Strong demand and stable costs to drive healthy earnings growth

Demand sustenance post festive has been encouraging

- Aggregate auto demand for all OEMs in our coverage universe grew 17% YoY for 3Q. Key to highlight is that demand has been healthy across all segments: 2W and PVs up 17% each, CVs up 22%, and tractors up 21%. Further, demand has sustained even after the festive season, which is the key positive.
- On the back of a healthy recovery in volumes, auto OEM companies under our coverage (ex-JLR) are expected to post a strong 24% revenue growth. Similarly, excl. JLR, both EBITDA/PAT for our coverage universe is expected to grow by 27% each YoY.
- Given the strong OE growth, auto ancillaries within our coverage universe are likely to post ~14% revenue growth and a much healthier 17%/20% EBITDA/PAT growth in 3Q.
- Within auto OEMs, all OEMs (ex-JLR) are anticipated to post healthy double-digit earnings growth, with the lowest being HMCL at 13% and the highest being TVS at 62%.
- Given the sustained demand pickup, there have been moderate earnings upgrades across our coverage universe.
- Our top OEM picks are MSIL, MM, and TVSL. Top auto ancillary picks are ENDU, Happy Forgings, and SAMIL.

Demand remains healthy even after the festive season

While demand in this festive season has been strong across segments, the encouraging part has been that the same has remained strong even post the festive season. Retail growth, even in Nov and Dec'25, has held up very well. As a result, the overall auto industry volume growth for 3Q (aggregate for all listed OEMs) stood at 17% YoY. More importantly, growth was driven across all segments: 2Ws and PVs rose 17% YoY each, CVs grew 22% YoY, and tractors were up 21% YoY. Within 2Ws, TVS (+27%) and RE (+21%) continued to drive growth. On the other hand, while HMCL volumes were up 13%, BJAUT volumes grew 10%. Similarly, in PVs, ex-HMIL, the other three listed OEMs posted healthy double-digit growth. HMIL underperformed peers with just 5% YoY growth in 3Q. A key highlight has been that all three CV OEMs have posted 20%+ growth in 3Q. Further, within tractors, while MM posted 23% YoY growth, Escorts' volumes grew 14% YoY. While demand has picked up well, discounts have moderated sequentially, especially in PVs.

Auto sector to experience healthy earnings growth in 3Q

On the back of a healthy recovery in volumes, auto OEM companies under our coverage (ex-JLR) are expected to post a strong 24% revenue growth. While input costs are likely to rise marginally QoQ (precious metals are up but likely to be partially offset by cooling steel prices), this impact is likely to be offset by operating leverage benefits and moderation of discounts. Aggregate EBITDA margin for our OEM coverage universe is estimated to rise marginally by 30bp YoY to 13.5%. In 3Q, major margin gains are expected for Escorts Kubota (+220bp YoY), HMIL (+150bp), TTMT CV (+100bp), and TVSL (+100bp). The key is that none of the auto OEMs are expected to see any meaningful margin decline on a YoY basis. As a result, we expect OEM companies (ex-JLR) under our coverage to record a strong 27% growth each in EBITDA/PAT.

Given the strong OE growth, auto ancillaries within our coverage universe are expected to post ~14% revenue growth. This is likely to lead to a strong 17%/20% growth in EBITDA/PAT for 3Q. Within auto ancillaries, all automobile based tyre companies under our coverage are expected to register healthy margin expansion given the lower input costs. Apart from these, we expect CRAFTSMA to post a 280bp margin expansion YoY over a low base. On the other hand, players like BKT (-180bp YoY) and SONACOMS (-240bp YoY) are likely to see margin pressure in 3Q.

Estimated hits and misses in 3QFY26

We expect our auto OEM coverage universe (ex-JLR) to post a 27% YoY growth in earnings. It is important to highlight that all listed OEMs (ex JLR) are anticipated to clock a healthy double-digit growth in earnings with the lowest being HMCL at 13% and the highest being TVS at 62%.

As highlighted above, our ancillary coverage universe is also expected to deliver healthy 20% YoY growth in earnings. Most of the auto ancillaries within our coverage are expected to record strong earnings growth. However, the few with relatively weak performance would include AMRJ (-5% YoY), BIL (-36%), BHFC (9%), and SONACOMS (+9%).

