Today's top research idea

Avenue Supermarts: Growth recovers, but profitability and FCF weaken

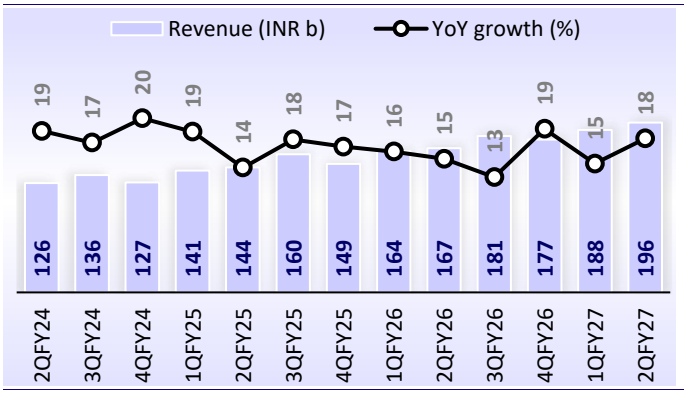

- Avenue Supermarts' (DMART) revenue growth accelerated to ~18% YoY in 2Q (vs. ~15% in 1Q) as LFL growth recovered to 9.5% (vs. 5.5% in 1QFY27). Store additions picked up to 15 in 2Q (vs. 3 in 1Q), taking the total to 518 (+20% YoY). However, profitability was weaker, with EBITDA/PAT missing estimates by 3%/ 7%, as EBITDA margin contracted ~30bp YoY due to weaker gross margin (-10bp YoY because of lower GM&A) and higher cost of retailing (CoR) per sqft, which rose ~3% YoY owing to entry-level wage inflation.
- 1HFY27, revenue/EBITDA/PAT grew 17%/15%/10% YoY, led by ~20% YoY area additions, while EBITDA margin dipped ~10bp YoY to 7.8% due to higher CoR.
- Pre-Ind AS 116 EBITDA grew ~15% YoY to ~INR27.8b in 1HFY27, with the margin contracting ~10bp YoY to ~7.4%.
- In 1HFY27, the standalone FCF outflow stood at INR16.6b (vs. YoY outflow of INR4b), due to a working capital build-up (INR19b vs. INR7b YoY) and higher capex (up 23% YoY). Net debt (ex-lease) surged to INR25b (vs. INR7b in Mar'26).We cut our FY27-28 EBITDA/PAT estimates by 1-3%. We model a CAGR of 16-17% across DMART's consol. revenue/EBITDA/PAT over FY26-29E, driven by ~15% CAGR in area additions and mid-single-digit LFL growth.
- We assign a ~35x Dec'28E Pre-Ind AS EV/EBITDA multiple (implying ~57x Dec'28 P/E) to arrive at our TP of INR3,925 (vs. INR4,000). Reiterate Neutral.

Growth recovers, but profitability and FCF weaken

- Avenue Supermarts' (DMART) revenue growth accelerated to ~18% YoY in 2Q (vs. ~15% in 1Q) as **LFL growth recovered to 9.5%** (vs. 5.5% in 1QFY27). Store additions picked up to 15 in 2Q (vs. 3 in 1Q), taking the total to 518 (+20% YoY).
- However, profitability was weaker, with EBITDA/PAT missing estimates by 3%/7%, as EBITDA margin contracted ~30bp YoY due to weaker gross margin (-10bp YoY because of lower GM&A) and higher cost of retailing (CoR) per sqft, which rose ~3% YoY owing to entry-level wage inflation.
- 1HFY27, revenue/EBITDA/PAT grew 17%/15%/10% YoY, led by ~20% YoY area additions, while EBITDA margin dipped ~10bp YoY to 7.8% due to higher CoR.
- **Pre-Ind AS 116 EBITDA grew ~15% YoY to ~INR27.8b in 1HFY27, with the margin contracting ~10bp YoY to ~7.4%.**
- In 1HFY27, the standalone FCF outflow stood at INR16.6b (vs. YoY outflow of INR4b), due to a working capital build-up (INR19b vs. INR7b YoY) and higher capex (up 23% YoY). Net debt (ex-lease) surged to INR25b (vs. INR7b in Mar'26).
- We cut our FY27-28 EBITDA/PAT estimates by 1-3%. We model a CAGR of 16-17% across DMART's consol. revenue/EBITDA/PAT over FY26-29E, driven by ~15% CAGR in area additions and mid-single-digit LFL growth.
- We assign a ~35x Dec'28E Pre-Ind AS EV/EBITDA multiple (implying ~57x Dec'28 P/E) to arrive at our **TP of INR3,925 (vs. INR4,000). Reiterate Neutral.**

Slightly weaker margin print; LFL growth recovers to 9.5%

- Standalone 2Q revenue grew ~18% YoY to INR192b, driven by 20% YoY area additions and a recovery in LFL growth to 9.5% (vs. 5.5% in 1Q/6.8% YoY).
  - The company added 15 stores/0.7m sqft area to reach to 518 stores and 21.4m sqft. This implies an average store size of 46.7k sqft. for stores added in 2Q, higher than the existing average store size of 41.3k sqft.
  - Annualized revenue per store declined ~1% YoY to INR1.51b, while annualized revenue/sqft remained stable YoY at INR36.6k.
- DMART's standalone gross profit came in at INR27.2b (up ~18% YoY, our est. INR27.5b) as gross margin (GM) contracted 10bp YoY to 14.1% (~20bp miss).
  - The share of the higher margin General Merchandise & Apparel (GM&A) category moderated ~10bp YoY to 21.9%, while the share of the lower margin Foods category increased ~40bp YoY to 58.8%.
- The company's standalone EBITDA at INR14b (vs. our est. INR14.4b), rose ~14% YoY, as margin contracted ~30bp YoY to 7.3% (~20bp miss) largely due to a weaker gross margin.
  - Driven by strong store openings, employee costs spiked ~20% YoY.
  - Other expenses grew ~22.5% YoY, likely reflecting the impact of higher minimum wages for contract labor.
- Standalone PAT at INR8b (7% miss), rose ~8% YoY, with PAT margin moderating ~40bp YoY to 4.2%. This was due to an 87% surge in interest costs and a 29% decline in other income, reflecting higher borrowings for store additions.

Losses at subsidiaries narrow YoY, likely due to calibration at DMART Ready

- Consolidated revenue grew 18% YoY to INR196.4b (vs. our est. INR197.5b).
- Consol. GP grew 17% YoY to INR29.3b(vs. our est. of INR29.9b) as gross margin contracted ~15bp YoY to 14.9% (~25bp miss).
- Consol. EBITDA rose ~15% YoY to INR13.9b (vs. est. of INR14.3b) as the EBITDA margin dipped ~20bp YoY to 7.1% (~15bp miss), led by weaker standalone margin.
- Operating losses at subsidiaries moderated to 2.3% (vs. 3.6% YoY, 6.1% QoQ).
- Consol. PAT grew 8% YoY to INR7.4b (7% miss). PAT margin contracted ~35bp YoY to 3.8%, as finance costs surged 83% YoY and other income slid 31% YoY.

Net debt surges amid a significant increase in FCF outflow

- In 1HFY27, revenue/EBITDA/PAT grew 17%/15%/10% YoY, driven by ~20% YoY area additions, while EBITDA margin contracted ~10bp YoY to 7.8% due to higher CoR. Finance costs surged 1.9x YoY, while depreciation rose ~25% YoY.
- Pre-Ind AS 116 EBITDA grew ~15% YoY to ~INR27.8b, with the pre-Ind AS EBITDA margin contracting ~10bp YoY to ~7.4%.
- In 1HFY27, standalone FCF outflow stood at INR16.6b (vs. an INR4b outflow YoY), due to a working capital build-up (INR19b vs. INR7b YoY, inventory per store up ~10% YoY) and higher capex (up 23% YoY). Net debt (ex-lease) surged to INR25b (vs. INR7b as of Mar'26).
- Standalone gross block additions (ex-RoU) were up ~25% YoY, with CWIP rising 24% YoY to INR15.9b (vs. INR12.8b in Mar'26), while RoU assets rose ~10.5%.
- The implied ask-rate for 2HFY27 stands at 18% YoY growth for revenue/EBITDA and ~15% YoY growth for standalone PAT.

