Today's top research idea

Indian Hotels: Resilient operating performance backed by diversification and scale

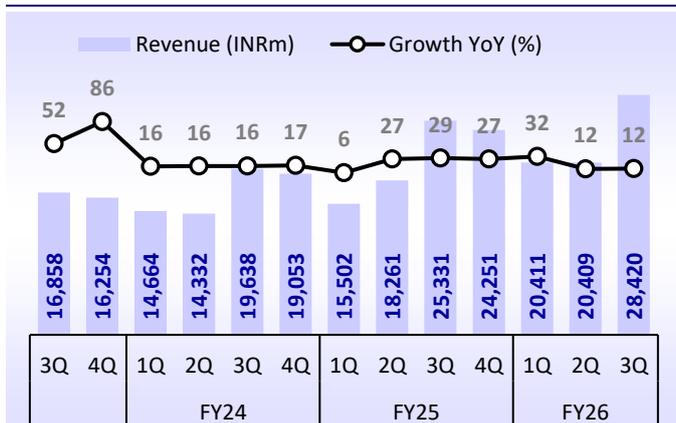

- ❖ Indian Hotels (IH) reported healthy consolidated revenue growth of 12% YoY in 3QFY26, led by growth in standalone business (up 9.5%). Subsidiaries business was up 16% YoY. The growth in standalone business was led by 13% growth in F&B and 6% growth in room revenue (ARR up 7%, OR flat). Higher F&B growth was led by increased MICE activity amid a wedding season and a higher number of events during the quarter.
- ❖ We expect the similar momentum to continue in 4Q, translating into double-digit revenue growth in 4Q. This is in line with management's medium-term guidance of double-digit revenue growth in FY26 and FY27. Key growth drivers will be the increase in MICE activities, new partnerships (such as ANK, Pride, Brij and Atmantan), and scale-up in new and reimagined brands. Moreover, IH has a pipeline of 30,200 keys (with 94% of the total pipeline being asset light), almost equal to its current operational keys of 32,300, thereby aiding higher profitability.
- ❖ We expect IH's performance to continue its uptrend and estimate a CAGR of 14%/18%/16% in revenue/EBITDA/adj. PAT over FY25-28. We broadly maintain our FY26/FY27/FY28 EBITDA estimates and reiterate BUY with our SoTP-based TP of INR900.

Operating performance in line with estimate

- Indian Hotels (IH) reported healthy consolidated revenue growth of 12% YoY in 3QFY26, led by growth in standalone business (up 9.5%). Subsidiaries business was up 16% YoY. The growth in standalone business was led by 13% growth in F&B and 6% growth in room revenue (ARR up 7%, OR flat). Higher F&B growth was led by increased MICE activity amid a wedding season and a higher number of events during the quarter.
- We expect the similar momentum to continue in 4Q, translating into double-digit revenue growth in 4Q. This is in line with management's medium-term guidance of double-digit revenue growth in FY26 and FY27.** Key growth drivers will be the increase in MICE activities, new partnerships (such as ANK, Pride, Brij and Atmantan), and scale-up in new and reimagined brands. Moreover, IH has a pipeline of 30,200 keys (with 94% of the total pipeline being asset light), almost equal to its current operational keys of 32,300, thereby aiding higher profitability.
- We expect IH's performance to continue its uptrend and estimate a CAGR of 14%/18%/16% in revenue/EBITDA/adj. PAT over FY25-28. We broadly maintain our FY26/FY27/FY28 EBITDA estimates and **reiterate BUY with our SoTP-based TP of INR900.**

Continued momentum across segments

- 3Q consolidated revenue/EBITDA/adj. PAT grew 12%/12%/20% YoY to INR28.4b/INR10.8b/INR6.9b (est. INR6.4b).
- Standalone revenue/EBITDA rose 9.5%/11% YoY to INR16.1b/INR7.5b, aided by an increase in ARR (up 7% YoY to INR21,900), while OR remained flat at 78.0%. F&B/other services/management fee incomes grew 12%/17%/11% YoY.
- For subsidiaries (consol. less standalone; including TajSATS), sales/EBITDA grew 16%/14% YoY to INR12.3b/INR3.2b. TajSATS revenue/EBITDA grew ~15%/15% YoY.
- International hotels performed better this quarter, with UOH/St. James' revenue growing 13%/19% YoY and EBITDA up 31%/flat.
- IH's new business verticals, comprising Ginger, Qmin, and amã Stays & Trails, grew 31% YoY to INR2.2b in 3QFY26.
- For 9MFY26, revenue/EBITDA/adj. PAT grew 17%/16%/11% to INR69b/INR22b/INR12b.
- Exceptional items of INR2.8b primarily included a profit of INR3.9b on the sale of its stake in Taj GVK, which was partially offset by new labor code impact of INR502m.

Highlights from the management commentary

- **International business:** The New York asset crossed INR1b in revenue for the first time in December, with improving profitability; therefore, the company intends to retain the asset with no exit plans. RevPAR rose 50% in San Francisco, while the London property is under renovation and is expected to reopen by Feb/Mar'26, providing a boost from 1QFY27. Currency movements benefitted RevPAR by 1.5-2%.
- **Taj Bandstand:** Excavation at the Taj Bandstand site has been underway for the past few months, with the tendering process currently in progress and development undergoing as planned. After stabilization, it is expected to generate ~INR10b in revenue and EBITDA margins of nearly 50%.
- **Atmantan (a luxury wellness resort):** The company plans to pursue a hybrid growth strategy, combining owned assets with select asset-light expansions. It plans to establish properties across key regions—West India, Kerala, Hyderabad, and North India—while maintaining healthy margins of ~40%. Each project typically requires 25-35 acres of land, along with strong transportation connectivity.

Valuation and view

- The outlook remains healthy for IH, led by strong traction in the core business as well as new and reimagined businesses.
- We expect the strong momentum to continue in the medium term, led by: 1) a strong room addition pipeline in owned/management hotels (5,940/24,630 rooms), 2) continued favorable demand-supply dynamics, and 3) increasing MICE activities in India.
- We broadly maintain our FY26/FY27/FY28 EBITDA estimates and **reiterate BUY with our SoTP-based TP of INR900.**

Total AUM scales a record high to touch INR81t; equity AUM moderates

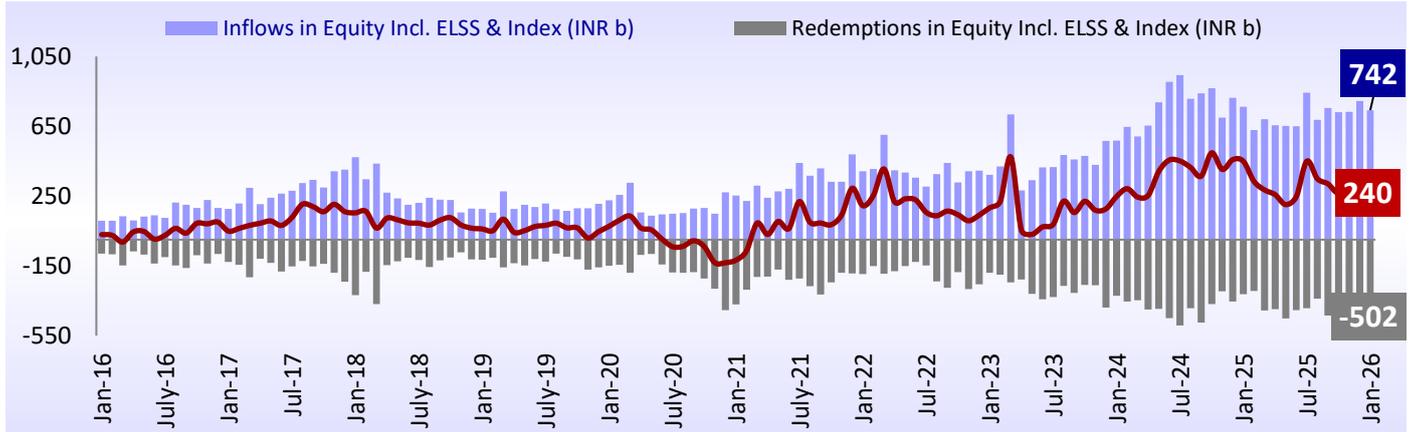

Key observations

- The Nifty ended 3.1% lower MoM at 25,321 in Jan'26 – the second consecutive month of a decline. Notably, with extreme volatility, the index hovered around ~1,453 points before closing 809 points lower. DII inflows into equities remain robust at USD7.6b in Jan'26. FIIs recorded their second consecutive month of outflows at USD3.3b in Jan'26.
- The MF industry's total AUM scaled new heights to touch INR81t in Jan'26 (+1% MoM), primarily led by a MoM rise in AUM for Gold ETFs (INR564b), liquid (INR474b), income (INR330b), and other ETF (INR308b) funds. Conversely, AUM of equity funds decreased INR912b MoM.
- Equity AUM of domestic MFs (including ELSS and index funds) decreased 2.3% MoM to INR38.1t in Jan'26, led by a fall in market indices (Nifty falling 3.1% MoM). Notably, sales of equity schemes dipped 6.8% MoM to INR742b. The pace of redemptions was up to INR502b (up 0.7% MoM). Consequently, net inflows moderated in Jan'26 to INR240b from INR298b in Dec'25.
- Investors continued to park their money in mutual funds. Inflows and contributions in systematic investment plans (SIPs) stood at INR310b in Jan'26 (flat MoM and +17.4% YoY).

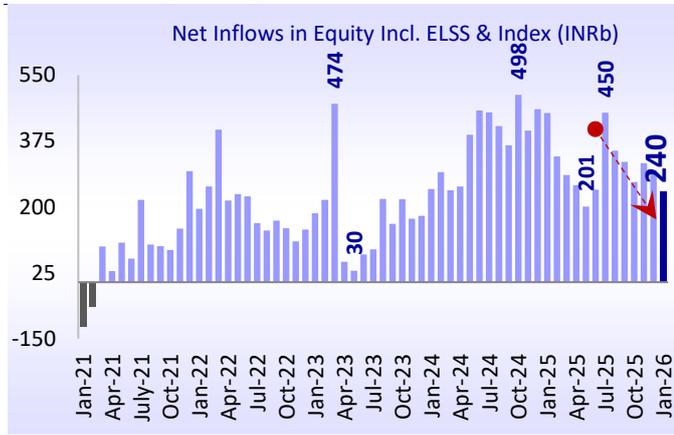

A few interesting facts

- The month witnessed notable changes in the sector and stock allocation of funds. On a MoM basis, the weights of Banks (Private & PSU), Utilities, Technology, Capital Goods, Metals, and Cement increased, while those of Consumer, Oil & Gas, Autos, Healthcare, NBFCs, Telecom, Retail, and Consumer Durables moderated.
- Private Banks' weight jumped to an eight-month high in Jan'26 to 18.2% (+60bp MoM; +110bp YoY)
- PSU Banks' weight surged to a three-year high in Jan'26 to 3.7% (+30bp MoM; +90bp YoY)
- Consumer's weight slipped to a nine-year low in Jan'26 to 5.6% (-30bp MoM; -50bp YoY)
- Oil & Gas' weight fell to 5.5% in Jan'26 – the lowest since Oct'15 (-30bp MoM; -50bp YoY)
- Automobiles' weight moderated in Jan'26 to 8.4% (-20bp MoM; flat YoY)
- The top sectors where MF ownership vs. the BSE 200 was at least 1% higher were Healthcare (14 funds over-owned), NBFCs (11 funds over-owned), Chemicals (10 funds over-owned), Capital Goods (9 funds over-owned), and Consumer Durables (9 funds over-owned).
- The top sectors where MF ownership vs. the BSE 200 was at least 1% lower were Oil & Gas (17 funds under-owned), Consumer (16 funds under-owned), Private Banks (15 funds under-owned), Utilities (13 funds under-owned), and Metals (12 funds under-owned).
- In terms of value increase MoM, divergent interests were visible within sectors: The top 10 stocks that witnessed the maximum rise in value were SBI (+INR96.6b), Axis Bank (+INR92.2b), ICICI Bank (+INR54.9b), Bharat Electronics (+INR52.5b), NTPC (+INR34.3b), Coal India (+INR30.8b), Biocon (+INR27.7b), Tata Steel (+INR27.5b), UltraTech (+INR20.5b), and BSE (+INR20.2b).