Moderate earnings revision expected in 3QFY26

Given the strong demand post-festive season, there has been a moderate upwards earnings revision for most of the OEMs under coverage, largely in single digits. For a few auto ANCs, there has been a need for earnings cuts as well. Within our coverage, players like APTY (-5% for FY26E) and BIL (-4%), SONACOMS (-4%) and Exide (-4%) have seen some earnings cut.

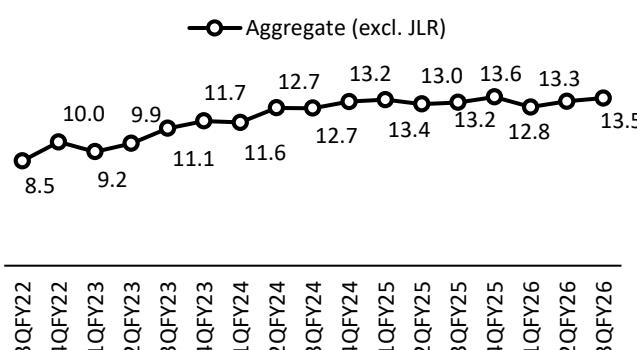

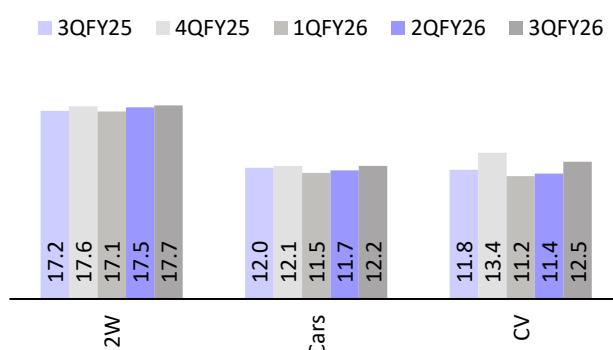

Post-festive season demand sustenance encouraging

Following the GST rationalization, demand has picked up across segments and seems to have remained intact even after the festive season. A notable trend is that entry-level vehicles, both 2Ws and PVs, are seeing a marked pickup in demand. Further, wholesales were strong in Dec, and retails were equally healthy across most segments. Thus, OEMs are likely to have ended 2025 with lean inventory. This would help them sustain the volume momentum in 4QFY26 as well. With a recovery in demand, we expect discounts (in the PV segment) to gradually reduce. MSIL is our top pick among auto OEMs, as its new launches and the current export momentum are likely to drive healthy earnings growth. We also like MM, given the uptrend in tractors and healthy growth in UVs. In 2Ws, we are positive on TVSL. In the auto ancillary space, our top picks are ENDU, HAPPY, and SAMIL.

- Total volumes grew ~10% YoY, supported by ~18% growth in exports even as domestic volumes grew ~3% YoY. While 2W sales grew 7% YoY, 3W sales were up ~23% YoY. On a QoQ basis, while the export mix has improved to 45.5% from 42.8%, the 3W mix has reduced to 15.6% from 17.4%.
- The key benefit for BJAUT in 3Q is expected to be favorable currency movement (INR depreciation)
- As a result, we expect margins to improve 40bp QoQ to 20.9%. Overall, we expect BJAUT to post 23% earnings growth YoY.

- RE has posted 21% YoY volume growth in 3Q (flat QoQ). On a QoQ basis, domestic sales rose to 91.3% from 89.7%.
- Exports have been weak due to uncertainty in markets like the US and Mexico.
- Management is expected to continue investing in the brand.
- As a result, margins are likely to remain stable QoQ.
- We expect VECV's margin to improve 180bp QoQ to 9.6%.
- Overall, we expect consol. PAT to grow 19% YoY for EIM.

- HMCL posted 13% YoY volume growth. On a QoQ basis, its mix has largely been stable
- Discounts were lower in the festive season. Further, HMCL has taken a 10% price hike on EVs from the first week of Dec'25.
- We expect margins to remain stable QoQ as we expect operating leverage benefits to be offset by higher input costs (precious metals) and higher ad spends.
- On the back of healthy volume growth, PAT is expected to grow 13% YoY in 3Q.