Recovery in foods (from a weak 1QFY27) weighs on gross margin

- Growth in Foods, the largest contributor to DMART's revenue, recovered to ~19% YoY (from ~14%/16% YoY in 1QFY27/FY26), while GM&A maintained ~18% YoY growth (vs. ~18%/16% YoY in 1QFY27/FY26). Non-food FMCG remained the weakest segment with ~17% YoY growth in 2Q (vs. ~15% YoY in both 1Q/FY26).
- The **share of GM&A** in DMART's mix moderated ~12bp YoY to 21.9% in 2QFY27, while Foods contribution increased ~40bp YoY to 58.8%. The contribution from the non-food FMCG segment moderated further by ~25bp YoY to 19.4%.
- **Bill cuts and ABV:** Total bill cuts in 2QFY27 at 111m was up ~14% YoY (vs. ~13% YoY in 1Q). The 2QFY27 average basket value (ABV) grew ~3.5% YoY to INR1,730 (up ~1.5% YoY to INR1,668 in 1QFY27).
- **DMART Ready:** It continues to focus on driving greater operational efficiencies and strengthening the customer experience in the cities in which it operates (having rationalized its presence to 11 cities in FY26 from 25 in FY25).

Valuation and view

- While the QC dent remains concentrated in dense metro catchments for now, we believe overall discounting and customer acquisition intensity are unlikely to moderate in the near term and could weigh on DMART's growth and margins over the medium term.
- We cut our FY27-28 EBITDA/PAT estimates by 1-3%. We model a CAGR of 16-17% across DMART's consol. revenue/EBITDA/PAT over FY26-29E, driven by ~15% CAGR in area additions and mid-single-digit LFL growth.

- We assign a ~35x Dec'28E Pre-Ind AS EV/EBITDA multiple (implying ~57x Dec'28 P/E) to arrive at our **TP of INR3,925 (vs. INR4,000).**
- Acceleration in store additions and sustenance of mid-to-high single-digit LFL growth remain the most important growth levers for DMART. The stock, however, lacks near-term triggers to outperform; hence, we **reiterate our Neutral rating**.

India wind installations to reach new high

- **Attractive valuation with improving earnings visibility:** Suzlon's (SUEL) stock price has corrected 31% over the past three months and is currently trading at 17.5x FY28E EPS, a 20% discount to its one-year fwd mean -1SD of 22x. Given the seasonal nature of earnings with 2H typically contributing 60-65% of annual EBITDA, we expect earnings momentum to strengthen in 2HFY27 as deliveries are expected to rise to 2.1GW from est. 1.2GW in 1H.
- **Strong order book and earnings growth outlook:** The company's order book stood at 5.9GW as of 1QFY27-end (~1.3GW of order inflows in FY27YTD), providing 100% visibility on our estimated deliveries through 3QFY28. We estimate SUEL to deliver EBITDA CAGR of 22% over FY26-28E.
- **Wind capacity additions on track to meet FY27 targets:** India added ~3GW of wind capacity in 1HFY27. Historically, as 2H installations have been 1.5x those in 1H, the implied addition of ~4.5GW in 2HFY27 would take FY27 additions to ~7.5GW, in line with the MNRE's expectation of 7.5-8.0GW.
- **Evening peak demand strengthens the case for wind:** Rising power demand, particularly during evening peak hours, should support greater deployment of wind capacity through wind-solar hybrid and FDRE projects. As highlighted in the EAC-PM paper (Jul'26), average May evening peak prices rose from INR8.08/kWh in 2023 to INR9.40 in 2025 and INR9.71 in 2026. We believe strong merchant power prices in late evening reinforce the economic case for wind capacity.
- **Valuation and view:** We retain BUY with a TP of INR65, based on 30x FY28E EPS, a slight premium to its historical average two-year fwd P/E of 27x.

Execution-led growth with new opportunities

- **Strong order book provides visibility through 3QFY28:** We build in 35% YoY rise in FY27 deliveries at 3.3GW (1.2GW in 1HFY27 and 2.1GW in 2HFY27), followed by 3.8GW in FY28E. Its order book stood at 5.9GW as of 1QFY27-end (~1.3GW of order inflows in FY27YTD), providing 100% visibility on our estimated deliveries through 3QFY28.
- **22% EBITDA CAGR backed by strong delivery visibility:** Given the seasonality of earnings with 2H typically contributing 60-65% of annual EBITDA, we anticipate earnings momentum to strengthen in 2HFY27, aided by a significant ramp-up in deliveries. Supported by strong delivery visibility and a robust order pipeline, we expect EBITDA CAGR of 22% over FY26-28E.
- **Three new growth engines – repowering, exports and DevCo:** SUEL's DevCo model has gained strong traction, with 600MW+ of orders booked within four months of FY27, accounting for 60% of total orders. In India, repowering presents a potential opportunity of up to 25GW, given that a major portion of the existing wind fleet was commissioned 10-20 years ago and SUEL expects to secure confirmed repowering orders by FY27-end, with opportunities likely to scale up in the next 2-3 years. Internationally, SUEL is evaluating export opportunities in Europe, Australia, Latin America and Southeast Asia, with Australia and Europe emerging as promising markets.

Stock performance (one-year)

Wind installations remain strong

- **Record 6.05GW additions in FY26:** India added a record 6.05GW of wind capacity in FY26, surpassing the earlier peak of 5.5GW in FY17, taking cumulative installed capacity beyond 56GW.
- **FY27 target implies strong 2H additions:** MNRE expects 7.5-8.0GW of wind capacity additions in FY27, with 3GW added in 1HFY27. That leaves roughly 5-5.6 GW for 2HFY27. Total installed wind capacity was 59.2GW as Sep'26 end. Capacity addition is expected to scale up to 13.2GW by FY30-31, taking cumulative installed capacity to 107GW.
- **Policy and transmission readiness support growth:** MNRE attributed the recent acceleration to policy clarity, transmission readiness, competitive tariffs and a strong project pipeline, with Gujarat, Karnataka and Maharashtra leading in capacity additions.

Peak demand reaches new high, increasing wind relevance

- **Record peak demand highlights need for firm generation:** India's peak power demand reached a record 269GW on 10th Sep'26, with a 15% rainfall deficit reducing hydro generation, while higher cooling and irrigation demand and temporary coal-availability disruptions tightened the supply-demand balance.
- **Rising peak demand supports wind-solar and FDRE deployment:** The power system faces its tightest supply-demand conditions later in the day, as solar generation stops after evening hours. As per the 20th Electric Power Survey, India's peak electricity demand is projected to rise from 277.2GW in FY27 to 366.4GW in FY32, implying a 5.74% CAGR. The rising demand, particularly during evening peak hours, should support greater deployment of wind capacity through wind-solar hybrid and FDRE projects.
- **Robust wind merchant segment improves project economics:** A key notable trend, as per EAC-PM paper published in Jul'26, is that the May average evening peak prices rose from INR8.08 in 2023 to INR9.40 in 2025 to INR9.71 in 2026. The peak-to-trough spread widened to INR8.60, up 63% from 2023, making wind capacity increasingly relevant. Prices for evening peak (18:00-23:00 hours) are significantly above the solar peak prices (8:00-16:00 hours).
- **Scarcity in late evening:** In Jun'26 intraday, the average price troughed at INR1.17/kWh at 11:00 hours and peaked at INR9.90 at 22:30 hours. The 8:00-16:00 average was INR1.63 vs. INR8.10 during 18:00-23:00. In June, only 5% of 18:00 blocks touched the INR10 ceiling vs. 91% at 21:00 and 96-97% at 22:00-23:00. It was still 84% at midnight and 57% at 02:00. We believe strong merchant power prices in late evening reinforce the economic case for wind capacity.

India's wind capacity to cross 100GW/400GW by FY30/FY47

- **Wind capacity set for steady growth:** According to CEA estimates, India's installed wind capacity is expected to exceed 100GW by 2030, implying average annual additions of around 10GW through 2030, significantly higher than the historical pace of deployment.
- **External estimates point to further upside:** The Energy and Resources Institute (TERI) and the International Energy Agency (IEA) have projected higher wind capacity of 120-160GW by 2030, indicating potential upside to CEA's base-case

outlook as transmission infrastructure improves and wind becomes increasingly important for meeting peak and firm renewable power requirements.

- **Long-term opportunity remains substantial:** India's wind capacity is estimated to reach 155GW by FY36 and 400GW by FY47, suggesting a multi-decade runway for capacity additions as rising electricity demand and the need for complementary renewable generation support greater wind deployment.

Valuation and view

- SUEL's stock price has corrected 31% in the last three months and is now trading at 17.5x FY28E EPS, 20% lower than one-year fwd mean -1SD of 22x.
- We reiterate our BUY rating with a TP of INR65, based on 30x FY28E EPS, a slight premium to its historical average two-year fwd P/E of 27x. SUEL stands to benefit from regulatory tailwinds mandating local content (ALMM for wind), a robust order book providing strong revenue visibility, and execution improvements through proactive land acquisition and EPC expansion initiatives.