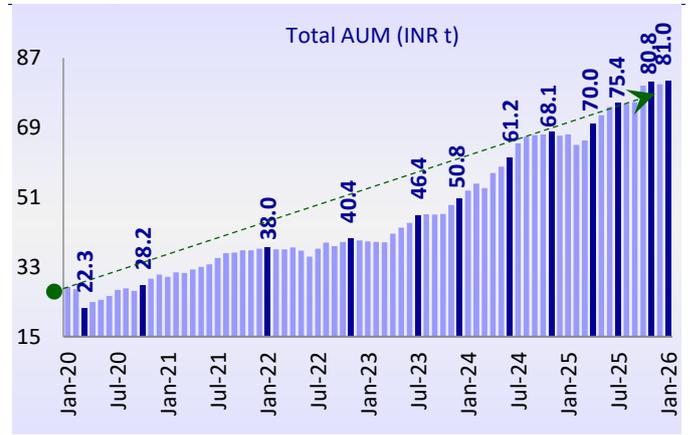

Monthly trends in sales, redemptions, and net amount raised by MFs (equity)

Net equity inflows continue to moderate for the second consecutive month in Jan'26, to an eight-month low

Total AUM scales new height in Jan'26 to INR81t (up 2.7x in the last five years)

Positive commentary for macros; expect better print in FY27

- Hindustan Unilever (HUVR) registered consolidated revenue growth of 6% (adjusted for the ice-cream demerger) at INR162.3b, compared to our expectation of 4%. Underlying volume growth was at 4% YoY (better than expected). October was impacted by the GST transition, which was offset by restocking in Nov/Dec. Hence, there was no impact of GST for the quarter. However, the company saw a steady improvement in demand, backed by supporting macros. This built confidence in a growth recovery in FY27, driven by macro recovery as well as portfolio and channel transformation initiatives.
- Gross margins for the quarter expanded 30bp YoY to 51.4% (in line). HUL expects mild RM inflation and will calibrate pricing actions accordingly. EBITDA margin in 3Q remained flat YoY at 23.7%. (est. 23.2%). HUL expects low single-digit pricing growth in FY27 and indicated that consolidated EBITDA margin would be within the current guidance range of ~23%.
- HUVR continues to remain focused on driving volume-led revenue growth, even if it comes at the expense of near-term margins. With various strategies underway across the portfolio and channels, management is optimistic about better operational performance in the coming quarters. The macro recovery pace and strategy execution of the new CEO will remain key monitorables. We reiterate our BUY rating on the stock with a TP of INR2,800 (55x on Dec'27E EPS).

In-line show with UVG at 4%

- **Slightly better UVG at 4%:** Net sales grew 6% YoY to INR162.3b (est. INR158.6b). Adjusted for the ice-cream demerger, the underlying revenue growth expectation was 4%. Underlying volume growth is at 4% YoY (est. 3% and flat in 2QFY26).
- **Home Care delivered mid-single-digit volume growth**, with revenue growing 3% YoY to INR58.9b. The category continued to witness a negative price impact due to pricing actions taken during the year. Fabric Wash delivered mid-single digit UVG. Liquids portfolio accelerated its growth momentum and grew in double digits. Household Care strengthened its double-digit UVG trend, led by Vim liquid. EBIT margin contracted 20bp YoY to 18.7%.
- **Beauty & Wellbeing segment witnessed low-single digit volume growth**, with revenue increasing 10.5% to INR39.3b. Hair Care saw volume-led double-digit growth. In Skin Care and Colour Cosmetics, the Winter portfolio delivered double-digit growth for the season. However, this was offset by a weaker performance in the non-winter portfolio. OZiva sustained its strong performance with double-digit growth. Minimalist continued to expand its skin and face portfolio. EBIT margin contracted 250bp YoY to 26.1%.
- **Personal Care saw low-single-digit decline in volumes**, while sales grew 6% YoY to 23.7b. Oral Care posted double-digit growth, driven by Closeup. Skin Cleansing saw mid-single-digit growth, led by pricing. Premiumization remained a key growth driver, as premium skin cleansing bars posted strong double-digit growth. Personal Care margin contracted 10bp YoY to 21%.

FII includes depository receipts

- **Food & Refreshment (F&R) delivered high-single-digit volume growth**, with sales growing 6% YoY at INR36b. Tea delivered mid-single-digit UVG, while revenue recorded low-single-digit growth, given price cuts taken in a deflationary RM environment. Coffee continued its strong double-digit growth momentum, supported by both price and volume. Lifestyle Nutrition grew in high single digits, driven by both Boost and Horlicks. Packaged Foods reported high single-digit growth, led by volumes. However, the Food & Refreshment segment margin contracted 120bp YoY to 21%.
- **EBITDA grew 6% YoY:** Gross margins for the quarter expanded 30bp YoY to 51.4% (est. 51.2%). Employee expense grew 13% YoY, while other expenses rose 8% YoY and ad spends rose 2% YoY. EBITDA margin remained flat YoY at 23.7% (est. 23.2%). EBITDA grew 6% YoY to INR39b (est. INR37.4b – adjusted with the ice-cream demerger). PBT grew 4% YoY to INR36.1b (est. INR34.3b), while PAT (bei) was flat YoY at INR26.2b (est. INR25.7b).
- Exceptional items for continuing operations include INR4.98b related to the fair valuation of financial liabilities arising from acquisitions, restructuring expenses of INR680m, acquisition and disposal-related costs of INR110m, and a profit of INR10m from the sale of property. We have also added INR1.13b as the impact of the new labor code under exceptional items.
- In accordance with Ind AS 10 ‘Distribution of Non-Cash Assets to Owners’, HUL has debited the fair value of the Ice Cream business to retained earnings, treating it as a dividend distribution to the shareholders of the holding company (HUL). The difference between the fair value and the carrying amount of the net assets of the ice cream business as at the effective date is recognized as a gain on demerger and disclosed as an exceptional item under discontinued operations, amounting to INR46.11b. Further, upon the scheme becoming effective, the investment made by HUL in KWIL stands cancelled.

Management conference call highlights

- In Home Care, pricing has remained benign, influenced by commodity trends and competitive pressures. Rising inflation in commodities has prompted the company to initiate calibrated price hikes in home care.
- **Management expects low-single-digit price growth for the full year in FY27. The guided FY27 revenue growth will be better than FY26.**
- Distributor and retailer pipeline levels have largely normalized following October destocking and November restocking; 3QFY26 should be considered as a normal quarter.
- Quick commerce is emerging as a structurally critical channel, currently contributing ~3% of sales and scaling rapidly.
- Minimalist and Oziva together form an INR11b business.
- Nutrition business saw its third consecutive quarter of positive growth. Boost is growing in double digits, while Horlicks is improving through price-pack corrections.

Valuation and view

- We largely maintain our estimates for FY26-FY28.
- HUVR remains focused on topline growth, backed by volume acceleration alongside new launches across categories and channels. The company has

unveiled its 'Unified India' strategy to lean the organization structure to accelerate decision making and execution.

- We expect supportive macroeconomic factors to act as a catalyst for boosting consumption sentiment. As a market leader in most staple categories, coupled with its strategic initiatives, HUVR is well-positioned to benefit the most. We model a 7%/9%/10% revenue, EBITDA, and APAT CAGR over FY26-28E. With various strategies underway, management is optimistic about stronger performance in the coming quarters. We believe HUVR is well-positioned to capitalize on its volume growth aspirations amid supportive macro drivers. We reiterate our BUY rating on the stock with a TP of INR2,800 (55x on Dec'27E EPS).

In-line quarter

Hindustan Aeronautics' (HAL) 3QFY26 revenue/PAT came in line with our estimates. With an estimated order book of ~INR2.3t to date, we expect this order book to propel manufacturing revenue from the current levels. With receipt of 5 engines from GE for Tejas Mk1A, HAL is ready to deliver these five aircraft during the year and is awaiting more engine deliveries to further scale up deliveries of Tejas Mk1A. HAL has not yet received any details regarding its participation in the AMCA project, where [media reports](#) suggested private sector participation. We cut our estimates by 4%/5%/5% for FY26/27/28 to bake in a slightly lower number of Tejas Mk1A deliveries and arrive at a revised TP of INR5,500 based on the average of DCF and 30x Mar'28E earnings. We maintain BUY on HAL. Tejas aircraft deliveries and execution of the manufacturing order book will be key drivers for the stock going forward.

Financials Snapshot (INR b)

BV/Sh. (INR)	619.6	727.0	870.3

In-line revenue and PAT

Revenue increased 11% YoY to INR77b, broadly in line with our estimate of INR79b. Gross margin expanded 280bp YoY to 53.6% vs. our estimate of 55%. Absolute EBITDA increased 11% YoY to INR19b, slightly below our estimate of INR20b, while margins were broadly flat YoY at 24.3% (+10bp YoY). Aided by higher other income and a lower tax rate, HAL's PAT increased 30% YoY to INR18.7b, in line with our estimate. For 9MFY26, revenue/EBIDAT/PAT increased 11%/9%/12% YoY to INR191b/47b/49b, while EBITDA margin contracted 40bp YoY to 24.6%. Employee expenses were higher than expected due to changes in gratuity ceilings by IDA. This has resulted in an increase in employee benefit expenses by INR3.3b for 9MFY26. Excluding that, adj. PAT for 9MFY26 increased 20% YoY to ~INR52.5b (7% ahead of estimate).

Update on the Tejas Mk1A project

HAL has received five F404 engines from GE to date and has successfully integrated them, enabling five LCA Mk1A aircraft to be readied for delivery. The company has identified and resolved all major design and development issues and is in active discussions with the Indian Air Force to commence deliveries at the earliest. An additional nine aircraft have already been built and flown, with their deliveries contingent upon further engine supplies from GE. GE has committed to delivering 24 engines in FY27, which is expected to significantly accelerate Tejas deliveries going forward.

FII includes depository receipts

Recent order wins

- **Dornier Aircraft:** The MoD, at the DAC meeting, signed an INR23b contract with HAL for the acquisition of eight Dornier-228 aircraft for the Indian Coast Guard, supporting domestic manufacturing, MSMEs, and long-term MRO and lifecycle support opportunities.
- **Dhruv NG:** In Jan'26, HAL signed a contract worth over INR18b with Pawan Hans for the supply of 10 indigenously developed Dhruv-NG helicopters, including spares and accessories, with execution scheduled by CY27 and civil certification expected within two to three months following its maiden flight on 30th Dec'25.

Recently announced DAC approvals

The DAC, in its meeting held today (12th Feb'25), accorded AoNs worth INR3.6t. This included an order for Air-Ship Based High-Altitude Pseudo Satellite (AS-HAPS). In Feb'22, the MoD had signed a deal with HAL for the development of the first prototype of the High-Altitude Pseudo Satellite (HAPS), a part of HAL's Combat Air Teaming System (CATS) program that is a combination of manned and unmanned systems. Given HAL's existing development mandate and prior contractual engagement in the HAPS domain, the latest AoN meaningfully strengthens its medium-term order visibility.

Steps towards increasing exports over the long term

HAL has invited consultancy firms through an Expression of Interest (EoI) to help build a structured export strategy for its aircraft and helicopter portfolio. This indicates HAL's strategic focus on expanding beyond domestic defense orders and developing overseas markets in regions such as Africa, Southeast Asia, and Latin America. The consultants are expected to identify potential customers, study local procurement systems, and help create long-term sales pipelines and partnerships. Over time, this initiative can help HAL diversify its revenue base, reduce dependence on Indian defense spending, and build a more stable, export-led growth model.

Other key developments for HAL

- On 6 Dec'25, the second mass-produced HTT-40 trainer aircraft made its first successful test flight from HAL's new factory in Nashik.
- DRDO completed a high-speed rocket-sled test of a fighter aircraft's emergency ejection system at 800 km/h in collaboration with the ADA and HAL.
- HAL has received four competitive bids from major industrial players to establish a 20,000-ton isothermal forging press facility, a strategic step toward building heavy forging capability for advanced aero-engine and defense components domestically and reducing reliance on imports.
- HAL has confirmed that its CATS Warrior combat drone program is progressing well and is expected to be ready in CY26 and plans to fly in CY27, strengthening India's indigenous unmanned combat capabilities.

Financial outlook

We cut our estimates 4%/5%/5% for FY26/27/28 to factor in a slightly lower number of Tejas Mk1A deliveries and expect the overall revenue to grow at a CAGR of 22% over FY25-28, primarily driven by a scale-up in manufacturing revenue. We expect EBITDA margin to remain strong at 29.1%/28.0%/26.8% for FY26/FY27/FY28, fueled by indigenization efforts taken by the company as well as lower provisions. With this, we expect PAT to register a 15% CAGR over FY25-28. With improving revenue and stable margins, we expect RoE/RoCE to remain comfortable, reaching 21.6%/22.1% by FY28.

