## Loan yield increase augurs well for margins

### Deposit repricing continues downward; remain watchful on policy rates

- After a series of consecutive declines, the yields on fresh loans expanded in Oct'25 by 12bp for PVBs and 9bp for PSBs (vs. a decline of 86bp/98bp for PSBs/PVBs during Mar-Sep'25). This provides an additional cushion for NIMs beyond CRR cuts, TD repricing and credit cost reduction.
- WALR on outstanding loans declined marginally by 2bp MoM in Oct'25 (flat for PVBs; down 3bp for PSBs). With repo repricing largely done and MCLR easing gradually, banks are lifting fresh loan yields (up 14bp MoM), which should help them sustain NIMs.
- The weighted average term deposit rate (WATDR) for the system continued to decline at a calibrated pace by 4bp MoM in Oct'25 to 6.87%, with PSBs and PVBs reporting a 4bp and 5bp fall, respectively.
- GDP growth in 2QFY26 came in strong at 8.2%, prompting an upgrade in FY26 growth forecast to 7.5% and raising expectations of a modest 25bp cut in repo rate to 5.25%. We thus expect limited NIM impact. The earnings outlook for the banking sector remains healthy, with PAT estimated to grow 15.1% in FY27E and 17.1% in FY28E.
- System credit growth has strengthened to 11.4% (6% YTD), supported by GST cuts, a full 1% CRR reduction, and improving retail and selective corporate demand. With FY26 YTD additions already higher than last year's pace, we raise our system loan growth estimate to 12%+ from 11% earlier.
- We maintain our preference for ICICI Bank, HDFC Bank, SBI and AU Bank.

### Fresh loan yield rises 14bp MoM; outstanding loan yields turning stable

- Yields on fresh loans increased for both PVBs and PSBs by 12bp and 9bp MoM, respectively. Over the last three/six months, WALR on fresh loans declined by 17bo/62bp, as it declined for both PVBs (down 62bp in six month) and PSBs (down 57bp).
- WALR on outstanding loans declined marginally by 2bp MoM to 9.24% in Oct'25 vs. a 6bp drop in Sep'25, though it was flat for PVBs and fell 3bp for PSBs. Over the past three months, WALR on outstanding loans declined marginally by 14bp (down 13bp/15bp for PSBs/PVBs).
- One-year MCLR for PVBs dipped 40-115bp over the past year. KMB posted a steeper decline of 115bp YoY and 20bp QoQ, whereas IDFCFB/IIB witnessed a marginal decline of 40bp/ 45bp. PSBs have transmitted rates less aggressively by 20-40bp YoY and 5-25bp QoQ.
- With most of the repo-linked repricing already completed and MCLR easing at a calibrated pace, incremental loan yields have begun to inch up as banks actively reprice new loans at higher levels. The recent rise in fresh loan yields reflects this trend (up 14bp MoM). This shift should help banks sustain their NIMs, especially now that the bulk of the downward repricing cycle is behind them.

### WATDR continues to ease, signaling consistent reduction in funding cost

- WATDR continues its downward trend at a calibrated pace, down 4bp MoM in Oct'25 and 5bp in Sep'25. In the past three months, WATDR declined 14bp QoQ, led by 17bp QoQ decline in PVBs and 12bp QoQ in PSBs.
- With the reduction in SA rates already factored in, the benefit from TD repricing is progressing more slowly, and its effect should become visible in 2HFY26.
- We expect WATDR to continue trending down as repricing gathers pace, leading to a reduction in the overall cost of funds in 2HFY26E.

We revise our credit growth estimate to >12% vs 11% earlier for FY26E

### GDP growth strong at 8.2%; all eyes on the upcoming policy meet

- GDP growth in 2Q was robust at 8.2% YoY, led by BFSI, real estate, and consumption. We now expect FY26E GDP growth to accelerate to 7.5% (base case), compared with our earlier forecast of 7%.
- Consensus estimates factor in a modest 25bp rate cut, with policy rates expected to settle at 5.25%. Given the limited magnitude of the cut, the impact on NII and NIMs should remain contained, particularly as even a 100bp rate cut in the past yielded a stronger-than-expected earnings recovery for banks.
- Consequently, we estimate PAT growth of 15.1% and 17.1% YoY for FY27E and FY28E, respectively.

### Growth showing resilience; raising system loan growth estimate to >12%

- Systemic credit growth has improved to 11.4% (6% YTD), recovering from the May'25 low of 8.9%.
- Credit growth has gathered momentum over the past few months, consistently rising above 10% since Jul'25. The system loan growth has expanded by INR9.4t in FY26 YTD vs. INR7.8t in the same period last year, implying a robust growth over the previous year's run rate.
- The credit cycle has strengthened meaningfully following the GST cuts, with system growth trending above 11% in Oct'25 and Nov'25, driven by a consumption-led uplift.
- The full 1% CRR reduction is now in effect, and together with the recent favorable regulatory measures, it is expected to provide further support to credit expansion.
- Most banks reported stronger-than-expected credit growth in 2Q, led by robust retail demand and selective corporate credit among private banks. Thus, we revise our systemic credit growth estimate to 12%+, up from our earlier expectation of 11% in FY26E.

