Margins remain resilient despite adverse factors

Guidance on new launches provides improved earnings visibility

- Hyundai Motor India (HMI)'s 1Q earnings at INR13.7b were ahead of our estimate of INR12.1b due to better-than-expected margins. The margins remained healthy in 1Q despite weak demand and higher discounts, led by improved mix in both domestic and export markets and lower input costs.
- HMI targets to launch 26 products (including variants) by FY30, of which eight would be launched over FY26-27E. Considering its launch pipeline, we now factor in an 8% volume CAGR over FY25-27E, which is largely back-ended. We also factor in the startup costs of the new Pune plant to impact earnings in the near term and normalize in FY27E. Overall, we expect HMI to deliver 10% earnings CAGR over FY25-27E. We believe HMI remains well-positioned to benefit from the premiumization trend in India, given its mix in favor of SUVs.

Reiterate BUY with a TP of INR2,408, valued at 27x Jun'27E.

Earnings beat driven by better-than-expected margins

- HMI's revenue declined 5% YoY to INR164b (in-line) and was largely due to the 6% YoY decline in volumes in 1Q.
- Avg. ASP rose 0.7% YoY due to improved mix. However, exports ASP was down QoQ, as HMI received a few fleet orders for Aura/Verna, for which the company had to offer some discounts.
- Gross margin improved 120bp YoY (+50bp QoQ) to 29.3%.
- However, due to higher-than-expected employee costs and higher other expenses, margin was broadly flat YoY at 13.3%, though ahead of our estimate of 12%.
- HMI was able to maintain margins despite weak volumes and higher discounts, which is commendable. Margin resilience was driven by improved mix both in domestic and export markets and lower input costs.
- Driven by better-than-expected margins, PAT stood at INR13.7b (-8% YoY).

Highlights from the management commentary

- The export growth guidance has been maintained at 6-7% for FY26E.
- Domestic PV demand remains challenging. June has been the lowest TIV month for the last 30 months (excluding December). Management is hopeful of a pickup in demand due to the 100bp interest rate cut, the upcoming festive season, and healthy monsoons.
- SUVs have continued to gain traction and stood at 69% of total sales. SUV penetration, even in rural regions, stood at 68.8% for HMI.
- The increase of CNG and EVs in the product mix has helped the company achieve CAFÉ norms. HMI's CAFÉ target for 1Q was 117.286, and the company managed to achieve 112.856.
- Localization:** The localization levels have reached 82% currently (localized sunroof last year) from 78% in 2024. Management will continue to work on several localization opportunities, especially in EVs.

Highlights from the management commentary

- **Revenue:** Sales have declined 6.1% YoY, but exports have shown a growth of 13% YoY, contributing to 27% of the mix.
- Exports to Africa grew 28% YoY, and exports to Mexico rose 14% YoY. Management has indicated that HMI's exports in 1H are better than in 2H. Exports growth guidance has been maintained at 6-7% for FY26E.
- Exports ASP is down QoQ as the company received a few fleet orders for Aura/Verna, for which HMI had to offer some discounts
- **Demand:** Domestic PV demand remains challenging. June has been the lowest TIV month for the last 30 months (excluding December). Management is hopeful of a pickup in demand due to the 100bp interest rate cut, the upcoming festive season, and healthy monsoons.
- Average discounts in 1Q stood at 3.4% of ASP, up from 2% in 4Q
- **Volume mix:** SUVs have continued to gain traction and stood at 69% of total sales.
- **Fuel mix:** Highest ever CNG mix at 16% (from 11.4% earlier), driven by dual cylinder technology and other product interventions on CNG. EV contribution stood at 1.4% in 1Q. Model-wise CNG mix: Aura: 89%, Exter: 30%, Nios: 18%.
- Increase of CNG and EVs in the product mix has helped the company achieve CAFÉ norms. HMI's CAFÉ target for 1Q was 117.286, and the company managed to achieve 112.856.
- Rural contribution for HMI stands at 22.6% compared to 19.9% in 1QFY25 and 20.9% for FY25 as a whole. SUV penetration, even in rural regions, stood at 68.8% for HMI.
- First-time buyer mix for HMI has gone from 32% in 2022 to 40% in 2025. For Creta, the same stands at 32% and for Venue at 45%
- **Customer Base:** 44% of HMI customers are salaried employees, and 16% of them are Government employees. Thus, HMI expects to be among the major beneficiaries of the upcoming pay commission payouts.
- About 47% of HMI's network is in rural regions. In order to increase its rural penetration, every 7 in 10 new outlets are being opened in rural regions by HMI. HMI is now present in 75% of the districts in India
- **Localization:** The localization levels have reached 82% currently (localized sunroof last year) from 78% in 2024. Management will continue to work on many localization opportunities, especially in EVs
- **Pune plant (Talegaon):** Engine production has started in mid-June this quarter. The car assembly capacity setup for production of ICE and EVs is expected to commence in 3Q.

Valuation and view

- **Well-positioned to outperform the domestic PV industry:** In the domestic market, HMI is well-positioned to benefit from the premiumization trends in India, given that 69% of its mix was from the SUV segment in FY25. Further, it has a healthy presence in some of the fastest-growing segments in India: it is a market leader with 33% share in the mid-size SUV segment, 20% share in compact SUVs, 20% share in the compact sedan segment, and 18% share in the premium compact car segment. Overall, HMI has now emerged as a trusted brand for its stakeholders in the domestic market. HMI has indicated that it plans to launch 26 products (including variants) by FY30, of which eight would be launched over FY26-27E. It would commence its model launches after the SOP of its new Pune plant in 3QFY26. We, hence, factor in a 6% volume CAGR for HMI over FY25-27E, which is largely back-ended.
- **HMI has now developed a solid ecosystem in India,** which includes: 1) a large production capacity; 2) an established supplier network; and 3) a strong distribution reach. This manufacturing ecosystem helps HMI launch PVs that are feature-rich, reliable, innovative, and yet competitively priced. It has also helped HMI establish itself as a strong and reliable brand in India.
- **HMI enjoys strong support from its parent (HMC)** in several aspects of its operations, including management, R&D, design, product planning, manufacturing, supply chain development, quality control, marketing, distribution, brand, human resources, and financing, et al. This enables a timely identification of upcoming technology trends in India, which can be introduced on a need basis within a short time-to-market. Further, given that HMC is strong globally in both hybrids and EVs, HMI can launch those technologies in India, customized to Indian conditions, as and when the market demands.
- **Huge export opportunities:** HMC's sales network across more than 190 countries helps HMI pursue export opportunities, which is an important revenue and profitability driver. The company aims to leverage its local manufacturing capabilities to establish HMI as a key export hub for emerging markets, including Southeast Asia, Latin America, Africa, and the Middle East, with the potential to export to other global markets. Management has indicated that it would target to grow 7-8% in exports in FY26E.
- **Valuation and view:** Considering its launch pipeline, we now factor in an 8% volume CAGR over FY25-27E, which is largely back-ended. We also factor in the startup costs of the new Pune plant to impact earnings in the near term and normalize in FY27E. Overall, we expect HMI to deliver 10% earnings CAGR over FY25-27E. We believe HMI remains well-positioned to benefit from the premiumization trend in India, given its mix in favor of SUVs. **Reiterate BUY with a TP of INR2,408, valued at 27x Jun'27E.**
