Strong recovery for capital market; steady trend for insurance

- The non-lending financial industry witnessed a strong recovery across segments in 1QFY26. Positive market sentiment boosted activity in the cash segment and AUM growth for AMCs/wealth managers/distributors. For life insurers, premium growth was subdued, though we expect an improvement in profitability. General insurers witnessed a marginal recovery in underlying demand, but they are expected to face elevated claims.
- SIP flows reached a new peak of INR266b+ in Apr'25/May'25 and equity inflows were largely stable, which, coupled with MTM gains, should support AUM of AMCs/CAMS/KFin. We expect yields to decline sequentially, offset by positive MTM contribution in other income.
- BSE reported strong MoM growth in premium turnover during Apr'25/May'25, offset by a decline in volumes during Jun'25. MCX continued to witness a surge in notional volumes and premium turnover, driven by crude oil volatility and all-time high prices of precious metals. ANGELONE's order run rate is likely to rise marginally, supported by robust retail cash activity and strong performance in commodities.
- Wealth managers are expected to deliver steady inflows and recurring revenues. Transaction-led revenues should also contribute meaningfully, driven by favorable market conditions and high investor participation in unlisted equities.
- In life insurance, we expect VNB margin expansion for most players (except IPRU), driven by the rising share of higher-margin products. Within our coverage universe, YoY VNB margin changes are expected in the range of -100bp to +210bp.
- General insurers witnessed a slight recovery in the motor segment, while the health segment's growth continued to be weighed down by the transition to 1/n accounting. Despite elevated claims, operational efficiencies should drive improvement in combined ratios.
- Non-lending financial companies have seen a healthy recovery after the impact of regulatory changes. With penetration at significantly lower levels, we expect capital market players to sustain their strong performance. For life insurance companies, we expect 1HFY26 to be tepid in terms of premium growth given the high base of 1HFY25, though it is expected to reverse in 2HFY26. In the capital market space, our top picks are UTI AMC, Nuvama and Angel One. Among insurance stocks, our preferred picks are HDFC Life and Niva Bupa.

Cash activity picks up, F&O loses some steam during the quarter

- Cash volumes witnessed MoM growth during all three months of 1QFY26, backed by strong retail momentum and institutional flows. Cash ADTO grew 2%/12%/2% MoM in Apr'25/May'25/Jun'25.
- F&O ADTO inched up 5% MoM in Apr'25 but then declined 5%/1% MoM in May'25/Jun'25. On the other hand, option premium ADTO saw strong growth of 16%/3% MoM in Apr'25/May'25 but declined 17% MoM in Jun'25 owing to a decline in retail momentum.
- BSE's market share in the options segment continued to scale up in terms of notional/premium turnover, reaching 37.2%/22% in Jun'25 vs. 36.7%/20% in Mar'25.

- Incremental demat account additions declined slightly to 2m/2.2m in Apr'25/May'25 from average of 2.4m per month in 4QFY25. NSE active client count continued to decline.
- High volatility in crude oil and precious metals due to macroeconomic pressures led to a surge in MCX volumes during the quarter. Futures ADTO was at INR406b in 1QFY26 (INR275b in 4QFY25). On the other hand, options ADTO rose to INR2.7t in 1QFY26 (INR2.2t in 4QFY25). Record-high gold prices and the launch of monthly silver option contracts by MCX led to ~2x surge in bullion options.
- We expect ANGELONE to report marginal revenue growth of 4% QoQ, with a 6% rise in the order run rate, offset by lower trading days. Lower customer acquisitions will slightly offset the impact of IPL costs during the quarter. Strong growth in premium turnover is expected to result in double-digit growth in revenue and operating profit of exchanges. Strong cash activity amid positive market sentiment and a recovery in the IPO pipeline will lead to strong double-digit sequential growth for CDSL.

Mutual Funds: SIP inflows scale to new heights; net equity inflows remain steady sequentially

- Mutual fund AUM grew 22%/23% YoY during Apr'25/May'25, driven by 23%/25% growth in equity AUM. On a sequential basis, net equity flows (incl. hybrid) continued to rise to INR385b/INR398b in Apr'25/May'25 from INR241b in Mar'2025. SIP inflows scaled new heights to INR266b/INR267b in Apr'25/May'25.
- Equity AUM's share dipped ~30bp in Apr'25 but rose ~80bp in May'25 to 57.2%. AUM of HDFC AMC/Nippon AMC/ABSL AMC/UTI AMC grew 24%/28%/17%/17% YoY at the end of May'25, reflecting market shares of 11.5%/8.5%/5.6%/5%.
- We expect AMCs to register decent revenue growth on a sequential basis, affected by a slight decline in yields. Other income is expected to continue on sequential growth trajectory on the back of a favorable market environment, leading to growth in profitability.
- CAMS and KFin are expected to register moderate sequential revenue growth of 5% and 6%, respectively, due to yield pressure, which is likely to be offset by healthy AUM growth.
- For wealth managers, steady inflows and positive MTM impact should drive healthy AUM growth. While recurring revenue is expected to remain stable, transaction revenue is likely to pick up due to favorable market sentiment sequentially.

Life Insurance: Base impact on APE growth; positive outlook for VNB margin

- Private life insurance companies posted 8%/10% YoY growth in APE in Apr'25/ May'25. Individual APE growth was impacted by a slowdown in ULIP momentum and a high base. We expect single-digit to mid-teen growth for our coverage universe, except for IPRU, which is expected to report APE decline of 1% YoY.
- VNB margin should continue to improve owing to an increasing share of non-par and protection products in the mix, as well as a rise in the contribution of high-margin ULIP sales (high sum assured with rider attachments). For our coverage universe, we expect VNB margin to expand by 90bp to 210bp YoY, except for IPRU, which is expected to see a 100bp YoY decline in VNB margin.

General Insurance: Slow quarter; operational leverage to boost combined ratio

- The general insurance segment recorded GWP growth of 12%/5% YoY in Apr'25/May'25. The health segment reported 11%/8% YoY growth in Apr'25/May'25, impacted by 1/n on retail health growth, offset by mid-teen growth in the group health segment. The motor segment saw a slight recovery, growing 11%/8% in Apr'25/May'25 (6.8% YoY in 4QFY25).
- For ICICI, premium was up 7%/2% YoY in Apr'25/May'25. While the motor segment's growth remained weak in single digits, retail health saw strong double-digit growth, which was offset by tepid growth in the group health segment.
- For Apr'25/May'25, STARHEAL continued to post soft premium growth of 5%/3% YoY, with retail growth of 11%/8% offset by group health decline of 49%/46% YoY.
- Niva Bupa's GWP grew 9%/10% YoY in Apr'25/May'25 with retail health growing 9%/11% and group health growing 6%/12% YoY.
- While claims are expected to remain elevated due to medical inflation and high claim frequency, operational efficiencies will offset the impact on combined ratio.
