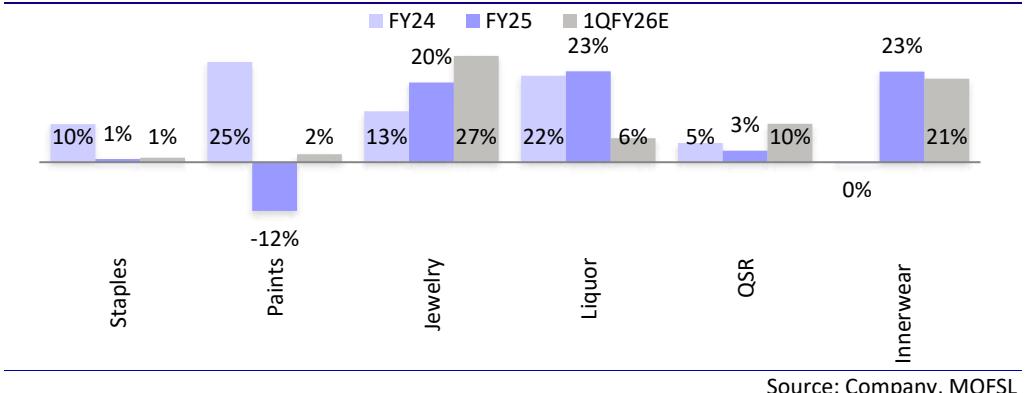

- Companies remain focused on normalizing the gap between volume and value growth while prioritizing a strategic balance between revenue growth and margin expansion amid evolving market dynamics. This approach aims to effectively navigate cost pressures while maintaining competitive positioning.

The tables below provide a snapshot of actual and estimated numbers for companies under the MOFSL Coverage Universe. Highlighted columns indicate the quarter/financial year under review.

Asian Paints

Neutral

CMP: INR2,369 | TP: INR2,500 (+6%)

EPS CHANGE (%): FY26 | FY27: -4.3 | -3.8

- We model 1% revenue growth in 1Q, as no meaningful improvement has been observed in the demand environment, particularly in urban markets.
- We expect GP margin expansion of 130bp YoY to 43.8% due to deflation in RM prices. EBITDA margin is expected to contract 40bp YoY to 18.5% due to negative operating leverage and high operating costs.
- Volume growth is expected to be 7% in domestic decorative paints. The gap in volume and value growth is due to downtrading.
- We expect this volume-value gap to narrow going forward as demand improves. The price hike taken by company in FY25 also helps in realization growth.

- We expect 8.5% revenue growth YoY, with volume growth of 3% and the remainder driven by price hikes in 1QFY26.
- BRIT continues to focus on innovation and distribution channels to gain market share.
- GP margin is expected to contract 260bp YoY to 40.8%, while EBITDA margin is expected to contract 43bp YoY to 17.3%, primarily due to a rise in agri commodity prices.

- We expect ~2% revenue growth, led by the 3% volume growth in the India business. We expect some sequential improvement in demand.
- The Beverage portfolio was impacted during the quarter due to unseasonal rains and a short summer. However, Activ Juices and Activ Coconut water saw good momentum, with growth expected in mid-teens.
- Home and Personal Care (HPC) division is expected to perform well, driven by the oral, home, and skin care categories. Within healthcare, brands such as Dabur Honey, Hajmola, Dabur Honitus, and Dabur Health Juices are expected to post robust double-digit growth.
- International business is expected to post double-digit constant currency growth.

- Domestic demand continued to mirror 4Q trends, with rural outpacing urban demand. We model 8% standalone revenue growth and 5% volume growth. Price hikes likely persisted in 1Q, especially in soaps.
- High inflation continues to put pressure on margins. We model a 330bp YoY contraction in the GP margin and a 130bp YoY contraction in EBITDA margins. The benefit of lower palm oil prices will materialize from 2QFY26 onwards.
- The company highlighted in its pre-quarter update that the Personal Care segment is expected to deliver low-single digit value growth, impacted by soaps. The Home Care business is likely to deliver double-digit value growth and UVG.
- The Indonesia business expected to deliver flattish UVG while GAUM business is likely to deliver strong double-digit value growth and UVG.