### Our view: Maintain preference for ICICIB, HDFCB, SBI and AU Bank

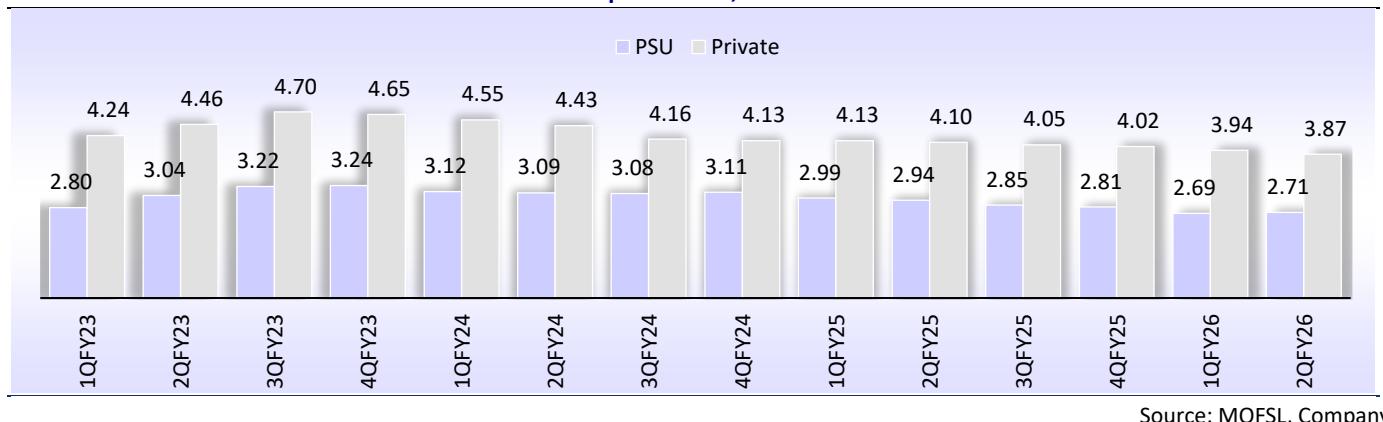

- The banking sector delivered better-than-expected NIMs in 2Q, even after absorbing the full impact of the 50bp repo cut, supported by meaningful reductions in SA rates. With CRR cuts now fully implemented in 3Q, credit growth is likely to accelerate. We revise our credit growth estimate for FY26 to >12% from 11%, providing an additional lift to system-wide NIMs.
- Stress in the unsecured segment has moderated, as reflected in banks' commentary, and many banks are once again exploring growth opportunities in this category. This should translate into lower credit costs for most lenders, driving a normalization in provisions and supporting stable earnings momentum through 2HFY26 and FY27.
- We estimate PAT growth of 15.1% and 17.1% YoY in FY27E and FY28E, respectively.
- We continue to prefer ICICI Bank, HDFC Bank, SBI and AU Bank. These banks stand out with their strong balance sheets, healthy PCR levels, and superior growth visibility, which position them well to cushion downside earnings risks.

## Exhibit 5: Pace of decline in WALR O/S decelerating for both PVBs and PSU banks

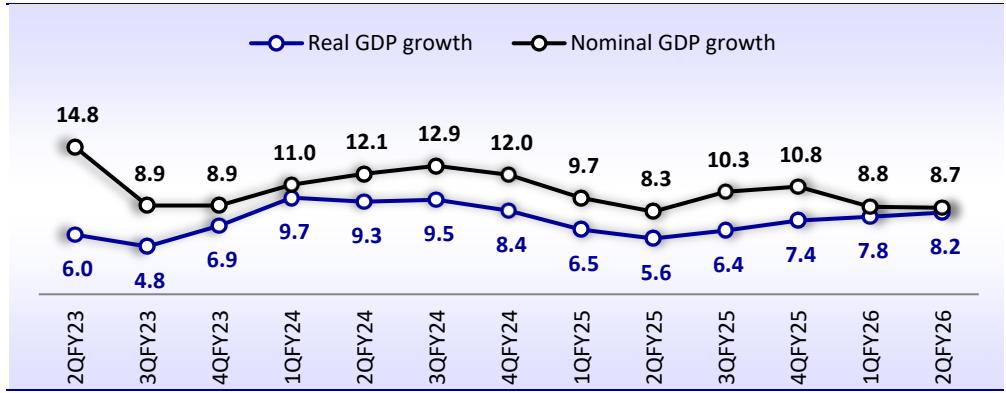

Both PSU and private banks have seen fresh loan yields rise after 2QFY26, which should support NIM expansion. This improvement will also be aided by factors such as CRR cuts and the ongoing repricing of deposits

## Exhibit 6: WALR on fresh loans saw an increase for both private as well as PSU banks

**Our view: Maintain preference for ICICIBC, HDFCB, SBI and AU Bank**

- The banking sector delivered better-than-expected NIMs in 2Q, even after absorbing the full impact of the 50bp repo cut, supported by meaningful reductions in SA rates. With CRR cuts now fully implemented in 3Q, credit growth is likely to accelerate. We revise our credit growth estimate to >12% from 11%, providing an additional lift to system-wide NIMs.
- Stress in the unsecured segment has moderated, as reflected in banks' commentary, and many banks are once again exploring growth opportunities in this category. This should translate into lower credit costs for most lenders, driving a normalization in provisioning and supporting sustained earnings momentum through 2HFY26E and FY27E.
- We estimate PAT growth of 15.1% and 17.1% YoY for FY27E and FY28E, respectively
- **We continue to prefer ICICI Bank, HDFC Bank, SBI and AU Bank.** These banks stand out with their strong balance sheets, healthy PCR levels, and superior growth visibility, which position them well to cushion downside risks to earnings.
