Automobiles: Asia roadshow takeaways: Cautious optimism

- ❖ We met with around 15 FIIs in our Singapore roadshow for three days last week. Most FIIs have now turned positive on the Indian automobile sector after the GST rate cuts.
- ❖ One key question lingering on the mind of most of the investors is whether the demand will sustain beyond the festive season or not, especially once discounts are curtailed.
- ❖ Investors were also keen to understand whether or not entry demand would pick up (in 2Ws/PVs) or premiumisation would continue after GST cuts.
- ❖ Within OEMs, MSIL seemed to be a consensus BUY, while there was mixed feedback for all other OEMs.
- ❖ In auto ancillaries, investors agreed that the ongoing tariff uncertainty has made it difficult to evaluate auto ancillaries purely on merit.
- ❖ Within auto ancillaries, beyond our top picks of Endurance and Happy Forgings, we saw lot of investor interest in BHFC, SONACOMS, BOS, SAMIL and MSWIL.

Dining out surges in India: UPI payments jump 34% as restaurants see record sales

India's love for food is driving a major surge in restaurant spending. UPI transactions have seen a sharp rise, indicating more people are dining out and ordering in. Recent GST changes are helping businesses, with restaurateurs expecting strong sales.

2

RBI weighs measures to make payments across borders easier

India's central bank, the RBI, is examining delays in international money transfers reaching bank accounts. This review aims to speed up payments for people. India receives the most remittances globally.

3

India to tighten Moscow oil tap after US sanctions

Indian refiners are preparing to significantly reduce imports of Russian oil. This comes after the United States imposed sanctions on major Russian oil exporters, Rosneft and Lukoil. The strict enforcement of these sanctions could disrupt global oil markets. This disruption may lead to a substantial reduction in Russian oil supply.

4

Critical mineral issue: Framework likely to address waste recycling

The Union mines ministry will formalize feedstock collection for critical mineral recycling through the extended producer responsibility (EPR) framework. This integration of waste into the recycling ecosystem aims to boost local recyclers and address concerns about informal collection and skill gaps.

Asia roadshow takeaways: Cautious optimism

- We met with around 15 FIIs in our Singapore roadshow for three days last week. Most FIIs have now turned positive on the Indian automobile sector after the GST rate cuts.
- One key question lingering on the mind of most of the investors is whether the demand will sustain beyond the festive season or not, especially once discounts are curtailed.
- Investors were also keen to understand whether or not entry demand would pick up (in 2Ws/PVs) or premiumisation would continue after GST cuts.
- Within OEMs, MSIL seemed to be a consensus BUY, while there was mixed feedback for all other OEMs.
- In auto ancillaries, investors agreed that the ongoing tariff uncertainty has made it difficult to evaluate auto ancillaries purely on merit.
- Within auto ancillaries, beyond our top picks of Endurance and Happy Forgings, we saw lot of investor interest in BHFC, SONACOMS, BOS, SAMIL and MSWIL.

Investor Interest in PV segment

- The key question lingering on the minds of most of the investors is whether or not demand will sustain beyond the festive season.
- While most investors are convinced that wholesales are likely to remain strong at least until Dec'25, there is still no consensus whether or not demand will sustain from Jan'26 onward, which would eventually determine the stock movements from hereon.
- Given that the current demand revival, especially in entry cars, was driven by discounts, few investors were not willing to believe that demand can remain upbeat after a gradual withdrawal of discounts in CY26.
- Quite a few investors expressed concern over future outlook for MM / TTMT given the ongoing newsflow that BYD is looking to enter India
- Within PV OEMs, most investors agree to the BUY call on MSIL but were keen to monitor small car demand and momentum in its new launches.
- Investor interest was divided between MM and HMIL. Few Investors were questioning if one should consider looking at TTMT PV after the correction.

Two Wheelers – Key monitorables

- Investors were keen to understand if there are any green-shoots visible to suggest entry 2W demand is seeing a pickup.
- Hence, after the recent rally, investors were not sure whether to continue to hold HMCL or not.
- Further, most investors agreed that TVS remains a long-term structural play but hardly any investors were comfortable with current valuations.
- On EIM, investors were keen to understand what led to the substantial growth in RE volumes in the last two months and if the same can sustain from hereon. Also, they wanted to understand the impact of GST hike in >350cc segment and what impact it can have on upcoming new launches for RE.