- Demand trends remained consistent QoQ with muted growth, and rural areas continued to outperform urban areas. We expect a 4.6% revenue growth in 1QFY26.
- GP margins are expected to face some pressure (contracting 140bp YoY to 50.6%) due to an increase in consumer offers and other initiatives undertaken to drive volume growth. The company revised its EBITDA margin guidance last quarter to 22-23%, down from the earlier guidance of the lower end of 23-24%.
- HUL's growth was impacted by several factors, including adverse mix dynamics, input cost inflation, and subdued seasonal demand, collectively moderating the overall growth trajectory.
- We model a 3% volume growth. The company has implemented calibrated price increases in Skin Cleansing and Foods, which were partially offset by deflation in the Home Care portfolio.

- The cigarette business is expected to show stable volumes and pricing, with the portfolio continuing to grow, aided by improvements in the product mix. We model 5% volume growth in the business in 1QFY26.
- We expect 6% YoY sales growth in the cigarette business and 4% YoY sales growth in the FMCG business.
- We expect a 5% YoY growth in cigarette EBIT, though margins may contract 40bp due to rising leaf tobacco prices. In the FMCG business, we expect a 16% decline in EBIT, with a 170bp margin contraction as price hikes lag RM inflation.
- The paper segment remained weak while agriculture segment performed well during the quarter.

- The domestic business is experiencing steady improvement. We expect 21% consol. revenue growth and ~8% domestic volume growth. The high pricing contribution is driven largely by price hikes in Parachute.
- Gross margins expected to contract 355bp YoY to 48.7%, given the high base and rise in RM prices. Operating margins are expected to contract 250bp YoY to 21.2%.
- Parachute oil is expected to deliver >20% revenue growth, aided by pricing interventions as the company incorporated another round of price hike in Jun'25. Saffola oil is expected to deliver revenue growth in the high twenties, backed by mid-single digit volume growth. Moreover, VAHO revenue grew in low double digits.
- The International business is expected to deliver revenue CC growth in high teens, with positive contributions from all markets.

- We expect overall sales growth of 5.7% YoY, led by 5.5% growth in domestic sales and 10% growth in export sales. However, while demand recovery is underway, a higher dependency on urban markets may weigh on NEST volumes.
- The company has likely implemented a price hike in response to rising commodity prices.

- We expect GP margin contraction of 60bp YoY to 57%, impacted by a rise in RM prices like coffee and edible oil, while we model a stable EBITDA margin of 23.3% in 1QFY26.
- Nestle focuses on expanding its distribution reach, premiumization, and innovations.

- We expect demand recovery in 1Q, though rural growth continues to outperform urban growth. Pidilite's core category can witness some headwinds due to the subdued demand environment at the macro level.
- We expect consolidated revenue to grow 10% YoY and volume to grow 12% during the quarter.
- We expect gross margin to expand 120bp YoY to 55%, driven by a YoY decline in VAM prices.
- Outlook on domestic and international demand is a key monitorable.

- We expect 22% revenue growth. In P&A, we model 17% volume growth and 23% revenue growth. In popular, we expect 40% revenue growth and 35% growth in volume.
- We expect GM to expand 200bp YoY to 43.5% on stable RM prices and improving product mix. EBITDA margin is expected to expand 120bp YoY to 14.3%.

- Radico has a mid- to high-single-digit revenue contribution from Maharashtra, so the impact of the increase in excise duty will be lower compared to other branded players.
- The success of new launches will be a key monitorable for the company's performance.

