India Strategy: Earnings review 3QFY26 - In-line print; commodities drive, while mid-caps underwhelm

- ❖ The 3QFY26 corporate earnings concluded on a strong note, marking the fourth consecutive quarter of double-digit earnings growth. A key highlight of the quarter was the improved sectoral breadth of earnings growth. Of the 27 sectors under our coverage, 19 delivered double-digit growth, five reported single-digit growth, and three sectors experienced a decline in PAT.
- ❖ The aggregate earnings of the MOFSL Universe companies grew 16% YoY (vs. our est. of 14% YoY) in 3QFY26. Excluding financials, the earnings jumped 18% YoY (vs. our est. of 16% YoY), whereas, excluding global commodities (i.e., Metals and O&G), the MOFSL Universe grew 12% YoY (vs. our est. of 12% YoY). The earnings growth was powered by Metals (profit surged 33% YoY), O&G (OMC's profit up 2.4x YoY), which grew 33% YoY, BFSI (14% YoY), Technology (12% YoY), and Telecom (164% YoY). These five sectors contributed 86% of the incremental YoY accretion in earnings in 3QFY26.
- ❖ The Nifty delivered a 7% YoY PAT growth (vs. our est. of +6%). Nifty reported a single-digit earnings growth for the seventh consecutive quarter since the pandemic (Jun'20). Five Nifty companies – SBI, Tata Steel, HDFC Bank, TCS, and Bharti Airtel – contributed 78% of the incremental YoY accretion in earnings. Within our MOFSL Universe, large-caps (86 companies) posted an earnings growth of 16% YoY – similar to the overall universe. Mid-caps (98 companies) have shown weakness and delivered earnings growth of 15% YoY (vs. our est. of 22%). Multiple mid-cap sectors, such as Private Banks, Metals, Logistics, and Insurance, dragged down overall performance. In contrast, small-caps (157 companies) delivered in-line performance, with earnings rising 29% YoY (our est. of +34%).

Refer to our Dec'25 quarter preview

Earnings review 3QFY26: In-line print; commodities drive, while mid-caps underwhelm

- Corporate earnings – sectoral breadth promising:** The 3QFY26 corporate earnings concluded on a strong note, marking the fourth consecutive quarter of double-digit earnings growth. A key highlight of the quarter was the improved sectoral breadth of earnings growth. Of the 27 sectors under our coverage, 19 delivered double-digit growth, five reported single-digit growth, and three sectors experienced a decline in PAT.
- Commodities shine:** The aggregate earnings of the MOFSL Universe companies grew 16% YoY (vs. our est. of 14% YoY) in 3QFY26. Excluding financials, the earnings jumped 18% YoY (vs. our est. of 16% YoY), whereas, excluding global commodities (i.e., Metals and O&G), the MOFSL Universe grew 12% YoY (vs. our est. of 12% YoY). The earnings growth was powered by Metals (profit surged 33% YoY), O&G (OMC's profit up 2.4x YoY), which grew 33% YoY, BFSI (14% YoY), Technology (12% YoY), and Telecom (164% YoY). These five sectors contributed 86% of the incremental YoY accretion in earnings in 3QFY26.
- Seventh successive quarter of single-digit PAT growth for the Nifty-50:** The Nifty delivered a 7% YoY PAT growth (vs. our est. of +6%). **Nifty reported a single-digit earnings growth for the seventh consecutive quarter since the pandemic (Jun'20).** Five Nifty companies – SBI, Tata Steel, HDFC Bank, TCS, and Bharti Airtel – contributed 78% of the incremental YoY accretion in earnings. Conversely, Tata Motors PV, Cipla, ICICI Bank, and Interglobe Aviation dragged Nifty earnings lower. Within the Nifty, 10 companies reported lower-than-expected profits, while 14 recorded a beat, and 26 registered in-line results.
- Large-caps and small-caps deliver in-line results, while mid-cap performance misses our estimates:** Within our MOFSL Universe, large-caps (86 companies) posted an earnings growth of 16% YoY – similar to the overall universe. Mid-caps (98 companies) have shown weakness and delivered earnings growth of 15% YoY (vs. our est. of 22%). Multiple mid-cap sectors, such as Private Banks, Metals, Logistics, and Insurance, dragged down overall performance. Conversely, sectors that clocked impressive earnings growth were Healthcare, Lending and Non-Lending NBFCs, Automobiles, Oil & Gas, and Utilities. These sectors contributed ~77% of the incremental YoY accretion in earnings. In contrast, small-caps (157 companies) delivered in-line performance, with earnings rising 29% YoY (our est. of +34%). Within small-caps, 62% of the coverage universe exceeded/met our estimates. Conversely, within the large-cap/mid-cap universes, 79%/67% of the companies exceeded/met our estimates.
- The beat-miss dynamics:** The beat-miss ratio for the MOFSL Universe was balanced, with 34% of the companies exceeding our estimates, while 32% reported a miss at the PAT level. For the MOFSL Universe, the earnings upgrade-to-downgrade ratio has been adverse at 0.7x in 3QFY26 (for FY27E), with the earnings of 69 companies having been upgraded by >3%, while the earnings of 100 companies have been downgraded by >3%.

PAT growth YoY in 3QFY26 (%)

- The 9MFY26 snapshot:** The MOFSL Universe delivered a 13.3% YoY earnings growth in 9MFY26. Excluding Metals and O&G, it reported a 9.3% YoY earnings growth. **We categorized our coverage stocks based on market capitalization criteria into large-cap, mid-cap, and small-cap segments.** Notably, our large-cap universe saw a 12.4% YoY earnings growth in 9MFY26, while mid-cap delivered a 23.6% YoY growth, and small-cap posted a muted growth of 5.5% YoY in 9MFY26. For 4QFY26, we estimate a healthy earnings growth for the MOFSL and Nifty Universe, at ~14% and ~10%, respectively.
- FY27E earnings highlights:** The MOFSL Universe is likely to deliver sales/EBITDA/PAT growth of 8%/13%/16% YoY in FY27. The Financials, Metals, and Automobiles sectors are projected to be the key growth engines, with 16%, 25%, and 27% YoY earnings growth, respectively. These three sectors are likely to contribute 64% of the incremental YoY accretion in earnings. Our large-cap universe is anticipated to deliver a 13% YoY earnings growth in FY27E, while mid-cap is estimated to deliver 27% YoY growth, and small-cap is estimated to deliver a 37% YoY growth in FY27E.
- MOFSL PAT records an upgrade of 0.6% for FY27...:** Earnings of the MOFSL Universe witnessed a rise of 0.6% for FY27, fueled by Metals, Technology, Telecom, PSU Banks, and NBFCs. In contrast, the MOFSL Large-cap remained unchanged, while the small-cap universe recorded a downgrade of 1% for FY27. Conversely, the MOFSL mid-cap universe registered an earnings upgrade of 4.1% for FY27.
- ...while the Nifty EPS cut marginally for FY26E/FY27E:** The Nifty EPS for FY26E was cut by 0.2% to INR1,082 (from INR1,084) due to downgrades in Tata Motors PV, Bharti Airtel, ICICI Bank, Interglobe Aviation, JSW Steel, Maruti Suzuki, and Cipla. The FY27E EPS was cut by 0.3% to INR1,263 (from INR1,267) – led by Maruti Suzuki, HDFC Bank, Tata Motors PV, ICICI Bank, ONGC, and Bharti Airtel.
- Top FY27E earnings upgrades:** Titan (+8%), Dr. Reddy’s Labs (5.6%), Ultratech Cement (4.9%), Tata Steel (3.9%), and Nestle (3%).
- Top FY27E earnings downgrades:** Eternal (-14.3%), Cipla (-13.2%), Tata Motors PV (-9.6%), Maruti Suzuki (-7.5%), and Max Healthcare (-7%).

The best Large-\Mid-\Small-cap results within the MOFSL coverage:

HDFC AMC	7.7	20	AU Small Finance	6.7	26	Aditya Birla AMC	2.7	20

- Our view:** The 3QFY26 earnings have generally been in line with our expectations, with a beat-miss ratio for the MOFSL Universe remaining balanced – 34% of the companies exceeded our estimates, while 32% reported a miss at the PAT level. Importantly, the 3QFY26 earnings season reaffirms our analysis that the aggregate earnings revision trajectory has become more palatable. We had observed a slowing intensity in earnings cuts until 1QFY26, which transitioned into an earnings upgrade for aggregate MOFSL PAT in 2QFY26 and got further corroborated in 3QFY26. Clearly, with the heavy lifting by RBI and GoI through a series of stimulative monetary and fiscal measures, the macro environment for earnings has improved and is somewhat reflected in an impressive 3QFY26 MOFSL PAT growth of 16% YoY – mildly ahead of our estimates of 14%. In this backdrop of stabilizing earnings, we believe that Indian markets appear poised for a better performance in CY26, especially after the sharp underperformance of ~26% (USD terms) vs MSCI EM in CY25. Even as Indian equity markets received abundant DII flows in CY25 (at ~USD90b), the FII outflows (USD19b in CY25) have been instrumental in pinning down Indian market performance vs. other peers. With the decisive moves on the landmark India-US trade agreement (even if an interim one), the missing capstone of India’s strong edifice is gradually falling in place. This, coupled with the proposal of a historic Indo-EU FTA, should help calm the frayed sentiments of FII investors and assuage concerns over India’s geopolitical isolation. Consequently, we expect abatement in FII outflows over the course of the year, helping India retrace its underperformance vs. key global markets. A key overhang in the current environment has emerged in the form of ongoing disruptions in the IT services sector and their potential impact on other sectors and remains a key monitorable in near term. We expect ~12% earnings growth for Nifty over FY25-27E. Valuations for Nifty at ~20.4x remain marginally below its LPA at 20.9x 12m forward earnings, while they remain stretched for broader markets. We are OW on Auto, PSU Banks, Diversified Financials, Technology, Consumer Discretionary, and Capital Goods + EMS, which are our key preferred investment themes. We are Neutral on Telecom, Cement and Healthcare, while maintaining our UW stance on Pvt. Banks, Consumer Staples, O&G, Utilities, and Metals within our [model portfolio](#).

Technology

Indian IT services: Assessing the narrative shock

What is the market pricing in?

IT services stocks have been struck down in the last one month, with the Nifty IT Index losing 15% MoM. The narrative that AI is coming for not just IT services but large swathes of the economy could be too strong to shake, at least in the short term. There are no easy answers to whether AI eventually renders IT services obsolete over the long term. For the short to medium term, however, we assess three key questions: 1) What is the structural FCF growth (or the lack of it) being priced in now? 2) What is the extent and timing of AI deflation in the near term, say 2-3 years? and 3) At the risk of thinking linearly, is there evidence of the normal business cycle turning?

The structural FCF growth being priced in

- Our reverse DCF implies that at current prices, the market is discounting an average 10-year free cash flow INR CAGR of ~6.5% (assumptions around WACC and terminal growth outlined in Exhibit 1). This compares to a 40% FCF CAGR in crisis eras such as GFC; a 13% FCF CAGR over FY16-19, when the sector decelerated sharply; and an 8.5% FCF CAGR during FY23-FY26, the latest period of deceleration.
- On an FCF yield basis, large-caps are trading at **5.8% FY27E/6.2% FY28E, levels approaching prior cyclical troughs.**
- The core question is whether AI represents a structural break to terminal growth assumptions or merely compresses growth/margins temporarily. **If this is a Kodak moment, then the quantum of downside from here is moot.** If it is not, the market is currently pricing an FCF CAGR that is among the lowest in the past two decades.

Near-term debate: Extent and timing of AI deflation

- As discussed in our prior report (dated 4th Feb'26: [Palantir, Anthropic, and its impact on IT services](#)), both the magnitude and timing of AI-induced deflation are key unknowns.
- We have previously estimated that 12-15% of sector revenue faces direct exposure to AI-driven productivity/displacement risk, with incremental pressure from third-party software efficiencies and automation layers. **On timing, we estimate two scenarios:**

Scenario 1: Front-loaded deflation (12-18 months)

- If deflation materializes rapidly, revenue growth could decelerate sharply across FY27-FY28E, driving EPS cuts of **10%** across our large-cap coverage. On these bearish estimates, large-caps would trade at **~18x for both FY27E/FY28E P/E (see exhibits for scenario analysis). This compares to 15-16x 12m fwd P/E at the bottom of the last cycle.**

Scenario 2: Gradual deflation, cyclical recovery dominates

- Enterprise complexity, legacy estates, and governance constraints could slow adoption, back-ending productivity gains. In this scenario, near-term growth is more dependent on cyclical recovery, partially offset by AI deflation.
- **Is there evidence of this cyclical recovery?** Notably, aggregate **revenue and EBIT growth bottomed out ~two quarters ago, with meaningful improvement in 3QFY26** across large, mid, and small-cap companies (Exhibit 4-6).

Long-term debate: “IT is dead because this time is different?”

- **The concern:** AI tools enable enterprises to internally generate code, reducing reliance on third-party vendors and upending pay per seat software.
- **Historical context:** The IT services industry originally scaled due to the challenges of maintaining large volumes of self-built, non-standardized, and security-vulnerable code. Over time, enterprises shifted toward packaged software + vendor-led customization to address these concerns. As shown in Exhibit 2, self-built software currently accounts for **14% of total software spend, down from 35-40% in the 90s.**
- In our view, in-house code generation does not inherently guarantee better architecture, security, or uptime management. **Vendor ecosystems continue to play a critical role in:**
 - Systems integration
 - Cybersecurity and governance
 - Performance optimization
 - Downtime mitigation/SLA management
- In the long term, answers to whether the industry goes extinct, thrives, or just survives won’t come by easily. In the short term, we stick to forecasting earnings growth for the next two years, which, as shown earlier, seems to be improving.
- For the medium term, getting to AI should be a revenue-accretive opportunity, and we believe IT services vendors have a role to play. We keep our estimates unchanged as of now, as we look for more evidence to factor in the current narrative.