- MSIL posted a strong 18% YoY volume growth, led by the strong festive & marriage season, aided by the GST rate cut.
- UV mix surged to 33.5% from 28% QoQ. Also, export mix has declined 160bp QoQ to 15% due to logistics constraints.
- Led by operating leverage benefit and improved mix, we expect margins to improve by 110bp QoQ to 11.6% in 3Q.
- SMG is likely to be merged (no change at the EBIT level) in 3Q.
- We expect MSIL to post a 25% YoY PAT growth in 3Q.

- Hyundai posted a 5% YoY volume growth in 3Q. Exports mix has declined to 25% from 28% QoQ.
- On the positive front, discounts are lower QoQ, currency is favorable, and the full quarter benefits of incentives would help support margins.
- Negative factors to monitor are: 1) weak export mix, 2) start-up costs of the Pune plant, 3) input cost pressure, 4) higher promotional spending due to the Venue launch, and 5) higher depreciation of the new plant.
- As a result, we expect EBITDA margin to dip 110bp QoQ to 12.8%.

- India PV volumes grew 22% YoY, fueled by the strong festive and marriage season demand. Led by operating leverage benefits, we expect the India margin to improve 160bp QoQ to 7.3%.
- After the cyber incident in 2Q, we expect JLR to post a steady recovery in volumes (+18% QoQ). Given this, we expect JLR's margins to improve to 5.4%, from -1.6% QoQ.

- MM posted a strong 23% YoY growth in tractors as well as in PVs (incl. PiKUp).
- While auto volume growth has been strong, a few adverse factors to note are: 1) rising discounts QoQ, 2) adverse mix, and 3) rising input costs. As a result, we factor in marginal margin expansion QoQ for the Auto segment.
- For the tractor segment, we expect a 190bp margin expansion YoY to 20%.
- Other income for 3Q is likely to be boosted by gains from the RBL stake sale in 3Q.
- Overall, we expect MM to post strong 32% YoY growth in earnings in 3Q.

- We expect standalone revenue growth of 8% YoY (4% QoQ) led by healthy demand across all key segments.
- However, the India margins are likely to be hit by higher promotional spending. Apollo is now the brand sponsor for the Indian Cricket team. We factor in a 70bp QoQ margin impact on account of this.
- Demand in Europe continues to be weak with flattish RM basket QoQ.
- We expect Europe's margin to marginally dip YoY to 17.3%.

- Wholesale dispatches to the US have improved QoQ as the destocking prevalent in 2Q is now behind. Further, demand in other key regions appears to have broadly remained stable QoQ. Overall, we expect BKT to post a 2% YoY decline (+6% QoQ) in tonnage in 3Q.
- Reduced input costs, a favorable currency would be the margin tailwinds, while higher brand spending would weigh on the same.
- Margin is likely to improve 160bp QoQ over a low base to 23.1%.

- Demand has remained healthy across segments in Q3. While OEM demand has been strong in 3Q, even replacement demand has picked up post-GST rate cuts. Exports are also expected to remain strong in 3Q. We expect CEAT to post 24% revenue growth in 3Q.
- Input costs are likely to remain stable QoQ as benefits from the reduction in crude are likely to be offset by currency depreciation.
- Further, this quarter would see the full impact of Camso integration.

- One needs to note that Camso margins are likely to remain muted for 5-6 quarters till CEAT takes full control of distribution and also the supply chain.
- As a result, we expect marginal pressure on CEAT consolidated margins QoQ despite healthy performance from the India entity.
- Overall, PAT is likely to grow 96% YoY due to Camso integration, as well as over a low base.

- While EV demand in the US has been weak, SONACOMS' revenue is likely to grow QoQ due to a pick-up in demand from one of its key clients. Demand is likely to be driven by traction motors as well as the railway business. Revenue growth of 30% YoY is largely a function of the integration of the Railways division.

- Given a weak mix, we expect margins to remain under pressure – down 70bp QoQ to 24.6%.
- Overall, we expect the PAT for the core business to grow 9% YoY to INR1.7b.