Valuation and view

HAL is currently trading at 30.5x/27.3x/22.1x P/E on FY26E/FY27E/FY28E EPS. We **reiterate our BUY rating on the stock** with a revised TP of INR5,500 based on the average of DCF and 30x Mar'28E earnings.

Key risks and concerns

Key risks would include 1) slower-than-expected finalization of large platform orders, 2) further delays in deliveries of key components such as engines for Tejas Mk1A, 3) delays in payments from MoD, and 4) increased involvement of the private sector.

- Revenue for 3QFY26 came at INR349b (-5% YoY and +16% QoQ) against our est. of INR345b. The decline was mainly led by muted volume during this fiscal.
- Adj. EBITDA (excluding OBR exp) stood at INR100.7b (-12% YoY and +72% QoQ) against our estimate of INR92b in 3QFY26. The EBITDA/t improved to INR534 (-10% YoY and +52% QoQ) vs our estimate of INR492/t.
- APAT came in at INR89.2b (+5% YoY and +105% QoQ) against our est. of INR65b during the quarter. Strong operational performance, higher OBR credit and lower tax outgo drove sharp jump in APAT. The Board of Directors approved the upgradation of pay scales of executives (up to mid-level] across the Company. The financial impact arising from such upgradation is payable with effect from 23rd August 2023. The total estimated financial impact of the said upgradation amounting to INR22b has been included in the consolidated financial results, for the quarter. For like-to-like comparison, we have adjusted this as exceptional item.
- Production for 3QFY26 stood at 200.1mt (-1 YoY and +37% QoQ), and offtake stood at 188.7mt (-3% YoY and +14% QoQ).
- FSA revenue stood at INR248.5b (-4% YoY and +14% QoQ), with volumes at 165.1mt (-3% YoY and +12% QoQ) and ASP at INR1,505/t (flat YoY and +2% QoQ) during the quarter.
- E-auction revenue came in at INR48b (-8% YoY and +35% QoQ), with volumes at 19.5mt (+1% YoY and +27% QoQ) and realizations at INR2,435/t (-9% YoY and +6% QoQ), translating into a premium of 62% during the quarter (vs. 76% in 3QFY25).
- In 9MFY26, production and offtake volume stood at 529mt (-3% YoY) and 546mt (-3% YoY), respectively. Revenue and EBITDA declined 3% and 10% YoY to INR1,010b and INR270b, respectively, in 9MFY26. Meanwhile, Adj. PAT declined 15% YoY to INR220b in 9MFY26.
- The company declared a third interim dividend of INR5.50/share in 3QFY26, totaling to 21.25/share in 9MFY26

Valuation and view

- Coal India (COAL) delivered decent performance, mainly supported by volume recovery, where e-auction volumes accounted for ~10% of total volumes and premium stood at 62% in 3QFY26.
- For FY26, we increased our APAT estimates by 14% to incorporate the performance beat, while we maintained our FY27/28 estimates. Going forward, we believe e-auction volume and premium will recover, supported by demand recovery and depleting inventory at both mine and power plant levels.

- We expect COAL to clock a 2% volume CAGR over FY25-28. This is expected to translate into a CAGR of 6% in revenue/EBITDA, supported by the rising share of non-FSA and washed coal. The company's focus on increasing coal-washer capacity will improve its market share in domestic coking/non-coking coal. Further, management remains focused on expanding its coal mining operations, which will be funded through internal accruals. COAL may, however, consider raising debt to undertake strategic diversification projects such as RE facilities and coal gasification.
- At CMP, the stock is trading at 4.9x EV/EBITDA and 2.1x P/BV on FY27E. We reiterate our BUY rating with a TP of INR500 (premised on 5.5x EV/EBITDA on Sep'27 estimate).

CMP: INR964 TP: INR1110 (+15%) Buy

In-line performance; Novelis to remain overhang on earnings

Consolidated performance

- Consolidated net sales came in line at INR665b (+14% YoY and flat QoQ), driven by favorable pricing and a better product mix.
- Consolidated EBITDA stood at INR80b (in line with our estimate), rising 5% YoY, but declining 11% QoQ, primarily due to muted Novelis earnings amid lower shipments following the Oswego fire.
- Adj. PAT came in line at INR39b (+3% YoY), declining 20% QoQ, primarily led by weak earnings from the Novelis business.
- The company recorded an exceptional item related to repair, clean-up, and restoration expenses at the Oswego plant following the fire incident. The costs associated with the event (net of insurance proceeds) amounted to INR26b (USD291m) during the quarter.
- Consolidated net debt increased to INR595b as of Dec'25 from INR353b in Mar'25 and INR418b in Dec'24.

Aluminum business

- Upstream revenue stood at INR106b (+6% YoY) and EBITDA stood at INR48b (+14% YoY; USD1,572/t), driven by higher volume and favorable pricing in 3Q.
- Downstream revenue stood at INR39b (+22% YoY) on account of higher shipments and favorable pricing. Downstream EBITDA stood at INR2.3b (+55% YoY), led by a better product mix. This translated into EBITDA/t of USD241 (+35% YoY) in 3QFY26, compared to USD265 in 2QFY26.
- Upstream aluminum sales stood at 345kt (+2% YoY) and downstream aluminum sales stood at 108kt (+9% YoY) in 3QFY26.

Copper business

- Copper business revenue stood at INR182b (+33% YoY) on account of higher average copper prices.
- EBITDA for the copper business came at INR6b in 3QFY26, down 23% YoY, led by a sharp decline in TC/RCs.
- Copper metal sales stood at 122kt (+1% YoY) in 3QFY26, and CCR sales were at 82kt, down 14% YoY, primarily due to a weaker domestic market amid higher LME and elevated channel inventories.

Novelis - 3QFY26 result update

- Revenue was largely in line at USD4.2b, rising 3% YoY due to healthy NSR, but declined 12% QoQ over muted shipments.
- NSR stood at USD5,174/t (+15% YoY and +3% QoQ), supported by favorable aluminum prices. Total rolled product shipments stood at 809kt, down 11% YoY and 14% QoQ, primarily due to a shipment disruption of 72kt at Oswego following the fire incident (guided ~75kt earlier). Shipments (excl. fire impact) declined 3% YoY, largely due to underlying muted demand.

Others	9.0	8.3	8.3

FII includes depository receipts

- Adj. EBITDA declined 5% YoY and 18% QoQ to USD348m (our est. USD320m) due to an adverse shipment impact of USD54m following the Oswego fire and tariff impact of USD34m. The beat on adj. EBITDA was mainly driven by lower-than-anticipated impact from the Oswego fire and tariff of USD100m.
- Adjusted EBITDA/t stood at USD430 (our est. USD380), up 6% YoY/down 4% QoQ. Adjusted EBITDA/t (excl. tariffs and Oswego fire-led shipment impact) stood at USD495.
- The company reported a net loss of USD160m, which included an exceptional item of USD286m. The exceptional item consisted of USD327m related to the Oswego fire losses/net recoveries and USD86m related to others, partially offset by a metal price lag of USD127. Adj. PAT stood largely in line with our estimate at USD69m, down 45% YoY and 53% QoQ.

Highlights from the management commentary

- India Aluminum (Upstream) CoP is expected to rise ~1% QoQ, primarily due to higher CP Coke (anode) prices amid China supply-demand tightness.
- Novelis' cost to serve is expected to remain elevated, in line with 3Q levels, due to increased external slab sourcing and supply chain reorientation, though Midwest premium arbitrage could provide some offset.
- Consolidated net debt/EBITDA stood at 1.73x. Management targets to keep it below the threshold of 2x. Net debt increased ~INR240b during 9MFY26, largely driven by Novelis' negative FCF (capex + working capital + fire impact) and working capital build-up of ~INR40b due to higher copper concentrate inventory.
- AV Minerals raised USD800m at SOFR + 105bp (five-year tenure) to fund higher Bay Minette costs. The weighted average cost of Novelis debt stands at ~5.3%, while the cost of capital is in the mid-8% range.
- 4QFY26 aluminum hedging: 64% commodity hedged at USD2,807/t and 26% currency hedged at INR88.18/USD. For FY27, the aluminum hedging stood at 21% at USD2,925/t and targets to achieve ~25% at USD3,000/t.

Valuation and view

- HNDL posted in-line consolidated performance in 3QFY26. Earnings growth was primarily driven by favorable pricing. Going forward, the strong earnings outlook for the Indian business will remain intact. However, the overall Hindalco business outlook has weakened following the Oswego fire incident and the Bay Minette project cost escalation to USD5b from USD4.1b.
- Novelis' volumes are expected to decline 150-200kt, with an FCF impact of USD1.3-1.6b (incl. an EBITDA impact of USD150-200m till 2QFY27), which erodes near-term earnings visibility and stretches the working capital. Management expects to recover ~70-80% via insurance in the next 18-24 months in a phased manner.
- We maintain our consolidated earnings, supported by a strong domestic business outlook, offsetting the muted Novelis profitability for FY26-27E.
- **At CMP, the stock trades at 7.4x EV/EBITDA and 1.7x P/B on FY27E. We reiterate our BUY rating on HNDL with an SoTP-based TP of INR1,110.**

Others	3.8	3.7	3.4

FII includes depository receipts

- **Stellar gold loan growth of ~50% YoY; calc. NIM stable QoQ**
- Muthoot Finance's (MUTH) strong operating performance in 3QFY26 was driven by: 1) robust gold loan growth of ~50% YoY to ~INR1.4t, 2) ~65bp QoQ improvement in GS3 to 1.6%, aided by NPA recoveries, and 3) spread expansion of 5bp QoQ to 11.85% as yields rose owing to NPA recoveries.
- PAT grew 95% YoY and 13% QoQ to ~INR26.6b (~23% beat). This included one-off interest income of ~INR6.5b – INR5b of interest on legacy NPA accounts, INR1.2b from gold loan auctions and INR240m from ARC sale. The yield improvement was mainly driven by the one-off item in interest income. Adjusted yields stood at 18.8% (vs. calculated yields of 20.7%). Reported RoA/RoE remained strong at 7.6%/32%.
- Net total income grew 66% YoY to ~INR46.2b (~16% beat). Opex grew ~28% YoY to INR9.2b (in line), resulting in a cost-to-income ratio of ~20% (PY: 26% and PQ: 21.3%). This included one-time impact of provisions of INR480m made on account of the new labor codes. PPOP grew 79% YoY to ~INR37b (~21% beat).
- Provisions stood at ~INR1.1b and translated into annualized credit costs of ~32bp in 3QFY26 [PY: ~90bp and PQ: ~35bp].
- Gold tonnage declined ~2% QoQ and grew ~1.5% YoY to 205 tons. The customer base declined ~0.6% QoQ to ~6.53m. Gold loan LTV declined ~75pp QoQ to ~55.8%.
- Management shared that gold loan growth is driven by customer need for liquidity rather than gold price movements. Additionally, with unsecured and MFI credit tightening, borrowers are increasingly shifting to gold-backed loans as a dependable source of funding.
- We believe gold loan growth will remain strong over the next few quarters, supported by elevated gold prices and continued tightening in unsecured credit, which is pushing borrowers toward secured, gold-backed financing. As the market leader among NBFCs, MUTH is well placed to capture a disproportionate share of this incremental demand and should continue to outpace peers. While the operating outlook remains favorable, volatility in gold prices remains a key monitorable, as sharp movements could influence customer behavior, collateral cover and short-term disbursement trends.
- We raise our FY26/FY27/FY28 EPS estimates by ~12%/9%/7% to factor in higher loan growth and stable recoveries from the NPA pool. We model a standalone AUM/PAT CAGR of ~18%/14% over FY26E-28E. We model RoA/RoE of 5.4%/24% by FY28E.
- MUTH now trades at 3.5x FY27E P/BV and 14x P/E and, in our view, has benefited from the tailwinds of: 1) a sharp rise in gold prices, and 2) an improvement in gold loan demand due to the industry-wide rationing in unsecured credit. With its ability to deliver industry-leading gold loan growth and best-in-class profitability, MUTH is one of the best franchises for gold loans in the country. **Maintain our Neutral rating with a revised TP of INR4,500 (based on 3.3x Dec'27E P/BV).**

Belstar: AUM up 2.5% QoQ; GNPA rises ~35bp QoQ

- MUTH's MFI subsidiary (Belstar) AUM declined 9% YoY and grew ~2.5% QoQ to ~INR79b. Belstar reported PAT of ~INR510m during the quarter (vs. a loss of INR316m in 2QFY26).
- GS3 in Belstar rose ~35bp QoQ to ~4.95% (PQ: 4.6%). The company opened 39 new gold loan branches in 9MFY26 to diversify the portfolio.