Reverse DCF suggests current prices imply ~6.5% 10-year FCF CAGR vs. higher FCF growth of 40% in GFC and ~12–13% in recent cycles

	TCS	INFY	HCLT	WIPRO	TECHM
WACC	10%	10%	10%	10%	10%
Terminal growth	3%	3%	3%	3%	3%

FII includes depository receipts

- **ONGC's 3QFY26 revenue came in line at INR315.5b.** Crude oil/gas sales were in line at 4.7mmt/3.9bcm. Crude oil production declined marginally QoQ/YoY, while natural gas production remained flat QoQ/YoY. Standalone EBITDAX came in line at INR173b. However, PAT came in 21% above our estimate, as other income stood significantly above the estimate, and the tax rate stood below.
- **Key things we liked about the result:** 1) ONGC's management has maintained its FY27 SA total production guidance of 42.5mmtoe, which implies a robust 7.7% YoY growth on our SA FY26 estimate. 2) Gas production is expected to increase by 9-10mmscmd by the end of FY27, as production ramps up from KG-D6, the Daman upside project, and DSF. 3) NWG contribution is expected to increase from currently 18% to 23-24% of total gas revenue in FY27.
- **Key investor concerns:** 1) Production volumes remained soft in 3Q as crude oil production declined marginally QoQ/YoY, while natural gas production remained flat QoQ/YoY. Total oil and gas production declined ~1% YoY in 9mFY26. 2) OPAL's weak performance continues as it reported a loss of INR5.4b in 3QFY26 (vs. a loss of INR4.6b/INR7.7b in 2QFY26/ 3QFY25). However, profitability should improve as petchem prices have risen. 3) OVL has also reported weak performance in 9mFY26 as its EBIT is down 40% YoY. 4) Exploratory well write-offs are likely to be higher QoQ in 4QFY26, which could dent ONGC's earnings.
- **Valuation and view:** We reiterate our Neutral rating on the stock and arrive at our SoTP-based TP of INR245 as we model a CAGR of 1.8%/2.5% in oil/gas production volume over FY25-28.

Key takeaways from the management commentary

- The 9MFY26 NW gas revenue is 18% of total gas revenue. This should ramp up to 23-24%.
- The **KG 98/2** project is advancing well with all 26 wells drilled, subsea infrastructure nearing completion, and the processing platform with living quarters and utility platform fully installed.
- **Daman Upside Development project** (~4-5mmscmd peak gas output) is expected to be operational by 4QFY26'end, while DSF is under development and targeted for commissioning by 4QFY27.
- **Capex:** Capex incurred during 9MFY26 is INR244b. FY27 standalone capex guidance: INR320-330b. 20 major development, redevelopment, and infrastructure revamp projects are under execution with a total combined capex of about INR770b.
- OPAL is operating at more than 90% capacity utilization with the average 9MFY26 capacity utilization of 92%.

In-line core performance; beat driven by higher other income

- Standalone 3Q revenue came in line with our estimate at INR315.5b.
- Crude oil/gas sales were in line with our estimate at 4.7mmt/3.9bcm. VAP sales stood at 662tmt (est. 635tmt).
- Reported oil realization was USD61.6/bbl, a USD1.5/bb discount to Brent during the quarter.
- Crude oil production declined marginally QoQ/ YoY, while natural gas production remained flat QoQ/YoY.
- Standalone EBITDAX came in line with our estimate at INR173b. However, PAT came in 21% above our estimate.
- DDA, dry well write-offs, and survey costs stood above estimate at INR86.6b.
- Other income stood significantly above our estimate at INR31b, and the tax rate stood below.
- ONGC Videsh:
 - OVL's oil and gas production was down YoY at 1.7mmt/0.69bcm.
 - Crude oil sales stood at 1.19mmt, while gas sales came in at 0.3bcm.
 - OVL's revenue (incl. other income) was INR18b and PBDT stood at INR3.9b.
- ONGC Petro additions Limited (OPaL):
 - OPaL's average capacity utilization for 3QFY26 stood at 85% (vs 78%/93% in 2QFY26/3QFY25).
 - OPaL reported a Loss of INR5.4b in 3QFY26 (vs. INR4.6b/INR7.7b in 2QFY26/3QFY25).
- The board has declared an interim dividend of INR6.25/sh (FV: INR5/sh; interim dividend in 2Q: INR6/sh).

Valuation and view

- In the past few quarters, ONGC has struggled to raise production/sales, with no meaningful production/sales growth YoY of 9mFY26. Further, we like the increased exploration intensity (which is key to building a robust development pipeline), though we believe it will likely be accompanied by higher dry well write-offs, which will weigh on earnings. Also, the benefits of increased new well gas proportion for ONGC will be mostly offset by subdued gas realization amid a weaker crude oil price outlook.
- We arrive at our SoTP-based TP of INR245 as we model a CAGR of 1.8%/2.5% in oil/gas production volume growth over FY25-28.

FII includes depository receipts

- Torrent Pharma (TRP) delivered a better-than-expected performance, with 3%/5%/10% beat on revenue/EBITDA/PAT in 3QFY26. Growth was aided by consistent superior execution in domestic formulation (DF)/LATAM, favorable currency benefits in the US, and a lower tax rate.
- In DF, TRP continued to outpace the industry with strong volume offtake, price hike and new launches. Even the OTC sub-segment has been scaling up on the back of promotions and increasing reach through increased number of MRs.
- While industry YoY growth has been moderate in Brazil, TRP has exceeded industry YoY growth, largely led by new launches. It is well positioned for new introductions in this market.
- With gaining control of JB Pharma (JBCP) acquisition effective 21st Jan'26, TRP is geared up to build synergy from the integration through cost efficiency and collective revenue growth.
- After consolidating different aspects of JBCP with TRP in 3-6 months, we expect meaningful benefits to accrue from 4QFY27 onward.
- We have consolidated the financials of JBCP with TRP from 4QFY26. We have lowered our EPS estimates by 15%/21%/7% for FY26/FY27/FY28, as a) the addition of EBITDA from JBCP would be more than offset by interest cost/amortization in the initial years; and b) we consider dilution due to JBCP acquisition. The merger is expected to raise the equity shares of TRP by ~42m. We expect 28% earnings CAGR over FY26-28 on the back of a) sustained outperformance in TRP's existing business, b) addition of JBCP business, and c) integration benefits.
- We value TRP 24x 12M forward EB/EBITDA and reduce net debt to INR133b to arrive at a TP of INR4,300. Given limited upside from the current levels, we maintain Neutral rating on the stock.

Consistent profitable growth for 13 quarters

- Sales grew 17.6% YoY to INR33b.
- Gross margin contracted 20bp at 75.8%.
- EBITDA margin expanded by 40bp YoY to 32.9%.
- Accordingly, EBITDA grew 19% YoY to INR10.9b (vs our Est: INR10.3b).
- Adj. PAT grew 27.8% YoY to INR6.4b.
- For 9MFY26, revenue/EBITDA/PAT grew 14%/16%/26% YoY.

DF/LATAM on a robust YoY growth path

- Sales grew 17.6% YoY to INR33b.
- India formulations revenue grew 13.7% YoY to INR18b (54.5% of sales).
- US generics grew 18.5% YoY to INR3.2b (10% of sales).
- Germany sales grew by 7.8% YoY to INR3b (9% of sales).
- LATAM business grew by 27.5% YoY to INR3.7b (11% of sales).
- ROW+CDMO sales grew 32.6% YoY at INR5.1b (15.5% of sales).

Highlights from the management commentary

- TRP indicated synergy benefits of INR4b-INR4.5b from integrating JBCP over the next 2-3 years, largely driven by the cost efficiency.
- Despite announcement of JBCP acquisition, attrition in JBCP's marketing team has been in the historical range.
- With JBCP EBITDA margin at 28-29% and TRP EBITDA margin at 32-33%, there is a scope to bring JBCP margins to TRP margin level in FY27.
- Germany business is impacted by continued disruption from a third-party supplier, which has got a regulatory issue and it is difficult to predict the timeline to resolve it. TRP is working on the alternate supplier, which would take 3-4 quarters.

Strong execution drives margin to decade high

Competition and pipeline gestation to cap earnings trajectory

- Lupin (LPC) posted a better-than-expected financial performance in 3QFY26, with 6%/16%/22% beat on revenues/EBITDA/PAT. Robust traction in US and other developed markets helped LPC sustain profitable growth momentum in 3Q.
- LPC delivered its highest-ever quarterly EBITDA margin in the past 10 years.
- Breaking its own record, it delivered the highest-ever quarterly US sales of USD350m in 3Q, led by the scale-up in recent launches.
- The company continued to outperform the India pharma market (IPM), with increased focus on chronic therapies, footprint expansion, and innovative product pipeline (13 launches in YTD FY26).
- Further, LPC is leveraging its portfolio in other developed markets and emerging markets to increase R&D productivity and capacity utilization.
- We raise our earnings estimates by 7%/4%/7% for FY26/FY27/FY28, factoring in a) higher sales from certain limited competition products, b) improved outlook for domestic formulation (DF) segment through product launches and increased marketing efforts, and c) superior traction in other developed/emerging markets. We value LPC at 22x 12M forward earnings to arrive at a TP of INR2,360.
- We believe that FY26 will be the second consecutive year of strong earnings growth; however, competition in certain products and some gestation period for commercialization of complex product pipeline in inhalation, injectables and biosimilar space could limit LPC's earnings growth over FY26-28. Maintain Neutral on the stock.

Product mix, operating leverage drive robust earnings growth

- 3Q revenue grew 25.9% YoY to INR71.7b (our est. INR67.6b).
- Gross margin (GM) expanded 400bp YoY to 73.8%.
- EBITDA margin expanded 660bp YoY to 30.8% (our est: 28.1%), largely due to better GM.
- As a result, EBITDA grew 60.5% YoY to INR22.1b (vs our est: INR19.0b).
- Adj. PAT grew 71.4% YoY to INR14.7b (our est: INR12.0b).
- For 9MFY26, revenue/EBITDA/PAT grew 22%/51%/56% YoY.

Broad-based growth across key geographies

- US sales grew 54% YoY to INR31.1b (up 46% YoY in CC to USD350m; 44% of sales).
- DF sales grew 5.6% YoY to INR20.4b (29% of sales). Rx business rose 10.9% YoY.
- Other developed market sales grew 10.8% YoY to INR8b (11% of sales).
- Emerging market sales grew 42.4% YoY to INR 9.2b (13% of sales).
- API sales decreased 24.1% YoY to INR2.2b (3% of sales).

Highlights from the management commentary

- LPC has reiterated its EBITDA margin guidance of 24-25% in FY27.
- The company would have a licensing outgo of more than USD75 per unit licensing fee with respect to Mirabegron. Still LPC believes the profitability to remain healthy in this product.
- It added 600 MRs for Rx market in India.
- LPC has created a separate division comprising 200 MRs for the semaglutide opportunity to reach out to the doctor pool comprising diabetologist, cardiologist, and gastroenterologist.
- LPC expects to sustain US sales at USD1b over the next couple of years.

Benefitting from strong demand for transformers

Siemens Energy's 1QFY26 results came in above our estimates. Net profit growth of 57% YoY was driven by a beat in EBITDA margin and a low tax rate. EBITDA margin at 24.1% was ahead of our estimate, aided by a sharp decline in other expenses. With a strong domestic and export opportunity available for large power transformers, the company is scaling up its capacity by another 30,000MVA potentially, taking the total capacity to 60,000MVA after its existing capex and new capex program commission. The capex plan also indicates its confidence in the long-term sustainability of overall demand in power transformers, led by energy transition initiatives domestically and globally. We would keep a close watch on commodity price movement to assess its impact on margins. Since [our last update](#) on Siemens Energy, the stock has already moved up by 29%. We marginally tweak our estimates by 4%/1%/1% for FY26/27/28 and arrive at a revised TP of INR3,600 (earlier INR3,400), based on 55x Mar'28E EPS. Retain BUY.

In-line revenue, beat on profitability

Siemens Energy reported in-line revenue but delivered a strong beat on profitability in 1QFY26. Revenue stood at INR19b, up 26% YoY, broadly in line with our estimates. Gross margin declined YoY to 44.1%; however, better control over other expenses led to a 200bp YoY expansion in EBITDA margin to 24.1% (est. 20.5%), with absolute EBITDA rising 37% YoY to INR4.6b. Supported by strong margins, higher-than-expected other income and a lower tax rate, PAT grew 57% YoY to INR3.6b (est. INR3b). During the quarter, the company recognized an exceptional item of INR519m related to the implementation of the new labor code. Order inflows increased 4% YoY to INR33.4b, taking the order backlog to INR176b, up 38% YoY.

Both segments perform well

The power transmission and generation segments reported revenue broadly in line with our estimates in 1QFY26. Power transmission revenue increased 34% YoY to INR11b, EBIT rose 61% YoY to INR3b, and EBIT margin expanded 410bp YoY to 24.3%. Power generation revenue rose 16% YoY to INR8b, EBIT grew 7% YoY to INR2b, and EBIT margin at 19.7% contracted 170bp YoY but improved by 410bp QoQ. We expect the power transmission segment to continue to benefit from strong demand and ongoing capacity expansion plan. The power generation segment has grown well vs. single-digit-growth guidance given by the company earlier. We expect power generation segment to benefit from improving demand for both steam and gas turbines.

Ongoing and additional capex for capacity expansion to support growth

The company has approved additional capex of ~INR20.6b, to be funded by internal accruals, to expand its large power transformer capacity by ~30,000 MVA, over and above the ongoing capex of INR7.4b (INR4.6b for power transformers at Kalwa and INR2.8b for high-voltage switchgear capacity expansion at Chhatrapati Sambhaji Nagar). The ongoing capex is expected to be commissioned between 4QFY26 and 1QFY27 and new project is expected to commence during FY30-32, strengthening the company's ability to cater to rising domestic and export demand for grid equipment. After this expansion, its capacity will increase to 60,000MVA.

Outlook across segments

Siemens Energy is positioned for a transmission-led growth profile over the medium to long term, supported by strong visibility from the domestic T&D capex cycle and its capabilities in high-voltage and HVDC solutions. We expect power transmission revenue to grow at 39% CAGR over FY25-28. Power generation segment, which has presence across steam and industrial gas turbines, is expected to benefit from sharp demand ramp-up for gas turbines. Management expects high-single-digit revenue growth in this business, while we model power generation revenue to grow at a 9% CAGR over FY25-28. Exports and services should continue to provide incremental support to overall growth and margins.

Financial outlook

We slightly revise our FY26/FY27/28 estimates to bake in 1QFY26 performance. We expect revenue/EBITDA/PAT CAGR of 27%/31%/32% over FY25-28E, led by strong growth across power transmission (39% CAGR) and power generation (9% CAGR). We expect EBITDA margins of 20.5%/20.8%/21.1% for FY26/27/28.

Valuation and view

Siemens Energy is currently trading at 46.6x/38.3x P/E on FY27/28E EPS. We tweak our estimates by 4%/1%/1% for FY26/27/28 and arrive at a revised TP of INR3,600 (earlier INR3,400), based on 55x P/E on Mar'28E earnings. Retain BUY.

Key risks and concerns

Key risks to our thesis can come from a slowdown in ordering and supply chain issues and a sharp rise in commodity prices, impacting margin.

