

Guar Seed

Guarseed has turned constructively bullish after completing a Cup & Handle breakout, with price reclaiming the pattern neckline and moving above the 20 EMA. The strong rally towards 6650 (R1) indicates renewed buying momentum, while the broader structure suggests the breakout remains intact as long as price holds above the recent support zone of 6400. On the upside, a sustained move above 6650 can extend the rally towards 6800 (R2). On the downside, 6400 - 6200(S1) is the immediate support, followed by 6050 (S2) if profit booking intensifies. Overall, the bias remains bullish, with dips likely to attract buying interest while the breakout structure holds.

Guargum

Guargum is showing a strong bullish setup after almost completing a Cup & Handle, with price approaching the key 13000 resistance (R1). The rising 20 EMA and the formation of higher highs and higher lows indicate that buying momentum remains intact, while the recent breakout suggests strength is building for a continuation move. On the upside, a sustained move above 13000 could extend the rally towards 13450 (R2). On the downside, 12400 -12300 (S1) is the immediate support, followed by 12000 (S2) if profit booking emerges. Overall, the bias remains bullish, with dips likely to attract buying interest while the breakout structure stays intact.

Jeera

Jeera is trading within a symmetrical triangle, with price approaching the upper trendline after holding above the rising 20 EMA. The recent higher lows indicate improving buying interest, while the current setup suggests the market is nearing a decisive breakout zone. On the upside, a sustained move above 21500 (R1) could trigger fresh momentum towards 21800 (R2). On the downside, 20600 (S1) remains the immediate support, followed by 19900 (S2) if the breakout fails. Overall, the bias remains cautiously bullish, with the next directional move likely to be decided near the triangle resistance.

Turmeric

Turmeric is showing early signs of recovery after bouncing from the lower boundary of the falling wedge. Price has reclaimed the 20100 support (S1) and is attempting to regain momentum, although it is still trading below the falling trendline and the 20 EMA, keeping the broader structure in a recovery phase rather than a confirmed breakout. On the upside, 21100 is the immediate hurdle, followed by the major resistance at 21800, where a breakout could confirm stronger bullish momentum. On the downside, 20100 (S1) remains the key support, while 19200 (S2) is the next important demand zone if selling pressure returns. Overall, the bias remains cautiously positive, with confirmation needed above the wedge resistance for the next upmove.