Growth in the kitty; profitability is next

Retail transformation behind us; a richer product mix and operating leverage to drive a sharper RoA-led earnings upcycle

- **Growth engine firing; multiple avenues support ~25% AUM CAGR:** Piramal Finance has moved decisively beyond its balance-sheet transition phase. Growth AUM now accounts for ~98% of the portfolio, while retail contributes ~85% of AUM, leaving the legacy book at less than 2%. With retail disbursements rising ~44% YoY to INR125b in 1QFY27 and consolidated AUM rising ~25% YoY, visibility on the company's ~25% FY27 AUM growth target remains strong. Importantly, growth is becoming more diversified. The established housing and LAP franchise is being complemented by gold loans, MFI, micro-LAP, unsecured lending and deeper cross-sell to its ~6m customer base. Cross-sell already contributes ~28-29% of business volumes, creating an opportunity to grow the franchise with lower customer-acquisition costs and potentially better credit outcomes.
- **The next earnings lever will be richer portfolio mix and lower cost of funds:** We see increasing scope for margin expansion as incremental originations are skewed toward higher-yielding, shorter-tenure businesses. Gold loans, MFI, micro-LAP and unsecured lending carry higher disbursement yields than the existing portfolio, and as these books season, the richer origination mix should progressively lift portfolio yields. At the same time, Piramal's improving credit ratings and greater access to diversified and multilateral funding should support a gradual reduction in cost of borrowings. Thus, we believe the next leg of NIM expansion is increasingly structural rather than purely rate-cycle driven. We estimate NIM at ~5.4%/5.9% in FY27E/FY28E.
- **Operating leverage is emerging as the biggest profitability catalyst:** The strongest change in the earnings profile is the widening gap between business growth and cost growth. In 1QFY27, AUM grew ~25% YoY, while opex increased only ~10%, driving the cost-to-income ratio down sharply to ~52.5% from 65.6% a year earlier. The Opex/AUM ratio has dipped consistently over the past eight quarters to 3.5% from 4.9%, despite the resumption of branch expansion. Technology and AI should further reinforce this operating leverage by allowing Piramal to scale underwriting, collections and operations without a commensurate increase in costs. Management expects opex/AUM to dip another ~40-50bp over the next 4-5 quarters and is targeting ~2.5% RoAUM by 4QFY27.
- **From growth to earnings – Piramal Finance is transitioning from the hard-work phase to the payoff phase:** With the legacy book largely behind it, we believe the company has reached an important inflection point. We expect the convergence of ~25% AUM CAGR, improving NIMs, operating leverage and controlled credit costs to drive a sharp earnings recovery. We estimate PAT CAGR of ~55% over FY26-28E, with RoA/RoE improving to 2.8%/11.4% by FY28E.

Stock's performance (one-year)

- The ~INR38.5b primary equity infusion further strengthens the capital base, providing greater flexibility to pursue disciplined growth while maintaining a prudent risk profile. The stock currently trades at ~1.3x FY28E P/BV. **We reiterate our BUY rating with a TP of INR2,480, based on our Mar'28E SoTP valuation.**

From balance sheet repair to earnings compounding

- **The business transformation has created the platform; we believe the next phase will focus on monetizing it:** Piramal Finance's multi-year transformation is now largely complete. The legacy portfolio has been reduced to less than 2% of AUM, while the growth portfolio has reached ~98%. At the same time, the retail franchise has scaled meaningfully and now accounts for ~85% of AUM.
- We estimate **~25% AUM CAGR over FY26-28**, taking the AUM to ~INR1.6t by FY28. We believe the growth runway is aided by three complementary engines:
- **Core franchise:** Housing, LAP and used-vehicle lending continue to provide scale and customer access.
- **Newer, higher-yielding businesses:** Gold loans, MFI, micro-LAP and unsecured lending are contributing to growth while enhancing portfolio yields.
- **Customer monetization:** The ~6m customer franchise provides significant cross-sell potential, with cross-sell already contributing ~28-29% of business volumes.

Higher-yielding businesses will change the portfolio economics

- The shift in portfolio mix will be an important enabler because the newer businesses carry materially higher yields than the housing finance franchise.
- As of 1QFY27, housing loans accounted for ~36% of retail AUM and LAP accounted for ~31%, but the contribution from used-car loans, salaried personal loans, unsecured business loans, digital loans and micro-loans is steadily rising.
- The economics of the newer businesses are attractive. Disbursement yields stood at ~15.5% for used-car loans, ~16.6% for salaried personal loans and ~18.8% for unsecured business loans vs. ~11.7% for housing loans and ~12.8% for LAP.
- Gold loans could become another meaningful growth vector. Piramal Finance expanded its gold-loan branch network to 67 by Jun'26 from 22 in Mar'26 and is targeting ~200 branches by FY27-end. The business is focused on personal-use borrowers in Tier-2/3 markets, with no exposure to jewelers, bullion dealers, pawnbrokers, or wholesale customers.

NIM expansion is fundamental, not just a rate-cycle story

Piramal Finance's NIM was ~6.5% in 1Q, up ~47bp YoY, while the cost of borrowings stood at ~8.8%. We believe the next leg of margin expansion can come from two self-help levers – a richer asset mix and lower borrowing costs. The higher-yielding businesses are already generating disbursement yields well above the existing portfolio yield. As these books scale and season, we expect the higher yields to progressively flow through to portfolio yields. Meanwhile, upgrade to the AA+ rating and greater access to multilateral funding should help lower refinancing costs. **We estimate NIM to improve to ~5.4% in FY27E and ~5.9% in FY28E (vs. 4.7% in FY26).**

Operating leverage could provide the biggest surprise

- We believe that the extent of operating leverage now embedded in the Piramal Finance platform is still underappreciated. Piramal Finance has already demonstrated that it can grow significantly faster than its cost base. With AUM

growing ~25% YoY in 1QFY27 vs. ~10% growth in opex, the opex/AUM ratio dipped to 3.5%. The company expects another ~40-50bp improvement in the opex ratio over the next 4–6 quarters.

- On the credit-cost front, growth-business credit costs remain manageable at ~1.6%, while unsecured and MFI portfolios continue to show resilient risk outcomes. Tighter underwriting and stable overall asset quality should help Piramal sustain credit costs in the current range through FY27-28E.

Valuation and view

- Piramal Finance is entering a phase where the benefits of its multi-year transformation can increasingly translate into earnings. With the legacy book largely behind it, a scalable retail franchise, a richer business mix, lower funding costs, improving operating leverage and disciplined credit outcomes provide a stronger foundation for sustained profitability improvement.
- The ~INR38.5b capital infusion further strengthens its balance sheet flexibility to fund growth while maintaining a prudent capital buffer. With Piramal Finance targeting ~2.5% RoAUM by 4QFY27 and >3% over the longer term, the improving operating architecture provides a credible pathway to sustained earnings expansion.
- We model a total AUM CAGR of ~25% and PAT CAGR of ~55% over FY26- FY28E, with RoA/RoE reaching 2.8%/11% by FY28E. **We reiterate our BUY rating with a TP of INR 2,480 (based on our Mar'28E SoTP).**

Scaling Superform through backward integration and capacity expansion

We attended the plant visit organized by UPL at its Jhagadia (one of UPL's largest plants) and Dahej facilities in Gujarat. During the visit, we interacted with the management team, followed by a tour of the plants. Key highlights of the interaction are as follows: 1) Superform aims to accelerate specialty chemicals growth, targeting a 20-23% revenue CAGR, aided by backward integration, UPL's global manufacturing, and distribution network; 2) phosphorus and cyanide are likely to drive Superform's growth, supported by China+1 tailwinds, capacity expansion, and downstream integration; and 3) the company has forayed into the battery chemical space.

Superform: Reigniting specialty chemicals growth

- Superform is looking to re-accelerate specialty-chemicals growth, targeting a 45–50% contribution to total revenue over time, while clocking a 20% revenue CAGR, with the segment likely to outpace overall business growth.
- Backward integration is a key competitive moat, reducing reliance on external suppliers, strengthening supply-chain resilience and improving cost competitiveness and margins. UPL aims to replicate its integrated agrochemical model across specialty chemicals, as demonstrated by mancozeb, where it has ~2x the capacity of other global players, highlighting the benefits of this strategy.
- UPL's global manufacturing and distribution network of 40+ facilities across 11 countries and its presence in 130+ countries provide Superform with access to global customers and supports international expansion.
- India's China+1 opportunity is aided by competitive labor costs, skilled manpower and an expanding renewable-energy ecosystem. UPL's ~INR100b investment in India has helped establish a manufacturing & technical ecosystem that Superform can leverage to scale its specialty-chemicals business.
- Superform plans to incur annual capex of USD100–125m through FY30, with the entire amount dedicated to expanding its specialty-chemicals business.

