Climbing up the value curve

Syrma SGS Technology (SYRMA) is undergoing a structural transformation in its business model, moving toward more value-added ventures. These changes are beginning to reflect in better revenue quality and margin expansion.

- SYRMA'S foray into printed circuit boards (PCB) (via 75:25 JV with Shinhyup, South Korea) positions it well to tap a large domestic import substitution opportunity (~88% import) while benefiting from India's 18-25% cost advantage vs. China in HDI PCB manufacturing (India's labor cost is ~20% of China). Their facility, strategically located within the Bengaluru-Chennai-Hyderabad corridor, provides direct access to high-growth HDI demand from automotive (~22% of demand) and telecom (20% of demand), which also enables just-in-time PCB supply vs. 45-60-day import cycles.
- Further, the Elemaster JV and Elcome acquisition expand SYRMA's presence in high-reliability (via Elemaster) and defense (via Elcome) electronics. The JV provides access to Elemaster's global OEM ecosystem, while SYRMA's existing PCBA and box-build capabilities are expected to strengthen Elcome's cost efficiency, integration capabilities, and execution strength in winning defense tenders.
- In parallel, the company is rationalizing its business mix by reducing exposure to consumer electronics and telecom (lower-margin business) while scaling up high-value segments such as automotive, industrial and MedTech. These factors, along with rising ODM contribution (18% in FY26 vs. 13% in FY25) and export scale-up (33% CAGR over FY26-28E; contribution 25% in FY26 vs. 23% in FY25) should improve revenue quality and support margin-led growth.
- Overall, we like SYRMA for its improving revenue mix, which resulted in margin expansion. Over FY26-28E, we expect SYRMA to post a CAGR of 32%/35%/39% in revenue/EBITDA/adj. PAT. We reiterate our BUY rating on the stock with a TP of INR1,300 (premised on 40x FY28E EPS).

Forayed into PCB manufacturing

- SYRMA is at an inflection point, strategically shifting from low-margin EMS assembly (PCBA/box build) toward an integrated electronics manufacturing model with backward integration into PCB manufacturing, in-house design capabilities and subsystem-level delivery, enabling structurally superior margins and value addition.
- This transition is well aligned with India's large PCB opportunity, currently valued at ~USD6.3b with ~88% import dependence (expected to decline to ~69% by FY29). What is projected to clock a CAGR of ~15-16% to ~USD21.3b by FY32, driven by the government's USD150b electronics manufacturing push under ECMS and a significant domestic supply gap in multilayer and HDI PCBs.
- SYRMA's PCB entry is not merely backward integration but a structural growth driver, as ~80% of its output is expected to cater to external EMS players, OEMs and industrial customers, which currently depend on imports, thereby creating a diversified incremental revenue stream.

- The PCB/CCL facility at Naidupeta, Andhra Pradesh, is **strategically located within the Bengaluru-Chennai-Hyderabad electronics and automotive corridor**, positioning SYRMA to capitalize on fast-growing HDI PCB demand from automotive electronics (22% of HDI demand; ~18.7% demand CAGR till 2030) and telecom (~16.3% CAGR HDI demand; 20% of HDI demand).
- This proximity to major OEM clusters also enables shorter logistics lead times and just-in-time PCB supply to OEMs, replacing 45-60-day import cycles from China and improving customer responsiveness and supply chain efficiency.
- According to Shenzhen-based PCB manufacturer, Hemeixin, **Indian HDI PCB manufacturing can offer ~18-25% lower overall costs vs. China**, aided by labor costs at ~20% of China levels (labor forms ~8-15% of PCB costs), positioning India as an emerging global HDI manufacturing hub.
- The venture is structured as a 75:25 JV between SYRMA and South Korea-based Shinhyup Electronics, where Shinhyup contributes proven multilayer PCB technology, significantly mitigating execution and technology risks associated with greenfield projects.
- Phase 1 capex of ~INR4b will create capacity of ~720k sq. m (multilayer) and ~480k sq. m (single-layer) by Dec'26, with revenue contribution expected from FY28 onward. We estimate FY28E revenue/EBITDA of INR3b/INR370m.
- Over the longer term, planned investments of ~INR15b by FY30 (including Phase 1) will expand capabilities in CCL and HDI PCBs. The business has the potential to generate ~INR25b in revenue at full scale.
- Margin accretion will be driven by the two factors: (1) in-house PCB manufacturing replaces imported procurement, converting external sourcing costs into internal margins and improving EMS gross margins; and (2) the standalone PCB business targets EBITDA margins of ~15-17% vs. SYRMA's FY26 EBITDA margin of ~11.1%, supporting consolidated margin expansion.
- **Overall, SYRMA's PCB foray strengthens its transition toward a fully integrated electronics manufacturing model spanning base board fabrication to final assembly, enhancing cost competitiveness, supply chain control and pricing power vs. pure-play assembly-focused EMS players.**