Our view: Investments in 99acres to drive further market share gains

- INFOE's recruitment business exhibited a mixed picture; revenue grew 14% YoY while billings remained broadly steady sequentially (~10% YoY growth). Healthcare and manufacturing continued to grow in double digits, while BFSI, retail, infrastructure, and consultant segments showed softness.
- Management indicated that hiring remains robust in the premium (>INR30 lakh CTC) and value (INR 5 lakh CTC) segments; however, the mid-segment (INR 5–30 lakh CTC) continues to see moderated volume growth, tapering to ~4% vs. 7–8% historically. Overall, we believe the hiring environment remains unchanged, with weakness in the mid-segment persisting and sectoral divergence likely to continue in the near term.
- 99acres sustained billing momentum, led by strong traction in the secondary (resale/rental) segment. The platform continues to gain supply share and improve traffic share (46% vs. 44% QoQ), positioning itself as a credible challenger in the large new projects market. We expect continued marketing investments to support share gains, though operating leverage may emerge gradually as revenue share expands.
- While the competitive intensity remains elevated in Jeevansathi, INFOE continues to strengthen its position in Hindi-speaking markets and leverage AI-led product enhancements to improve conversions and ARPU. Shiksha, however, faces visible AI-led headwinds, particularly in the domestic business where traffic has sharply declined. The company is pivoting towards counseling and marketing services to diversify revenue streams.
- Margins improved in 3QFY26 (standalone EBIT margin at 39.6%), aided by lower staff costs sequentially and moderation in marketing within Naukri. INFOE intends to continue investing in performance marketing across verticals, particularly in 99acres and Jeevansathi, to drive share gains. Within recruitment, investments in JobHai (a blue-collar job platform) and AI capabilities will continue as long-term strategic bets. We expect margins to reverse course in the next quarter (39% in 4QE) and settle ~36% in FY26/FY27E.

Valuations and changes to our estimates

- Our estimates are broadly unchanged. While INFOE's businesses exhibit steady growth in recruitment and real estate, limited near-term profitability upside weighs on the outlook. In our opinion, the current valuations already reflect much of the expected growth, leaving little room for re-rating.
- We value the company's operating entities using DCF valuation. Our SoTP-based valuation indicates a TP of INR1,250. **Reiterate Neutral.**

Revenue in line; margins beat our est.; billings up 12% YoY

- Standalone revenue stood at INR 7.65b, up 13.9% YoY/2.5% QoQ, in line with our estimates (~INR 7.6bn).
- Overall billings rose 11.8% YoY and were INR 7.47b. Billings for Recruitment/99 Acres came in at INR 5.4b/INR 1.1b vs. INR 5.05b/INR 1.03b in 3QFY25.
- EBITDA margin came in at 42.5% (up 290bp QoQ/down 60bp YoY), above our estimate of 38.8%.
- Naukri's PBT margin was up 350bp QoQ at 59.3%, while 99acres' PBT loss percentage reduced 300bp QoQ to 17.3%.
- Adj. PAT was up 8.8% YoY to INR2.8b (vs. our est. of 2.7b).
- The board has declared an interim dividend of INR 2.4/share.

Highlights from the management commentary

- Tech, IT & BPM segments combined grew 14% YoY. GCCs grew 13%, Recruitment Consultants grew 5%, and Other Sectors combined grew 2%.
- **Recruitment:** Across these segments, the focus is on increasing hiring share and revenue per hire. The premium segment market size is small but growing rapidly, and the hiring share in this segment is increasing.
- Volume growth is robust in the premium and value segments. Mid-segment volume growth has moderated (earlier 7–8% about 4–5 years ago, now ~4%) and appears under pressure.
- **99acres:** Platform investments supported further traffic share gains, with quarterly average traffic share at 46%. With consistent traffic share gains, accelerating response growth, and mid-teen billings growth in recent quarters, management believes it has outpaced the market and expanded both traffic and revenue share.
- Marketing strategies are helping grow traffic share, supply, and revenue share in the matrimony business, and this approach will continue.
- If revenue growth remains in the teens, margins can be maintained or improved. However, if growth falls to single digits, margins may compress.

Valuation and view

- We expect near-term recruitment growth to remain range-bound, as macro uncertainty and client caution – particularly in IT and consulting – keep overall hiring demand muted. Management's disciplined investments in growth businesses such as 99acres and Jeevansathi are already showing progress, and we believe these businesses could scale up meaningfully over the medium term, adding to the group's long-term value.
- We value the company's operating entities using DCF valuation. Our SoTP-based valuation indicates a TP of INR1,250. **Reiterate Neutral.**

Neutral

Acquisition of Occlutech to open opportunities in Med-tech segment

Segmental mix, operating leverage drive beat on earnings

- ALKEM is taking significant steps in its Medtech journey through acquiring Occlutech (develops, manufactures, and commercialized medical devices for congenital heart disease, stroke prevention and heart failure).
- ALKEM would be buying up to 55% stake for a consideration of EUR99m (INR10.6b). Revenue/EBITDA/loss of this company in CY25 was EUR49m/EUR2m/EUR6.8m. ALKEM expects to improve EBITDA margins to 23-24% over the next 3-4 years.
- ALKEM Laboratories reported in-line revenue in 3QFY26. EBITDA/PAT came in 17%/20% higher than our estimates, aided by higher growth in export markets, partly supported by currency movement.
- Strong growth was seen in therapies like VMNs, anti-diabetic, respiratory and derma. This was offset to some extent by muted YoY growth in anti-infectives and gastro-intestinal segments.
- New launches, volume traction in base business and steady progress across non-US markets drove overall export growth for the quarter.
- We reduce our earnings estimates by 4%/5% for FY27/FY28, factoring in a) an increase in raw material prices due to the implementation of minimum import price (MIP) by the government of India, and b) ongoing weakness at industry level in certain therapies in DF segment. We value ALKEM at 28x 12M forward earnings to arrive at a TP of INR5,525.
- Increased efforts toward new ventures (med-tech and Enzene), as well as the step-up in the tax rate, are expected to keep growth in check over FY26-28. Maintain Neutral on limited upside from current levels.

Occlutech acquisition to form a Medtech platform for ALKEM to enter developed markets

- Occlutech is a **leading specialist provider of minimally invasive structural heart occlusion devices** with presence across congenital heart disease, stroke prevention and heart failure segments; commercialized in **70+ countries** with manufacturing facilities in **Germany and Turkey**.
- Its portfolio comprises **10+ product lines** across three therapeutic areas with **200,000+ devices sold** since inception.
- It has delivered ~17% sales CAGR over CY22-24 to EUR43m; estimated to reach EUR49m (~INR4.9b) in CY25, implying ~16.5% CAGR over CY22-25. Over the next five years, ALKEM intends to scale up revenue to INR10b+ and expand EBITDA margin from ~5% currently to ~20-25%.
- This implies EV/EBITDA of ~15x/~7x on CY28E/CY30E EBITDA. The acquisition is 3.6x CY25 sales.
- ALKEM would leverage Occlutech as a global med-tech entry platform across Japan, the US and Europe.

- **Our take:** For ALKEM, acquiring an R&D-focused company with presence in developed markets is a good strategy to scale up its med-tech business. The profitability of Occlutech has yet to improve despite being present in this space for 15+ years. With ALKEM also in the process of building its positioning in this space, this would be the key monitorable. The valuation is decent if the performance happens as per guidance.

EBITDA/PAT better than expected

- 3Q revenue grew 10.7% YoY to INR37.4b (our est.: INR36.7b).
- Gross margin expanded 160bp YoY to 66%.
- EBITDA margin was steady YoY at 22.2% (our est.: 19.3%) as higher gross margin was offset by high other expenses/employee cost (up 140bp/80bp YoY as % of sales). R&D expense was stable YoY as % of sales.
- EBITDA grew 9% YoY to INR8.3b (our est. of INR7.1b).
- Adj. PAT grew 8.7% YoY to INR6.8b (our est.: INR5.8b).
- For 9MFY26, revenue/EBITDA/PAT grew 13%/17%/13% YoY.

International growth much higher than DF segment

- DF business grew 5.5% YoY to INR25b (67.2% of sales).
- International business grew 27% YoY to INR12.1b.
- US sales increased by 19% YoY to INR7.7b (20.3% of Sales).
- Other international sales rose 42% YoY to INR4.6b (12.5% of sales).

Highlights from the management commentary

- ALKEM had taken steps to change the distribution set-up in DF, leading to high base last year. Adj for the same, YoY growth would be double digits in 3Q.
- ALKEM expects Enzene and medtech to have EBITDA margin of 25% in 4-5 years.
- In addition to acquisition, ALKEM would invest INR1b-INR2b in R&D at Occlutech over next 1-2 years. Current GM of Occlutech is about 73%.
- There is a debt of INR4b-INR5b on the balance sheet of Occlutech. This can be re-financed using corporate guarantee of ALKEM. In CY25, Occlutech reported revenue of EUR49m, EBITDA of EUR2m, and a loss of EUR6.8m.

Temporary constraints weigh on performance

Launch traction key to unlocking operating leverage in biologics/generics

- Biocon (BIOS) delivered lower-than-expected financial performance for the quarter. Temporary constraints in the biologics and CRDMO segments impacted revenue for the quarter.
- Re-prioritization of high-margin products in the biologics segment was offset by operating deleverage during the quarter.
- BIOS has about four molecules with USD200m+ annual sales in the biologics segment. It has disclosed three biosimilar assets, which are a work-in-progress. These products are scheduled to lose exclusivity over the next five years.
- The Generics segment continues to scale from new launches and market share gains in existing products.
- Regarding the CRDMO business, BIOS has expanded its commercial capacity and chemistry capabilities.
- We reduce our earnings estimate by 4%/4%/5% for FY26/FY27/FY28 to factor in: a) manufacturing constraints for one of the customers in the CRDMO segment, b) a gradual scale-up in the biologics business, and c) higher opex from recently commissioned facilities in the generics segment.
- We value BIOS on an SOTP basis (22x 12M forward EV/EBITDA for the Biologics business, 53% stake in Syngene, and 10x EV/EBITDA for the Generics business) to arrive at a TP of INR450.
- BIOS has built considerable capacity across major segments. The operational cost is largely baked in. Product launches and commercial traction remain the key. We expect a 39% earnings CAGR over FY26-28. Reiterate BUY.

Geography/segment mix benefit offset by lower operating leverage

- BIOS's 3QFY26 revenue grew 9.2% YoY to INR41.7b (est. INR45.4b).
- Gross margin (GM) expanded 350bp YoY to 65.5%.
- EBITDA margin contracted 60bp YoY to 20% (est: 19.7%) (employee expenses/other expenses rose 55bp/280bp YoY as a % of sales). R&D costs inched up (75bp YoY as a % of sales) for the quarter.
- EBITDA grew 6.1% YoY to INR8.3b (est: INR8.9b).
- BIOS had an exceptional expense of INR3b related to: a) one-time employee expense w.r.t. changes in the labor code (INR1.7b), b) advisory and legal consultancy, premium on hedges, and bridge financing costs (INR2.2b), c) provision for liquidation of inventories (INR762m), d) fair value change of investment (INR50m), and e) gain on remeasurement of the derivative liability related to Mylan Inc.'s investment in BBL (INR1.8b).
- Adj. for the same, PAT came in at INR1.2b (est. INR1.6b) vs INR439m YoY.
- In 9MFY26, Revenue/EBITDA grew 14%/16% YoY, while PAT came in at INR2.5b, compared to a loss of INR800m in 9MFY25.

- Revenue growth was led by Biosimilars (58.5% of sales), rising 9.4% YoY to INR25b. Research services (21.5% of sales) declined 2.8% YoY to INR9.2b. Generics (20% of sales) rose 24% YoY to INR8.5b.
- Biocon Biologics' EBITDA was INR7b, with margin at 27.9%, up 560bp YoY.
- Syngene's (Research services) EBITDA margin was 24.4% for the quarter, down 750bp YoY.
- This implies a generics EBITDA margin of 3.1%, down 250bp YoY.

Highlights from the management commentary

- BIOS recently submitted the Pertuzumab (b-Perjeta) filing with the USFDA.
- The company has reiterated annualized interest cost savings of INR3b from FY27 onwards.
- It has taken certain steps to upgrade operational/manufacturing facilities in the biologics segment, impacting growth in 3Q.
- BIOS indicated EBITDA margins of mid-20s in the biologics segment in FY26.
- Given the commercial success of Adalimumab, with annualized sales of USD200m+ and potential to gain further business, BIOS has acquired full global rights to the product.
- In the generics segment, while the addressable market for liraglutide is declining, the product continues to offer a potential opportunity for BIOS.

Note: FII includes depository receipts

- PI Industries (PI) reported a weak quarter as revenue declined 28% YoY, primarily due to a 32% YoY dip in the CSM business, attributable to global slowdown and cautious customer scheduling (volume declined 29% YoY). Domestic Agri/Pharma also reported a revenue decline of 8%/6% YoY. While gross margins expanded by 630bp YoY due to a better product mix, lower volumes led to adverse operating leverage, thereby resulting in an overall EBITDA margin contraction of 500bp YoY.
- We expect a gradual stabilization in industry conditions after a prolonged downcycle marked by channel destocking, weak commodity prices, and cautious farmer spending. While pricing remains soft and demand visibility is still evolving, management has begun seeing early signs of improvement, particularly in order scheduling and volume traction, thereby **guiding sequential revenue growth with EBITDA margins in the range of 26-27%**.
- Factoring in the weak 4Q performance and a slower-than-anticipated industry recovery, we reduce our FY26/FY27/FY28 earnings estimates by 9%/11%/10%. **We reiterate our BUY rating with a TP of INR3,780 (based on 35x FY28E EPS).**

Adverse operating leverage hurts margins

- Revenue stood at INR13.6b (est. INR16.9b), down 28% YoY. Agrochemicals business revenue was down 28% YoY to INR13.2b, and pharma business revenue dipped 6% YoY to INR599m.
- EBITDA was INR3b (est. INR4b), down 41% YoY. EBITDA margin contracted 500bp YoY to 22% (est. 23.9%); gross margin was 59% (up 630bp YoY); employee expenses rose 650bp YoY to 16.6%; other expenses grew 470bp YoY to 20.5% of sales. Adj. PAT was down 38% YoY to INR2.3b (est. INR3b).
- PI's net profit included an exceptional income due to the writeback of contingent consideration of INR1.3b, partially offset by additional provisioning of retirement benefits of INR209m as per the new labor code.
- The EBIT margin for the Agrochemical business was 21.8% (down 730bp), and Pharma reported an EBIT of INR580m vs. a loss of INR599m in 3QFY25.
- For 9MFY26, PI's revenue/EBITDA/adj. PAT declined 17%/21%/23% to INR51.5b/INR13.6b/INR10.3b. Our 4QFY26 implied revenue/EBITDA/PAT dipped ~16%/22%/21% YoY, while sequentially we have built in a 9%/17%/12% growth.

