FY26: Tough year, yet 21 BFSI stocks deliver >25% returns

Macro volatility persists; earnings recovery to support improved performance over FY27E

- Despite FY26 being a challenging year for investing, ~21 stocks within our BFSI coverage universe delivered >25% returns, underscoring the importance of stock selection and the breadth of opportunities within the sector.
- BFSI market cap has expanded to INR108t in 2026 from INR91t in 2025, reflecting a growth of ~18% in a year. This shift is largely due to the outperformance of segments such as PSU Banks, NBFCs, and fintech firms, backed by technological shift and innovation.
- BFSI sector's evolution, driven by digitalization, retail credit expansion, and regulatory reforms, has broadened the investible universe beyond traditional banks, prompting MOFSL to significantly expand its coverage to 77 stocks (adding ~12 stocks in FY26), in line with the sector's increasing depth and complexity.
- BFSI earnings estimates have been consistently downgraded in recent quarters, owing to margin pressure, weak loan growth, and high credit costs. The pace of earnings revisions, though, has moderated significantly in recent months.
- In the last 12 months, MOFSL earnings estimates for private banks were lowered by 8%/5% for FY26/FY27, while PSU banks saw milder revisions.
- We estimate private banks' aggregate earnings growth at 20% over FY27-28. For our banking universe, we estimate earnings growth of 16%/17% in FY27/28 after growth bottoms out at 5% YoY in FY26E.
- This recovery in earnings momentum, along with improved loan growth (aided by GST, direct tax rate cuts, and lower borrowing costs), should help drive better sector performance over the medium term. Top picks: ICICIB, HDFC, and SBIN.

FY26 – Tough year for investing, but 21 stocks deliver >25% returns

FY26 has been a challenging year for investing, with benchmark indices like the Nifty 50 and Nifty Bank delivering muted returns of -5%/-2% amid macro uncertainties. Meanwhile, large private banks declined ~10–18% (barring AXSB delivering returns of ~5%). Select mid-size banks like Bandhan, IDFCB, and Equitas also underperformed. PSU and few mid-sized banks emerged as key outperformers, with names like RBK, Indian Bank, AUBANK, and KVB delivering 50–70% returns. Strong gains were also seen beyond banks, with stocks like MCX, ABCL, and LTFH delivering 60–120% returns. **Despite the weak broader backdrop, we note that 21 stocks within our BFSI coverage universe delivered >25% returns, underscoring the importance of stock selection and the breadth of opportunities within the sector.**

BFSI market cap grows ~18% to INR108t in FY26

The Indian BFSI sector has experienced a remarkable >60x surge in market capitalization over the past two decades. **It has expanded to INR108t in 2026 from INR91t in 2025, reflecting a growth of ~18% in a year.** This shift is largely due to the outperformance of segments such as PSU Banks, NBFCs, and fintech firms, backed by technological shift and innovation. The fintech space, which was virtually non-existent until 2015, **now boasts a market cap of >INR13t**, both listed and unlisted together. As the BFSI sector continues to grow, fueled by increasing digitalization and evolving consumer preferences, it will present significant high-growth investment opportunities.

MOFSL BFSI coverage expands by 12 stocks to a total of 77 in FY26

The BFSI sector has evolved significantly, driven by digitalization, retail credit growth, and regulatory reforms, leading to a more diversified ecosystem beyond traditional banks. This shift, along with the advent of new-age business models, has expanded the research focus and overall investible BFSI universe. **At MOFSL, we have stayed aligned with these trends and added ~12 stocks under our coverage in FY26 (more than doubled our BFSI coverage to 77 stocks over the past five years),** reflecting the sector's increasing depth, complexity, and the need for granular, stock-level analysis.

AQ robust; near-term credit cost in control – medium term under watch

- Banks with higher exposure to unsecured retail loans have seen sharper earnings downgrades over the past year due to elevated delinquencies in MFI and unsecured loans, though early signs now point to improving asset quality outlook in these segments.
- While overall credit costs are expected to remain contained for both private and PSU banks, stress persists in pockets such as retail CV and micro-LAP. Mid-sized private banks are likely to benefit from improving asset quality as conditions stabilize, whereas large private banks with diversified, secured portfolios continue to outperform.
- Additionally, PSU banks are gaining a structural edge through the CGTMSE framework, under which eligible loans can receive government guarantees (INR50m). This reduces credit risk for banks and supports lending to smaller businesses, enabling collateral-free MSME lending at competitive rates and narrowing the gap with private sector peers.