Building a moat through complex chemistry and deep integration

- China+1 is expected to be a key growth driver for UPL's specialty-chemicals business, with the company strategically positioned across niche, high-growth chemistries and large addressable markets.
- UPL has built strong expertise in complex chemistries, with leadership positions across phosphorus, cyanation, phosgene, and sulfur chemistries, which are technically challenging and require stringent safety and manufacturing capabilities.

- Deep backward integration is a key differentiator for UPL, with the company controlling critical raw materials across several chemistry platforms. This provides supply security and greater resilience to external supply-chain disruptions, while being difficult for competitors to replicate. This makes the business relatively insulated from commodity-price volatility while higher input costs in the CDMO business (which accounts for the majority of Superform's business) can largely be passed on to customers.
- The company has selectively entered niche chemistries after extensive market and technical evaluation, allowing it to build differentiated positions in areas where barriers to entry are high.
- Capacity utilization remains high and UPL is looking to undertake significant capacity additions to support the specialty-chemicals' growth opportunity.

Phosphorus and cyanide to drive the next leg of growth

- Phosphorus and cyanide are expected to be the key growth engines for Superform, supported by China+1 tailwinds, capacity expansion, and increasing downstream integration.
- Phosphorus is expected to grow at ~20% CAGR, with Superform expanding beyond its established positions in agrochemical intermediates and lubricant additives into battery-grade chemicals, high-purity grades, and phosphorus-based flame retardants.
- Phosphorus flame retardants represent another structural growth opportunity for Superform, driven by the potential shift from halogen-based to phosphorus-based alternatives as European regulations tighten amid concerns over the toxicity, persistence, and environmental impact of certain halogen flame retardants. The global flame-retardant market is currently estimated at ~USD7b and is recording ~6% CAGR, with building and construction being a key end-use segment.
- Superform's backward integration into yellow phosphorus provides a competitive advantage in flame retardants, with the company working closely with global players and developing new patented products. R&D for its new flame-retardant products is largely complete, with the pilot project nearing completion.
- Cyanide presents an even larger growth opportunity, driven by significant import-substitution potential and downstream derivative expansion. Superform is scaling capacity from ~17kt to 50kt, with a longer-term ambition of ~200kt.
- Cyanide derivatives offer exposure to diverse end-markets, including pharma, personal care, gold mining, and energy transition, with emerging opportunities in rubber accelerators, epoxy hardeners, battery chemicals, and synthetic caffeine
- Synthetic caffeine presents a meaningful China+1 opportunity, as global beverage companies diversify sourcing from China. Superform is evaluating further capacity expansion, including a potential US facility.
- Safety and sustainability remain critical barriers to entry in cyanide chemistry, creating additional competitive protection for established, integrated manufacturers with the required technical and safety capabilities.

- Deep backward integration across both chemistries provides a structural cost and supply-security advantage, while high technical and safety requirements create significant barriers to entry.

Scaling cyanide capacity and phosgene integration to drive growth at the Dahej plant

- The 188-acre facility offers significant headroom for expansion, with only ~30% of the plant area currently utilized.
- Established in 2020, the site benefits from strong road, rail, and air connectivity and houses both agrochemical and specialty-chemical manufacturing operations.
- The facility is a key manufacturing hub for cyanide and phosgene, with installed capacities of ~17kt each. Cyanide operations are running at 100% utilization.
- Cyanide capacity is expected to surge threefold, with expansion work already underway and commissioning targeted over the next 12-14 months, providing a significant growth runway.
- Phosgene is manufactured at a centralized unit and supplied to multi-purpose plants for downstream processing. Upcoming capacity additions, expected in 2026, will comprise multi-purpose plants for manufacturing phosgene derivatives.
- The phosgene utilization currently stands at ~50%, with upcoming projects expected to drive it to 100% as new multipurpose plants consume additional phosgene from the centralized unit to manufacture downstream derivatives.
- The site benefits from closely integrated manufacturing units, enabling operational synergies and supporting the production of multiple downstream products using the existing phosgene infrastructure.
- The facility houses a ~3kt CTPR CDMO operation under a client contract until 2030, with the client supplying raw materials and UPL receiving payment for committed volumes irrespective of orders. While third-party sales are restricted, UPL can use the product for captive consumption in select geographies.
- UPL has an additional 150-acre site in East India, where work has commenced to establish phosphorus manufacturing facilities and downstream derivative production capabilities, with the plant expected to become operational by 3QFY27.

Expanding into next generation battery materials

- Superform is developing battery-grade PCl_5 for Li-ion battery electrolytes, with trial batches approved by customers for use in electrolyte development and end-customer qualification.
- The company is developing continuous-process technology to enable large-scale production, with commercialization targeted in 1.5–2 years, while engaging domestic and overseas electrolyte manufacturers seeking alternatives to Chinese suppliers.
- Superform is also exploring opportunities in sodium-ion batteries, including PCl_5 for electrolyte salts and cyanide-based Prussian Blue/White cathode materials, particularly for stationary energy storage.

- Backward integration across phosphorus chemistry and stringent impurity control provide a potential competitive advantage in meeting battery-grade specifications.
- The opportunity remains at an early stage, with no dedicated capex committed so far. Initial investments are focused on R&D and pilot trials, with capacity expansion contingent on customer approvals, commercial orders, and demand visibility.

Valuation and view

- We believe UPLL is increasingly benefiting from its diversified business model, with growing contributions from Superform and Sustainable Solutions reducing its dependence on the cyclical crop protection business. This is supported by a stronger innovation pipeline and capacity expansion plans.
- Superform's backward- and forward-integrated manufacturing network across its facilities strengthens control over the value chain, reducing dependence on external suppliers, improving supply security, and enabling greater value capture across complex chemistries.
- Further, Superform can leverage UPL's established global legacy, customer relationships and distribution network across 130+ countries to accelerate specialty-chemical growth, thereby gaining access to established markets and customers without having to build distribution capabilities from scratch.
- We expect its revenue/EBITDA/Adj. PAT to clock 7%/9%/28% CAGR over FY26-28E. **We reiterate our Neutral rating on the stock with a TP of INR558.**

Healthy quarter driven by NIM expansion and lower credit costs

Earnings in line; NIM (calc.) expanded 25bp QoQ and AUM grew ~55% YoY

- Poonawalla Fincorp's (PFL) 2QFY27 PAT stood at ~INR3.7b (in line). NII grew ~81% YoY to ~INR13.8b (in line). Other income rose ~49% YoY to ~INR2.1b.
- Opex rose 37% YoY to ~INR7.1b (in line), with C/I ratio broadly stable QoQ at ~45% (PY: 57%). Opex to AUM rose ~10bp QoQ to 4.15% due to ongoing investment in branches, collections, and tech Infrastructure. Management indicated that the minor sequential increase remains within the guided range, while operating leverage is expected to improve structurally over the next two years.
- PPoP grew ~127% YoY to ~INR8.8b (in line). Provisions stood at INR3.8b (in line), translating into annualized credit costs of ~2.15% (PQ: 2.35% and PY: ~2.75%). Management shared that 90+ dpd at 6 and 12 MOB for recent originations is ~53% better, indicating stronger early vintage credit performance and sustained improvement in portfolio quality.
- New products have gained strong traction, contributing ~28% of 2QFY27 disbursements (vs. ~26% in 1QFY27), and have reached a meaningful scale to support predictable earnings growth. PFL is targeting AUM growth of ~35-40% CAGR in the medium term, driven by the scale-up in new products, deeper distribution capabilities, and cross-selling opportunities across its retail portfolio. We model AUM CAGR of ~44% over FY26-28E.
- PFL remains confident of an improvement in RoA, driven by higher yields, a favorable product mix, declining credit costs, and a gradual moderation in the opex-to-AUM ratio. These factors, along with healthy AUM growth momentum and operating leverage, are expected to drive earnings growth and strengthen profitability over the medium term.
- We raise our FY27/FY28 EPS estimates by ~3% each to factor in slightly higher NIM (driven by stronger expansion in yields). The stock currently trades at 2.3x FY28E P/BV. We model ~44% AUM CAGR and ~120% PAT CAGR over FY26-FY28E and expect PFL to deliver RoA/RoE of 2.4%/~17% in FY28E. **Reiterate our BUY rating with a TP of INR570 (based on 2.7x Sep'28E BVPS).**

Strong business momentum; share of new products continues to improve

- AUM grew ~55% YoY and ~10% QoQ to ~INR740b. Disbursements stood at INR5.8b in 2QFY27 (vs. INR5.4b in 1QFY27) in the Prime PL business.
- PFL remains disciplined in its growth approach, with management highlighting strong business momentum across newer product segments. Disbursements continue to gain traction sequentially, supported by an expanding presence and a wider distribution network. We expect PFL to deliver an AUM CAGR of ~44% over FY26-28E.