- The P&A segment's volume growth remained subdued in 1QFY26, partly due to a high base in 1QFY25, which had benefited from election-related inventory stocking. We model 5% volume growth and 7% revenue growth in the P&A segment.
- We model 5% volume growth and 8% revenue growth in the popular segment.
- Gross margins are expected to remain stable at 44.5%, given the stabilization in input prices. EBITDA margin is expected to contract 270bp YoY, impacted by elevated expenses and some degree of operating deleverage during the quarter.
- The impact of Maharashtra's import duty changes, primarily affecting the lower- to mid-prestige segments, will be more visible in 2QFY26. However, the upper prestige segment remains largely unaffected.

QSR: Muted demand trends; margin to remain under pressure

- The demand environment for QSR companies remained muted in 1QFY26. While demand sentiments remained healthy in Apr'25, they remained weak in May'25 and the second half of Jun'25. Weak underlying growth, combined with negative operating leverage and continued store expansion, is likely to keep operating margins under pressure. This will weigh on restaurant and EBITDA margins for most brands. The dine-in channel performance and the revenue gap between dine-in and delivery will be key monitorables for the quarter. Enhancing the menu and rolling out activation drives for dine-in could be crucial for improving footfall/orders going forward. We expect sales/EBITDA growth of 11%/10%, while APAT is likely to decline 17% for our coverage QSR companies in 1QFY26.
- Jubilant FoodWorks is expected to continue being an outlier among QSR companies in the near term (driven by delivery moat), but its valuations are rich. Though dine-in companies are struggling, their operating growth metrics are likely to improve significantly once recovery begins.

Outliers: Jubilant Foodworks
Underperformers: Devyani, Sapphire

EBITDA CHANGE (%): FY26 | FY27: -1%

- The India business is expected to grow 12%. We build 2-3% SSSG as there is not much improvement in the underlying demand. Demand was good in Apr'25 but weak in May'25. The second half of Jun'25 was also not good.
- ADS is expected to decline 1% YoY to 118k.
- We model six store additions in India, bringing the total store count to 519 (14% YoY).
- We expect a 40bp expansion in GP margin to 68% due to stable RM prices. Additionally, we expect a 140bp YoY expansion of EBITDA margin to 14% due to cost efficiency.

Jewelry: Softness in demand due to sharp rise in gold prices

- In 1QFY26, gold prices surged ~30-35% YoY and ~15% QoQ, breaching the INR100,000 mark (per 10gm) in the retail market, driven by ongoing geopolitical tensions. This sharp and rapid increase has led to consumer budget constraints, with many customers choosing to delay purchases in anticipation of a price correction or stabilization, leading to demand softness in 1QFY26. SSSG is expected to grow in low-double-digit to mid-teens SSSG, primarily driven by pricing growth.
- Finance costs are expected to stabilize as the GML rate has normalized, following a spike in 4QFY25 due to the imposition of US tariffs. We expect sales/EBITDA/PAT growth of 20%/27%/35% for our coverage jewelry companies in 1QFY26.

- We expect 30% revenue growth in the India business. We model 15% SSSG, led by an increase in gold prices. We expect nine store additions for India Kalyan, 20 for Candere, and two in the Middle East, bringing the total count to 419 stores in 1Q.

- We expect a 90bp contraction in GP margin to 13.4%, impacted by promotional schemes offered to offset the sharp rise in gold prices. We model a 70bp contraction in EBITDA margin to 6.8% in 1QFY26.
- In the Middle East, we expect 14% YoY revenue growth and moderation in EBITDA margin.

- We expect retail revenue to grow 35% YoY. However, reported revenue growth will be limited to 5% due to the discontinuation of HO bullion sales.
- Gross profit margin is projected to expand 170bp YoY to 10%, driven by the cessation of bullion transfers being reported as sales and an improving mix from higher studded jewelry contribution.
- Finance costs will stabilize to some extent as the GML rate has reduced to 4%.
- We expect five store additions, bringing the total store count to 58.