Highlights from the management commentary

- The RBI's draft proposal to eliminate the requirement for prior approval for branch openings is significantly positive. The company currently operates around 5k branches under Muthoot Finance and 1k under Muthoot Money, and plans to pursue calibrated network expansion based on business conditions.
- The company follows a customer-friendly approach and does not aggressively auction gold, often giving customers time to repay before triggering auction.
- Opex has risen due to higher employee costs, variable pay linked to business growth, rent increases, regulatory compliance costs, advertising and external consulting expenses.

Valuation and view

- MUTH reported a strong operating performance for the quarter, driven by sustained momentum in gold loan growth and higher-than-expected earnings supported by recoveries from the NPA pool and gold loan auctions. Excluding recoveries from the NPA pool, earnings were broadly in line during the quarter. Asset quality improved due to auctions and old NPA customers repaying their gold loans. NIMs and spreads were broadly stable in the quarter.
- With a favorable demand outlook for gold loans, driven by the limited availability of unsecured credit, the company is well-positioned to maintain its healthy loan growth momentum. **Maintain our Neutral rating with a revised TP of INR4,500 (based on 3.3x Dec'27E BVPS).**

- LG Electronics India (LGEIL)'s 3Q revenue declined ~6% YoY to INR41.1b (in line), while EBITDA declined ~39% YoY to INR2.1b (~23% miss, due to weak performance in the home appliance segment). OPM contracted 2.7pp YoY to 5.1% (est. 6.5%). Adj. PAT declined ~50% YoY to INR1.2b (~37% miss due to higher depreciation/interest and lower other income).
- LGEIL indicated that in 3Q, margin pressure was temporary due to seasonal revenue softness, operating deleverage in compressor-based products, higher raw material costs, and currency depreciation. However, strong traction is being seen in 4Q, and revenue growth should be in double digits, with the margin better than the same quarter last year. LGEIL's FY26 guidance remains early single-digit revenue growth with double-digit margins, while FY27 is projected to achieve double-digit revenue growth with margins reverting to FY25 levels. Further, LGEIL's target is to double export revenue in FY27E; currently, exports contribute ~6-7% of its revenue.
- We maintain our EPS estimates for FY26-FY28. The stock trades at 44x/37x FY27/FY28E EPS. We value LGEIL at 45x FY28E EPS to arrive at our TP of INR1,770. **Reiterate BUY.**

Revenue declines ~6% YoY; OPM contracts 2.7pp to 5.1% (est. 6.5%)

- LGEIL's consol. revenue/EBITDA/adj. PAT stood at INR41.1b/INR2.1b/INR1.2b (-6%/-39%/-50% YoY; -2%/-23%/-37% QoQ). OPM contracted 2.7pp YoY to 5.1% (vs. est. 6.5%) in 3QFY26. Depreciation and interest costs rose 23%/9% YoY, while other income declined ~4% YoY.
- Segmental highlights: **a) Home Appliances & Air Solutions (H&A)** revenue declined 10% YoY to INR27.9b, and EBIT declined 49% YoY to INR1.1b. EBIT margin dipped 3.1pp YoY to 4.0% (vs. est. 6.5%); **b) Home Entertainment (HE)** revenue inched up ~2% YoY to INR13.3b. EBIT declined 28% YoY to INR1.3b. EBIT margin contracted 3.9pp YoY to 9.6%.
- In 9MFY26, LGEIL's revenue/EBITDA/PAT stood at INR165.5b/INR14.7b/INR10.2b, declining ~2%/28%/30% YoY. OPM contracted 3.3pp YoY to 8.9% for the period.

Key highlights from the management commentary

- Management highlighted a strong start to 4Q with a broad-based demand recovery, mainly in home appliances, supported by new BEE norms and premium product traction.
- The home appliances and air solutions segment maintained category leadership, with YTD Dec'25 market share at ~33% in washing machines, ~30% in refrigerators, and ~17.3% in RACs. Side-by-side refrigerator share improved to ~43.3%, reinforcing premium leadership.
- The company secured INR7.1b in incentive support from the Maharashtra government. This will be realized over 15 years from May'25, with ~INR430m expected to be accounted for in FY26.

Valuation and view

- LGEIL's 3QFY26 earnings were below our estimate due to margin pressure and softening in consumer demand post-festive season. However, looking ahead, management indicated that the implementation of new norms is accelerating replacement demand and driving recovery across appliance categories. The industry outlook remains constructive, led by rising preference for premium, energy-efficient products, while low penetration levels continue to offer volume-led growth opportunities.
- We estimate LGEIL's revenue/EBITDA/PAT CAGR at 10%/20%/21% over FY26-28. We estimate the H&A segment's revenue CAGR of ~11% over FY26-28E and margin at ~12%/13% in FY27/FY28 vs. ~11% in FY26E. The HE segment's revenue CAGR of ~8% over FY26-28, and the margin is projected at ~14%/16% in FY27/FY28 vs. ~13% in FY26E. The stock trades reasonably at 44x/38x FY27/FY28E EPS. We value LGEIL at 45x FY28E EPS to arrive at our TP of INR1,770. **Reiterate BUY.**

US Class8 appears to have bottomed out

GST rate cut helps drive domestic auto revival

- Bharat Forge's (BHFC) standalone adjusted earnings at INR3.2b came 14.7% below our estimate due to lower-than-expected margins. Margins were impacted by weak exports, adverse mix and increase in tariff costs in Q3.
- The GST rate cut has helped revive the domestic auto business, which augurs well for BHFC. Further, the US Class8 cycle appears to have bottomed out, with early signs of revival. Defense, aerospace, and JSA are likely to remain key growth drivers for BHFC over the coming years. Given its improved outlook, we have raised our FY26-27E EPS by 10%/8%. We now expect BHFC to post a 15%/17%/31% CAGR in revenue/EBITDA/PAT over FY25-28E. However, following the recent rally in the stock, most positives seem to be factored in (valuation now at 44.7x FY27E and 36.2x FY28E). Reiterate Neutral with a TP of INR1,597 per share (valued at 35x Dec-27 EPS).

Earnings below estimates due to weak demand and adverse mix

- Standalone revenue was flat YoY at INR20.8b (largely in line with estimates). Volumes in 3Q declined 6% YoY to 57,859MT, while realizations grew 7% YoY to INR360/kg, driven by a higher non-auto mix.
- Auto revenue declined 18.5% YoY to INR8.7b (8.5% below est), and contribution fell to 41.7% vs 51% in 3QFY25 and 46% in 2QFY26. Meanwhile, non-auto revenue grew 18% YoY to INR12.1b (in line) and contribution touched 58.3%.
- Export revenues declined 20.8% YoY to INR9.1b on account of lower production and inventory de-stocking in the CV segment in North America, as North America CV revenue declined 51% YoY.
- On the other hand, domestic CV revenues were strong, driven by higher production volumes across OEMs in 3Q, as the benefits of GST rate cuts percolated into lower TCO for end-users. Overall, domestic revenues grew 24% YoY to INR11.7b
- Standalone EBITDA margin contracted 190bp YoY to 27.2% vs est of 29.6%, due to weak demand, adverse mix, and increase in tariff costs. As a result, EBITDA declined 7% YoY to INR5.7b (vs est of INR6.3b).
- Overall, adjusted PAT (adjusted for INR487m on account of labor code changes) declined 7% YoY to INR3.2b (15% below estimates).
- Consolidated revenue grew 25% YoY to INR43.4b, led by the integration of K-mobility. Consolidated EBITDA stood at INR7.5b, up 20% YoY.
- Consolidated margins contracted 70bp YoY at 17.3%.
- Overseas subsidiaries' margins expanded to 3.8% in 3Q from 0.3% YoY, led by improved utilization. Europe subsidiaries' margin expanded 320bp YoY to 4.3%, and US subsidiaries' margin surged to 2.7% (from a loss in 3QFY25).

Highlights from the management interaction

- BHFC secured orders worth INR23.9b in 3Q, with INR18.7b coming from defense, INR3.8b coming from components, INR780m from castings, and INR550m from K mobility. The defense order book as of Dec'25 stood at INR111b.
- According to management, the worst seems to be behind in both the domestic and export markets across segments.
- The implementation of GST has boosted domestic auto demand, leading to a healthy uptick across segments.
- The US CV market seems to be bottoming out with early signs of recovery visible, given higher order intake in the last couple of months.
- Regarding the India-US deal, while the fine print is awaited, it removes uncertainty between the two trading partners, thereby facilitating the long-term resumption of trade.
- Standalone Net D/E at the end of 3QFY26 stood at 0.15x, and management aims to close the year with long-term debt of INR6b.

Valuation and view

The GST rate cut has helped revive the domestic auto business, which augurs well for BHFC. Further, the US Class8 cycle appears to have bottomed out, with early signs of revival. Defense, aerospace, and JSA are likely to remain the key growth drivers for BHFC in the coming years. Given its improved outlook, we have raised our FY26-27E EPS by 10%/8%. We now expect BHFC to post a 15%/17%/31% CAGR in revenue/EBITDA/PAT over FY25-28E. However, following the recent rally in the stock, most positives seem to be factored in (valuation now at 44.7x FY27E and 36.2x FY28E). Reiterate Neutral with a TP of INR1,597 per share (valued at 35x Dec-27 EPS).

FII includes depository receipts

- Axis Max Life Insurance's (MAXLIFE) APE grew 30% YoY to INR27.3b (11% beat due to better-than-expected APE for Dec'25). For 9MFY26, APE grew 21% YoY to INR69.1b.
- MAXLIFE's VNB rose 35% YoY to INR6.6b (12% beat), resulting in a VNB margin of 24.1% (MOFSLe: 24%) vs. 23.2% in 3QFY25. For 9M, VNB grew 30% YoY to INR16.3b, reflecting a VNB margin of 23.6% (21.9% in 9MFY25).
- EV at the end of 9MFY26 stood at INR281.1b, reflecting an annualized operating RoEV of 16.9% (17.3% in 9MFY25).
- The management aims to sustain 300–500bp faster growth than the industry, with better growth likely for FY26 than what was guided earlier (15-17%). 1/3 of the GST impact (300-350bp) has been mitigated in 3QFY26, with full mitigation expected in the next few quarters.
- We raise our APE estimates by 4% each in FY26/FY27/FY28, considering the 3Q performance and strong growth in Jan'26. Our VNB margin estimate remains intact. **We reiterate our BUY rating on the stock with a TP of INR2,200, premised on 2.2x FY28E EV.**

Product mix shift from ULIP to traditional

- Gross premium income grew 18% YoY to INR97b (in line). Renewal premium grew 16% YoY to INR60.5b (in line). The stable growth momentum drove market share expansion to 9.8% during 9MFY26 from 9.3% in 9MFY25.
- VNB margin expansion of 90bp YoY was largely driven by a product mix shift in 3QFY26, with non-par savings contribution increasing to ~29% (~26% in 3QFY25) and protection contribution rising to ~17% (~14% in 3QFY25), while ULIP contribution declined to ~37% (~45% in 3QFY25).
- The high-margin protection and health segments witnessed an APE growth of 57% YoY during 9MFY26 to INR9.3b, with rider APE growing 95% YoY. Annuity APE posted 107% YoY growth to INR6.3b during 9MFY26. Group credit life continues to witness recovery, growing 45% YoY in 3QFY26.
- MAXLIFE launched the Online Savings Plan Plus and Corporate Advantage in Retirement and Employee Benefit Smart Plan during the quarter.
- On the distribution front, the proprietary channel maintains strong growth momentum, growing 29% YoY during 9MFY26. For the quarter, offline APE witnessed growth of 43% YoY, while online APE witnessed strong 75% YoY growth. The partnership channel grew 13% YoY during 9MFY26, driven by the scaling of new bank partnerships. Axis channel witnessed 7% YoY growth, while other banks experienced 47% YoY growth in 3QFY26.
- The opex-to-GWP ratio increased 90bp YoY to 15.8% during 9MFY26.
- Persistency on the premium basis rose across long-term cohorts, especially in the 25th-month (+400bp YoY to 76%) and 61st-month (+300bp YoY to 56%). However, the 13th-month persistency dipped 200bp YoY to 85%.
- AUM grew 12% YoY to INR1.93t. The solvency ratio stood at 201% in 9MFY26 vs. 196% in 9MFY25.