- In BJAUT, the key concern was the loss in market share in two wheelers, both in domestic and exports.

Commercial Vehicles – when will the tide turn?

- One of the key queries in FIIs has been whether or not there is any evidence on CV demand revival at this stage.
- Few FIIs were also keen to understand the impact of DFC on the sector and will that drive structural de-rating for the sector.
- Investors did agree to the view that CV industry has much better pricing discipline now and the leverage for most players is much better than any of the past cycles. Hence, this sector did see reasonable interest from Investors.

Auto Ancillaries – tariff uncertainty remains the primary concern

- Investors agreed that the ongoing tariff uncertainty has made it difficult to evaluate Auto Ancs purely on merit.
- On the segments that have been adversely impacted by tariffs like CV components and non-autos, FIIs wanted to understand what kind of impact these companies are seeing in terms of demand and margins.
- Investors were also keen to understand if domestic-focused Auto Ancs are seeing any uptick in their production schedules from OEMs, given the expected demand revival.
- We received minimal push-back on our top picks in Auto Ancs, which are Endurance and Happy Forgings.
- Within Auto Ancs, we saw a lot of investor interest in BHFC, SONACOMS, BOS, SAMIL and MSWIL.

Valuation and view

- After the GST rate cuts and based on discussions with OEMs and dealers, auto demand has picked up across segments, albeit aided by pent-up demand.
- The notable trend is that entry-level vehicles, both 2Ws and PVs, are seeing a marked pickup in demand.
- Most OEMs across segments expect to sustain the healthy momentum at least until Diwali, if not beyond.
- With a recovery in demand, we expect discounts to gradually reduce after the festive season.
- MSIL is our top pick among auto OEMs, as its new launches and the current export momentum should drive healthy earnings growth.
- We also like MM given the uptrend in tractors and healthy growth in UVs.
- In Auto Ancillaries, our top picks are Endurance and Happy Forgings.

Macro drivers constructive; expectations rising for 2HFY26

- Hindustan Unilever's (HUVR) 2QFY26 consolidated revenue rose 2% at INR162.5b (in line), with flat underlying volume growth (est. 2.5% and 4% in 1QFY26). Demand trends remained stable; however, the GST transition and prolonged monsoon weighed on performance during the quarter. The GST transition and trade pipeline adjustments impacted volume growth by ~2%. Nonetheless, management expects 2HFY26 to be better than 1HFY26.
- Home Care delivered mid-single-digit volume growth, while revenue declined 1% YoY, given price cuts taken in 1QFY26. Fabric Wash volumes grew in mid-single digits, driven by strong double-digit volume growth in liquids. EBIT margin contracted 30bp YoY to 19.1%.
- The Beauty & Wellbeing segment witnessed flattish volume growth, with revenue increasing 9%, driven by Skin Care and Health & Wellbeing. Channels of the Future maintained its competitive, double-digit growth trajectory. Skin Care and Colour Cosmetics grew in high single digits. EBIT margin contracted 440bp to 28.4% due to higher investments in **brands and innovations**.
- Personal Care** posted flat YoY revenue growth, impacted by the GST rate transition during the quarter. **Volumes declined to high single digits, supported by calibrated price hikes amid commodity inflation.** Oral Care witnessed a marginal decline. **EBIT margin expanded 340bp YoY to 20.3%, with EBIT rising 21%.**
- Food & Refreshment (F&R) revenue grew 2%, with a low single-digit UVG. Beverages grew in double digits. Lifestyle Nutrition showed early green shoots with sustained UVG. However, sales were impacted by pricing actions taken in previous quarters to refine the pack-price architecture. Packaged Foods delivered a subdued performance amid the GST transition. However, EBIT declined 9% YoY.
- Under the new leadership, HUVR continues to remain focused on driving volume-led earnings growth, even if it comes at the expense of near-term margins. With various strategies underway, optimism is building for stronger operational performance in the coming quarters. We believe the new leadership is well-positioned to capitalize on its volume growth aspirations amid supportive macro drivers. We reiterate our BUY rating on the stock with a TP of INR3,050 (55x on Sep'27E EPS).