Broadening geographic footprint and defense electronics capabilities

- SYRMA's recent capital allocation across Elemaster (JV) and Elcome (acquisition) reflects a deliberate portfolio shift toward high-reliability electronics (via Elemaster) and defense electronics (via Elcome).
- The Elemaster JV (~INR550m initial investment for 60% stake; FY27 revenue target of ~INR2b) with Italy's Elemaster S.p.A is strategically significant as it gives SYRMA the entry into high-reliability segments (rail, industrial, medical), which have long qualification cycles, sticky revenue and structurally higher margins.
- More importantly, beyond initial India-focused execution, the **JV acts as a gateway into Elemaster's global OEM ecosystem**, enabling SYRMA to leverage India as a cost-efficient manufacturing base for international programs, thereby driving export-led scale, deeper client integration and structurally higher margin capture over time.
- Further, SYRMA has also acquired a 60% stake in Elcome for ~INR2.35b (balance 40% over three years), marking its entry into defense electronics, with Elcome bringing 40+ years of track record, strong Indian Navy installed base and capabilities in navigation, surveillance and communication systems.

Buy Indian-IDDM

category: Indigenously designed, developed and manufactured is the highest-priority category under the Defense Acquisition Procedure (DAP), giving preference to equipment designed and made in India with high local content.

- India’s defense electronics market is projected to grow from USD7.46b in CY25 to USD11.35b by CY32 (~6-6.5% CAGR), positioning SYRMA among the faster-growing large defense markets globally, driven by policy support and rising domestic sourcing.
- The FY26 Union Budget allocated INR6.81t to defense (+9.5% YoY), with ~75% of the capital procurement budget earmarked for domestic sourcing under the “Buy Indian–IDDM” category of the DAP, reinforcing the government’s push toward indigenization and local manufacturing.
- Elcome’s installed base and order book (~5% of total orderbook) provide immediate scale, with FY27 revenue visibility of ~INR3b, 15-20% growth and 20-25% EBITDA margins. **While SYRMA’s PCBA and box-build capabilities enhance cost efficiency, execution speed and solution integration, strengthening overall competitiveness in defense tenders.**
- **We believe these initiatives will help SYRMA transition from a traditional EMS player to high-reliability electronics (via Elemaster) and defense (via Elcome) platform, which will drive mix improvement and revenue growth.**

Gradual shift toward higher-margin segments

- SYRMA is undergoing a calibrated portfolio transformation, consciously reducing exposure to low-margin, volume-driven consumer electronics (40% of revenue in FY24 vs. ~30% in FY26; targeted steady-state ~28%) and telecom (low-margin laptop), while scaling up its presence in design-intensive segments such as automotive, industrial and MedTech.
- The mix improvement is already driving profitability, with EBITDA margins expanding ~480bp to 11.1% in FY26 despite modest revenue growth, reflecting a conscious shift toward higher-quality and better-margin businesses.
- Further, automotive and industrial segments now drive the growth engine, contributing significantly to incremental order wins and ~53% of the INR66b order book. These segments have high engineering intensity, longer qualification cycles and stronger customer stickiness.
- Customer additions remain strong, with 32 new customers added in FY26, including seven industrial clients. Management indicated these additions carry a revenue potential of ~INR10b in the near term and ~INR25b in the long term.
- Additionally, export momentum continues to strengthen, with FY26 exports growing 38% YoY to INR12b (~25% of revenue). Europe contributes ~35% of total exports, while nearly 90% of industrial export revenue is derived from the region, supported by SYRMA’s Stuttgart R&D center in Germany and its long-standing relationships with European customers.
- The business mix is also shifting to higher-value ODM opportunities, with ODM revenue growing to 18% of FY26 sales vs. 13% in FY25 (up 70% YoY to INR8.3b), led by MedTech business, which contributed ~INR3.95b to ODM revenue.
- Operational efficiency is emerging as another margin lever, with Ark Systems (of US)-enabled SMT monitoring potentially improving productivity by ~5% (Unlock 1,000 additional operating hours), equivalent to adding nearly 2 production lines without incremental capex.
- **Overall, SYRMA’s transformation is increasingly visible through improving business mix, rising export intensity, scaling up ODM contribution and stronger positioning in high-entry-barrier segments such as automotive,**

industrial and MedTech. The company appears to be transitioning from a low-margin EMS player to a differentiated, high-value electronics manufacturing platform.

Valuation and view

- SYRMA is well-positioned to benefit from the increasing complexity and localization of global electronics supply chains, with management estimating its blended TAM opportunity at ~USD600b. Its design-led capabilities and export-oriented manufacturing ecosystem strengthen its positioning in higher-value electronics outsourcing opportunities.
- We believe the company’s growth trajectory will remain strong, backed by: 1) its focus on low-volume, high-margin business; 2) an increase in exports; 3) increasing share of revenue in the industrial, automotive, and MedTech segments; 4) a foray into bare PCB, HDI, and CCL manufacturing; and 5) its expansion into new verticals, such as defense and potential entry into renewables.
- We expect SYRMA to post a CAGR of 32%/35%/39% in revenue/EBITDA/adj. PAT over FY26-28E. **We reiterate our BUY rating on the stock with a TP of INR1,300 (premised on 40x FY28E EPS).**