Key highlights from the management commentary

- Focus remains on maintaining strong growth while keeping the VNB margin at ~25%. Any excess margin will be invested back in the business for distribution scale-up and further process enhancements.
- With respect to product-level margins, Par margins have been stable while Protection margins are improving. Non-par savings margins have been under some pressure post surrender regulations, while ULIP margins are improving due to higher sum assured. Credit life margins have been stable.
- Apart from large bank partnerships (Axis Bank and Yes Bank), MAXLIFE has also achieved the highest counter share in some of the new bank partnerships. Agency channel performance improved meaningfully in 3QFY26, positioning the same on the top among peers after a gap of several years.

Valuation and view

- MAXLIFE maintains a better-than-industry APE growth trajectory. VNB margin continues to witness YoY expansion, supported by strong APE growth and increased contribution of protection and non-par segments during 3QFY26. The proprietary channel continues to drive growth across offline (+43% YoY) and online channels (+75% YoY), while the bancassurance channel posted strong growth in non-Axis partnerships (+47% YoY). The persistency trends improved across almost all cohorts.
- We raise our APE estimates by 4% each in FY26/FY27/FY28, considering the 3Q performance and strong growth in Jan'26. Our VNB margin estimate remains intact. **We reiterate our BUY rating on the stock with a TP of INR2,200, premised on 2.2x FY28E EV.**

Stock performance (one-year)

Growth visibility improves; volume ramp-up to unlock value

We recently met with Dalmia Bharat's (DALBHARA) management to understand current industry demand, pricing environment and the company's growth plans. Management noted that overall cement demand momentum is strong. Regionally, the east is subdued amid weak demand in West Bengal and Jharkhand and slow project execution in Odisha. South and northeast are performing better. On pricing, after a sharp correction in 3Q, recent hikes of INR5-15/bag (trade) and INR10-15/bag (non-trade) have been observed. The company is targeting cost savings of INR150-200/t, with INR45-50/t having already been achieved and a further INR50-100/t expected over the next 12-18 months. The company's expansion remains firmly on track, with new clinker capacity commissioned in the northeast, and the large-scale expansion in the south region is expected to increase clinker/grinding capacity to 34.3mtpa/61.5mtpa by 1HFY28. Over the past two years, muted volumes, weak profitability, and uncertainty around the JPA acquisition weighed on stock performance. With clarity on expansions, capacity utilization and profitability improvement, there is potential for further re-rating. The stock currently trades at 12x/11x FY27/FY28E EV/EBITDA. We value the stock at 13x FY28E EV/EBITDA to arrive at our TP of INR2,570. Reiterate BUY.

Divergent regional trends – East lags, south and northeast drive growth

- Regionally, the east continues to face challenges in cement demand. West Bengal remains weak due to election-related disruptions, while Jharkhand demand has also been soft. Odisha witnessed a weak 1HFY26, largely due to delays in project execution, although the infrastructure pipeline remains large, and execution has yet to meaningfully pick up. Over the last two to three years, cement demand growth in the east has been limited to ~4-5%.
- In contrast, the south is performing materially better, with stronger demand traction and improving market conditions. The northeast has also emerged as a relatively bright spot, with demand trends improving over the last 3-4 years. In northeast, DALBHARA and Star Cement together command over 50% market share in the region. Moreover, budgetary allocation toward infrastructure is higher in the northeast, alongside the emergence of new industries, making it a structurally promising market over the medium term.
- Over FY24-26E, DALBHARA's estimated volume CAGR is ~3% vs. the industry CAGR of ~5-6%. Consequently, the company's capacity utilization dropped to ~61-62% vs. ~70% over FY19-24. In the past two years, the company has undergone leadership restructuring and appointed Mr. Navin Tewari as Chief Marketing Officer. In the east region, it has lost market share due to changes in its marketing strategy.
- The company is now focusing on ramping up volume growth in its key markets, actively strengthening its dealer and distribution network by increasing dealer engagements and investing in brand-building. We believe the company's volume should improve and we estimate a volume CAGR of ~7% over FY26-28. Average capacity utilization remains range-bound at ~60-62% mainly due to the addition of new capacity during that period.

Expansions on track; remains among the top-four cement players in India

- Earlier in 4QFY25, DALBHARA commissioned 2.4mtpa grinding capacity at Lanka, Assam. It has recently commissioned 3.6mtpa clinker capacity at Umrangso, Assam. Now the company has excess clinker capacity, which can be converted into 1.0-1.5mtpa cement in the northeast. It is evaluating options to add additional grinding capacity in the northeast to utilize excess clinker.
- Apart from that, the company announced a strategic expansion in the south region – 1) clinker/grinding capacity of 3.6mtpa/3.0mtpa at its Belgaum, Karnataka plant, along with a 3.0mtpa greenfield grinding unit in Pune, likely to be completed in FY27; and 2) clinker/grinding capacity of 3.6mtpa/6.0mtpa at its Kadapa plant in Andhra Pradesh (alongside a 3mtpa bulk terminal in Chennai to deepen its access to the North Tamil Nadu market), to be completed in 1HFY28. Total estimated capex for these expansions in the south region is ~INR68.1b (capex cost of USD63/t).
- Following these expansions, the company's clinker/grinding capacity will surge to 34.3mtpa/61.5mtpa by 1HFY28 vs. 27.1mtpa/49.5mtpa currently (registering grinding capacity CAGR of ~12%). Moreover, to diversify its geographic footprint and become a pan-India player, the company is planning to set up facilities in the north and central regions. Within that, it has prioritized a greenfield expansion in Jaisalmer, Rajasthan. While other project-related work is going as per the plans (land acquisitions, EC application, etc.), it is likely to announce expansion in the coming months, after board approvals. Given the company's expansion plans, we believe it will continue to be among the top-four cement companies in India (in terms of cement capacity).

Cost efforts continuing; price hike sustainability remains vital

- The company is targeting a cost reduction of INR150–200/t, with INR45-50/t having been achieved in the past six quarters, supported by higher RE share, logistics cost optimization and higher clinker conversion ratio. A part of the benefit was offset by the levy of additional mineral tax by Tamil Nadu. Fuel cost is also trending favorably so far, as the company is sourcing domestic petcoke (in its fuel mix), which is cheaper than imported petcoke. It does not expect the recent rise in fuel prices to impact near-term performance, given low-cost inventory.
- It expects further cost savings of INR50-100/t in the next one-and-a-half years by ramping up green power share to 60% by FY27 from 48% currently, improving clinker conversion ratio by producing more blended cement (~80% currently), and increasing alternative fuel share. On logistics side, it has a lower lead distance of 270-280km vs. industry average of ~350km, and it is scaling up direct dispatches, reducing handling costs, improving fleet utilization and streamlining warehousing to reduce overall freight cost/t.
- While cement prices fell in 3QFY26 beyond the GST rate cut, our recent channel checks suggest a price hike of INR5-15/bag in trade segment and INR10-15/bag in non-trade segment across regions. Cement prices remained highly volatile in the company's core markets (east and south) due to high competitive intensity. The near-term pricing outlook remains difficult to predict; however, the medium

term outlook for pricing remains positive, supported by increased consolidation, rising entry barriers, and steady capacity utilization of ~70% at the all-India level.

Valuation and view

- Over the past two years, muted volume growth and weak profitability, coupled with limited visibility on the expansion roadmap amid the pending JPA cement acquisition, acted as key overhangs on the stock's performance. While the stock witnessed an initial re-rating following the announced south expansion and exit from the JPA acquisition race, we believe there is a potential for further re-rating, driven by improving capacity utilization and a recovery in profitability.
- We estimate a CAGR of 9%/14%/9% in revenue/EBITDA/PAT over FY26-28. We estimate a volume CAGR of ~7% over FY26-28E and EBITDA/t of INR1,079/INR1,142 in FY27E/FY28E vs. INR1,019 in FY26E (avg. EBITDA/t of INR1,013 over FY21-25). The company's net debt is estimated to rise to INR37.3b by FY28 from INR15.6b in FY26E. Its net debt-to-EBITDA ratio is estimated at 0.9x vs. 0.5x in FY26E.
- The stock currently trades at 12x/11x FY27/FY28E EV/EBITDA. We value the stock at 13x FY28E EV/EBITDA to arrive at our TP of INR2,570. **Reiterate BUY.**

Buy

Retains strong performance

Kirloskar Oil Engines' (KOEL) 3QFY26 revenue, adjusted for the transfer of its B2C division, was once again ahead of our expectations, driven by strong growth in the powergen, industrial, and export segments. The company is benefitting from strong growth in both LHP and HHP segments, followed by industrial segment. Over the next few years, we expect KOEL to gain from 1) incremental sales from HHP too in overall powergen segment, 2) further ramp-up in industrial segment from large orders won in previous years in nuclear and defense segments, 3) CPCB 4+ products coming up for warranty renewal, which can ramp up distribution segment growth, and 4) further penetration in export markets. This improved revenue mix can result in margin improvement from current levels, with B2C too now being transferred from standalone business. We incorporate the transfer of B2C segment to its subsidiary and cut our EPS estimates by 6%/9%/3% for FY26/27/28. We increase our core business multiple for KOEL from 25x to 28x after we reduce the discounting vs. the market leader as KOEL has been continuously gaining market share. We arrive at a revised SoTP-based TP of INR1,600 on Mar'28E EPS. Retain BUY.

Strong performance for B2B

The company completed the transfer of its B2C segment to its wholly owned subsidiary through a slump sale. As a result, YoY growth rates are not comparable. On restated financials, revenue grew 35% YoY to INR13.8b, reflecting an entirely B2B revenue base and coming in ~10% ahead of our estimated B2B revenue of INR12.7b. Gross margin declined by 40bp YoY and 50bp QoQ, and EBITDA margin stood at 12.2% in 3QFY26 vs. 10.3% in 3QFY25 (restated) and 14.0% in 2QFY26, with the sequential decline driven by elevated other expenses. Adjusted PAT came in at INR1,022m vs. our est. of INR1,227m. For 9MFY26, revenue/EBITDA/PAT grew 16%/17%/15% to INR43b/INR5.6b/INR3.6b, with EBITDA margins at 13.1% and net cash of INR3b.

Powergen segment performance remained healthy

The powergen segment grew 44% YoY to INR6b in 3QFY26 (11% higher vs. est), supported by a low base of last year. KOEL's powergen revenue growth for 9MFY26 stood at 33% YoY vs. 17% for Cummins, indicating that KOEL has gained market share in this period. Powergen segment growth was largely driven by the LHP segment, supported by incentive schemes at channel and retail levels. The HHP segment also delivered strong 235% YoY growth in 3QFY26. Demand momentum remained healthy from infrastructure, real estate, manufacturing and data centers. Improving market share and traction across products ranging from 1,000 kVA to 3,000 kVA was also supported by ongoing sales and service capability building and consultant-led selling for HHP gensets. We expect powergen revenue to grow at a 20% CAGR over FY25-28.

Industrial segment growth trajectory remains strong

Industrial segment revenue grew 41% YoY/5% QoQ to INR4b in 3QFY26, 17% ahead of our estimate, supported by strong demand from the defense, nuclear, and marine segments. Growth was broad-based across these segments, while the construction and mining segment remained subdued during the quarter due to a temporary phase of inventory correction at OEMs. We expect industrial segment to further benefit in FY27 from volume ramp-up from large-sized nuclear and defense orders bagged in previous years. We bake in 24% revenue CAGR for FY25-28.

Distribution & aftermarket segment positioned for steady growth

Distribution and aftermarket segment grew 14% YoY to INR2b in 3QFY26, largely in line with our estimate. Growth was driven by higher spare parts sales and service contracts, supported by an expanding installed base. The segment mainly comprises spare parts and services, while overhauls under the 'New Life' brand remain a small part of the mix. The company continues to improve service penetration through higher AMC coverage and stronger service capabilities. We expect this segment to clock revenue CAGR of 14% over FY25-28, supported by a growing installed base and continued focus on services.

Exports to see gradual scale up

Exports grew 25% YoY to INR1.4b in 3QFY26. Growth was supported by continued traction in international markets, particularly in the Middle East and Africa, with a sustained focus on building capability, capacity, and coverage across regions. The company strengthened its presence in South Africa by setting up its own entity and continues to invest in the US market through its Americas subsidiary, though the business remains at an early stage. Across regions, the company is evaluating different go-to-market models based on market requirements. We expect export revenue to clock a 17% CAGR over FY25-28.

Margin expansion expected over the medium term

EBITDA margin improved ~190bp YoY to 12.2% in 3QFY26 (on restated financials), supported by better operational efficiency. Sequentially, margins declined by ~180bp due to product mix and operating leverage loss. Gross margins remained stable at ~35%, with no material pressure from commodity costs. The transfer of the B2C business to LGM is expected to result in a slight improvement in standalone margins going ahead. We expect EBITDA margins of 14%/14.5% for FY27/28.