In-line performance; volume growth flat YoY

- Net sales grew 2.1% YoY to INR160.6b (est. INR160.6b), while UVG remained flat YoY (est. 2.5% and 4% in 1QFY26). Total revenue rose 2% YoY to INR162.5b (est. INR162.6b). **Home Care** revenue declined 1% YoY (with UVG up mid-single digit), **Beauty and Wellbeing** rose 9.1% YoY (UVG flat), **Personal Care** remained flat YoY (UVG up high-single digit decline), and **Food & Refreshment** sales grew 2% YoY (UVG up low-single digit).

- Gross margins for the quarter contracted 20bp YoY to 51.4% (est. 50.7%). Employee expenses declined 9% YoY, while other expenses rose 5% YoY and ad spends rose 11% YoY. EBITDA margin contracted 80bp YoY to 23%. (est. 22.4%). The company expects EBITDA margin to remain at current levels in the near term.
- EBITDA declined 1% YoY to INR37.4b (est. INR36.5b), PBT declined 5% YoY to INR34b (est. INR34.2b), and PAT (bei) declined 4% YoY to INR25b (est. INR25.5b). Reported PAT rose 4.1% YoY to INR26.9b.
- An exceptional item of INR1,840m relates to the one-off positive impact from the resolution of prior-year tax matters between the UK and Indian tax authorities, along with restructuring expenses and acquisition- and disposal-related costs.
- In 1HFY26, net sales, EBITDA, and APAT grew 4%, -1%, and 5%, respectively.
- HUVR has declared an interim dividend of INR19 per equity share, each with a face value of INR1.

Management conference call highlights

- HUL's ~40% portfolio has transitioned to the 5% GST bracket, and the company has undertaken pricing and grammage revisions across more than 1,200 SKUs to reflect the changes.
- Management expects the combined impact of GST cuts, easing inflation, and a more accommodative monetary policy to drive a gradual recovery in consumption, particularly in rural markets.
- Volume impact of ~2% during the quarter was attributed to the GST transition and trade pipeline adjustments.
- E-commerce contributes 8% to total sales (12% in urban markets), while general trade forms 70% and modern trade about 20%, with all channels recording growth.
- The near-term EBITDA margin guidance remains in the 22-23% range, with 50-60bp expansion expected following the demerger, as the low-margin Ice Cream business will be excluded.

Valuation and view

- We largely maintain our estimates for FY26-FY28.
- The company plans to focus aggressively on volume acceleration, alongside new launches and the reactivation of its value proposition, which is expected to drive further growth from 2HFY26 onwards.
- We expect supportive macroeconomic factors to act as a catalyst for boosting consumption sentiment. As a market leader in most staple categories, coupled with its strategic initiatives, HUVR is well-positioned to benefit the most.
- We model an 8%/8%/9% revenue, EBITDA, and APAT CAGR over FY25-28E. With various strategies underway, optimism is building for stronger operational performance in the coming quarters. We believe the new leadership is well-positioned to capitalize on its volume growth aspirations amid supportive macro drivers. We reiterate our BUY rating on the stock with a TP of INR3,050 (55x on Sep'27E EPS).

Muted 2Q print; watchful for growth recovery ahead

- Colgate's (CLGT) 2QFY26 performance remained weak as its revenue fell 6% YoY to INR15.2b (in line) on a high base of 10% growth and due to the impact of GST-led transition (trade disruptions). We believe that volume is likely to have declined ~5% (in line). CLGT continued to focus on premiumization and investing in its brands, resulting in the premium portfolio delivering better revenue growth.
- Gross margin expanded 100bp YoY and 60bp QoQ to 69.5% (est. 67.9%). EBITDA margin was flat YoY at 30.6% (est. 29.8%). EBITDA declined by 6% YoY to INR4.7b.
- CLGT's performance has been relatively weak over the past 4-5 quarters, marked by muted revenue growth and margin contraction. However, following the reduction in the GST rate on the entire oral care portfolio from 18% to 5%, which benefitted nearly 95% of the company's portfolio, we believe CLGT is well positioned for a recovery in the coming quarters, supported by improving demand trends.
- We recently upgraded CLGT from Neutral to BUY following the rollout of GST 2.0 ([link](#)) and ~30% stock correction over the past 12 months. The stock is trading at a comfortable valuation of 40x P/E for FY27. Maintain BUY with a TP of INR2,850 (45x Sep'27).