Highlights from the management commentary

- Electronic Chemicals:** The company anticipates commercializing 4–5 new molecules this year, primarily aimed at semiconductor and other high-end application segments. Additionally, it has secured five new customers in the electronic chemicals space, mainly from Japan and Europe.

- **Pharma:** Over the past 12 months, the pharma segment added several new customers, including strategic and large pharmaceutical clients, positioning the business for sustained mid- to long-term growth. Profitability declined due to one-off processing costs and an unfavorable product mix. Meanwhile, the company incurred capital expenditure of INR616m during 9MFY26.
- **Biologics:** PI has strengthened its product development and distribution footprint across the US, Brazil, and Mexico. It expanded to 33 distributors in Brazil and 28 in Mexico, with strong farmer engagement, and is building a Midwest distribution network in the US. The company also launched two products each in Brazil and Mexico and received California approval for its disease control product, unlocking access to the largest US market.

Valuation and view

- PI's growth trajectory is expected to pick up gradually from 4QFY26, led by the commercialization of new products and scaling up of newly launched products, signaling improving demand prospects.
- The company's medium- to long-term growth story will be led by 1) improving growth prospects in the CSM business (five molecules commercialized in 9MFY26) due to the rising pace of commercialization of new molecules (order book of USD1.2b); 2) healthy launch pipeline of new products (four products commercialized in 9MFY26, and two new products to be launched in 4QFY26) in the domestic market; 3) biological industry continuing to outpace the chemical industry; and 4) the ramp-up of its pharma business.
- We expect a CAGR of 14%/15%/12% in revenue/EBITDA/adj. PAT over FY26-28. **We reiterate our BUY rating with a TP of INR3,780 (based on 35x FY28E EPS).**

Buy

Capacity tie-ups and volume recovery remain key catalysts

- PLNG's 3QFY26 EBITDA (adjusted for labor codes impact of INR254m) came in 7% above estimate at INR12.2b (flat YoY). EBITDA adjusted for UoP provisioning and waiver stood 21% above our estimate. PAT adjusted for UoP provisioning, waiver, and labor code impact stood 25% above our estimate. Total volumes came 3% above our estimate at 233tbtu. Dahej utilization was also 3% above our estimates, while Kochi utilization stood in line with our estimates.
- **Key things we liked about the result:** 1) Capacity utilization remained robust at the Dahej LNG Terminal and Kochi LNG Terminal at 97% and 30%, respectively, with spot volumes witnessing a recovery to 4tbtu during the quarter. 2) Management has guided that it intends to maintain a healthy dividend payout of ~40% over the coming years, despite an increase in the capex. 3) Kochi-Mangalore-Bangalore PL is expected to be connected to the National Gas Grid by end-Jun'26. Lower LNG prices, along with enhanced pipeline connectivity, are likely to support higher terminal utilization at Kochi in FY27.
- **Key investor concerns:** 1) The company booked additional provisions of INR0.8b against UoP dues during the quarter. UoP trade receivables of INR0.8b were waived off during 3Q. UoP write-offs and waivers continue to weigh on PLNG's performance. 2) The 5 mmtpa capacity expansion at the Dahej LNG Terminal is now expected to be mechanically completed by end-Mar'26, and will take a few months to become operational (delayed vs. the previous timeline of becoming operational by end-Mar'26). Further, the absence of long-term contracts to cover a meaningful portion of the incremental capacity raises concerns over potential under-utilization.
- **Key changes to earnings estimates:** Considering the delay in commissioning of expanded capacity at Dahej and the recent softness in spot and service volumes, we lower our FY27/28 volume assumption for the Dahej terminal to 18/18.7mmtpa (from 18.3/18.9mmtpa earlier), leading to a 11%/8% reduction in our FY27/28 EBITDA estimate.
- **Valuation and view:** According to our DCF analysis (WACC: 10.5%), at CMP, PLNG is pricing in an unrealistic scenario of a 20% decline in tariffs at the Dahej and Kochi terminals in FY28, with no tariff hike thereafter and 0% terminal growth. At 10.3x FY27E P/E and a ~3.7% dividend yield, we believe valuations are inexpensive. We reiterate our BUY rating with a DCF-based TP of INR365.

Highlights from the management commentary

- **Update on the Dahej petchem expansion:** The mechanical completion is expected to be completed by Mar'26.
- **Gopalpur terminal:** Land has been acquired, and revised Environmental Clearance (EC) has been resubmitted. The company is expecting the clearance soon (no timeline shared). Major capex will start in FY28 (total capex INR60b)
- In 3Q, inventory gain stood at INR270m.
- CY22 UoP charges are expected to be paid by Mar'26.

Stable 3Q performance

- PLNG's 3QFY26 revenue came in below our estimate by 11% at INR112b.
- EBITDA (adjusted for labor codes impact of INR254m) came in 7% above estimate at INR12.2b (flat YoY).
- The company booked additional provisions of INR0.8b against UoP dues during the quarter. UoP trade receivables of INR0.8b were waived off during 3Q. **EBITDA adjusted for UoP provisioning and waiver stood 21% above our estimate.**
- Adj. PAT was 10% above our estimate at INR8.7b (flat YoY).
- **PAT adjusted for UoP provisioning, waiver, and labor code impact stood 25% above our estimate.**
- Operational performance:
 - Total volumes came 3% above our estimate at 233tbtu.
 - Dahej utilization was also 3% above our estimates, while Kochi utilization stood in-line with our estimates.
- **As of Dec'25**, provisions on UoP dues stood at INR8.2b.
- UoP dues of INR13.1b (net of provision: INR5b) were included in trade receivables as of Dec'25. PLNG has obtained bank guarantees from some customers to recover UoP charges. While some customers have not given balance confirmations toward these dues, management is confident of recovering such charges.
- Spot LNG prices fell QoQ in 3Q, averaging USD10.9/mmbtu (USD11.8/mmbtu in 2Q).

Valuation and view

- As per our DCF analysis (WACC: 10.5%), at CMP, PLNG is pricing in an unrealistic scenario of a 20% decline in tariffs at the Dahej and Kochi terminals in FY28, with no tariff hike thereafter and 0% terminal growth. At 10.3x FY27E P/E and a ~3.7% dividend yield, we believe valuations are inexpensive.
- Our DCF-based TP of INR365 (WACC: 10.5%, TG = 2%) assumes a 10% tariff cut in FY28, followed by a 4% rise for both the terminals. While we have incorporated the full capex for the petchem plant, we value it conservatively at 0.5x FY29E P/B and discount this back to FY27.

Steady quarter!

The India business continues to outperform industry growth

- Endurance Technologies (ENDU)'s 3QFY26 adj. PAT stood at INR2.3b and was in line. While standalone margins at 12.4% beat our estimate of 11.7%, the European business margin came in line at 18%.
- On the back of its healthy order backlog, we expect ENDU to outperform core industry growth, both in India and Europe. As a result, we estimate a CAGR of ~16%/16%/14% in consolidated revenue/EBITDA/PAT over FY25-28E. The stock trades at 32x/28.4x FY27E/FY28E consolidated EPS. We reiterate our BUY rating with a TP of INR2,976 (based on 35x Dec'27E consolidated EPS).

Earnings in line

- ENDU's 3QFY26 consolidated revenue grew 26% YoY to INR36b (in line), driven by ~23% YoY growth in the standalone (India) business and ~40% YoY growth in Europe (in INR; +20% in EUR terms), aided by the Stoferle acquisition (excluding which revenue declined 2% YoY in EUR terms).
- Maxwell revenue grew 53% to INR400m.
- The India business continued to outperform relative to 18% growth in the 2W industry.
- However, European business, ex-Stoferle, has underperformed relative to the 5% industry growth in 3Q. This is primarily due to higher tooling sales in the base quarter.
- Standalone margins remained stable YoY at 12.4% and were ahead of our estimate of 11.7%. Standalone margins were supported by the recurring incentives from the Maharashtra state government, while the benefits were offset by adverse commodity inflation and costs related to the ramp-up of new plants and capacity expansion.
- Europe's margins were largely in line with our estimate at 18%. Maxwell margins came in at 5.8% vs. 4.3% QoQ and 0.5% YoY.
- Overall, consolidated margins were in line with estimates at 13.2%. As a result, EBITDA grew 28% YoY to INR4.8b (in line).
- The company recorded an exceptional expense of INR210m on account of labor code changes. Adjusted for this, consolidated PAT grew 29% YoY to INR2.3b (in line).

Key highlights from the management commentary

- In 9MFY26, the company secured a total of INR12.8b in orders, with INR12.6b coming from new business.
- Going ahead, with an RFQ worth INR42b in hand, the company expects to win orders worth INR15b in the next 12-18 months.
- The company is awaiting regulatory guidelines on the proposed implementation of ABS on up to 125cc segment of 2Ws, which is expected in a quarter. If, instead of ABS, the authority decides to mandate CBS on up to 125cc 2Ws, even then ENDU benefits, as drum brakes would get replaced with disc brakes, and Endurance is amongst the key suppliers of disc brakes for 2Ws in the country.
- Standalone capex guidance for FY26E stands at INR 8b and is likely to be well under INR 8b in FY27E as it would look to sweat its assets from FY27 onwards.
- In Europe for 9MFY26, ENDU booked EUR15m in new orders, including large machine castings for Volkswagen and Porsche, as well as plastic injection molding parts for EVs. Stoferle had order wins worth EUR5m from customers like BMW and Magna with visibility of volumes extending through 2030-2032. Order wins in the EU have been at only EUR15m due to the poor market conditions in the EU.
- In the EU, capex guidance stands at EUR36m in FY26 after the payment for the Stoferle acquisition. ENDU plans to spend EUR25-30m in FY27.

Valuation and view

- On the back of its healthy order backlog, we expect ENDU to outperform core industry growth, both in India and Europe. As a result, we estimate a CAGR of ~16%/16%/14% in consolidated revenue/EBITDA/PAT over FY25-28E. The stock trades at 32x/28.4x FY27E/FY28E consolidated EPS. We reiterate our BUY rating with a TP of INR2,976 (based on 35x Dec'27E consolidated EPS).

Others	8.8	8.7	9.6

FII includes depository receipts

- IGL's 3QFY26 EBITDA/scm (adjusted for labor code impact of INR293m) came in 5% above our est. at INR5.8. Gas costs decreased ~INR0.9/scm QoQ in 3Q. Total volumes were slightly below our estimate at 9.42mmscmd, up 3% YoY. Resulting adj. EBITDA was 4% above our estimate at INR5b (+38% YoY). IGL's adj. PAT came in line with our est. at INR3.8b (+33% YoY).
- **Key things we liked about the result:** 1) Raw material costs declined INR0.8/scm QoQ amid margin headwinds despite a 23% QoQ increase in Henry Hub (HH) price and rupee depreciation of 2% QoQ in 3Q. 2) Management has guided for a robust 1mmscmd YoY growth trajectory in FY27/28 and stable EBITDA margin of INR7/scm. 3) Zonal tariff reform and tax reduction in Gujarat should result in EBITDA margin gain of ~INR1/scm for IGL. 4) The company plans to add 80-100 CNG stations p.a. over the next few years to drive volume growth.
- **Key investor concerns:** 1) CNG volume growth stood at only ~3% YoY, primarily due to falling volumes from DTC buses. However, management has highlighted that DTC buses would go to zero in 4QFY26. CNG volume growth, excl. DTC and DIMTS buses, was ~10% YoY in 3Q. 2) With HH prices averaging USD7.2/mmbtu in Jan'26 compared to USD3.7/mmbtu in 3QFY26, EBITDA/scm margins are likely to face pressure in 4QFY26.
- **Valuation and view:** We value IGL at 15x Dec'27E SA P/E and add INR43/sh as the value of JVs to arrive at our TP of INR235/sh. At 3% FY27E dividend yield and 9% EPS growth over FY25-28, we believe the valuation is attractive. Reiterate BUY.

Key takeaways from the 3Q earnings call

- IGL maintains volume guidance of 10mmscmd by FY26-end. The company plans to add 1mmscmd per annum over FY26-28.
- **Regulatory developments:** 1) Replacement of 15% VAT with 2% CST on domestic gas sourced from Gujarat will result in lower gas costs for IGL by ~INR0.25/scm. 2) Two-zone tariff reform will also benefit IGL in terms of lower gas cost by ~INR0.75/scm (after partial pass-through to customers). 3) Owing to these factors, management has maintained EBITDA/scm margin guidance of ~INR7/scm.
- **Other takeaways:** 1) IGL will incur core capex of INR12.5b in FY26 (INR8.5b spent in 9MFY26) and INR12-13b in FY27. 2) 3Q gas sourcing split for priority segment sale: APM/NW gas/HP-HT/RLNG: 3.38/0.57/0.5/5.3mmscmd; 3) Middle East tender process: IGL sees a sales potential of ~6mmscmd (1.5mmscmd per city x 4 cities); IGL will submit tender for phase 2 by Apr'26.

In-line performance; Volume growth disappoints

- Total volumes were slightly below our estimate at 9.42mmscmd (our est.: 9.53mmscmd), up 3% YoY.
- CNG and PNG volumes stood 1%/3% below est.
- EBITDA/scm (adjusted for labor codes impact of INR293m) came in 5% above our est. at INR5.8.
- Realization decreased by ~INR0.1/scm QoQ and gas costs decreased by ~INR0.9/scm QoQ, while opex increased by ~INR0.2/scm QoQ.
- Resulting adj. EBITDA was 4% above our estimate at INR5b (+38% YoY).
- IGL's adj. PAT came in line with our est. at INR3.8b (+33% YoY).
- The board has declared an interim dividend of INR3.25/sh (FV: INR2/sh).

Valuation and view

- IGL currently trades at 14.9x 1-year fwd. P/E, below its mean – 1 S.D. P/E. However, we believe that earnings have bottomed out now. We estimate EBITDA margin to improve to INR5.5/INR6.5/INR6.5 per scm and volumes to clock 6% CAGR over FY25-28E. Resultant EBITDA and PAT are estimated to clock a CAGR of 9% each over FY25-28E.
- We value IGL at 15x Dec'27E SA P/E and add INR43/sh as the value of JVs to arrive at our TP of INR235/sh. At 3% FY27E dividend yield and 9% EPS growth over FY25-28, we believe the valuation is attractive. Reiterate BUY.