Pvt banks witness 8%/5% cut in FY26/27E PAT; PSBs witnesses upgrades

- FY26-27 earnings estimates of the MOFSL banking universe have been downgraded over the recent years, considering a sharp contraction in margins and elevated provisioning mainly due to unsecured stress. Mid-size private sector lenders have witnessed sharper cuts due to higher exposure to MFI and unsecured assets, which resulted in a steeper rise in credit costs.
- However, with collection efficiency in the MFI segment recovering to over 99% across lenders and stability in both the PL and credit card segments, the earnings cycle is expected to stabilize. In the past 3 months/12 months, private banks' aggregate FY26E PAT has been cut by 2%/8% vs. a 3%/5% increase for PSU banks. Likewise, FY27E aggregate PAT for private banks has been reduced by 5% in the last 12 months, while it has remained broadly unchanged in the past 3 months.

MOFSL vs. consensus: Where do we stand vs. peers?

MOFSL aggregate earnings estimates are broadly in line with consensus; however, stock-level variations do exist. **We are slightly more positive than consensus for some mid-tier banks like RBK (+44%), BANDHAN (+11%), IDFCFB (+5%) and DCBB (+3%) for FY27,** driven by our expectation of credit cost normalization and NIM stability. **For PSBs like Canara (+2%) and PNB (+18%) too, our earnings estimates stand higher than consensus.** For large private banks, our estimate are broadly similar to consensus, barring our KMB estimate, which is lower by 4% than consensus for FY27.

Earnings growth slows to 5% in FY26E; estimate ~16% CAGR over FY27-28

Sector earnings have moderated due to margin pressure, elevated unsecured stress, and slower loan growth, with growth declining from ~40% CAGR in FY21–24 to ~5% in FY26E. However, early signs of recovery are visible, **and we expect earnings growth to rebound to ~16–17% in FY27–28, driven by improving asset quality, lower credit costs, and margin recovery.**

- In the last 12 months, HDFCB saw a 5% earnings upgrade, whereas ICICIBC saw a marginal cut in FY26, and KMB/AXSB saw earnings cuts of 13%/11% due to high stress in the unsecured segment and slower loan growth. **We estimate ~17% CAGR over FY26-28 for large private banks.**
- Mid-sized private banks have seen the sharpest earnings downgrades, with cuts of 30–98% over the past year due to higher exposure to unsecured and MFI segments. However, with stress now moderating, we expect earnings to bottom out and recover sharply, **estimating ~63% CAGR over FY26–28.**
- PSU banks have seen modest earnings upgrades, with FY26E estimates rising ~3%/5% over the past 3/12 months, led by upgrades in Canara, Indian Bank, and SBI, while PNB witnessed a ~13% cut. **We estimate a steady earnings CAGR of ~11% over FY26–28 for PSBs.**

Where are we in the earnings cycle?

After a flat FY26, we estimate a ~16-17% CAGR in earnings over FY27-28 (consensus estimate: ~15% CAGR). The earnings recovery is expected to be fairly calibrated, with growth moderating sharply from 34% in 2QFY24 to 17% in 2QFY25 and bottoming out in 2QFY26 at ~1% YoY (~3% excl. IIB). Thereafter, earnings started to recover gradually, improving to ~9% YoY in 3QFY26 (11% excl. IIB), enabling the **banking sector to exit FY26E with ~10% YoY growth and continue recovering further through FY27E.**

Sector outlook positive; estimate earnings CAGR of ~17% over FY27-28

The banking system has witnessed a **steady recovery in credit growth at ~14.5% YoY, led by growth across segments, especially MSME credit.** Buoyed by resilient margin performance and improved asset quality, we had earlier raised our aggregate FY26/27 earnings estimates by ~3%/1% in 2QFY26 results, mainly led by PSU banks, and have further maintained our estimates in the 3QFY26. **We estimate private banks' aggregate earnings growth at 20% over FY27-28.** For our banking universe, we estimate earnings growth of 16%/17% in FY27/28 after growth bottoms out at 5% YoY in FY26. This recovery in earnings momentum, along with improved loan growth (aided by GST, direct tax rate cuts, and lower borrowing costs), should help to drive better sector performance over the medium term. **Top picks: ICICIBC, HDFC, and SBIN.**
