On the daily chart of Guarseed , price has formed a bullish flag-and-pole pattern, with the recent recovery approaching the upper boundary of the consolidation channel. The structure remains constructive above the 6,500–6,550 support zone, while a decisive breakout above the falling trendline can trigger fresh upside momentum. Momentum remains positive, with RSI sustaining above the 50 mark, indicating improving buying interest despite the ongoing consolidation. On the upside, 6,900–7,000 is the immediate resistance cluster, followed by 7,180 and 7,325 on a sustained breakout. The near-term bias remains bullish above 6,500, with a breakout above 6,900–7,000 likely to reinforce the flag breakout setup; a break below 6,500 would negate the positive structure.

On the daily chart of Jeera futures, price has maintained a strong bullish structure, forming successive higher highs and higher lows within a rising channel. The recent sharp up move has resulted in a decisive breakout above the upper channel boundary, indicating a fresh expansion in bullish momentum. The RSI at 83.05 reflects strong momentum but also places the market in an overbought zone, warranting caution against near-term profit booking. Immediate support is placed at 22,925, followed by 22,170, while the breakout zone around the upper channel should act as a key support base. On the upside, 25,270 and 25,860 emerge as the next important resistance/target levels. The near-term bias remains strongly bullish above 22,925, with dips likely to remain buying opportunities as long as the breakout structure is sustained.

Turmeric's bullish ascending channel has been decisively breached, confirming a bearish reversal. Following the sharp decline, prices have entered a tight sideways consolidation, suggesting a potential base formation. A breakout from this range will be crucial in determining the next directional move.

Cocudakl is showing a bullish breakout set up, trading around 22,790, with resistance at 24,500-25,300. The counter has gained nearly 6% over the last week, while RSI remains above the mid-level, supporting positive momentum. A sustained move above 22,000-22,790 can open the way toward 24,500 and 25,300