Margin expansion supported by improving yields and product mix

- NIM (calc.) expanded ~25bp QoQ to ~7.05%, driven by improvement in yields by ~30bp QoQ to ~14.7%. CoB (calc.) rose ~10bp QoQ to ~7.62%. Reported CoF rose ~4bp QoQ to 7.76%.
- Management indicated that portfolio yields will continue to improve as they gradually converge toward higher disbursement yields, which expanded by a further ~20bp QoQ, driven by a favorable product mix. The company shared that its disbursement yields were ~200bp higher than portfolio yields, providing pricing flexibility and a cushion against rising borrowing costs. We expect NIM to expand to ~7.7%/7.9% in FY27/FY28 (FY26: ~7%), including the benefit of primary equity capital raised at the beginning of FY27.

Improving asset quality with lower credit cost trajectory

- GS3 declined ~17bp QoQ to ~1.2%, while NS3 declined ~9bp QoQ to ~0.61%. PCR on S3 loans was broadly stable QoQ at ~49.1% (PQ: ~49.1%).
- The company highlighted that its 6 MOB 30+ dpd (excluding gold loans) for the latest cohort declined to 0.35% from 0.67% in the previous quarter, reflecting improved fresh-vintage quality, stronger underwriting, and better collection efficiency. The company expects credit costs to exhibit an improvement bias over the next 1-2 years, supported by stronger collections, improved underwriting calibration, and better-quality origination cohorts. We model credit costs of ~2.2%/1.9% in FY27E/FY28E.

Highlights from the management commentary

- The company plans to continue investing in 300-400 branches annually, with a sustained focus on scaling gold loans and consumer durable financing.
- Consumer durable financing is gaining traction, with management citing encouraging credit performance among customers who have completed their 8-9-month loan tenures. Bureau data reportedly indicates nearly 40% better credit quality than the industry benchmark for these seasoned customers.
- Gold loan branches stood at 550 as of Sep'26. Average monthly gold loan disbursements in 2QFY27 stood at INR3.5b (vs INR2.9b in 1QFY27).

Valuation and view

- PFL delivered a healthy quarter, supported by sustained business momentum and improving asset quality. The growing contribution of new products continues to support yield improvement and NIM expansion, while strong underwriting and collection practices have driven a sequential moderation in credit costs. We believe PFL's diversified product portfolio positions it well to deliver strong AUM growth. This, along with improving yields, further credit cost moderation, and operating leverage, is expected to drive sustained RoA expansion.
- We model ~44% AUM CAGR and ~120% PAT CAGR over FY26-FY28E, and expect PFL to deliver RoA/RoE of 2.4%/~17% in FY28. Reiterate our BUY rating with a TP of INR570 (based on 2.7x Sep'28E BVPS).

CMP: INR139 **TP: INR180 (+30%)** **Buy**

Performance largely in line

- In 2QFY27, Canara HSBC's APE grew 11% YoY to INR6.6b (in line). For 1HFY27, APE grew 14% YoY.
- VNB at INR1.4b (in line) rose 20% YoY, resulting in VNB margin of 21.4% (19.7% in 2QFY26) vs. our est. of 21%. For 1HFY27, VNB grew 24% YoY with VNB margin of 21.3%.
- PAT grew 5% YoY to INR431m. EV at the end of 1HFY27 was INR76.2b, with an operating RoEV of 19.8%.
- Distribution paper is seen as net positive since CANHLIFE's current EoM gap is comfortable vs. proposed 15%, commissions are moderate, and renewal payouts may rise. Improved affordability could further accelerate volumes, with industry-leading growth momentum to continue, as per management.
- While regulations are yet to be finalized, CANHLIFE's current operations seem to be in line with the regulator's directions in the consultation paper. We believe the key monitorable items are the impact on credit life due to regulations, GST drag, sub-debt-led improvement in solvency, and sustainability of the traditional mix. We have largely maintained our estimates considering the in-line performance in 2QFY27. **We reiterate our BUY rating with a TP of INR180 (based on 1.7x FY28E EV).**

Favorable product mix contributes 2.6% to margin expansion

- In 2Q, gross premium grew 12% YoY to INR25.8b, driven by 16% YoY growth in renewal premium and 12% YoY growth in first-year premium.
- APE growth of 11% YoY in 2Q was driven by 40%/66%/25%/11% growth in the Protection/Non-Par/Par segments, while Annuity/ULIP dipped 8%/1% YoY. While demand for protection and guaranteed products was affordable, ULIP was impacted by weak equity markets.
- The 23% YoY growth in traditional APE led to a rise in contribution to 55% (49% in 2QFY26), with a continued increase in contribution from protection segment and strong growth in credit life segment. Favorable product mix contributed 2.6% to margin expansion in 1HFY27.
- Apart from the product mix, favorable yield curve movements resulted in 0.8% contribution to VNB margin expansion, offset by a 2% impact due to expenses, largely related to GST-exemption.
- The channel mix, based on 2Q individual APE, was 59% from Canara Bank, 21% from HSBC Bank, 6% from other banks, and 15% from alternate channels. The recently launched agency channel witnessed an APE of INR257m in 2Q.
- Persistency ratios declined YoY in 2Q across all cohorts, except 25M and 37M persistency, with 13M persistency at 80.8% (82.0% in 2QFY26) and 61M persistency at 52.2% (58.8% in 2QFY26).
- The total expense ratio stood at 20.3% vs. 18.6% in 2QFY26. The commission ratio was largely stable YoY. While the cost ratio is above the proposed EoM threshold of 15%, the gap can be reduced in two years, aided by operating leverage and continued efficiency initiatives.

- AUM at the end of 2QFY27 stood at INR502b. Solvency was 180% in 2QFY27 vs. 198% in 2QFY26 owing to the adverse equity market movements during the quarter, along with rising contribution of protection segment.

Highlights from the management commentary

- RBC and IFRS implementations are being seen as tailwinds, with the expectation of solvency getting more headroom and capital intensity improving.
- Credit life, which witnessed 35% YoY growth in APE, is a key monitorable with the backdrop of distribution paper. However, the bank distributor is also the shareholder, and credit life protects its loan book, which keeps the selling motivation intact despite potential commission changes.
- Solvency at 180% was dented by equity market correction. Sub-debt will be taken if needed but no equity raise.

Valuation and view

- CANHLIFE continued to deliver robust growth in 2QFY27, along with VNB margin expansion, supported by a pickup in traditional segment's contribution, a supportive interest rate environment, and operational leverage.
- The insurer's under-penetrated PSU bank engine, rising contribution from premiumized HSBC flows, and disciplined agency expansion serve as key growth levers. Backed by rising branch activation, product mix upgrades, and operating leverage, we expect the company to deliver 19**% operating RoEV going forward**.
- While the regulations are yet to be finalized, CANHLIFE's current operations seem to be in line with the regulator's directions in the consultation paper. Impact on credit life due to regulations, GST drag, sub-debt to improve solvency and sustainability of the traditional mix are key monitorables.
- We have largely maintained our estimates considering the in-line performance in 2QFY27. **We reiterate our BUY rating with a TP of INR180 (based on 1.7x FY28E EV).**

Healthy order inflows and execution drive robust outlook

VA Tech Wabag (VATW) remains well-positioned for sustained growth, aided by regular order inflows (INR34.3b added in 1Q) and normal project execution, including in the war-affected Middle East. The company's current order book of ~INR200b (~5x FY26 revenue) and a strong bid pipeline provide visibility into ~20% revenue growth over the next 3-4 years. The focus remains on profitable growth and overseas markets. After delivering a CAGR of 7%/17%/28% in revenue/EBITDA/ APAT over FY21-26, we estimate a CAGR of 19%/26%/23% over FY26-28. Strong FCF generation, net cash of INR10b+, and improving return ratios (pre-tax RoCE/RoIC of 23%/ 36% in FY28E) make VATW attractive at ~21x FY28E P/E. We reiterate our BUY rating on the stock with a TP of INR2,529 (based on 28x FY28E P/E).

Regular order inflows across a wide range of water-sector applications

- Over the past six months, VATW has bagged several high-quality orders across a wide range of applications in India and overseas markets.
- The company recently won a repeat order worth up to INR2.5b from Reliance Industries in Jamnagar for an EPT work.
- It entered Kuwait with an INR10b contract for an SWRO project; it also entered the UAE market with an order of up to INR6b in Ajman.
- In India, the company strengthened its long-standing relationships with BWSSB and DJB through new order wins; in Europe, it secured a key project in Austria from Donauinsel Water Works.
- The Chennai desalination project is steadily moving towards completion.
- **VATW's current order book of ~INR200b (~5x FY26 revenue; ~40% of the order book from the Middle East) and a strong bid pipeline provide visibility into 15-20% revenue growth over the next 3-4 years.**
- The Middle East and Africa region remains a key strategic focus market. Overseas projects contribute ~50% of revenue and a higher share of the order book. Given the critical and non-discretionary nature of desalination plants, business continuity is expected to remain intact.