Arka Fincap (AFHPL) business scaling gradually

AFHPL's revenue increased 7% YoY to INR2b in 3QFY26, with total AUM at ~INR77b as of Dec'25. The wholesale book stood at ~INR26b, while the rest comprised retail and SME lending, including used vehicle financing and small-ticket loans against property. The company continues to build a more granular portfolio, supported by ~110 branches and ~1,600 employees. Asset quality remained stable, with gross NPAs at ~1.2% and net NPAs at ~0.3%. We expect Arka Fincap to scale up steadily over the medium term, supported by portfolio diversification and disciplined risk management.

Financial outlook

We cut our estimates by 6%/9%/3% for FY26/FY27/FY28E to factor in 3Q performance and transfer of B2C segment to its wholly owned subsidiary. We thus expect a revenue CAGR of 15% over FY25-28, driven by 20%/24%/14%/17% CAGR in powergen/industrial/distribution/exports. Over FY25-28E, we bake in a 170bp improvement in margins to build in better product mix and operating leverage benefits. We expect an EBITDA/PAT CAGR of 19%/21% over the same period.

Valuation and recommendation

The stock is currently trading at 32.8x/26.3x P/E on FY27/28E earnings. Adjusted for subsidiary valuation, KOEL is trading at 28.8x/23.1x P/E on FY27/FY28E earnings, which is still at a significant discount to the market leader. We increase our core business multiple for KOEL from 25x to 28x after we reduce the discounting vs. the market leader as KOEL has been continuously gaining market share. We arrive at a revised SoTP-based TP of INR1,600 on Mar'28E earnings. Retain BUY.

Rating change

CMP: INR861
TP: INR891 (+3%)
Neutral

Weak performance in 3Q

Earmarks fresh investments for the BESS opportunity

- Amara Raja's (ARENM) 3QFY26 PAT at INR1.8b came in well below our estimate of INR2.1b. The earnings miss was due to a slower-than-expected demand and sustained margin pressure.
- Given the continued margin pressure seen in 3Q, we cut our FY26/FY27 EPS estimates by 5%/4%. While the market is optimistic about ARENM's Li-ion initiative, we are cautious about its potential returns. We believe the stock, trading at around 17.8x FY27E/15.7x FY28E EPS, appears fairly valued. **We reiterate our Neutral rating with a TP of INR891, based on 15x standalone EPS and INR92/sh value of the investment in the New Energy business.**

Margins continue to be under pressure

- ARENM's 3QFY26 revenue grew ~6% YoY to INR33.5b, below our estimate of INR35.1b. Revenue growth was muted due to a 40% YoY dip in telecom, slower replacement demand over a high base, and weak export demand.
- New energy business revenue doubled YoY to INR1.2b, aided by robust demand for Li-ion telecom battery packs. The revenue from lead acid and allied products was flat YoY at INR31.7b.
- While the 4W OEM segment saw a healthy 25% YoY growth, overall auto replacement growth was muted over a high base. Exports also witnessed weak demand due to heightened competition. The industrial, ex-telecom segment, posted a 2% YoY growth.
- EBITDA margin dipped ~200bp YoY to 11.2%, below our estimate of 12.2%. The margin miss was led by higher input costs, adverse mix, and higher provision for warranty and EPR. EBITDA declined ~10% YoY to INR3.7b.
- During the quarter, AMRJ faced a one-time extraordinary expense of INR438m as provisions against changes in the labor code.
- Adjusted for this, PAT declined 20.1% YoY to INR1.8b (well below our estimate of INR2.1b).
- The 9MFY26 revenue/EBITDA/PAT stood at +7%/-9.3%/-17.5% at INR101b/INR11.7b/INR5.9b.

Highlights from the management commentary

- ARENM's 3Q growth was muted due to a 40% YoY dip in telecom, slower replacement demand over a high base, and weak export demand.
- Margin pressure continued in 3Q due to higher input costs, adverse mix, and higher provision for warranty and EPR.
- To mitigate the rising cost impact, the company has taken ~2% price hike with effect from the first week of January.
- Over the medium term, management reiterated its intent to restore operating margins toward the 13–14% range, subject to normalization in input costs.

- Capex guidance for FY6 stands at INR 7.5-8b for the lead acid business. For FY27, lead-acid business capex is expected to normalize to INR3-4b, while new energy capex could increase to INR10b.
- Market size for the BESS application is expected to be 30 GWh by FY31. For the same, they are setting up a battery pack assembly line of 5GWh to cater to this demand at an estimated capex of INR 2.8b.

Valuation and view

- ARENM's venture into the lithium-ion business is strategically sound, given the opportunities in the segment and risks facing its core business. However, there are notable challenges: 1) market opportunities are limited by existing OEM partnerships; 2) the low-margin nature of the lithium-ion business is likely to dilute returns; and 3) the long-term viability of the technology remains uncertain despite the large capital investment.
- While the market is optimistic about ARENM's Li-ion initiative, we are cautious about its potential returns. We believe the stock, trading at around 17.8x FY27E/15.7x FY28E EPS, appears fairly valued. **We reiterate our Neutral rating with a TP of INR891, based on 15x standalone EPS and INR92/sh value of the investment in the New Energy business.**

Miss on earnings; FY26 estimate cut

- Revenue for 3QFY26 stood at INR1.3b (against our est. of INR1.9b), rising 10% YoY but declining 19% QoQ.
- Black galaxy granite production stood at 15.3k cbm (-3% QoQ) during 3QFY26, while absolute black granite stood at 9.5k cbm (-10% QoQ). The company sold 15k cbm of black galaxy granite (-6% QoQ) and 9k cbm of absolute black granite (-17% QoQ).
- During the quarter, the blended granite ASP was INR 53,842/cbm (-7% QoQ).
- EBITDA stood at INR305m (against our est. INR545m), up 31% YoY but down 34% QoQ. EBITDA margin corrected to 23.7% in 3QFY26 vs 20% in 3QFY25 and 29.3% in 2QFY26, which was attributed to higher employee benefits and other expenses during the quarter.
- APAT came at INR183m (vs our est. INR377m), increasing 29% YoY but declining 34% QoQ.

Key highlights from the management commentary

- The company has been awarded a 10.9-hectare galaxy mine, which is adjacent to existing operations, and production is expected to commence in 4QFY26.
- The company has received a 30-year quarry lease work order from the government of Andhra Pradesh for the extraction of colored quartzite blocks.
- China (largest export market) saw strong demand, driven by a reduction in legacy real estate inventory, completion of stalled construction projects, strong RMB (~6.9 vs historical ~6.2), and improving import economics.
- Phase I has revenue potential of ~INR2-2.1b, with Phase 2 expected to add a similar scale, taking the quartz vertical revenue potential to ~INR4-4.2b. The HPQ addition could take the total quartz revenue potential to ~INR5.5-6b over time.
- The company has repaid INR0.5b debt using the IPO proceeds, thereby reducing the borrowings to INR1.6b.

Valuation and view

- Midwest Limited (MIDWEST) delivered muted performance, mainly due to weak volumes and lower ASP during 3QFY26. For FY26, we trimmed our revenue/EBITDA/APAT estimates by 22%/25%/29%, respectively, as we incorporate the muted volumes of 3QFY26 and the current earnings mix. We expect the quartz segment to contribute to the revenue in the coming quarters.
- We expect MIDWEST to clock a 35% revenue CAGR over FY25-28, led by the new business venture (Quartz and Heavy Sand Minerals), translating into a CAGR of 45% in EBITDA and 54% in PAT. We expect the quartz segment to contribute ~34% of the total operational revenue in FY28, thus reducing dependency on granite.

- The company's debt/equity ratio is expected to remain at favorable levels. The recent debt repayment of INR0.5b further strengthens the company's financial position. **At CMP, MIDWEST trades at 15x EV/EBITDA on FY27E. We reiterate our BUY rating on the stock with a revised TP of INR1,700, valuing the stock at 12x EV/EBITDA on FY28 estimates.**

Merger to strengthen the balance sheet, sector reach, and funding power

Poised to unlock scale, operational synergies, and capital efficiency

The proposed PFC-REC merger is a key step in the Government of India's agenda to consolidate public sector NBFCs and strengthen institutional capacity in the power sector. Announced in the Union Budget FY26, it aims to create a larger, more resilient, and strategically aligned financing institution to support India's energy transition and long-term infrastructure needs.

Since PFC acquired a 52.63% stake in REC in 2019, REC has operated as PFC's subsidiary. The current proposal reflects continuity in policy, formalizing and deepening integration between the two entities.

Strategic rationale: Enhancing scale & capability for future power financing

- At a strategic level, the merger is anchored in balance sheet consolidation and capital efficiency. The combined entity would benefit from a stronger net worth base, enhanced leverage headroom, and operational synergies, enabling underwriting of larger ticket sizes and supporting long-gestation infrastructure projects with greater balance sheet flexibility, particularly as the power sector transitions from conventional generation and transmission financing to capital-intensive, technology-driven opportunities.
- While renewable energy remains central, the next phase of growth will increasingly be driven by emerging technologies such as green hydrogen, CCUS, small modular nuclear reactors, and advanced energy storage solutions, which require longer tenors, higher upfront capital, and stronger technical evaluation capabilities.
- In this context, a unified PFC-REC platform, combining sector expertise, institutional experience, and strong financial capacity, would be structurally better positioned than standalone entities to finance complex, capital-intensive projects across the power value chain.

Continuity of government control and strategic credit backing

- A key stabilizing factor is the continuation of government company status post-merger, with the Government of India retaining control of the merged entity, including rights over board appointments and removals. This ownership and governance continuity should mitigate concerns around strategic direction, policy alignment, and access to funding, given the quasi-sovereign positioning both entities enjoy in debt markets.
- From a credit perspective, continued government backing is expected to remain a key support factor, particularly during periods of market volatility or tight liquidity conditions.

Lending business: Regulatory exposure and growth capacity

- Both PFC and REC, as NBFCs, operate comfortably within RBI-prescribed credit concentration norms linked to Tier I capital. Post-merger, single and group borrower exposures will be assessed against the consolidated Tier I capital of the merged entity. Given their strong capital bases, management does not foresee any breach of regulatory exposure limits, and the larger capital base should provide incremental flexibility to support lending growth without materially constraining exposure to large borrowers in the power sector.
- This gains relevance as project sizes increase and financing requirements become more concentrated among fewer, larger counterparties, particularly in transmission, storage, and integrated energy platforms.

Borrowing profile and funding headroom

- On the liability side, both entities maintain diversified funding profiles: ~18% domestic bank/FI borrowings, 25% foreign currency borrowings, and 57% domestic bond borrowings.
- After the Government of India's divestment of its REC stake to PFC in 2019, the combined borrowing exposure was capped at 25% of banks' Tier I capital, down from 40%. Management notes this transition was smooth, supported by diversified funding sources and strong market access.
- Post-merger, a tighter single-entity exposure cap of 20% will apply. However, with the top ten Indian banks' aggregate Tier I capital at ~INR18t (FY25) and expected to rise further through profit accretion, management believes sufficient headroom exists to support incremental borrowings without disruption.

Merger structure and execution

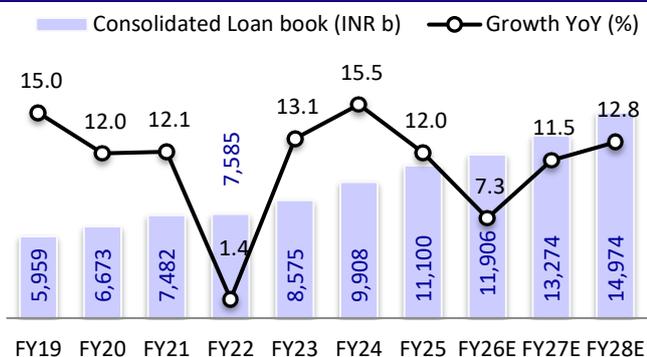

- While the strategic intent is clear, the merger structure, valuation framework, and implementation timeline are still under deliberation. External advisors, consultants, valuation experts, and legal counsel are expected to be appointed to ensure structured and compliant execution.
- Given the size and systemic importance of both institutions, execution complexity should not be underestimated. Key areas include merger mechanics, integration of operations and systems, potential portfolio overlaps, and regulatory approvals. Until these aspects are clarified, the announcement may create a near-term investor overhang.

