On the daily chart of NCDEX Guar Seed Futures, the broader trend remains bullish, with prices maintaining a sequence of higher highs and higher lows within a well-defined rising channel. The recent sharp rally above the channel's upper boundary signals a bullish breakout, although the latest pullback suggests potential consolidation near the breakout zone. The RSI stands at 71.06, indicating strong bullish momentum but also highlighting the possibility of short-term profit-booking following the sharp advance. Immediate resistance is placed at ₹8,700, followed by ₹8,900 and ₹9,000, while support is seen at ₹8,150–₹8,200, followed by ₹7,652–₹7,800. The near-term bias remains positive above ₹7,652, with sustained strength potentially driving prices towards ₹8,700–₹8,900; a break below the breakout zone could trigger a deeper corrective phase.

On the daily chart of NCDEX Cocudakl Futures, the broader trend remains bullish, although prices have undergone a sharp correction from the recent peak near ₹4,200. The price has rebounded from the ₹3,200–₹3,300 support zone and is showing signs of recovery within the broader rising-channel structure. Immediate resistance is placed at ₹3,908–₹3,995, while support is seen at ₹3,545–₹3,597, followed by the recent swing-low region near ₹3,200. The visible momentum oscillator is recovering from oversold territory, indicating improving momentum; however, sustained buying interest is required to confirm a stronger reversal. The near-term bias is cautiously positive above ₹3,545, with a decisive move above ₹3,995 potentially extending the recovery, while a breach of ₹3,545 could revive selling pressure.

The recent recovery from the trendline support has triggered a sharp upward move, with prices approaching the key resistance zone of ₹17,500–₹17,950. The rising trendline continues to provide dynamic support, while the recent price surge indicates strengthening bullish momentum despite the possibility of intermittent profit-booking. Immediate support is placed at ₹16,300–₹16,000, followed by trendline support near ₹14,800–₹15,000; resistance is seen at ₹17,500 and ₹17,950. The near-term bias remains positive above ₹16,000, with a sustained breakout above ₹17,950 potentially extending the uptrend, while a breach of ₹16,000 could trigger corrective pressure.

On the daily chart of NCDEX Turmeric Futures, the broader trend remains bullish, with a sharp rally followed by a breakout above the previously established descending channel, indicating renewed buying interest. The price structure has turned decisively positive, with a sustained move above the channel resistance signalling potential trend continuation. The RSI is elevated at approximately 79.98, indicating strong bullish momentum but also suggesting overbought conditions and the possibility of intermittent profit-booking. Immediate resistance is placed at ₹28,650–₹29,600, followed by ₹30,000, while support is seen at ₹24,712–₹23,950 and the former channel breakout zone. The near-term bias remains bullish, with sustained strength favouring further upside; however, a failure to hold above ₹24,712 could trigger a corrective pullback.

Immediate resistance is placed at ₹17,000–₹17,350, while support is seen at ₹14,935–₹14,228, followed by ₹13,930.