Steady operating performance amid macro challenges

Operating performance misses estimate

- Deepak Nitrite (DN) reported a healthy operating performance, with EBITDA growing 25% YoY (on a low base) to INR2b amid persistent macroeconomic challenges.
- Phenolic segment EBIT grew 20% YoY, driven by higher plant utilization and process optimization, while Advanced Intermediate EBIT declined 11% YoY due to continued pricing pressure from aggressive Chinese dumping, global oversupply, residual inventory restocking, and import competition.
- We expect DN's performance to remain under pressure in the short term amid persistent industry-wide challenges. Continued oversupply from China, coupled with rapidly evolving geopolitical developments, is likely to sustain pricing pressure and weigh on overall operational performance.
- We reduce our FY26/FY27 earnings estimates by 17%/7% while maintaining our FY28 estimates, and project a CAGR of 5%/9%/7% in revenue/EBITDA/PAT over FY25-28. We value the stock at 24x FY28E EPS to arrive at our TP of INR1,470. Reiterate Sell.

Intermediate segment continues to face margin headwinds

- 3Q revenue grew 4% YoY to INR19.8b (est. in line), primarily led by an 18% YoY growth in Advanced Intermediates to INR6.5b, while Phenolic revenue declined 2% YoY to INR13.4b.
- Gross margin came in at 27.8% (up 100bp YoY), while EBITDAM stood at 10.7% (up 180bp YoY). Employee costs as a % of sales stood at 5.4% (vs. 5.2% in 3QFY25), while other expenses stood at 11.8% (vs. 12.8% in QFY25).
- EBITDA grew 25% YoY to INR2b (our est. INR2.5b), while EBIT for Phenolics grew 20% YoY, and EBIT for Advanced Intermediates declined 11%.
- EBIT margins for Advanced Intermediates contracted 80bp, while EBIT margins for Phenolic expanded 200bp YoY to 11%.
- Adjusted PAT stood at INR1b (est. of INR1.5b), rising 11% YoY (Adjusted for the one-time impact of labor code).
- In 9MFY26, its revenue/EBITDA/Adj. PAT declined 5%/22%/31% to INR57.7b/INR6b/INR3.4b.

Highlights from the management commentary

- **Guidance and outlook:** While the global environment remains characterized by persistent pricing pressures and heightened competitive intensity, management expects a favorable performance in 4QFY26, driven by strategic priorities, including product innovation, geographical expansion, and leveraging in-house nitric acid production.
- **Polycarbonate:** The company is systematically building an integrated ecosystem from raw material security to the final polycarbonate product, supported by strategic tie-ups with key vendors and suppliers. The financial arrangements and funding structures are in the final stages to ensure capital and balance sheet readiness. This is expected to come online over the next 2-2.5 years in an integrated fashion with propylene, phenol, BPA, and then polycarbonates.

- **Product development:** The company has a pipeline of ~15 products across R&D and pilot stages, with key opportunities in mining chemicals, personal care, flavors & fragrances, and polymer applications. The Methyl Isobutyl Ketone (MIBK)/Methyl Isobutyl Carbinol (MIBC) project is progressing well and is targeted for commissioning in 4QFY26.

Valuation and view

- The global chemical industry continues to face a challenging operating environment, with sustained pricing pressure, intense competition, and uneven demand trends driven by shifting trade flows and aggressive pricing by Chinese producers. While the favorable shift in US tariffs offers a constructive long-term outlook, the near- to medium-term impact on the company is expected to remain moderate, given its limited exposure.
- We reduce our FY26/FY27 earnings estimates by 17%/7% while maintaining our FY28 estimates. We project a CAGR of 5%/9%/7% in revenue/EBITDA/PAT over FY25-28E. We value the stock at 24x FY28E EPS to arrive at our TP of INR1,470. Reiterate Sell.

- Eris Lifesciences (ERIS) reported lower-than-expected performance with a 4%/8%/11% miss on revenue/EBITDA/PAT for the quarter. ERIS witnessed strong growth in the international business. Domestic formulation (DF) business grew at a slower pace in 3QFY26.
- ERIS has re-evaluated its DF portfolio and decided to curtail products that are either not growing and/or not aligning with its core therapies. This kept growth under check in the DF segment in 3QFY26.
- While margins in the international business were lower during the quarter, this is largely due to the front-loading of opex to cater to future needs.
- ERIS' order book has expanded 10x between 1QFY26 and 3QFY26. In addition to existing sites, ERIS' third injectable site is expected to be commissioned in FY28, adding capacity for its CDMO business.
- We lower our earnings estimate by 5%/7%/6% for FY26/FY27/FY28, factoring in: a) the rationalization of portfolio in the DF segment, and b) increased operational costs in the international business. We value ERIS at 28x 12M forward earnings to arrive at TP of INR1,520.
- We expect a 14%/15%/31% CAGR in sales/EBITDA/PAT over FY26-28, backed by comprehensive offerings in the insulin segment, GLP product launch in India, and a healthy order book in the CDMO segment. That said, the current valuation captures this upside. Reiterate Neutral rating on the stock.

Stronger operating efficiency cushions the product mix effect

- ERIS' 3QFY26 revenue grew 11% YoY to INR8.1b (vs our est: INR8.4b).
- The DF segment grew 10% YoY to INR7b (86% of the sales). The international market sales grew 45% YoY to INR1.1b (14% of sales).
- Gross margin contracted 330bp YoY to 72.3%.
- However, EBITDA margin expanded 50bp YoY to ~34.9% (our est. 36.4%), despite decreased gross margins. Employee costs/other expenses declined 10bp/declined 370bp YoY as a % of sales) for the quarter.
- DF EBITDA margin was stable at 36.5%. International market EBITDA margin was 29.7% vs 28.9% YoY.
- EBITDA increased 12.5% YoY to INR2.8b (vs our estimate: INR3b).
- Adj. PAT increased 34.7% YoY to INR1.1b (vs our estimate: INR1.3b).
- Exceptional item (INR172m) relates to one-time employee expense on account of changes in the labor code.
- For 9MFY26, Revenue/EBITDA/PAT grew 8.4%/10.7%/35.4% YoY.

Highlights from the management commentary

- The discontinuation of certain low-margin products has led to lower YoY growth in the DF segment in 3QFY26.
- ERIS has guided for FY27 revenue/EBITDA of INR5.5b-INR6b/INR1.8b-INR2b from the international business.
- ERIS is currently lagging market growth in oral anti-diabetes therapy but expects to stabilize over the next 2-3 quarters.
- The company has identified three key growth drivers for the next 3-4 quarters: its diabetes franchise, integration of biotech manufacturing, and ramp-up of the international business.
- ERIS has developed Esaxerenone in-house. The clinical data is favorable for reduction in hypertension as well as some benefits on the kidney side.

■ **Soft 3Q as deliveries fall short of our expectations:** Inox Wind (IWL) reported a quarterly consolidated revenue of INR12.1b (+33% YoY, +8% QoQ), which missed our estimates by 34%, largely on account of weaker-than-expected execution of 252MW vs. our estimate of 300MW. Reported EBITDA of INR2.8b, missed our estimates by 15%, even as EBITDA margin remained strong at 23%. The order book stood at 3.2GW (49% WTG and 51% turnkey) at the end of 3QFY26, flat YoY and QoQ.

■ **What did we like about the result:** 1) management commentary about the sector and new order outlook remained positive, and IWL remains confident about growing the order book; 2) EBITDA margin guidance was pushed up to 22% for FY26 and 20-22% for FY27 (vs. our previous estimate of 17-18%); 3) the company expects a strong 4QFY26 earnings performance (as implied by FY26 guided revenue and EBITDA estimates); 4) as per IWL, the working capital cycle is now down to 220 days (from 300+ days in FY25) and is expected to decline to 200/150 days by the end of FY26 and FY27.

■ **Key monitorables:** 1) new order inflows at 600MW are trailing our est.; 2) while EBITDA margin guidance was raised, there was a sharp cut in revenue guidance amid soft realizations and a slow pace of deliveries.

■ **Cut our FY26E/FY27E PAT by 10%/5%:** We cut our FY26 and FY27 PAT estimates by 10% and 5%, respectively, as we adjust deliveries and realizations slightly lower. Our revised estimates are broadly in line with the revised company guidance.

■ **Valuation and view:** We cut our valuation multiple to 20x (from 24x), given 1) weaker sentiment in the wider market as well as in the power/renewables sector, 2) a modest cut to earnings, and 3) a slower-than-expected pace of new orders. Our revised TP of INR150 (based on 20x FY28 EPS) implies 42% potential upside. **Reiterate BUY.**

Miss on earnings as execution falls short of expectations

Financial performance

- IWL reported a quarterly consolidated revenue of INR12.1b (+33% YoY, +8% QoQ), which missed our estimates by 34%, largely on account of weaker-than-expected execution of 252MW vs. our estimate of 300MW.
- IWL reported an EBITDA of INR2.8b, missing our estimates by 15%, but improving 38%/24% YoY/QoQ. EBITDA margin came in at 23%, beating our estimate of 18% by 540bp.
- With a higher-than-expected tax rate of 40%, the company has reported its Adj. PAT at INR1.2b (-6% YoY, +28% QoQ), missing our estimate by 38%.

Operational performance

- IWL reported execution of 252MW (+33% YoY, +25% QoQ), missing our expectation of 300MW by 16%.
- The order book of IWL stood at 3.2GW (49% WTG and 51% turnkey) at the end of 3QFY26, flat YoY and QoQ.

Inox Green

- Inox Green's revenue was reported at INR0.8b (+34% YoY, -5% QoQ) with EBITDA at INR0.2b (+46% YoY, +165% QoQ), with EBITDA margins at 27.8% (vs. 10% in 2QFY26).
- Inox Green's O&M contracted capacity expanded further to 13.3GW in 3QFY26 from 12.5GW in 2QFY26.

Highlights of the 3QFY26 performance

- IWL expects to achieve around INR50b in consolidated revenue for FY26, supported by healthy order inflows.
- The company's order book stood at 3.2 GW at the end of 3QFY26, ensuring revenue visibility for the next 18–24 months.
- The company has guided for EBITDA margins of 20–22% in FY26, with a similar margin range expected to be sustained into FY27.
- For FY27, management is targeting approximately 75% growth in consolidated revenue.
- Working capital days are expected to be reduced to 200 days by the end of FY26 and further down to 120–150 days by FY27.
- Inox Green is guiding for over INR6.0b EBITDA by FY27 on its 13.3 GW managed portfolio, maintaining high fleet availability and benefiting from new turbine additions.

Valuation and View

- We cut our valuation multiple to 20x (earlier: 24x), given 1) weaker sentiment in the wider market as well as in the power/renewables sector, 2) a modest cut to earnings, and a slower-than-expected pace of new orders. Our revised TP of INR150 (based on 20x FY28 EPS) implies 42% potential upside. **Reiterate BUY.**

Sell

Earnings under pressure amid persistent margin headwinds

- Fine Organic Industries (FINEORG) reported muted operating performance, with an EBITDA growth of 2% YoY, primarily due to gross margin contraction of 140bp YoY to 38%.
 - FINEORG has been expanding its global reach by entering new geographies and strengthening its strategic partnerships. The company incorporated a wholly-owned subsidiary in Jebel Ali Free Zone, Dubai, UAE, to establish a local presence in GCC countries and improve supply chain efficiencies.
 - We broadly maintain our earnings estimates for FY26/FY27/FY28 and estimate a revenue/EBITDA/Adj. PAT CAGR of 9%/6%/7% for FY25-FY28. FINEORG currently trades at ~29x FY28E EPS and ~22x FY28E EV/EBITDA. We value the stock at 26x FY27E EPS to arrive at our TP of INR3,920.
- Reiterate Sell.**

Margin pressure despite stable demand

- FINEORG reported revenue of INR5.6b in 1QFY26, rising 8% YoY. Overall demand remained stable during the quarter.
- Exports revenue grew 2% YoY to INR2.9b, while domestic revenue grew 15% YoY to INR2.6b, driven by improved domestic demand.
- Gross margin stood at 38% (down 140p YoY), while EBITDA margin contracted 100bp YoY to 18.3% in 3QFY26, primarily due to higher raw material costs in 3QFY26.
- EBITDA stood at INR1b, up 2% YoY, and Adj. PAT dipped 4% YoY to INR792m in 3QFY26 (est INR869m).
- In 9MFY26, revenue grew 5% YoY to INR17.4b, while EBITDA/Adj. PAT declined 7%/4% to INR3.6b/INR3b.

Highlights from the management presentation

- Freight costs have stabilized during the year and reduced further in 3Q, mainly due to a reduction in global sea freight rates.
- During the quarter, the company infused equity of about INR61.7m in its joint venture company, Fine Organic Industries (Thailand) Co. Ltd., for business growth purposes.
- FINEORG has incorporated a wholly-owned subsidiary, Fine Organics FZE, in Dubai, UAE. The subsidiary aims to establish a local presence in GCC countries and enhance supply chain efficiency.

Valuation and view

- The company remains focused on strengthening its global presence through investments in overseas subsidiaries, expanding US capacity for future growth, enhancing manufacturing capabilities, and incorporating a wholly-owned subsidiary in Dubai to establish a local presence in GCC countries and improve supply chain efficiency
- The long-term prospects for FINEORG remain healthy, as the company operates within the oleochemicals industry and has consistently driven growth through R&D innovations over the years. However, we anticipate that its performance may be adversely affected in the near-to-medium term by the following factors: 1) longer-than-expected delays in the commissioning of new capacities for expansion, and 2) existing plants operating at close to optimum utilization, with no potential for debottlenecking.
- We broadly maintain our earnings estimates for FY26/FY27/FY28 and project a revenue/EBITDA/Adj. PAT CAGR of 9%/7%/8% for FY25-FY28. FINEORG currently trades at ~29x FY28E EPS and ~22x FY28E EV/EBITDA. We value the stock at 26x FY27E EPS to arrive at our TP of INR4,100. Reiterate Sell.