View

- Overall, the proposed PFC-REC merger is directionally positive strategically and for the balance sheet, offering benefits in scale, capital efficiency, and sectoral positioning. Regulatory and funding concerns appear manageable, supported by government ownership and system-level capital growth.
- However, without details on merger structure, swap ratios, and timelines, investor focus is likely to remain on execution visibility and incremental disclosures. Clarity on these aspects will be key to shaping the medium-term investment thesis for power financiers.

Sanofi	7.1	12.7
Sun	11.3	13.8
Torrent	9.8	11.3
Zydus	9.9	11.5

Cardiac/anti-diabetes/VMN on robust growth path; Anti-infectives/Derma witness recovery

- The Indian pharma market (IPM) grew 11.5% YoY in Jan'26, compared to 15% in Dec'25 and 9% in Jan'25.
- Growth was driven by strong outperformance in Cardiac, Anti-Diabetic and VMN therapies, which outpaced IPM growth by ~440bp/410bp/100bp in Jan'26.
- Acute therapies remained on a healthy growth path of 9% YoY in Jan'26 vs. 12% in Dec'25 and 8% in Jan'25.
- Chronic therapies maintained strong momentum, registering superior growth of 16%, supported by increased focus on chronic portfolios in the domestic market amid India's changing demographics.
- For the 12 months ending in Jan'26, IPM growth was driven by 2.2%/4.3%/2.6% YoY growth in volumes/prices/new launches.
- Mounjaro remained the top-selling drug in Jan'26, with sales of INR1.3b, followed by Foracort with sales of INR1b, as per IQVIA.
- In Jan'26, Mixtard continued to witness YoY decline of 39%, as per IQVIA.

Intas/Lupin/Ipca/Ajanta outperform in Jan'26

- In Jan'26, among the top-20 pharma companies, Intas (up 16.4% YoY), Lupin (up 15.9% YoY), Ipca (up 15.6% YoY), and Ajanta Pharma (up 15.1% YoY) recorded much higher growth rates vs. IPM.
- Alembic/Emcure/Abbott/Eris were the major laggards in Jan'26 (down 0.2% YoY/up 4.2%/up 5%/up 6.9%).
- Lupin outperformed IPM, led by growth in Cardiac/Respiratory/Anti-diabetic.
- Ipca outperformed IPM, led by growth in Cardiac/Pain/Antineoplast, with superior double-digit growth in the rest of the therapies, except Anti-infectives.
- Glaxo reported industry-leading price growth of 6.7% YoY on MAT basis. Pfizer reported the highest volume growth of 8.1% YoY on MAT basis. Zydus posted the highest growth in new launches (up 4.8% YoY).

Cardiac/Respiratory/Anti-diabetes lead YoY growth on MAT basis

- On MAT basis, the industry reported 9.1% growth YoY.
- On MAT basis, chronic therapies posted 12.6% YoY growth, while acute therapies recorded 7% YoY growth.
- Cardiac/Respiratory/Anti Diabetic grew by 13.4%/11.2%/10.9% YoY. Gastro/Derma/ Anti-Infectives underperformed IPM by ~260bp/280bp/430bp on YoY basis for 12 months ending in Jan'26.
- The acute segment's share in overall IPM stood at 60% for MAT Jan'26, with YoY growth of 7%.

MNCs continue to outperform domestic companies in YoY growth

- As of Jan'26, Indian pharma companies continue to hold a majority share of 84% in IPM, while the remaining is held by MNCs.
- In Jan'26, Indian companies grew 11%, while MNCs grew 14.2% YoY.

New CPI series poses upside risks to inflation

MoSPI has introduced the new CPI series today on 12th Feb'25 with base year 2024=100 to better reflect current consumption patterns, price structures, and the evolving nature of the Indian economy. The revision is anchored in the HCES 2023–24, capturing shifts driven by rising incomes, urbanization, services expansion, and digitalization.

What has changed in CPI 2024?

- The base year has been updated from 2012 to 2024
- Transition from 6 groups to 12 divisions under COICOP 2018
- The item basket expanded from 299 to 358 items (Goods items: 259 → 308, Services: 40 → 50)
- Rural house rent is included for the first time
- Greater representation of digital consumption (OTT subscriptions, telecom services)
- Greater weight to services and housing
- Price collection now spans 1,407 urban markets (including online) and 1,465 villages, with nearly 100% reporting in Jan'26
- New items added: streaming services, value-added dairy products, barley products, pen drives/external hard disks, attendants/babysitters, and exercise equipment.
- Items removed: VCR/DVD players, radios, tape recorders, second-hand clothing, audio-video cassettes, and coir products — signaling a shift toward a modern consumption basket.

Revised basket better captures changing consumption patterns

A sharp decline in the weight of food & beverage (from 45.86% to 36.75%), alongside a rise in miscellaneous (services-heavy) categories, indicates a structural pivot toward core inflation.

Within the food basket, lower weights for cereals, pulses, edible oils, and vegetables—combined with higher shares for milk and fruits—will reduce the historical volatility associated with food shocks, potentially smoothing headline inflation over the cycle.

Higher weights for transport, health, household services, and digital communication, along with the inclusion of e-commerce price collection and online subscription services, point toward a structurally more urbanized and services-oriented consumption profile. Meanwhile, the exclusion of free food grains under PDS improves the market-price signal embedded in the index.

The rural weight has increased to 55.4% (from 53.5%), while the urban share has declined to 44.6%, largely due to the introduction of a housing index for rural areas.

Jan'26 CPI data highlights

Provisional January data points to sticky core pressures

Headline inflation stood at 2.75% in Jan'26 compared to 1.3% in Dec'25 with the old base. Price pressures were notably stronger across core segments, with food inflation at 2.1% in Jan'26 vs. -2.1% in Dec'25. Personal care and miscellaneous services recorded nearly 19% inflation, emerging as the single largest contributor to price momentum despite a modest 5% weight. Similarly, education inflation remained elevated at 3.35%, while restaurants and accommodation services printed 2.9%, underscoring persistent services inflation.

Emerging cost pressures within transport

Although transport services for goods saw a sharp inflation of 7.5%, overall transport inflation remained subdued due to deflation in vehicle prices (around -4.5%).

Housing is likely to become a more important driver going forward. Its weight has increased from 10.1% to 12.3%, with rural rent now incorporated for the first time. Even though current housing inflation is moderate, the higher weight raises its sensitivity in the headline index, particularly in a tightening rental cycle. Rural housing inflation has come in at 2.4%, which is higher than the combined housing inflation of 2%.

Macro implications

A lower food weight under the revised CPI is estimated to push inflation higher by approximately 60bp in FY26 and 30bp in FY27, primarily because the reduced dominance of food dampens the disinflationary impact of easing food prices. A structurally firmer inflation trajectory could, in turn, translate into an upside risk for nominal GDP (FY27 est: 11.5%), given the direct relationship between price levels and nominal growth. However, clearer implications for growth and macro aggregates will emerge once the government releases the new GDP series on 26 February, which is expected to provide better alignment with the updated inflation framework and offer greater clarity on the evolving macroeconomic outlook.

Expanded services coverage suggests inflation may become less volatile but more persistent.

Digital price capture and modern consumption items improve measurement accuracy.

For monetary policy, this shift is subtly hawkish. Even if headline inflation remains within target, the higher core share increases the likelihood that underlying inflation stays closer to the midpoint rather than undershooting it.

Further details on the revised CPI series are still awaited, as the MoSPI has currently released only limited back-series data covering headline CPI from January 2025 to January 2026. The absence of a longer historical series and granular breakdowns across sub-components constrains a comprehensive assessment of trend inflation and the full macro impact of the revised weights. Greater clarity on the inflation trajectory is expected once a more extended time series and detailed component-level data are made available.

Exhibit 1: Division-wise Inflation (% YoY)

Division Name	Rural	Urban	Combined
Food and beverages	2.0	2.4	2.1
Paan, tobacco, and intoxicants	2.7	3.2	2.9
Clothing and footwear	3.4	2.3	3.0
Housing, water, electricity, gas, and other fuels	1.3	1.7	1.5
Furnishings, household equipment, and routine household maintenance	1.6	1.3	1.5
Health	2.1	2.3	2.2
Transport	0.1	0.1	0.1
Information and communication	0.2	0.1	0.2

In-line core performance; Beat driven by higher other income

Standalone 3Q revenue came in line with our est. at INR315.5b.

- Crude oil/gas sales were in line with our est. at 4.7mmt/3.9bcm. VAP sales stood at 662tmt (est. 635tmt).
- Reported oil realization was USD61.6/bbl, a USD1.5/bb discount to Brent during the quarter.
- Crude oil production declined marginally QoQ/ YoY while natural gas production remained flat QoQ/YoY.
- Standalone EBITDAX came in line with our est. at INR173b. However, PAT came in 21% above estimate.
- DDA, dry well write-offs, and survey costs stood above estimate at INR86.6b.
- Other income stood significantly above estimate at INR31b and tax rate stood below estimate.
- **ONGC Videsh:**
- OVL's OVL's oil and gas production was down YoY at 1.7mmt/0.69bcm.
- Crude oil sales stood at 1.19mmt, while gas sales came in at 0.3bcm.
- OVL's revenue (incl. other income) was INR18b and PBDD stood at INR3.9b.
- **ONGC Petro additions Limited (OPaL):**
- OPaL's average capacity utilization for 3QFY26 stood at 85% (vs 78%/93% in 2QFY26/3QFY25).
- OPaL reported a Loss of INR5.4b in 3QFY26 (vs. INR4.6b/INR7.7b in 2QFY26/3QFY25).
- The board has declared an interim dividend of INR6.25/sh (FV: INR5/sh; interim dividend in 2Q: INR6/sh).

Strong beat on estimates

- Lupin's (LPC) 3QFY26 revenue grew 25.9% YoY to INR71.7b. (our est. INR67.6b).
- US sales grew 54% YoY to INR31.1b (up 46% YoY in CC to USD350m; 44% of sales).
- Domestic formulation (DF) sales grew 5.6% YoY to INR20.4b (29% of sales). Rx business up 10.9% YoY for 3QFY26.
- Other Developed market sales grew 10.8% YoY to INR8b (11% of sales).
- Emerging market sales grew 42.4% YoY to INR 9.2b (13% of sales)
- API sales decreased 24.1% YoY to INR2.2b (3% of sales).
- Gross Margin (GM) expanded 400bp YoY to 73.8%.
- EBITDA Margin expanded 660bp YoY to 30.8% (our est: 28.1%), largely due to better GM.
- As a result, EBITDA grew 60.5% YoY to INR22.1b (vs our est: INR19.0b).
- Adj. PAT grew 71.4% YoY INR14.7b (our est: INR12.0b).
- For 9MFY26 Revenue/EBITDA/PAT grew 22%/51%/56% YoY.

Other highlights

- LPC received 1 ANDA approvals and launched 3 products in 3QFY26.
- Launched 3 brands across therapies in India during the quarter.
- R&D was INR5.4b (7.5% of sales, down 40bp YoY) for the quarter.
- Capex for the quarter was INR2b (2.8% of sales, up 60bp YoY)

Lower revenue in biologics leads to lower op. leverage

Result below our estimate

- BIOS's 3QFY26 revenues grew 9.2% YoY to INR41.7b (est. INR45.4b).
- Revenue growth was led by: Biosimilars (58.5% of sales), up 9.4% YoY to INR25b. Research services (21.5% of sales), down 2.8% YoY to INR9.2b. Generics (20% of sales), up 24% YoY to INR8.5b.
- Gross margin (GM) expanded 350bp YoY to 65.5%.
- EBITDA margin contracted 60bp YoY to 20% (est: 19.7%) ; (employee expense/other expense up 55bp/280bp YoY as % of sales). R&D cost inched up (75bps YoY as % of sales) for the quarter.
- EBITDA grew 6.1% YoY to INR8.3b (est: INR8.9b).
- BIOS had an exceptional expense of INR3b related to (a) one time employee expense w.r.t. the change in the labor code (INR1.7b), (b) advisory and legal consultancy, premium on hedges, bridge financing cost (INR2.2b), (c) provision for liquidation of inventories (INR762m), (d) fair value change of investment (INR50m), (e) gain w.r.t. the remeasurement of the derivative liability in relation to investment in BBL by Mylan Inc (INR1.8b)
- Adj. for the same, PAT came in at INR1.2b (est. INR1.6b) vs INR439m YoY.
- Its revenue/EBITDA/PAT missed BBG estimates (-8%/-11%/26% YoY)
- In 9MFY26, Revenue/EBITDA grew 14%/16% YoY, while PAT came in at INR2.5b from a loss of INR800m in 9MFY25.