Focus remains on profitable growth and cash flows

- VATW's focus remains on profitable growth and overseas markets. The Middle East and other overseas projects are better placed in terms of working capital cycles and cash flow generation vs. Indian projects.
- Its intensified focus on executing large-scale projects in high-margin segments such as EP, Industrial, and O&M augurs well for margins.

Valuation and view: Reiterate BUY

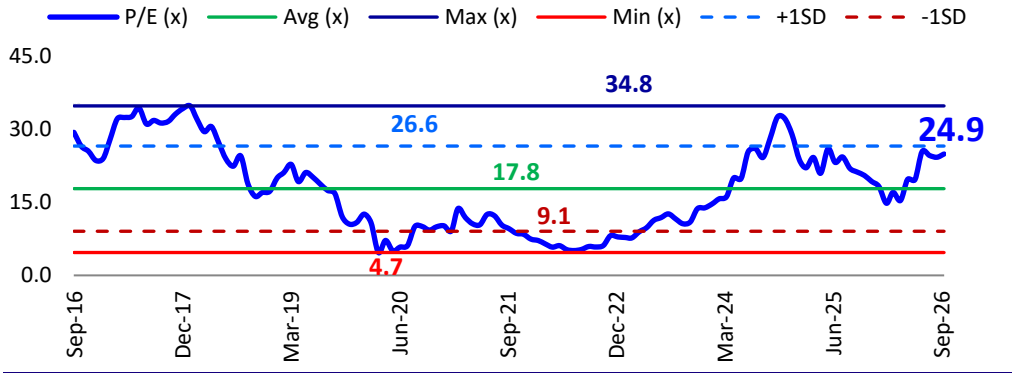

- After delivering a CAGR of 7%/17%/28% in revenue/EBITDA/APAT over FY21-26, we estimate a CAGR of 19%/26%/23% over FY26-28.
- **Strong FCF generation, net cash of INR10b+, and improving return ratios (pre-tax RoCE/RoIC of 23%/ 36% in FY28E) make VATW attractive at ~21x FY28E P/E. We reiterate our BUY rating on the stock with a TP of INR2,529 (based on 28x FY28E P/E).**

Mid-teens growth ambition, backed by volume growth, premiumization, and margin expansion

We attended Campus Activewear (Campus) analyst meet and came away constructive on management's mid-teens organic growth ambition, underpinned by volume, premiumization, and expansion into newer categories such as performance footwear. Notably, management indicated its openness to inorganic opportunities (brand licensing/M&A) to strengthen its premium portfolio, marking an additional growth lever, although any such transaction would need to be ASP and margin accretive. Further, Campus remains confident of sustaining its YoY margin expansion, aided by an improving product mix and calibrated price hikes. which it does not intend to roll back even if RM prices moderate. We expect ~15%/18%/23% revenue/ EBITDA/PAT CAGR over FY26-29E, driven by equal contributions from volume and ASP growth. Our estimates do not factor in any inorganic expansion. After the recent sharp correction, the risk-reward appears compelling. We reiterate our BUY rating on Campus with a TP of INR290, premised on 35x Sep'28 EPS.

Stock Performance (1-year)

Targeting mid-teens organic growth; inorganic opportunities emerge as an additional growth lever

- Management targets mid-teens growth from its existing portfolio, aided by volume-led distribution initiatives, deeper market penetration (especially in the South) and an expanding addressable market (led by a rising contribution from the women's and kids' categories).
- Brand extensions (Elan), category diversification (athleisure apparel), entry into performance footwear and potential inorganic opportunities could provide incremental growth beyond the core portfolio.
- As highlighted during previous distributor interactions, Campus has recalibrated distributor incentives toward volume growth (vs. value earlier), aimed at improving throughput and market penetration. SKU rationalization, manufacturing automation and improved inventory visibility should further support execution and volume growth.
- Management, for the first time, indicated its openness to inorganic opportunities, including brand licensing and M&A, to bridge portfolio gaps in the premium footwear segment. However, any potential transaction would need to be ASP- and margin-accretive, highlighting its focus on profitable growth and premiumization.
- We expect Campus to deliver ~7% volume CAGR over FY26-29, supported by volume-led distribution initiatives and expansion into newer consumer segments. Meanwhile, the company's increasing focus on premiumization through the Elan range, openness to ASP-accretive inorganic opportunities, and recent price hikes, which management does not intend to roll back, reinforce our expectation of ~7% ASP CAGR over FY26-29. Together, we expect these factors to drive ~15% revenue CAGR over FY26-29E. We do not explicitly factor in any inorganic contribution.

Premiumization, pricing actions, and operating leverage to drive sustainable margin expansion

- Management remains confident of delivering sustainable YoY margin expansion over the medium term, supported by an improving product mix, premiumization, operating leverage and backward integration benefits.
- Campus has undertaken selective price hikes in Oct'26 to offset RM inflation. Importantly, management indicated that it does not intend to roll back these hikes even if RM prices moderate, providing potential upside to gross margins. An increasing contribution from higher-ASP categories, including sneakers, performance footwear and the Elan range, should support product mix improvement. We build in ~65bp gross margin expansion over FY26-29E.
- Overall, we expect ~155bp EBITDA margin expansion over FY26-29E, aided by a richer product mix, pricing actions and operating leverage. Campus's increasing focus on premium categories, alongside potential ASP- and margin-accretive inorganic opportunities, could provide further upside to our margin estimates.

Women's, kids', and performance footwear to drive the next leg of growth

- Campus sees significant whitespace in mid-premium performance footwear and plans to enter court (badminton, padel, and pickle), cricket and football categories, targeting a 3-5% volume contribution over the medium term.
- Women's footwear continues to outperform, growing at over 2x the company average, with its contribution reaching 15-16%; management expects this segment to sustain superior growth over the next 3-5 years.
- Kids' footwear, currently contributing 5-6%, remains another key focus area, with potential to double its volume share over the medium term.
- The recently launched Elan range has witnessed encouraging traction, attracting a new customer cohort to Campus. The company is also launching an open footwear range under Elan to cater to South Indian markets.
- Management noted that the West has become a key growth market for the company with Gujarat leading in EBO count and Maharashtra overtaking Bihar to become the company's second-largest market. However, management sees significant whitespace in South India, especially in Kerala and Tamil Nadu.
- Additionally, management sees exports as a big opportunity following the India-UK FTA and intends to leverage its low-cost manufacturing base while pursuing international expansion in the UK, UAE, and Southeast Asia through the Campus brand rather than through white-label manufacturing.

Valuation and view

- Campus is expanding beyond its core category of sports shoes into sneakers, women's and kids' categories. Sharper segmentation, affordability-led positioning and ongoing operational initiatives are supporting stronger execution and improving product mix. Channel feedback on execution remains stronger than that for peers.
- We model an FY26-29E revenue CAGR of 15%, driven by 7% ASP growth and 7% volume growth. Improving product mix and recent launches could support stronger ASP growth, while the company's focus remains on driving volume

growth through linking distributors' incentives to volume growth rather than value growth.

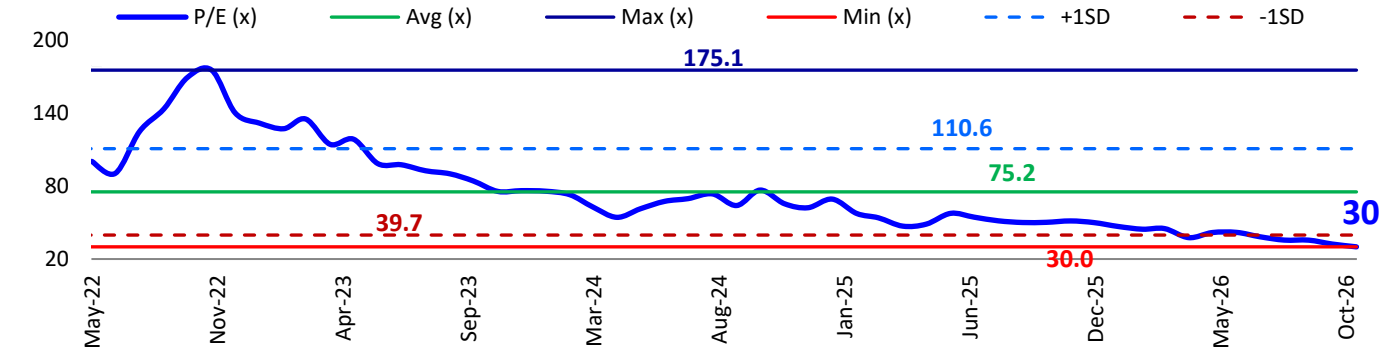

- We build in ~155bp EBITDA margin expansion over FY26-29E, with gross margin improvement contributing ~65bp, led by premiumization and product mix improvements. Recent price hikes should cushion margins against near-term headwinds from raw-material inflation. Accordingly, we model an EBITDA/PAT CAGR of 18%/23% over FY26–29E.
- Further, management indicated that there is no plan for a promoter stake sale over the medium term, seeking to assuage investors' concerns about a potential stake sale.
- We reiterate our **BUY rating with a TP of INR290**, based on 35x Sep'28 EPS.