FII Includes depository receipts

- Vedant Fashion's (VFL) 3Q performance was adversely impacted by the lack of wedding days in Dec'25 and Jan'26, leading to a 2% drop in customer sales and a 4% YoY fall in reported revenue.
- While the wedding calendar creates quarterly fluctuations, VFL's growth has been structurally weak for the past few years despite largely stable wedding days in FY24 and FY26 (refer: Exhibits 3 and 4).
- VFL's 9MFY26 revenue is tracking at almost similar levels to 9MFY23, highlighting increased competitive intensity and brand-related challenges.
- Gross/EBITDA margins contracted ~195bp/270bp YoY, reflecting price absorption after the GST hike and operating leverage.
- VFL continued to consolidate its retail footprint in order to improve the overall quality. The company closed three net domestic EBOs and four SIS, leading to net closure of seven stores. Management expects the closure of small format stores/SIS to continue for at least next couple of quarters.
- We cut our FY26-27 earnings estimates by ~8-9%, factoring in weaker sales, lower gross margins and operating leverage. We now model a modest 2-4% CAGR in revenue/EBITDA/PAT over FY25-28E. **Notably, FY28E earnings are still expected to remain ~4% below the FY23 levels.**
- Following a sharp ~50% correction over the past year, VFL now trades at ~30x FY27E EPS. While valuations have meaningfully reset, we would prefer clearer evidence of a sustainable demand recovery and earnings acceleration before turning constructive on the stock.
- **Maintain Neutral with a revised TP of INR510 (earlier INR600), premised on 30x FY28E EPS.**

Another weak quarter; revenue/EBITDA down 2%/9% YoY

- Customer sales declined ~2% YoY to INR6.9b in 3QFY26, owing to the lack of wedding days in Dec'25 and Jan'26.
- Same-store sales declined ~4.5% in 3Q (+1.8% in 9MFY26), while area additions remained muted at 2.3% YoY.
- Consolidated 3Q revenue declined 4% YoY to INR4.9b (6% miss on our muted expectations).
- The company closed seven net stores during 3Q (three domestic EBOs, four SIS), bringing the total store count to 664 (vs. 666 YoY).
- Gross profit (GP) declined 6% YoY to INR3.4b (9% miss) as gross margin contracted ~195bp YoY to 70% (~200bp miss).
- Including job charges, GP declined ~6% YoY to INR3.2b, with margin contracting ~155bp YoY to 65.7%.
- Employee cost (excluding labor code provisions) increased 9% YoY, while other expenses declined ~2% YoY (5% lower).
- EBITDA declined ~9% YoY to INR2.2b (11% miss), due to weak revenue, lower gross margin and operating leverage.
- EBITDA margins declined ~270bp YoY to 44.7% (~250bp miss).

- Depreciation/finance costs rose 13%/1% YoY, while other income fell ~4% YoY.
- VFL booked a one-time provision of INR16.17m related to the new labor code. Adjusted for the same, PAT declined ~14% YoY to INR1.4b (15% miss).
- For 9MFY26, customer sales/revenue grew by a modest 5%/2% YoY, while EBITDA/PAT declined 5%/9% YoY.

Highlights from the management commentary

- **Demand:** VFL saw growth during Sep-Nov'25 festive and wedding periods; however, 3QFY26 growth was affected by calendar shifts. Management indicated that Dec'25 had just three wedding dates and Jan'25 had none (vs. ~10 YoY), which, coupled with a slowdown in mid-premium discretionary consumption, led to overall weak performance.
- **Network expansion:** VFL continues to prioritize the quality of retail network over store count, closing sub-1,000 sq.ft., SIS and weaker micro-market stores while shifting toward larger flagship formats. Store count may decline, but square footage remains the more relevant metric. Expansion has been calibrated amid rental inflation, with normalization expected over the next 2-3 quarters once consolidation stabilizes and productivity improves.
- **Gross margins:** Moderation was primarily attributed to the GST rate hike (12% to 18% on ~90% SKUs), with only partial price pass-through to preserve value positioning. VFL tries to strike a balance between value proposition and margins, with normalization expected as pricing adjustments flow through.

Valuation and view

- Over the past few years, VFL has seen sales stagnate owing to a high base (post Covid-bump in FY23), weaker wedding calendar, and subdued overall consumer sentiment.
- While wedding calendar creates quarterly fluctuations, VFL's growth has been structurally weak for past few years despite largely stable wedding days in FY24 and FY26 (refer: Exhibits 3 and 4).
- We believe rising organized competition in ethnic wear and a slower-than-expected shift from unorganized to organized in the ethnic wear category have also been the key headwinds for VFL.
- Growth recovery in Manyavar (on low base of last few years), scale-up of Mohey (women's celebration wear) and Twamev (premium offering in celebration wear), and improved traction in recent forays in the newer categories (Diwas, value brand catering to festive wear) remain the key growth drivers.
- We cut our FY26-27E earnings estimates by ~8-9%, factoring in weaker sales, lower gross margins and operating deleverage. We now model a modest 2-4% CAGR in revenue/EBITDA/PAT over FY25-28E. **Notably, FY28E earnings are still expected to remain ~4% below the FY23 levels.**
- Following a sharp ~50% correction over the past year, VFL now trades at ~30x FY27E EPS. While valuations have meaningfully reset, we would prefer clearer evidence of a sustainable demand recovery and earnings acceleration before turning constructive on the stock. **Maintain Neutral with a revised TP of INR510 (earlier INR600), premised on 30x FY28E EPS.**

FII	6.2	6.9	7.5
Others	14.4	13.6	13.2

FII includes depository receipts

- Bata India reported a modest 3% revenue growth in 3QFY26 and its EBITDA margin expanded 73bp YoY to 22.4%, supported by tighter cost control and accounting changes.
- Management highlighted early signs of recovery in demand, aided by GST pass-through and improved value propositioning. The premium portfolio, led by Hush Puppies, remained resilient.
- Strategic focus areas include scaling up ZBM, improving sell-through, brand strengthening, and leaner inventory to enhance availability and turns. It is also increasing digital marketing spends (double-digit growth over two years) to strengthen engagement with younger cohorts. We believe these are the steps in the right direction.
- Nevertheless, these initiatives are yet to translate into meaningful growth acceleration or margin recovery, with profitability likely to remain below pre-Covid levels even by FY28E.
- We tweak our FY26-28 estimates and build in revenue/EBITDA/adj. PAT CAGR of 4%/8%/7% over FY26-28E. **Reiterate Neutral with a revised TP of INR945.**

Modest revenue growth; higher other income drives profitability

- Revenue grew 3% YoY to INR9.5b (in line), hit by GST-related disruptions (vs. Metro: +15% | Campus: +14% | Relaxo: flat).
- Gross margin contracted **20bp YoY to 56%**, likely due to channel mix changes.
 - Consequently, **gross profit grew 2% YoY (in line)**.
- Employee costs rose 8% YoY, while other expenses were down by 4% YoY, **aided by cost controls and partly due to an accounting change**.
- **EBITDA grew 6% YoY (in line), led by tighter cost controls**.
- **EBITDA margins stood at 22.4%, up 75bp YoY**.
- BATA booked one-time exceptional items: 1) VRS – INR13m on top of the INR83m booked in 2Q; overall INR143m booked in 9MFY26; and 2) the labor code impact of INR67m.
- Depreciation grew 15% YoY, as the royalty amount was moved from other expenses to amortization. Finance costs rose 4% YoY.
- Other income more than doubled YoY to INR227m, boosting profitability.
- Reported PAT at INR660m grew 12% YoY. Adj PAT at INR740m rose 11% YoY (14% ahead).
- For 9MFY26, revenue was flat, gross margin compressed 90bp to 54.9%, and EBITDA dipped 1% with margin at 20.7%. Reported PAT at INR1.32b declined 54% YoY and adj PAT at INR1.5b dipped 25% YoY.

Key takeaways from the management commentary

- **Demand:** Early demand recovery is visible, supported by GST-led formalization and stronger internal execution—scaling up ZBM, improving sell-through, sharper brand focus, and leaner inventory driving better availability and turns. Growth is broad-based across price points, including lower ASPs, indicating that value proposition recalibration is working, while product funnel re-engineering remains the key medium-term accelerator.

- **Marketing spends** have grown in double digits for two consecutive quarters and are expected to remain elevated, increasingly skewed to digital and influencer-led campaigns. Focused product campaigns (Festive, Victoria Ballerina, Power Easy Slide) indicate sharper ROI orientation rather than diffuse brand advertising.
- **Inventory quality** has materially improved with a 25% reduction over two years and record-low aged stock, driven by SKU rationalization and data-led forecasting under 'Project Customer First'. Freshness and tighter line architecture should help to sustain working capital gains and reduce markdown risk structurally.

Valuation and view

- Bata India is accelerating distribution expansion (~30% store growth via franchise), sharpening brand and product mix through youth-focused concepts (Floatz, Power, Sneaker Studios), and driving premiumization. Parallel execution on ZBM scale-up, sell-through improvement, leaner inventory, and higher digital spends support better availability, faster turns, and stronger engagement. We view these steps as directionally appropriate.
- Nevertheless, these initiatives are yet to translate into meaningful growth acceleration or margin recovery, with profitability likely to remain below pre-Covid levels even by FY28E.
- We tweak our FY26-28E estimates and build in revenue/EBITDA/adj. PAT CAGR of 4%/8%/7% over FY26-28E.
- Despite sharp underperformance, the stock trades at ~48x 1-year forward P/E, above its long-term average; however, the expected demand recovery after GST cuts in the organized value segment should benefit Bata, preventing a downgrade to Sell. **Reiterate Neutral with a revised TP of INR945.**

52-Week Range (INR)	249 / 153
1, 6, 12 Rel. Per (%)	13/-13/-5
12M Avg Val (INRm)	462

- Time Technoplast (TIME) reported a healthy and in-line set of results in 3QFY26. Volume/revenue/EBITDA/PAT grew 16%/13%/16%/25% YoY. EBITDA margin expanded 46bp YoY to 14.9%. Volume growth was led by both the Overseas (up 17%) and Indian businesses (up 15%).
- Value-added products (VAP) revenue grew 18% YoY, with an 18.8% EBITDAM. Established product revenue up 10% YoY with a 13.4% EBITDAM.
- For 9M, revenue/EBITDA/PAT grew 11%/14%/21% YoY.

Others	24.1	26.8	27.6

Key highlights from the management commentary

- VAP sales grew 18% YoY; focus remains on driving higher margin VAP sales.
- Despite INR1.8b capex in 9M, debt reduced INR3.8b, aided by QIP money and healthy CFO (INR3.3b). Gross debt now stands at INR2.6b.
- TIME aims to be debt-free in the next six months.
- **Revenue growth guidance:** Overall 15%+, Packaging Products 11-13%, Composite 25-30%, PE Pipes 20-25%.
- **Margin levers** are efficiency improvement, manufacturing consolidation, manpower cost reduction, automation, and adoption of solar solutions.
- **RoCE expansion** of 20% in FY26E is on track; it stood at 18.6% in 9M.
- 4Q generates roughly 30% of annual revenue.
- Working capital targeted to reduce to 90 days from 100+ days currently.
- It targets completion of due diligence for the FIBC acquisition by Mar'26.
- The company sees a large market opportunity for hydrogen and fire extinguisher composite cylinders.
- The use of solar power at select plants is likely to save INR100m in FY27.
- Plant consolidation of CNG composite cylinder and capex (from 480 to 1080 cascades) is on track for commissioning in 4QFY26.
- The first recycling plant is expected to be operational by Apr'26.
- Phase 1 of plant automation is expected to be completed by FY27.
- Expanding PE pipe capacities at various locations to meet strong demand.
- It has received 3 acres of land from the Gujarat government for the future expansion of packaging product capacities.

Valuation and view: Reiterate BUY

- We maintain our earnings estimates after an in-line result in 3QFY26.
- After clocking a 16%/19%/39% CAGR in revenue/EBITDA/PAT over FY21-25, we estimate a 14%/15%/22% CAGR over FY25-28, to be fueled by its strong performance in the VAP segment (20% revenue CAGR, 18%+ EBITDAM).
- Pre-tax RoCE and RoIC are expected to expand from ~18.2% each in FY25 (FY24: 16-17%) to ~23% and ~25% in FY28, respectively, led by healthy operating results, improved efficiency, and working capital management.
- **Robust outlook and attractive valuation (~14x FY28E P/E) warrant a re-rating, in our view. Reiterate BUY and a TP of INR280 (20x FY28E P/E).**

Better than expected performance

Astra Microwave (ASTRA)'s 3QFY26 results were ahead of our estimates on better-than-expected margins. Order inflow was strong at INR4.7b (standalone basis) in 3QFY26, with another INR5-6b expected in 4QFY26. The company is rightly positioned to benefit from a strong addressable market of INR250b over the next 4-5 years. We expect ASTRA to get orders from DPSUs and DRDO for various platforms such as QRSAM, Tejas, Su-30 upgrade, etc. We maintain our estimates and expect revenue/EBITDA/PAT CAGR of 18/19/23% over FY25-28. We believe ASTRA's revenue growth is likely to accelerate over FY27-30, as larger platform orders are finalized by DPSUs and MoD. We consider ASTRA as a long-term investment opportunity and maintain our BUY rating with a revised TP of INR1,150 (earlier INR1,100), rolling forward to 38x Mar'28E EPS.

Strong beat on profitability

ASTRA's revenue was in line, while EBITDA and PAT beat our estimates. Revenue was broadly flat YoY at INR2.6b, in line with our estimate. Gross margin expanded 730bp YoY to 55.3%, above our estimate of 47.0%. This led to an EBITDA beat of 34% at INR825m (+8% YoY), while margin expanded 220bp YoY to 31.7% vs. our estimate of 23.5%. However, a higher tax rate compared to last year led to a 1% YoY dip in PAT to INR468m. This was still much better than our expectation of INR305m (54% beat). For 9MFY26, revenue/EBITDA/ PAT increased 5%/15%/9% YoY, while EBITDA margin expanded 220bp YoY to 25.4%. The company received orders worth INR6.6b during the quarter, taking the consolidated order book to INR25.7b.

Defense segment continues to be key contributor

Defense segment's revenue declined 3% YoY to INR2.1b, while order inflows stood at INR2.9b, taking the total order book to INR14.8b. The company has secured key subsystem wins such as DCPD for EW suites for platforms like Sukhoi. Several EW systems, where ASTRA has been qualified, such as Nayan, Samudrika, and Dharashakti, are entering production stages, which can enhance revenue stability. This transition from development to production is likely to support margin sustainability over time. We expect the segment to grow at a CAGR of 29% over FY25-28.

Meteorology segment to drive diversification

Meteorology segment's revenue increased 27% YoY to INR88m, while inflows stood at INR1.5b, taking the total order book to INR3.7b. The company is actively involved in Mission Mausam under the Indian Meteorological Department, with multiple contracts already under execution. The overall opportunity is expected to be rolled out through 4-5 tenders over the next few years. Order finalization is likely to take two years, while execution may be spread out over three to four years. Continued participation in national weather infrastructure projects strengthens the company's execution beyond defense. We expect the segment's revenue to clock a CAGR of 51% over FY25-28.

Space segment growth to be prolonged

Space segment revenue declined 21% YoY to INR68m, with order inflows of INR174m taking the order book to INR2.5b. Most orders in the current order book are related to satellite payload electronics, with only ~5% linked to launch vehicle systems. The company expects repeat orders over the next 2-3 years in similar configurations. It is also working toward developing its own satellite, with a potential launch timeline of around two years. Partnerships with startups are being pursued to strengthen capabilities in propulsion and satellite technologies. We expect the segment's current revenue levels to sustain over the medium term and grow meaningfully beyond FY28 once the company launches its own satellite.