Other highlights

- Biocon Biologics' EBITDA was INR7b, with a margin at 27.9%. up 560bp YoY.
- Syngene's (Research services) EBITDA margin was 24.4% for the quarter, down 750bp YoY.
- This implies a generics EBITDA margin of 3.1%, down 250bp YoY
- BIOS gained global market entry for biosimilar, Aflibercept, and biosimilar Denosumab through patent settlement agreements
- BIOS launched Liraglutide for diabetes (gVictoza) and obesity (gSaxenda) in the Netherlands as its first 'direct-to-market' GLP-1 in the EU.

Stable 3Q performance

- PLNG's 3QFY26 revenue came in below our estimate by 11% at INR112b.
- EBITDA (adjusted for labor code impact of INR254m) came in 7% above estimate at INR12.2b (flat YoY).
 - The company booked additional provisions of INR0.8b against UoP dues during the quarter. UoP trade receivables of INR0.8b were waived off during 3Q. **EBITDA, adjusted for UoP provisioning and waiver, stood 21% above our estimate.**
- Adj. PAT was 10% above our estimate at INR8.7b (flat YoY).
 - **PAT, adjusted for UoP provisioning, waiver and labor code impact, stood 25% above our estimate.**
- Operational performance:
 - Total volumes came in 3% above our estimate at 233tbtu.
 - Dahej utilization was also 3% above our estimate, while Kochi utilization stood in line with our estimate.
- **As of Dec'25**, provisions on UoP dues stood at INR8.2b.
- UoP dues of INR13.1b (net of provision: INR5b) were included in trade receivables as of Dec'25. PLNG has obtained bank guarantees from some customers to recover UoP charges. While some customers have not given balance confirmations toward these dues, management is confident of recovering such charges.
- Spot LNG prices fell QoQ in 3Q, averaging USD10.9/mmbtu (USD11.8/mmbtu in 2Q).

Earnings in line with estimates

- Consolidated revenue grew 26% YoY to INR36b (in line), led by a 23% YoY growth in the Indian business and the Stoferle acquisition.
- Europe's revenue growth stood at 40% YoY in INR terms and 21% YoY in EUR terms (in line).
- Consolidated margins were in line with estimates at 13.2%. As a result, EBITDA grew 28% YoY to INR4.8b (in line).
- Standalone margins remained stable YoY at 12.4% and were ahead of our estimate of 11.7%.
- Europe margins were also largely in line with our estimate at 18%.
- The company recorded an exceptional expense of INR210m on account of labor code changes. Adjusted for this, consolidated PAT grew 29% YoY to INR2.3b (in line).
- The AURIC Shendra project SOP for machined castings in 4W and the non-auto segment was delayed from 4QFY26 to 2QFY27.
- The company is also setting up a new facility at the Sanand plant to cater to volume orders from Solar damper and actuators, the SOP for which is expected in 1QFY27.

From the investor presentation

India

- 9M order wins in India stood at INR12.8b (excl. Bajaj Auto), including INR3.0b for battery packs and INR450m for Maxwell.
- 4W and non-auto formed 57% of business wins in the Indian business in 9MFY26, including the first PV proprietary orders – foundational brakes and driveshafts.
- Cumulative EV orders (excl. battery packs) in India reached INR12.4b, including Bajaj Auto, with FY26 YTD EV orders forming ~24% of total wins, vs. 49% in FY25 and 5% in FY24, highlighting a steady EV order pipeline.

Europe

- 9M Europe order wins stood at EUR15m, taking the cumulative five-year order book to EUR244m.
- Of these, EUR94m of orders (39%) are for EV and EUR111m (45%) for hybrid applications.

Valuation view: The stock trades at ~38.7x/32.6x FY26E/27E consol EPS.

Neutral

Another weak quarter; revenue declines 4% YoY, EBITDA down 9% YoY (11% miss)

- Customer sales declined ~2% YoY to INR6.9b in 3QFY26, owing to the lack of wedding days in Dec'25 and Jan'26.
- Same-store sales declined ~4.5% in 3Q (+1.8% in 9MFY26), while area additions remained muted at 2.3% YoY.
- Consolidated 3Q revenue declined 4% YoY to INR4.9b (6% miss on our muted expectations).
- The company closed seven net stores during 3Q (three domestic EBOs, four SIS), bringing the total store count to 664 (vs. 666 YoY).
- Gross profit (GP) declined 6% YoY to INR3.4b (9% miss) as gross margin contracted ~195bp YoY to 70% (~200bp miss). Including job charges, GP declined ~6% YoY to INR3.2b, with margin contracting ~155bp YoY to 65.7%.
- Employee cost (excluding labor code provisions) increased 9% YoY, while other expenses declined ~2% YoY (5% lower).
- EBITDA declined ~9% YoY to INR2.2b (11% miss), due to weak revenue, lower gross margin and operating leverage.
- EBITDA margins declined ~270bp YoY to 44.7% (~250bp miss).
- Depreciation/finance costs rose 13%/1% YoY, while other income declined ~4% YoY.
- VFL booked a one-time provision of INR16.17m related to the new labor code.
- As a result, adjusted PAT declined ~14% YoY to INR1.36b (15% miss).
- For 9MFY26, customer sales/revenue grew by a modest 5%/2% YoY, while EBITDA/PAT declined 5%/9% YoY.

Strong beat on profitability

- AMPL's revenue was in line, while EBITDA and PAT beat our estimates.
- Revenue was broadly flat YoY at INR2.6b, in line with our estimate.
- Gross margin expanded 730bp YoY to 55.3%, above our estimate of 47.0%.
- This led to an EBITDA beat of 34% at INR825m (+8% YoY), while margin expanded 220bp YoY to 31.7% vs. our estimate of 23.5%.
- However, a higher tax rate compared to last year led to a 1% YoY dip in PAT to INR468m. This was still much better than our expectation of INR305m (54% beat).
- For 9MFY26, revenue/EBITDA/PAT increased 5%/15%/9% YoY, while EBITDA margin expanded 220bp YoY to 25.4%.
- The company received orders worth INR6.6b during the quarter, taking the consolidated order book to INR25.7b.

Segmental performance

- **Defense:** Revenue declined 3% YoY to INR2.1b. Order inflows stood at INR2.9b, taking the segment's order book to INR14.8b.
- **Space:** Revenue declined 21% YoY to INR68m. Order inflows stood at INR174m, taking the segment's order book to INR2.5b.
- **Meteorological:** Revenue increased 27% YoY to INR88m. Order inflows stood at INR1.5b, taking the segment's order book to INR3.7b.
- **Exports:** Revenue increased 38% YoY to INR299m. Order inflows stood at INR204m, taking the segment's order book to INR1.3b.

Beat on profitability; quarter performance remain volatile

- Senco reported strong consolidated revenue growth of 51% YoY to INR30.7b (est. INR23.9b). The 3Q performance remained volatile; 2QFY26 revenue growth was 2.4% YoY (peers were >20%) and 28% in 1QFY26.
- As per the 3QFY26 business update, retail revenue increased 49% YoY; our preview estimates were prepared before the pre-quarter update.
- Average transaction value (ATV) increased 8% QoQ to INR93,000, while average selling price rose 6% QoQ to INR60,270, reflecting improved realizations.
- Titan (Jewelry standalone, ex-bullion), Kalyan, and P N Gadgil (retail) delivered revenue growth of 40%, 42%, and 36%, respectively, in 3Q.
- Consolidated gross margin expanded sharply by 830bp YoY to 19.9% (vs. est. 14.3%; 17% in 2QFY26), adjusted for the customs duty impact in the base quarter. Gross margins were down by 710bp in 3QFY25.
- Employee expenses rose 31% YoY (adjusted for a one-time INR62m labor code impact), while other expenses increased 63% YoY.
- EBITDA margin expanded 810bp YoY and 640bp QoQ to 13.4% (est. 6.7%, 6.9% in 2QFY26), supported by the sharp improvement in gross margins.
- EBITDA grew 282% YoY to INR4.1b (est. 1.6b).
- APAT grew 396% to INR2,687m (est. INR796m, 2QFY26 INR488m).
- In 9MFY26, net sales/EBITDA/APAT jumped 30%/135%/202%.

Ashok Leyland: Aggressively Pushing To Expand Exports In ASEAN Countries; Shenu Agarwal, MD & CEO

- 4 straight months of broad-based growth (LCV to heavy trucks); January stronger than December.
- Replacement cycle underway: Fleet age now 10+ years (vs 7.5 earlier) — signals structural demand, not just GST-led spike.
- Record Q3 performance: All-time high revenue, EBITDA, PBT & PAT; 12th consecutive quarter of double-digit margins.
- Strong market position: ~31% MHCV share, 40%+ buses; exports up 30%, ASEAN emerging as “fourth home market.”

[➔ Read More](#)

Patanjali Foods: GST Cuts Led To A Sharp Upmove In Consumer Biz In Q3FY26; Sanjeev Asthana, CEO

- Q3 margin at 1.9% seen as trough; Q4 recovery expected, with 3–4% volume growth guided for FY27 amid industry consolidation.
- Q3 margins near 25% (vs 18% target); revenue to reach ~₹3,500cr next year with steady ~15% growth.
- Tax cuts and wider distribution driving momentum; 8–10% growth targeted for overall foods portfolio.
- 350cr EBITDA in 9M; plantation at 110,000 hectares, expanding 15–20% annually as new capacity comes online.

[➔ Read More](#)

Star Cement: Capex of Rs 4,800 Cr Planned Over 4 Years; Tushar Bhajanka, Deputy MD

- Targeting 10–12% in Q4FY26 and 12–15% in FY27, aided by Assam expansion (capacity rising to ~9.7mt).
- Aggressive diversification: Expanding beyond Northeast (26% share) with 3mt clinker in Rajasthan + 5mt grinding in North India over 3 years.
- Margins resilient post-GST cut: Despite ₹150/ton GST impact, EBITDA guided at ₹1,550–1,650/ton; Q4 could touch ₹1,800/ton.
- 4,800cr capex, leverage disciplined: Funded via accruals + timely raise; Net debt/EBITDA to stay <1.5x.

[➔ Read More](#)

Latent View: Trying To Replace Physical Workforce With Digital AI Agents; Rajan Venkatesan, CFO

- Expands into copper recycling; funded via internal accruals + QIP surplus; closure by Mar’26.
- RMIL FY25 revenue ~₹900cr → target ₹1,200cr by FY27, via utilization jump from 50% to ~70% + future 50,000 MTPA capacity.
- Improve RMIL ROIC from ~14% toward Gravita’s 25% target, driven by scrap optimization, integration & marketing synergies.
- Targeting 25% revenue CAGR, 30–35% PAT CAGR; path toward ₹1,000cr annual EBITDA by FY29-30.

Disclosures:

The following Disclosures are being made in compliance with the SEBI Research Analyst Regulations 2014 (herein after referred to as the Regulations).

Motilal Oswal Financial Services Ltd. (MOFSL) is a SEBI Registered Research Analyst having registration no. INH000000412 and BSE enlistment no. 5028. MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on www.motilaloswal.com. MOFSL is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL), NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products and is a member of Association of Portfolio Managers in India (APMI) for distribution of PMS products. Details of associate entities of Motilal Oswal Financial Services Ltd. are available on the website at <http://onlinereports.motilaloswal.com/Dormant/documents/Associate%20Details.pdf>

Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at <https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx>

MOFSL, its associates, Research Analyst or their relatives may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst or their relatives may have actual beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report or date of the public appearance. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may have any other potential conflict of interests at the time of publication of the research report or at the time of public appearance, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report..

In the past 12 months, MOFSL or any of its associates may have:

- received any compensation/other benefits from the subject company of this report managed or co-managed public offering of securities from subject company of this research report,
- received compensation for investment banking or merchant banking or brokerage services from subject company of this research report,
- received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.

MOFSL and its associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.

Subject Company may have been a client of MOFSL or its associates during twelve months preceding the date of distribution of the research report.

Research Analyst may have served as director/officer/employee in the subject company.

MOFSL and research analyst may engage in market making activity for the subject company.

MOFSL and its associate company(ies), and Research Analyst and their relatives from time to time may have:

- a) a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein.
- (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures. To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report.

Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Disclosure of Interest Statement

Analyst ownership of the stock No

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

MOTILAL Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts), and

under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore. This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL.

In respect of any matter arising from or in connection with the research you could contact the following representatives of MOCMSPL. In case of grievances for any of the services rendered by MOCMSPL write to grievances@motilaloswal.com.

Disclaimer:

This report is intended for distribution to Retail Investors.

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.

This report is meant for the clients of Motilal Oswal only.
