Highlights from the management commentary

- RoA is guided to remain above 1% over the near term with the following details:
- 1) NIM is projected at 3.2%, 2) fee income is expected to contribute 1.1%, thus resulting in a total revenue yield of ~4.3%, 3) the cost-to-assets ratio stood at 2.5%, translating into a PPoP of 1.8%, 4) considering a credit cost of 45bp, PBT is expected to be in the range of 1.35%–1.4% thus supporting an RoA of ~1%+.
- The bank has submitted revised documents to the RBI following the demise of its promoter, Aga Khan. This is expected to increase the promoter's stake to above 15%.
- DCBB currently has 465 branches and aims for 480-490 branches by the end of FY26.

Valuation and view

DCBB reported a weak quarter with a miss in earnings amid higher provisions, partly offset by treasury gains. Margin moderated by controlled 9bp QoQ, but the bank expects it to remain under pressure in the near term due to the lagged impact of repo rate cuts. Loan growth was muted while DCBB aims to grow its advances by ~20% over the medium term. Fresh slippages increased while PCR declined to 59.7%, though management expects credit cost to remain below 45bp over the coming quarters. We cut our earnings estimates by 10%/4% for FY26/FY27 and project an FY27E RoA/RoE of 1.0%/15.5%. **Reiterate BUY with a TP of INR160 (based on 0.8x FY27E ABV).**

Highlights from the management commentary

Opening remarks

- Deposits grew 20% YoY, while the balance sheet expanded by 19–20% YoY.
- Bottom-line growth remained in line with top-line trends.
- Core fee income rose 17.5% YoY; operating leverage at 15% was the highest in four years.
- The bank made accelerated provisions in 1Q, fully covering its MFI book and unsecured DA portfolio.
- Despite a 100bp policy rate cut, NIMs declined only 9bp in 1Q.
- Slippage ratio has crept up; there are higher slippages in MFI and unsecured DA. Small ticket secured DA has flown into NPA. School finance was also one of the reasons for this.

Advances and deposits related

- The co-lending portfolio now constitutes 15% of the bank's overall book.
- The current strategy emphasizes fixed-rate and short-tenure loans, with increased focus on gold loans and co-lending.
- Growth in long-tenure loans is expected to revive following the recent repo rate cuts.
- IBPC is actively used to cushion NIM impact; the bank benefits from strong PSLC availability and favorable pricing in this segment.
- Overall advances are expected to grow at ~20% YoY in the near term.
- Mortgage growth remains healthy, with IBPC largely comprising secured assets. Small-ticket mortgages have a limited impact on performance. Within mortgages, the focus has shifted to fixed-rate segments.
- The proportion of LAP within the mortgage book is rising, aiding margin resilience.
- Mortgage disbursements remained slow in 1Q, as part of a deliberate strategy, and are expected to improve from 2Q onwards.
- The bank has been prioritizing LAP over traditional mortgage loans.
- With the repo rate cut now behind, the bank plans to re-enter long-tenure lending. The earlier tilt toward short-term loans was in anticipation of the rate reduction.
- A dedicated resource has been hired to scale the SME lending portfolio.
- The construction finance book targets small-ticket loans, with peak exposures ranging between INR 100–120m.

Income and cost-related

- Core fee income includes third-party distribution, which tends to be higher in 4Q; hence, QoQ comparisons can be volatile.
- Fee income is expected to grow slightly below the pace of asset growth.
- Fee income should remain above 1% of average advances.
- The unsecured portfolio comprises an MFI book of INR 6.25b, lending via BCs of INR 5b, and personal loans of INR 2.71b.
- The bank sees strong PSLC performance in the SMF segment, though it currently has no presence there. General PSL demand remains subdued, while PSL in agriculture is relatively unattractive.

- Between last year and now, the bank has reduced headcount by 800. There are a lot of productivity gains. Non-productive work has gone away with the new technology.
- Bank has reduced 7% reduction on C/I ratio on a YoY basis, aided by better cost control.
- Bank will be totaling to 480-490 branches in FY26. The bank currently has 465 branches. The bank believes that more employees per branch are necessary for growing at a faster rate.

Yields and Margins

- The bank has fully transmitted the repo rate cuts during the calendar quarter.
- Efforts continue to lower the cost of funds and cost of deposits to support NIM management.
- Savings account rates were reduced across various buckets in both June and July.
- The benefit from rate cuts will continue to flow through 2Q and extend into 3QFY27.
- The full transmission impact is yet to be realized; one more quarter is needed for complete pass-through. As a result, term deposit repricing will aid margins progressively over the coming quarters.
- NIMs will reflect the impact of rate cuts through 2Q and 3Q as well.

With respect to asset quality

- The bank has made accelerated provisions across MFI, unsecured DA, and secured DA portfolios.
- Gross NPA ratios have increased in the mortgage segment as well.
- PCR declined 300bp QoQ, largely due to write-offs.
- Credit cost is expected to remain below 45bp over the coming quarters.
- The DA book remains small, and within that, the INR 0.2–0.6m ticket-size segment has very limited exposure. Even if stress persists, its impact on credit costs should be minimal.
- The DA portfolio is largely experimental, aimed at testing new geographies and customer segments where the bank has limited presence.
- Stress is emerging in the small-ticket DA segment.
- The bank has taken full provisions on both unsecured DA and MFI exposures.
- Slippages are largely from the MFI and unsecured DA segments, with some stress also seen in secured DA loans in the INR 0.2–0.6m range. However, credit costs are expected to remain within the guided range.
- From a slippage standpoint, the stressed pool is relatively small. Moreover, most of the unsecured book has already been provided for, giving the bank confidence in maintaining credit costs at 40–45bp.
- The bank also monitors loans originated by other lenders in similar segments, which helps in keeping asset quality under control and disbursements to the right customers.
- Stress in the MFI segment is expected to persist for another 2–3 quarters before recovery begins.
- Most gold loans are sourced from players like Muthoot and Manappuram, where bullet repayment structures are followed.

- Slippage ratio needs to improve, with expectations of slippages normalizing to INR 3.5–4b.

Others

- The bank has submitted revised documents to the RBI following the demise of its promoter, Aga Khan. This is expected to increase the promoter's stake to above 15%.

Guidance

- Credit cost is expected to remain below 45bp over the coming quarters.
- The bank aims to grow its overall advances by ~20% YoY in the near term.
- NIMs will remain under pressure in 2Q and 3Q due to the lagged impact of repo rate cuts.
- RoA is guided to remain above 1% - Details below –
- 1) NIMs are projected at 3.2%, 2) fee income is expected to contribute 1.1%, 3) resulting in a total revenue yield of ~4.3%.
- 4) Cost-to-assets stands at 2.5%, translating into a PPoP of 1.8%.
- 5) After factoring in a credit cost of 45bp, PBT is expected to be in the range of 1.35–1.4%, 6) supporting a RoA of ~1%+.

- DCBB reported a weak quarter with a miss in earnings amid higher provisions, partly offset by treasury gains. Loan growth was muted while DCBB aims to grow its advances by ~20% over the medium term.