Export segment execution to remain moderated on selective approach

Export revenue increased 38% YoY to INR299m, while order inflows stood at INR204m, taking the segment order book to INR1.3b. The company has consciously shifted away from low-margin high-value export contracts (BTP) to design-led high-margin business (BTS). As a result, export revenue has moderated in recent years but margins have improved. New opportunities are emerging following trade agreements with Europe and the US, with renewed discussions currently underway. However, these opportunities may take time to convert into firm orders due to long qualification and negotiation cycles. Consequently, the company's selective approach is expected to keep execution moderated in the export segment.

MoU with Bharat Electronics

The company has signed a memorandum of understanding with BHE to jointly design, develop, and manufacture advanced defense systems. This partnership focuses on strengthening indigenous capabilities in radar, electronic warfare, and related technologies. Through this arrangement, the company aims to integrate more deeply into major DPSU-led programs, particularly in areas requiring complex RF, microwave, and mission critical electronics. Overall, this partnership supports long-term order visibility while reinforcing the company's competitive positioning.

Guidance

FY26 revenue is guided to grow 10% YoY with healthy margins. The company expects order inflows worth INR5.5b-6b in 4QFY26, taking the FY26 inflows to ~INR13b. Of this INR5.5b-6b, ~INR4.5b is expected to come from defense and ~INR1.2b from metrology. For FY27, the company has guided revenue growth of 15% YoY, with order inflows for the year reaching ~INR15b-16b. Majority of this will be from DPSUs like BHE which are expecting some large-size inflows in 1QFY27 for QRSAM, as well as from DRDO where ASTRA is participating in few R&D programs. Export order inflows are expected to be ~INR1b-1.3b in FY27.

JV performance

The Astra-Rafael joint venture reported an order book of ~USD80m and executed orders worth ~USD18.2m in 3QFY26. For FY26, the JV is expected to generate revenue of ~INR3.5b, rising to ~INR4b+ in FY27. PBT margin is estimated at 10%-12%. The JV has secured two major orders worth over INR3b during the quarter. Its strong execution track record supports sustainable growth over the next five to six years.

Financial outlook

We maintain our estimates and expect the company's revenue/EBITDA/PAT to clock a CAGR of 18%/19%/23% over FY25-28. With margins to sustain at current strong levels, we expect its RoE and RoCE to remain at comfortable levels of 15-18% by FY28.

Valuation and view

ASTRA is currently trading at 38.2x/30x P/E on FY27E/FY28E EPS. We **reiterate our BUY rating on the stock** with a revised TP of INR1,150 (earlier INR1,100) on roll forward to 38x Mar'28E EPS.

Key risks and concerns

Key risks include delays in awarding of larger platforms, lower-than-expected spending from the government on the defense sector, slower export momentum, and supply-chain related constraints.

3Q impacted by pharma destocking; contrast remains stable

Earnings below estimates

- Blue Jet Healthcare (BLUEJET) reported revenue of INR1.9b in 3QFY26, down 39% YoY, primarily due to pharma intermediate destocking and the timing of sales recognition (goods in transit of 3Q will be recognized in 4Q) in contrast media.
- Going ahead, we expect recovery in the pharma intermediate segment over the next couple of quarters as destocking ends. Additionally, steady growth in contrast media is supported by new intermediate ramp-ups and backward integration.
- Moreover, growth is expected to recover in FY27, backed by confirmed orders, recovery in pharma intermediates and customer-aligned capex expansion.
- Factoring in the weak 3QFY26 performance, we cut our FY26/FY27/FY28 earnings estimates by 32%/33%/34% and value the stock at 27x FY28E EPS to arrive at a TP of INR500. **Reiterate BUY.**

Declines in high-intensity sweeteners and pharma intermediates drag down operating performance

- BLUEJET reported revenue of INR1.9b (est. INR3.3b), down 39% YoY and up 16% QoQ. High-intensity sweeteners/pharma intermediates revenue declined 31%/73% YoY to INR257m/INR401m, while revenue from contrast media intermediates was flat YoY at INR1.2b.
- Gross margin stood at 51.7% (vs. 54.5% in 3QFY25 and 65% in 2QFY26), primarily due to product mix and a one-time inventory write-off.
- As a percentage of sales, employee costs stood at ~10% YoY (vs. ~5% in 3QFY25), while other expenses stood at ~17% (vs. ~11% in 3QFY25).
- EBITDA declined 62% YoY and 15% QoQ to INR469m (est. INR1.2b). EBITDA margin contracted 14.4pp YoY and 880bp QoQ to 24.4% (est. 35.6%).
- Adj. PAT stood at INR402m (down 59% YoY/23% QoQ), below our estimate of INR932m.
- In 9MFY26, revenue grew 4% YoY to INR7.1b, while EBITDA/adj. PAT declined by 6%/5% to INR2.2b/INR1.8b.

Highlights from the management commentary

- Capacity expansion:** Vizag is being developed with INR10b capex planned over 3-4 years, aligned to specific customer demand and new products. Unit 3 at Ambarnath, MH (~INR1.46b capex), is nearing validation in 1QFY27, strengthening backward integration in contrast media. A new INR400m Hyderabad R&D center focused on GLP-1 and advanced chemistries is expected to commence operations in 3QFY27.

- **Pharma intermediates:** Weakness in pharma intermediates was driven by channel destocking and supply chain realignment in the Bempedoic acid chain. Management expects normalization within 1-2 quarters. The earlier revenue spike was due to launch-led inventory build-up across the 9-10-month supply chain, which is now correcting. Importantly, underlying end-demand remains strong with growth in Japan and other markets, and management expects to remain the primary supplier given regulatory switching barriers.
- **Contrast media:** Contrast media is expected to grow on the back of; (i) an advanced intermediate under validation with five-year capacity visibility, (ii) the NCE intermediate line commissioned in Dec'25, which is expected to ramp up from 1QFY27 with better realizations due to forward integration, and (iii) Unit 3 backward integration to enhance cost competitiveness and supply chain control. The gadolinium-based new chemical entity (NCE) business remained sequentially stable with steady purchase orders.

Valuation and view

- We expect a recovery in pharma intermediates in the next couple of quarters, led by growth in cardiovascular drugs across geographies and end of destocking. Bempedoic acid (a key intermediate for cardiovascular products) should see healthy growth, backed by long-term contracts and the increasing market size of its key drugs.
- Further, operational performance is expected to be driven by strong order visibility in the MRI segment of contrast media and the approval of a new product in the high-intensity sweeteners segment.
- We expect a CAGR of 7%/2%/2% in revenue/EBITDA/PAT over FY25-28. Factoring in the weak 3QFY26 performance, we cut our FY26/FY27/FY28 earnings estimates by 32%/33%/34% and value the stock at 27x FY28E EPS to arrive at our TP of INR500. **Reiterate BUY.**

Note: FII includes depository receipts

- EPL reported revenue of INR11.5b (up 13% YoY) in 3QFY26, in line with estimates, driven by revenue growth across geographies. The Americas posted the highest growth of 19% YoY on the back of robust revenue growth in Brazil. EAP/AMESA/EU delivered 18%/10%/8% YoY growth, with strong growth of ~26% YoY in Beauty & Cosmetic (BNC), while oral care reported muted growth of 2% YoY.

- EPL continued its trajectory of margin expansion (up 20bp YoY), supported by AMESA/EAP/Americas (up 130bp/170bp/80bp). Europe recorded a margin contraction of 640bp due to operational challenges, which, the company indicated, is improving, resulting in a gradual margin recovery. Further, **EPL maintains its long-term double-digit growth guidance and expects EBITDA to grow slightly higher than revenue**, driven by an increase in the mix of BNC and sustainable products; and higher growth from emerging geographies (Brazil and Thailand).

- We maintain our estimates for FY26/FY27/28 and value the stock at 14x FY28E EPS to arrive at our TP of INR270. **Reiterate BUY.**

Marginal EBITDA expansion offset by weak EU performance

- Consolidated revenue grew 13% YoY to INR11.5b (est. in line). Gross margin stood at 60.6% (up ~40bp YoY). EBITDA margins expanded ~20bp YoY to 20.1% (est. 20.1%). EBITDA stood at INR2.3b (est. in line), up 14% YoY.
- Adj. PAT declined 3% YoY to INR907m (est. INR973m), adjusted for the INR53m impact of labor code change and the INR67m expense related to the closure of a factory unit in one of its subsidiaries.
- Revenue from AMESA/EAP/Americas/Europe grew 10%/18%/19%/8% YoY to INR3.9b/INR3b/INR3.2b/INR2.4b.
- EBITDA margins for AMESA/EAP/Americas expanded 130bp/170bp/80bp to 19%/23%/20%, whereas Europe EBITDA margin contracted 640bp to 12%.
- EBITDA for AMESA/EAP/Americas grew 18%/27%/24% YoY to INR737m/INR675m/INR659m, whereas Europe EBITDA declined 30% to INR292m during the quarter.
- For 9MFY26, revenue/EBITDA/adj PAT grew 11%/17%/21% YoY to INR34.6b/INR7b/INR3b. Our implied 4Q revenue/EBITDA/PAT growth is 12%/16%/3%.

Highlights from the management commentary

- Europe:** Margin was impacted by short-term operational issues such as higher write-offs, higher outsourcing and production issues, Christmas holidays, and an adverse mix. The company has consolidated some operations to reduce costs, which can drive margin expansion in the coming quarters.

- **EAP:** 3Q results were majorly driven by China performance. EPL initiated commercial production in Thailand plant in Nov'25. There was a factory closure in China mainly due to a customer moving its facility closure to another facility of EPLL. There are no capacity cuts and machines are operating in another facility.
- **Personal care and beyond:** Under the personal care and beyond category, B&C delivered robust growth of 26% with all regions delivering at least 20% growth. The company has built frontend and backend capabilities to grow this segment, i.e., building the center of excellence in Mumbai that focuses on innovations. EPLL is also investing in extruded capacities. **B&C's market size and growth are twice that of the Oral segment.**

Valuation and view

- EPL continues to deliver a healthy operating performance across geographies (except Europe), supported by healthy demand, product innovations, an improving sustainable mix (38% of total volume), and continued capacity expansion. We expect this positive trend to continue.
- With a focus on improving market share across geographies in the BNC segment and an expected recovery in Europe, we expect a CAGR of 11%/13%/21% in revenue/EBITDA/adjusted PAT over FY25-28. We value the stock at 14x FY28E EPS to arrive at our TP of INR270. **Reiterate BUY.**

Improved SSSG print; margin volatility continues

- Senco Gold (SENCO) delivered a consolidated revenue growth of 50% YoY to INR30.7bn, witnessing a sharp acceleration after clocking 2% growth in 2Q (peers >20%). SSSG stood at 39% (21% in 9MFY26), aided by festive demand and a higher old-gold exchange mix (43% of revenue). However, amid elevated gold prices, gold volumes declined 3% QoQ and ~10% in 9MFY26. Management highlighted that the demand momentum has been sustained in 4Q, and expects to deliver >25% revenue growth.
- The company opened four stores (+15% YoY) during the quarter, bringing the total store count to 196 (111 COCO, 83 FOCO, and 2 Dubai). SENCO is on track to reach 200 stores by FY26.
- GM expanded sharply by 830bp YoY to 19.9% (vs. est. 14.3%; 17% in 2QFY26), adjusted to custom duty in base. Inventory gains were added ~350bp in 3Q and ~250bp in 9MFY26 gross margins, which led to a sharp beat to our estimates. SENCO has a lower inventory, hedging to 55-60% in 9MFY26 vs. the earlier 95% in FY25. EBITDA margin expanded 810bp YoY to 13.4% (est. 6.7%, 6.9% in 2QFY26). EBITDA margin adjusted to inventory gain stood at ~9.5–10% in 3Q and ~8.5% in 9M. Management guide 7.5–7.8% EBITDA margin is sustained. However, given the competitive pressure, we model 7.2% margin for FY27/FY28 (close to the average of FY23–25).
- Given the inconsistencies in operating performance and low hedging ratios, we remain cautious on SENCO's operating margin performance going ahead. We **reiterate our Neutral rating with a TP of INR375 (18x Dec'25)**.

Beat on profitability; 3Q remains volatile

- **Healthy sales growth:** SENCO posted a strong consolidated revenue growth of 51% YoY to INR30.7bn (est. INR23.9bn). The 3Q performance remained volatile; 2QFY26 revenue growth was 2% YoY (peers were >20%) and 28% in 1QFY26. Titan (Jewelry standalone, ex-bullion), Kalyan, and P N Gadgil (retail) delivered revenue growth of 40%, 42%, and 36% in 3Q. Average transaction value (ATV) rose 8% QoQ to INR93,000, while average selling price rose 6% QoQ to INR60,270, reflecting improved realizations.
- **Inventory gain and margin expansion:** Consolidated gross margin expanded sharply by 830bp YoY to 19.9% (vs. est. 14.3%; 17% in 2QFY26), adjusted for the customs duty impact in the base quarter. Last year in 3QFY25, the company's gross margin dipped 710bp due to the impact of hedge accounting. Inventory gains were added ~350bp in 3Q and ~250bp in 9MFY26 gross margins, which led to a sharp beat to our estimates. Employee expenses rose 31% YoY (adjusted for a one-time INR62mn labor code impact), while other expenses increased 63% YoY. EBITDA margin expanded 810bp YoY and 640bp QoQ to 13.4% (est. 6.7–6.9% in 2QFY26), supported by the sharp improvement in gross margins.
- **Strong improvement in profitability:** EBITDA grew 282% YoY to INR4.1b (est. 1.6b). APAT grew 396% to INR2,687m (est. INR796m, 2QFY26 INR488m).
- In 9MFY26, net sales/EBITDA/APAT jumped 30%/135%/202%.

Key takeaways from the management commentary

- Gold volume declined by ~3% QoQ in 3Q and ~10% in 9MFY26, while the diamond segment recorded a 12.5% growth during 9MFY26.
- For FY27, the company plans to open 18–20 stores, split evenly between COCO (8–10) and franchisee (8–10) formats.
- Inventory stood at INR 46bn (up 55% YoY) to support wedding-season demand. Higher gold prices increased working capital requirements, funded through bank borrowings of INR 22.5bn (up 44% YoY).
- The company hedged 55–60% of inventory in 9MFY26 in a volatile gold price environment (normally 75-90%). In FY25, 95% of its inventory has been hedged.