Weak performance; but largely in line

- Volumes decline in mid-single digit:** Revenue declined 6% YoY to INR15.2b (est. INR15.3b) on a high base of 10% growth and the impact of GST-led transitions.
- Sustains healthy margins** - Gross margins expanded by 100bp YoY to 69.5% (est. 67.9%). Gross profit was down 5% YoY. Employee expenses were flat YoY, while ad spends and other expenses were down by 7% and 2%, respectively. EBITDA contracted by 6% YoY to INR4.7b (est. INR4.5b). EBITDA margin was flat YoY at 30.6% (est. 29.8).
- Decline in profitability:** PBT declined 7% YoY to INR4.4b (est. INR4.3b). APAT was down 8% YoY at INR3.3b (est. INR3.2b).
- In 1HFY26, net sales, EBITDA and APAT fell 5%, 9% and 10%, respectively.
- The company announced its first interim dividend of INR24 per share.

Key highlights from management commentary

- GST rates on the oral care portfolio were reduced from 18% to 5%, a move welcomed as supportive of consumer confidence and oral health awareness.
- Lower prices were promptly passed on to consumers in collaboration with trade partners.
- The quarter saw temporary disruption for distributors and retailers due to the GST rate change, impacting the company's near-term performance.

- 1HFY26 has a high double-digit growth base, with a gradual recovery expected in the second half.
- Margins remained resilient, supported by continued focus on its “Funding The Growth” program.
- The company maintained strong premium portfolio momentum, led by Colgate Visible White Purple.
- Palmolive’s new *Moments* body wash range was launched, featuring 100% natural extracts and patented fragrance technology.
- The “CAVITY-PROOF” campaign under Colgate Strong Teeth reinforced the brand’s advanced Arginine + Calcium Boost technology for 24-hour anti-cavity protection.

Valuation and view

- We largely maintain our EPS estimates for FY26/FY27.
- The company’s performance has been relatively weak over the past 3-4 quarters, marked by muted revenue growth and margin contraction. However, following the implementation of GST 2.0, which reduced the GST rate on toothpaste from 18% to 5%, benefiting nearly 95% of the company’s portfolio, we believe CLGT is well-positioned for a recovery in the coming quarters, supported by improving demand trends.
- CLGT remains focused on driving sustainable revenue growth through multiple levers — 1) launching science-backed, premium innovations to enhance realizations, 2) expanding category reach through increased marketing and consumer education, 3) deepening rural penetration to drive frequency and new user addition, and 4) broadening its presence in personal care to reduce dependence on the slower-growing oral care category.
- The stock has corrected ~30% over the past 12 months and is trading at a comfortable valuation of 45x and 40x P/E for FY26 and FY27, respectively. We maintain BUY rating on the stock with a TP of INR2,850 (45x Sep’27).

Healthy momentum in CDMO/FDF; earnings upcycle intact

ARV recovery, CDMO scale-up, and operating leverage drive a 2Q beat!

- Laurus Lab (LAURUS) delivered yet another better-than-expected quarter with a 6%/18%/38% beat on revenue/EBITDA/PAT. Higher formulation sales (FDF; backed by robust ARV revenue), a superior mix in the CDMO segment, and improving operating leverage led to a strong 2QFY26 performance.
- Along with improving traction in the human health CDMO segment, the company has invested in manufacturing assets for the animal health and crop science aspects of the CDMO segment. In fact, the validation batches for certain products in the animal health segment are ongoing, with scale-up likely from FY27.
- The non-ARV formulation sales have witnessed a healthy scale-up QoQ, fueled by newer introductions and higher off-take of existing products.
- LAURUS has shown encouraging performance in the ARV segment, led by higher volumes of products sold during the quarter.
- We raise our earnings estimates by 11%/10%/6% for FY26/FY27/FY28, factoring in 1) improved ARV prospects, 2) steady pick-up in CDMO projects, and 3) higher generics business backed by CMO opportunities.
- We expect a 50% earnings CAGR over FY25-28 and value LAURUS at 58x 12M forward earnings to arrive at our TP of INR1,110. **Reiterate BUY.**