Higher-than-expected opex leads to EBITDA miss; revenue and PAT in line

- Anand Rathi Wealth (ARWM) reported revenue from operations of ~INR3.4b in 2QFY27 (in line), growing 16% YoY.
- MF revenue rose 17.5% YoY to INR1.4b (in line), while revenue from the distribution of financial products grew 14.5% YoY (in line) to INR2b for the quarter.
- Operating expenses for 2QFY27 grew 42% YoY to INR2.3b, with employee costs growing 50% YoY to INR1.9b (4% higher than est.). Other expenses grew 13% YoY to INR396m (in line).
- EBITDA came in at INR1.2b (5% miss), down 15% YoY but up 8% QoQ, with EBITDA margin at 34% (vs our estimate of 35.8%) in 2QFY27 (46.2% in 2QFY26).
- Other income for the quarter came in at INR126m vs INR97m in 2QFY26 (our est. of INR135m). This resulted in a PBT of INR1.2b (down 13% YoY).
- For 2QFY27, consolidated PAT stood at INR893m, down 11% YoY/45% QoQ, in line with estimate.
- AUM at INR1.08t grew 18% YoY, with private wealth/digital wealth AUM rising 18%/14% YoY to ~INR1.06t/INR25.3b, respectively, in 2Q.
- The Board has also declared an interim dividend of INR4 per share.

Valuation and view

- Management has guided for FY27 Revenue/PAT/AUM of INR14.2b/INR4.6b/INR1.2t.
- We expect ARWM to post an AUM/revenue/PAT CAGR of 26%/21%/17% during FY26-28.
- **We have a Sell rating on the stock with a one-year TP of INR1,630 (premised on 50x FY28E P/E).** We will revisit our estimates after the conference call scheduled for 12th Oct'26.

Teething issues with tech transformation hit disbursements

Advances grow ~10% YoY; reported NIM improves ~8bp QoQ

- Can Fin Homes' PAT grew ~9% YoY to ~INR2.7b (in line) in 2QFY27. NII in 2QFY27 grew 7% YoY to ~INR4.3b (in line). Fee and other income stood at ~INR95m (PQ: INR93m).
- Opex rose ~13% YoY to INR864m (in line). The cost-to-income ratio stood at ~19.6%. (PQ: ~19.5%, PY: ~18.6%). PPoP grew ~6% YoY to INR3.5b (in line).
- Provisions stood at INR74m (vs. MOFSLe of INR90m) resulting in annualized credit costs of ~7bp [PQ: ~12bp and PY: ~3bp].

Advances growth moderates; run-off ratio improves

- CANF's 2QFY27 disbursements declined ~7% YoY and 9% QoQ to INR23.7b. Disbursements were hit by the teething issues encountered during the migration of ~175 branches to the new tech platform.
- Advances grew ~10% YoY and ~1% QoQ to ~INR435b. Annualized run-off in advances declined to ~16.7% (PQ: 17.6% and PY: ~17.1%).

Reported NIM expands ~8bp QoQ; bank borrowings increase to ~65%

- NIM (reported) for 2QFY27 improved ~8bp QoQ to ~3.9%. NIM (calc.) declined ~2bp QoQ.
- Reported yields for 2QFY27 improved ~3bp QoQ to 9.8%, while the CoB increased ~5bp QoQ to 7% leading to reported spreads declining ~2bp QoQ to 2.8%.
- The DSA channel in the sourcing mix remained stable at ~79% and bank borrowings stood at ~65% as of Sep'26 (PQ: 62%).

Asset quality broadly stable with GS3 at 0.9%

- Asset quality was broadly stable with GS3 rising ~3bp QoQ to 0.9% and NS3 rising ~2bp QoQ to ~0.42%. RoA/RoE stood at ~2.4%/~17.1% in 2QFY27.

Roadmap for FY28

- **Geographical concentration** mix of 60:40 in South and Rest of India for incremental disbursements (vs. 66:34 as of now)
- **Product mix:** Housing and Non-housing mix of 80:20 (vs. 84:16 currently)
- **Segment mix**: Salaried and Self-employed mix of 65:35 (vs. 67:33 currently)
- **Sourcing mix**: Reduce DSA reliance to 60% of overall sourcing (vs. 79% currently).

Valuation and view

CANF delivered an in line quarter, with PAT growing ~9% YoY. Disbursements were hit by the migration to the new technology platform across ~175 branches as part of the ongoing tech transformation. Reported NIM improved ~8bp QoQ but spreads moderated slightly amid a higher cost of borrowings. Asset quality remained broadly stable, with benign credit costs. The earnings call is scheduled for 12th Oct'26, where commentary on disbursement recovery, margin trajectory, and execution of the FY28 roadmap will be key to monitor.

Disclosures:
The following Disclosures are being made in compliance with the SEBI Research Analyst Regulations 2014 (herein after referred to as the Regulations).

Motilal Oswal Financial Services Ltd. (MOFSL) is a SEBI Registered Research Analyst having registration no. INH000000412 and BSE enlistment no. 5028. MOFSL, the Research Entity (RE) as defined in the Regulations, is engaged in the business of providing Stock broking services, Depository participant services & distribution of various financial products. MOFSL is a listed public company, the details in respect of which are available on www.motilaloswal.com. MOFSL is registered with the Securities & Exchange Board of India (SEBI) and is a registered Trading Member with National Stock Exchange of India Ltd. (NSE) and Bombay Stock Exchange Limited (BSE), Multi Commodity Exchange of India Limited (MCX) and National Commodity & Derivatives Exchange Limited (NCDEX) for its stock broking activities & is Depository participant with Central Depository Services Limited (CDSL) National Securities Depository Limited (NSDL),NERL, COMRIS and CCRL and is member of Association of Mutual Funds of India (AMFI) for distribution of financial products and Insurance Regulatory & Development Authority of India (IRDA) as Corporate Agent for insurance products and is a member of Association of Portfolio Managers in India (APMI) for distribution of PMS products. Details of associate entities of Motilal Oswal Financial Services Ltd. are available on the website at http://onlinereports.motilaloswal.com/Dormant/documents/Associate%20Details.pdf

Details of pending Enquiry Proceedings of Motilal Oswal Financial Services Limited are available on the website at https://galaxy.motilaloswal.com/ResearchAnalyst/PublishViewLitigation.aspx

MOFSL, it's associates, Research Analyst or their relatives may have any financial interest in the subject company. MOFSL and/or its associates and/or Research Analyst or their relatives may have actual beneficial ownership of 1% or more securities in the subject company at the end of the month immediately preceding the date of publication of the Research Report or date of the public appearance. MOFSL and its associate company(ies), their directors and Research Analyst and their relatives may have any other potential conflict of interests at the time of publication of the research report or at the time of public appearance, however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report..

In the past 12 months, MOFSL or any of its associates may have:
received any compensation/other benefits from the subject company of this report
managed or co-managed public offering of securities from subject company of this research report,
received compensation for investment banking or merchant banking or brokerage services from subject company of this research report,
received compensation for products or services other than investment banking or merchant banking or brokerage services from the subject company of this research report.