Valuation and view

- Led by the beat on gross margin, we raise our EPS estimates by 12% for FY27 while maintaining the same for FY28.
- SENCO's gross margins have historically been volatile, reflecting its low level of hedging and resultant inventory gains. Management guided that a 7.5-7.8% EBITDA margin will be sustained. However, given the intense competition, we model 7.2% margins for FY27/FY28 (near the average of FY23-25).
- We model a revenue/EBITDA CAGR of 14%/-6% over FY26-28. However, adjusting the inventory gain, we model an EBITDA CAGR of 10%.
- **We reiterate our Neutral rating with a TP of INR375 valued at 18x Dec'27.**

Strategy reset, more work to be done; turnaround in FY27

VIP Industries' (VIP) 3QFY26 print was below our estimates. Consolidated revenue declined 9.4% YoY to INR4.5b, while EBITDA and PAT witnessed losses. The revenue decline was on account of: 1) heavy discounting in the Carlton brand, according to our channel checks, 2) elevated competition in the MT/GT channels, and 3) lower realization. VIP cut inventory by INR1.2b in 9MFY26, and we expect the company to introduce new designs over the next quarter. In addition, the company reported a one-time exceptional gain of INR712m from the sale of non-core assets. We expect the company's strategic focus on clearing old inventory and selling non-core assets to result in a stronger balance sheet. While the inventory provisioning reflects proactive cleanup and improved supply chain discipline, renewed brand investments and rationalized discounting should aid in sustainable growth. With Mr. Atul Jain's leadership and ongoing premiumization trends, VIP is poised for margin recovery and market share gains, in our view.

Subdued performance: Higher discounting across GT/MT channels

VIP's 3QFY26 consol. revenue declined 9.4% YoY to INR4.5b. 3Q saw a strong pickup in GT/MT and retail channels, resulting in higher discounting. We highlight that, amid ongoing litigation related to the Carlton trademark, we expect VIP to focus on liquidating system inventory within the stipulated period (six months). Our channel checks indicated that VIP ran 50% discounts on Carlton brands across EBOs, MT outlets, and select retail kiosks. In addition, despite lower saliency, e-commerce contributed to some volume uptick. VIP cut inventory by INR1.2b in 9MFY26, and we expect the company to introduce new inventory over the next year. With inventory cleanup underway, we believe the company is well-positioned to scale up revenues in FY27, supporting the topline growth of over 14% in FY27-28.

Gross margins contract to 29.5% due to higher provisions

Gross margins contracted to 29.5% (-1,707 bp YoY and 117bp QoQ), impacted by an INR543m soft inventory provision taken in 3Q. EBITDA loss came in at INR768m, settling EBITDA margin at -16.9% (-2263bp YoY and +926bp QoQ), led by employee costs (+3.2%) and other expenses (+2.9%). Adjusting for a one-time inventory provisioning cost of INR543m in COGS, EBITDA loss came in at INR225m (-179% YoY). In addition, the company reported a one-time exceptional gain of INR712m, mainly on account of the sale of non-core assets. With the new management focusing on inventory cleanup and re-establishing price discipline, we anticipate a strong recovery in EBITDA in FY27.

Valuation and view: Reiterate BUY; expect turnaround in FY27

We expect VIP to gain market share and deliver industry-beating growth, supported by strategic drivers that include: 1) a celebrity-led campaign to drive brand recall, 2) product upgrades with distinctive features, such as the Smart Bag-Tag, 3) store rationalization through the closure of low RoI EBOs, and 4) the Bangladesh plant's turnaround. Despite near-term weakness in performance, we are optimistic about VIP's growth story. Considering the 9MFY26 performance, we have trimmed our earnings estimates for FY26E/FY27E. We reiterate BUY with a revised TP of INR475 (implying 40x FY28E EPS). Risks: local competition, significant rise in input cost, and prolonged disruption in the Bangladesh facility (refer to [our IC note dated Sep'25](#)).

Weak exports; domestic bakery & biscuit growth in line

Mrs. Bectors Foods (MBFSL)'s consolidated revenue grew 8.4% YoY to INR5.3b in 3QFY26, led by strong performance in the bakery segment (+13.1% YoY, B2C – high teens and QSR – mid single digit). Biscuits grew at 5.5% YoY, led by high single-digit growth in the domestic segment, while exports reported low single-digit growth. According to the management, growth was largely volume-led, especially in English Oven and premium biscuits, indicating healthy underlying demand rather than pricing-driven expansion. Management expects a low-to-mid-teens growth, led by high-teens growth in Export & Bakery and high single-digit growth in QSR & domestic biscuits for FY27. EBITDA margin improved to 12.8% (+35bp YoY) despite export incentive suspension and labor code provisioning, with management reiterating its 14% margin target by 1HFY27. We expect Revenue/EBITDA/APAT to clock 13/16/19%, respectively, over FY25-28.

Bakery outperforms while exports struggle; domestic biscuits in line

MBFSL's reported steady 3Q performance with revenue growth of 8.4% YoY to INR5.3b. Strong performance in the bakery segment (+13.1% YoY, B2C – high teens and QSR – mid-single digit) while biscuits growth moderated (+5.5% YoY, Exports – low single-digit and Domestic – high single-digit). The domestic biscuit portfolio is shifting toward premium and health-oriented products. B2B and QSR segments remained stable, with strong client relationships and rising contribution from frozen products. Export growth remained muted due to US tariff uncertainties and delayed project execution. Management expects a low-to-mid-teens growth, led by high teens growth in Export & Bakery and high single-digit growth in QSR & domestic biscuit for FY27. We expect Revenue/EBITDA/APAT to clock 13/16/20%, respectively, over FY25-28.

Margin improves QoQ, led by product mix; expect improvement in 4Q

In 3Q, gross margin came at 45.0% (-6bp YoY and +83bp QoQ, led by product mix), supported by softening input costs, particularly wheat flour and select edible oils. EBITDA grew by 11.4% to INR684m, settling EBITDA margin at 12.8% (+35bp YoY/+26bp QoQ), despite an increase in the employee costs (+9.4% YoY) and other expenses (+5.2% YoY). APAT grew by 10.1% to YoY to INR381m on account of lower interest expense (-9.0%). Management expects the gross margin to improve slightly in FY27 and reach 14% by 1HFY27.

Valuation and view: Upgrade to Buy

We expect MBFSL to deliver a 13% revenue CAGR over FY25-28, driven primarily by 1) strong growth in domestic bakery, 2) premiumization and health-focused innovation, and 3) growth in the export revenue after the reduction in tariffs.

Domestic biscuits and QSR remain the weaker growth segments. Additionally, we believe distribution expansion in the domestic market (especially in Lower North) will be a key monitorable. Earlier we had NEUTRAL rating on this stock; however, following the correction since our IC, we have upgraded it to a BUY rating with a DCF-based TP of INR270 (based on an implied P/E of 34x on FY28). Key risks: potential supply chain disruptions impacting production and distribution/execution risks related to plant consolidation (refer to [our IC note dated Sep'25](#)).

Strong beat on estimates

- 3QFY26 sales grew 6.6% YoY to INR23.9b (our est: INR24.1b).
- Formulations sales grew 14% YoY to INR15.2b (64% of sales).
- Exports formulation sales grew 17% YoY to INR5.4b (23% of total sales).
- Domestic formulation sales grew 12% YoY to INR9.8b (41% of total sales).
- Exports (generics formulation) grew 21% YoY to INR2.7b (51% of export sales). Exports (branded formulation) grew 28% YoY to INR2.0b (38% of export sales). Exports (institutional sales) declined 21% YoY to INR583m (11% of export sales).
- API sales remained stable at INR3.2b (13% of sales). Export API sales grew 6% YoY to INR2.4b (74% of API sales). Domestic API sales declined 14% YoY to INR815m (26% of API sales).
- Revenue from subsidiaries declined 6% YoY to INR5.4b (23% of sales).
- Gross margin (GM) expanded 230bp YoY to 72.5%.
- EBITDA margin also expanded 170bp YoY to 22.3% (our est: 20.1%), driven by the expansion of gross margin.
- EBITDA grew 15% YoY to INR5.3b (our est: INR4.8b).
- IPCA had an exceptional gain of INR177m related to the sale of land and buildings.
- Adj. for the same, PAT grew 26% YoY to INR3.1b (our estimate: INR2.8b).

Result marginally above our estimates

Earnings snapshot: 3QFY26

- Revenue grew ~8% YoY to INR18.7b during 3Q FY26 (7% above our estimate). Revenue includes a) a gain on InvITs & Related Assets as per fair value measurement and b) dividend/Interest income from InvITs & Related Assets.
- EBITDA margin came in at 54.6% (vs. our estimate of 53%) in 3QFY26 (+600bp YoY and +180bp QoQ). EBITDA grew ~4% YoY to INR10.2b (10% above our estimate).
- APAT grew 41% to INR1.4b (in line).
- Construction revenues stood at INR 7.8b (-31% YoY); BOT revenue stood at INR 7.06b (+9% YoY); and InvIT & related assets revenue stood at INR3.8b.
- IRB to act as a project manager for the TOT – 18 project for an estimated amount of INR15.8b
- The Board declared an interim dividend of INR 0.07 per equity share.
- IRB also recommended bonus equity share in the ratio of 1:1.
- The order book stood at ~INR373b (excl. GST) at the end of Dec'25.

Miss on revenue; low A&P supports profitability

Consolidated financial performance

- Indigo Paints' net sales grew 4.7% YoY (base -3%) to INR3,588m (est. INR3,745m).
- Sales in Oct'25 were affected by early Diwali and the delayed withdrawal of monsoon. However, following the festive period, demand was robust, and the company achieved double-digit growth since Nov'25.
- In 3QFY26, Enamels & Wood Coatings volume grew 20% (base -13%), while Emulsions volume declined 3.4%. Cement Paints & Putty volume returned to a positive trajectory after four quarters, growing at 2% (base -7%).
- Apple Chemie revenue grew 32% YoY to INR199m.
- Gross margin expanded 20bp YoY to 46.8% (est. 47%), led by lower RM prices. Indigo Paints highlighted that the prices of raw materials reached pre-COVID levels in 3QFY26, which helped the company increase discounts.
- Employee expenses rose 14% YoY, while other expenses declined 9% YoY. The company further highlighted that A&P expenses as a % of revenue reduced to 5.6% in 3QFY26 compared to 8.2% in the base.
- EBITDA margin expanded 230bp YoY to 19% (est. 17.6%).
- EBITDA rose 20% YoY to INR683m (est. INR659m).
- PBT increased 25% YoY to INR565m (est. INR530m).
- APAT rose 20% YoY to INR431m (est. INR395m).
- In 9MFY26, revenue/EBITDA/APAT grew 3%/9%/11%, respectively, YoY.

Outlook

- A&P expenses for the entire fiscal are expected to decline as a % of revenue, and the company is expected to focus on influencer engagement.
- EBITDA margins for FY26 are expected to expand, with an improvement in demand and product mix.
- Apple Chemie is actively exploring export opportunities and has commenced production at the new sealant plant in the Nagpur facility. New products in the sealant range are expected to support growth.
- Solvent-based paint plant (12,000 KLPA): Production commenced in Feb'26.
- Water-based paint plant (90,000 KLPA): The new manufacturing unit is expected to be operational in Jun'26.

Hindalco: Copper EBITDA Will Continue At ₹600-650 Cr/Quarter; Satish Pai, MD

- Tight supply-demand and positive sentiment keeping aluminium near ~\$3,000/ton; input costs (CP coke) rising but price outlook constructive.
- Domestic mix rising: Sales shifting to ~70% India / 30% exports as Odisha downstream capacities ramp up, backed by strong auto & electronics demand.
- Novelis recovery path: Oswego fire impact peaks in Q4; restart expected mid-Q1. 70–80% insurance recovery targeted; profitability seen normalising toward ~\$500/ton next year.
- Heavy capex, controlled leverage: ₹10,000 crore (FY26) and ₹12,000 crore (FY27) spend planned under ₹40,000 crore cycle, while keeping net debt/EBITDA near ~2x.

Indegene: Generative AI Yet To Fully Percolate, Likely To Drive Growth; Manish Gupta, Chairman & CEO

- AI already accelerating drug discovery (40 candidates in trials); next phase is cheaper, faster clinical trials & commercialization.
- Strong execution track record: Revenue scaled from \$90m (2020) to \$335m (2025) — ~30% USD CAGR, built on early AI/NLP investments since 2016.
- GenAI still early innings: Biggest impact on revenue acceleration and cost efficiency yet to play out as adoption deepens.
- 1,400cr cash for smart M&A: Focus on acquiring traditional healthcare assets and layering Indegene's AI stack to drive value uplift.

Carraro India: EBITDA Growth Target for FY27 Is 12%; Balaji Gopalan, Managing Director

- 9M revenue up 21%; FY26 expected to close at ~₹2,250 crore (€220–225m), above earlier guidance.
- Good monsoons + shift toward 4WD tractors (~25% penetration) driving demand; capacity expansion underway.
- Construction weak domestically, but teleboom handlers & LatAm/China exports supported momentum.
- FY27 growth guided at 8–12% with EBITDA margin target of 12% (vs ~11%); recent PAT dip was one-off.

Biocon Biologics: Guided That Debt To EBITDA Will Go Below 2x And Close To 1x; Shreehas Tambe, MD & CEO

- Q3 EBITDA up 40% YoY; margin at 28%, driven by focus on high-margin markets ahead of FY27 launches.
- GLP-1 momentum building: Liraglutide launched in Germany/UK; US approval awaited. Also preparing for long-term play in Semaglutide across key emerging markets.
- India go-to-market strategy: Will partner for GLP-1 in India (like insulin model) for wider reach; direct selling in markets with own field force.
- Leverage improving fast: Debt/EBITDA cut from 4.2x to 2.5x; target is <2x, ideally ~1x over time.

MOFSL, its associates, Research Analyst or their relatives may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst or their relatives may have actual beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report or date of the public appearance. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may have any other potential conflict of interests at the time of publication of the research report or at the time of public appearance, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

In the past 12 months, MOFSL or any of its associates may have:

- received any compensation/other benefits from the subject company of this report managed or co-managed public offering of securities from subject company of this research report,
- received compensation for investment banking or merchant banking or brokerage services from subject company of this research report,
- received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.

MOFSL and its associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.

Subject Company may have been a client of MOFSL or its associates during twelve months preceding the date of distribution of the research report.

Research Analyst may have served as director/officer/employee in the subject company.

MOFSL and research analyst may engage in market making activity for the subject company.

MOFSL and its associate company(ies), and Research Analyst and their relatives from time to time may have:

- a) a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein.
- (b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.

Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures. To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report.

Terms & Conditions:

This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.

Analyst Certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Disclosure of Interest Statement

Analyst ownership of the stock No

A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

Regional Disclosures (outside India)

This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:

This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.

MOTILAL Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the "1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts), and

under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore

In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore. This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL.

In respect of any matter arising from or in connection with the research you could contact the following representatives of MOCMSPL. In case of grievances for any of the services rendered by MOCMSPL write to grievances@motilaloswal.com.

Disclaimer:

This report is intended for distribution to Retail Investors.

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, nor its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be suffered by the person accessing this information due to any errors and delays.