Better operating efficiency fuels margin expansion

- LAURUS' 2QFY26 revenue grew 35.1% YoY to INR16.5b (our est. INR15.6b). Synthesis business (29% of sales, small molecules) was up 58% YoY to INR4.7b, led by expansion of the project funnel and a healthy client base.
- FDF sales grew 58% YoY to INR5.2b (31% of sales). API sales (37%) rose 11% YoY to INR6.2b. Bio division sales (3%) grew 18% YoY to INR470m.
- Gross Margin (GM) expanded ~470bp YoY to 59.9%, with a change in business mix. Notably, GM expanded 50bp QoQ despite the share of Synthesis business dipping 300bp during the same period.
- EBITDA margin expanded ~980bp YoY to 24.4% (our estimate: 21.9%) due to better operational efficiency (other expenses/employee costs dipped 360bp/160bp YoY as a % of sales).
- EBITDA grew 126% YoY to INR4.0b (our estimate at INR3.4b).
- The company's Adj. PAT scaled from INR198m in 2QFY25 to INR1.9b (our estimate at INR1.4b) for the quarter.
- LAURUS' 1HFY26 revenue/EBITDA grew 33%/125% YoY to INR32/INR8b. PAT sharply moved from INR330m in 1HFY26 to INR3.5b in 1HFY26.

Highlights from the management commentary

- LAURUS guided the ARV business to be INR25b (+/-INR2b) for FY26.
- The favorable mix of commercial molecules within CDMO is driving better gross margin despite a lower share of CDMO revenue on a QoQ basis.

- In addition to the **INR50b capex planned over the next five years**, LAURUS has been **allotted 532 acres in Vizag** by the Govt. of Andhra Pradesh. The company plans to invest **USD600m (~INR50b)** over eight years on this land to expand **pharma manufacturing and R&D infrastructure**, with a focus on **scaling and technology advancement**.
- Of the total capex outlay of INR36b over FY22-26, about 23% would be spent on the API/CDMO projects, while the remainder **would** be spent on drug products.

Sep'25 – Ferrous prices dip MoM over monsoon weakness and inventory buildup

- Monthly average rebar (BF-route) prices declined INR1,000/t MoM to INR47,100/t in Sep'25. The dip was due to subdued infrastructure and construction activities, coupled with elevated inventories and the lull period during the festive season. Similarly, the monthly average HRC prices dipped INR550/t MoM to INR49,200/t amid sluggish demand and oversupply.
- According to the Joint Plant Committee (JPC), crude steel production declined slightly by 2% MoM (+15% YoY) to 13.8mt and finished steel production stood at 13.3mt (flat MoM and +15% YoY) in Sep'25.
- During Sep'25, steel imports in India remained subdued at 0.65mt (-3% MoM and -36% YoY), which led to a cumulative steel imports decline of 29% YoY in 1HFY26. This steel import curb was primarily driven by trade protection measures and stricter BIS regulations. Meanwhile, exports rose 11% MoM and 48% YoY to 0.58mt as exports to the EU increased to fulfill the quotas ahead of CBAM implementation in Jan'26.
- Channel checks indicated that the rebar prices have reached bottom, and post-monsoon recovery is likely amid an increase in infrastructure and construction activities. However, the inventory buildup at both the mills and channel levels will keep prices under pressure in Oct'25. The average Chinese flat steel prices for Sep'25 stood flat MoM at USD479/t, and currently, China's landed steel prices into India are at a 15% premium to India's domestic steel price.
- Prices for non-ferrous commodities increased MoM during Sep'25, whereas Copper, Aluminum, and Zinc prices were up by 3%, 2%, and 5% MoM to USD9,950/t, USD2,650/t and USD2,930/t, respectively. In contrast, Lead and Nickel prices remained flat MoM at USD1,950/t and INR15,100/t, respectively, during Sep'25, on account of higher inventory buildup.
- Alumina prices continued to shift downward to USD340/t (-9% MoM) amid factors like easing supply with shifts in the supply-demand landscape.

Sept'25 - Input costs continue to remain firm at the current level

- NMDC's iron ore prices for lumps and fines remained flat MoM during Sep'25, due to subdued demand and limited material availability. In Oct'25, NMDC took INR650/t price cuts for both lumps and fines.
- Premium hard coking coal prices (CNF Paradip, India) remained range-bound at USD180-200/t, owing to weak demand globally. Average coking coal prices in Sep'25 stood at USD203/t and remained flat MoM.
- Domestic coal production declined 1% YoY to ~68mt and achieved ~92% of the monthly target. In contrast, Coal India's production dipped 4% YoY to 49mt in Sep'25. Domestic coal dispatches were flat YoY at 74mt during the month. The dispatches to the power sector remained subdued, dipping 2% YoY to 59mt. This was broadly offset by increased dispatches to the non-power sector (especially CPP and steel) by 7% YoY to 14.9mt in Sep'25.