MOFSL and it's associates have not received any compensation or other benefits from the subject company or third party in connection with the research report.
Subject Company may have been a client of MOFSL or its associates during twelve months preceding the date of distribution of the research report.
Research Analyst may have served as director/officer/employee in the subject company.
MOFSL and research analyst may engage in market making activity for the subject company.
MOFSL and its associate company(ies), and Research Analyst and their relatives from time to time may have:
a) a long or short position in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein.
(b) be engaged in any other transaction involving such securities and earn brokerage or other compensation or act as a market maker in the financial instruments of the company(ies) discussed herein or act as an advisor or lender/borrower to such company(ies) or may have any other potential conflict of interests with respect to any recommendation and other related information and opinions.; however the same shall have no bearing whatsoever on the specific recommendations made by the analyst(s), as the recommendations made by the analyst(s) are completely independent of the views of the associates of MOFSL even though there might exist an inherent conflict of interest in some of the stocks mentioned in the research report.
Above disclosures include beneficial holdings lying in demat account of MOFSL which are opened for proprietary investments only. While calculating beneficial holdings, It does not consider demat accounts which are opened in name of MOFSL for other purposes (i.e holding client securities, collaterals, error trades etc.). MOFSL also earns DP income from clients which are not considered in above disclosures.
To enhance transparency, MOFSL has incorporated a Disclosure of Interest Statement in this document. This should, however, not be treated as endorsement of the views expressed in the report. MOFSL and / or its affiliates do and seek to do business including investment banking with companies covered in its research reports. As a result, the recipients of this report should be aware that MOFSL may have a potential conflict of interest that may affect the objectivity of this report.

Terms & Conditions:
This report has been prepared by MOFSL and is meant for sole use by the recipient and not for circulation. The report and information contained herein is strictly confidential and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent of MOFSL. The report is based on the facts, figures and information that are considered true, correct, reliable and accurate. The intent of this report is not recommendatory in nature. The information is obtained from publicly available media or other sources believed to be reliable. Such information has not been independently verified and no guaranty, representation of warranty, express or implied, is made as to its accuracy, completeness or correctness. All such information and opinions are subject to change without notice. The report is prepared solely for informational purpose and does not constitute an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments for the clients. Though disseminated to all the customers simultaneously, not all customers may receive this report at the same time. MOFSL will not treat recipients as customers by virtue of their receiving this report.
Analyst Certification
The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issues, and no part of the compensation of the research analyst(s) was, is, or will be directly or indirectly related to the specific recommendations and views expressed by research analyst(s) in this report.

Disclosure of Interest Statement
Analyst ownership of the stock No
A graph of daily closing prices of securities is available at www.nseindia.com, www.bseindia.com. Research Analyst views on Subject Company may vary based on Fundamental research and Technical Research. Proprietary trading desk of MOFSL or its associates maintains arm's length distance with Research Team as all the activities are segregated from MOFSL research activity and therefore it can have an independent view with regards to subject company for which Research Team have expressed their views.

Regional Disclosures (outside India)
This report is not directed or intended for distribution to or use by any person or entity resident in a state, country or any jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL & its group companies to registration or licensing requirements within such jurisdictions.

For Hong Kong:
This report is distributed in Hong Kong by Motilal Oswal capital Markets (Hong Kong) Private Limited, a licensed corporation (CE AYY-301) licensed and regulated by the Hong Kong Securities and Futures Commission (SFC) pursuant to the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) "SFO". As per SEBI (Research Analyst Regulations) 2014 Motilal Oswal Financial Services Limited (SEBI Reg No. INH000000412) has an agreement with Motilal Oswal capital Markets (Hong Kong) Private Limited for distribution of research report in Hong Kong. This report is intended for distribution only to "Professional Investors" as defined in Part I of Schedule 1 to SFO. Any investment or investment activity to which this document relates is only available to professional investor and will be engaged only with professional investors." Nothing here is an offer or solicitation of these securities, products and services in any jurisdiction where their offer or sale is not qualified or exempt from registration. The Indian Analyst(s) who compile this report is/are not located in Hong Kong & are not conducting Research Analysis in Hong Kong.

For U.S.
MOTILAL Oswal Financial Services Limited (MOFSL) is not a registered broker - dealer under the U.S. Securities Exchange Act of 1934, as amended (the"1934 act") and under applicable state laws in the United States. In addition MOFSL is not a registered investment adviser under the U.S. Investment Advisers Act of 1940, as amended (the "Advisers Act" and together with the 1934 Act, the "Acts), and

under applicable state laws in the United States. Accordingly, in the absence of specific exemption under the Acts, any brokerage and investment services provided by MOFSL, including the products and services described herein are not available to or intended for U.S. persons. This report is intended for distribution only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the Exchange Act and interpretations thereof by SEC (henceforth referred to as "major institutional investors"). This document must not be acted on or relied on by persons who are not major institutional investors. Any investment or investment activity to which this document relates is only available to major institutional investors and will be engaged in only with major institutional investors. In reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act") and interpretations thereof by the U.S. Securities and Exchange Commission ("SEC") in order to conduct business with Institutional Investors based in the U.S., MOFSL has entered into a chaperoning agreement with a U.S. registered broker-dealer, Motilal Oswal Securities International Private Limited. ("MOSIPL"). Any business interaction pursuant to this report will have to be executed within the provisions of this chaperoning agreement.

The Research Analysts contributing to the report may not be registered /qualified as research analyst with FINRA. Such research analyst may not be associated persons of the U.S. registered broker-dealer, MOSIPL, and therefore, may not be subject to NASD rule 2711 and NYSE Rule 472 restrictions on communication with a subject company, public appearances and trading securities held by a research analyst account.

For Singapore
In Singapore, this report is being distributed by Motilal Oswal Capital Markets (Singapore) Pte. Ltd. ("MOCMSPL") (UEN 201129401Z), which is a holder of a capital markets services license and an exempt financial adviser in Singapore.This report is distributed solely to persons who (a) qualify as "institutional investors" as defined in section 4A(1)(c) of the Securities and Futures Act of Singapore ("SFA") or (b) are considered "accredited investors" as defined in section 2(1) of the Financial Advisers Regulations of Singapore read with section 4A(1)(a) of the SFA. Accordingly, if a recipient is neither an "institutional investor" nor an "accredited investor", they must immediately discontinue any use of this Report and inform MOCMSPL .
In respect of any matter arising from or in connection with the research you could contact the following representatives of MOCMSPL. In case of grievances for any of the services rendered by MOCMSPL write to grievances@motilaloswal.com.

Disclaimer:
This report is intended for distribution to Retail Investors.

The report and information contained herein is strictly confidential and meant solely for the selected recipient and may not be altered in any way, transmitted to, copied or distributed, in part or in whole, to any other person or to the media or reproduced in any form, without prior written consent. This report and information herein is solely for informational purpose and may not be used or considered as an offer document or solicitation of offer to buy or sell or subscribe for securities or other financial instruments. Nothing in this report constitutes investment, legal, accounting and tax advice or a representation that any investment or strategy is suitable or appropriate to your specific circumstances. The securities discussed and opinions expressed in this report may not be suitable for all investors, who must make their own investment decisions, based on their own investment objectives, financial positions and needs of specific recipient. This may not be taken in substitution for the exercise of independent judgment by any recipient. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of an investment in the securities of companies referred to in this document (including the merits and risks involved), and should consult its own advisors to determine the merits and risks of such an investment. The investment discussed or views expressed may not be suitable for all investors. Certain transactions -including those involving futures, options, another derivative products as well as non-investment grade securities - involve substantial risk and are not suitable for all investors. No representation or warranty, express or implied, is made as to the accuracy, completeness or fairness of the information and opinions contained in this document. The Disclosures of Interest Statement incorporated in this document is provided solely to enhance the transparency and should not be treated as endorsement of the views expressed in the report. This information is subject to change without any prior notice. The Company reserves the right to make modifications and alternations to this statement as may be required from time to time without any prior approval. MOFSL, its associates, their directors and the employees may from time to time, effect or have effected an own account transaction in, or deal as principal or agent in or for the securities mentioned in this document. They may perform or seek to perform investment banking or other services for, or solicit investment banking or other business from, any company referred to in this report. Each of these entities functions as a separate, distinct and independent of each other. The recipient should take this into account before interpreting the document. This report has been prepared on the basis of information that is already available in publicly accessible media or developed through analysis of MOFSL. The views expressed are those of the analyst, and the Company may or may not subscribe to all the views expressed therein. This document is being supplied to you solely for your information and may not be reproduced, redistributed or passed on, directly or indirectly, to any other person or published, copied, in whole or in part, for any purpose. This report is not directed or intended for distribution to, or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction, where such distribution, publication, availability or use would be contrary to law, regulation or which would subject MOFSL to any registration or licensing requirement within such jurisdiction. The securities described herein may or may not be eligible for sale in all jurisdictions or to certain category of investors. Persons in whose possession this document may come are required to inform themselves of and to observe such restriction. Neither the Firm, not its directors, employees, agents or representatives shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost revenue or lost profits that may arise from or in connection with the use of the information. The person accessing this information specifically agrees to exempt MOFSL or any of its affiliates or employees from, any and all responsibility/liability arising from such misuse and agrees not to hold MOFSL or any of its affiliates or employees responsible for any such misuse and further agrees to hold MOFSL or any of its affiliates or employees free and harmless from all losses, costs, damages, expenses that may be` suffered by the person accessing this information due to any errors and delays.
